

Archivist's Note

XSW11

The records for an additional phase of work were found after the archive had been sent for microfilming and are included as hard copies only. These related to the watching brief on the Marmadon Sewer in 2011. The records consisted of four context sheets (renumbered as 63-66), one trench sheet, three two-page Crossrail daily record sheets, plus one non-context plan ('Marmadon Sewer'), one multi-context plan (63), and one section (S.7) including a matrix, all on film. The context sheets, plans and sections were added to the existing registers.
