

K1526 Condition Report

Conservation Started: 19/06/2013

Conservation Finished: 19/06/2013

Conservator: Cymbeline Storey

Time Taken: 0.75 hour

Including digital photography, report, conservation and packing.

Larger fragment:

Dimensions: (L) 5mm (W) 4mm (D) 1mm

Weight: 0.02g together

Catalogue number: 691

Digital photography:

Taken with a Keyence VHX-1000 3D digital microscope with LED and/or fibre optic lights (20-200x magnification). Taken before and after.

Annotation on any of the storage bags or boxes: None

Description: Visual and microscopic examination using Meiji stereo microscope 7-75x magnification

Two small fragments of copper alloy. The larger fragment is gilded; the smaller is ungilded.

Associated Objects: TBC

Pre-Conservation Condition: Visual and microscopic examination using Meiji stereo microscope 7-75x magnification

The larger fragment is completely corroded and has traces of gilding on one side. The smaller fragment is completely corroded and ungilded. Both are stable.

Treatment: None

Post-Conservation Condition/Findings:

No conservation treatment was undertaken on the objects as it was deemed unnecessary. The condition of the objects is the same as pre-conservation. Only 'before' photographs were taken.

Key Features:

- Two small fragments of copper alloy, corroded
- Larger fragment has traces of gilding on one side

Samples:

None
