

## **SURVEY AND LEVELS DATA NOTE**

**XSZ11**

### **Watching Brief 17/12/11-14/01/12 (Verizon Utility Trench) Watching Brief 12/05/12-30/ 06/12 (Gas Main Trial Trenches)**

The locations of all features and deposits were recorded using local baselines surveyed by the site contractor's surveyors and subsequently supplied to MOLA for a CAD plot to be produced.

Levels were supplied by the site contractor's surveyors in metres Above Tunnel Datum (ATD). To convert Tunnel Datum to Ordnance Datum subtract 100m, i.e. 1m OD = 101m ATD.

### **Watching Brief 25/06/13-10/09/13 (Utilities works at Blomfield Street/London Wall)**

The UKPN works at the Blomfield Street/London Wall junction were surveyed by MOLA Geomatics team and a CAD plot was produced. The location of the Thames Water Trial Trench on London Wall was offset from surrounding building edges, kerbs and street furniture, recorded onto a permatrace plan and subsequently plotted onto the Ordnance Survey grid for a CAD plot to be produced.

Levels were supplied by the site contractor's surveyors in metres Above Tunnel Datum (ATD). To convert Tunnel Datum to Ordnance Datum subtract 100m, i.e. 1m OD = 101m ATD.
