

## **K 1493 Condition Report**

### **Analysis Undertaken**

Surface and subsurface analysis was carried out using the Bruker Mistral M1 XRF. This analysis formed part of the silver pilot study for the English Heritage programme. To access the core (sub-surface) of the object a small area on the surface was removed from the edge of the hilt-plate. Due to errors detected another area had to be prepared on a flat surface.

**Catalogue number:** 602, 675, 613

Two fragments of silver hilt plate renumbered to K2083 and K2084.  
K1493 rivet renumbered to K2187
