

HISTORIC BUILDING RECORDING WITH AERIAL-CAM IN GLOUCESTER CATHEDRAL

July 2, 2012 Aerial-Cam Commercial Archaeology, Day of Archaeology, Day of Archaeology 2012, Digital Archaeology, Historical Archaeology, Illustration, Medieval, Periods, Survey Aerial-Cam, Downland Partnership, Gloucester Cathedral, Lady Chapel, photogrammetry, surveying

We've been using a specially adapted tri-frame mast system to get the camera into position at various heights inside the Lady Chapel (1470). We are working with the Downland Partnership, who needed a full photographic record of the masonry and window structure for the production of accurate drawings via photogrammetry and laser scanning.
