

Building Recording

Despite the statement in the report for this phase of work, there were no sketch drawings made and only 25 digital photos were taken.

Photos

There are 2 image registers included with the archive, one (01) is the standard register showing all information and the other (02) is a concordance with the site digital image registers.

Finds/Ecofacts:

Metal finds have not been x-rayed.

Digital photos exist for reg finds <1>, <6> and <8> to <20>. Photos for <2> to <5> and <7> printed on reg cards only. No digital versions of these were found and as some objects were on display they were not available to be re-photographed.

Permission given on 05/06/15 by Jay Carver from Crossrail to discard large wooden keel [127] – see below – as mentioned in the conservation report:

The timber recorded and drawn by Damian Goodburn from [63] was not included in his report and the object has not been located so it is presumed discarded.
