

Missing Context sheets:

There are no context sheets for the following contexts:

[30] Alluvium – no sheet was produced

[125] and [126] Timbers – no sheets were produced but Damian Goodburn looked at the timbers and his comments were included in the “Fieldwork Report Archaeological Watching Briefs Pudding Mill Lane Portal” C261-MLA-T1-RGN-CRG03-50033 – a location plan has also been included with the archive

[127] Timber – no sheet was produced but this was uncovered by the site contractors and Dave Sankey went to view the timber – see email included within archive and location plan mentioned above.

Site notes include an email and plan for a later watching brief call-out in 2016.

The location of the ‘trial hole’ on the CAD plan is approximate

X-ray 10336 for <1> Unidentified iron from [60] will be deposited with XSM10

The environmental flots from samples <6>. <7> and <8> were sent to Enid Allison to investigate them for insect remains. This process involves paraffin flotation after which the flots are usually discarded.
