

Editorial.

In connection with the very valuable List of Potters' Marks in Part I of this Volume, the Society is greatly indebted to Professor Robert Newstead, F.R.S., for his drawing of the plate, "Types of Sigillata," and for tracings of all the marks. The Professor was also good enough to see Mr. Hayter's paper through the press, thereby earning the thanks—hereby proffered—of the Author and of the Editorial Secretary alike.
