@AdamCorsini oh my gosh - that's better than we ever would've dreamed! #ArchiveLottery has made our Friday! #ancientpoop

Time for the metals! These objects are stored separately. A dehumidified store, sealed boxes and silica gel help us maintain these objects to a high degree of preservation as they'd slowly degrade in normal room conditions. Tweet me @AdamCorsini using #ArchiveLottery & a number between 1 and 500 to discover, completely at random, what that shelf holds...
