

SURVEY AND LEVELS DATA NOTE

XTE12

Watching Brief on test pits, boreholes and Grout Shaft at Charterhouse Square

The location of the Grout Shaft was surveyed by MOLA Geomatics team and this information was then transferred onto the Ordnance Survey grid and a CAD plot produced. For the rest of the work on this phase the location information was supplied by the Principal Site Contractor.

Levels were calculated from Temporary Bench Marks supplied by the Site Surveyors.

Watching Brief at Moorgate Spur Grout Shafts and Farringdon Road

The locations of the Grout Shafts and the Farringdon Road intervention were surveyed by the Site Surveyors and the information passed to MOLA Geomatics team to be transferred onto the Ordnance Survey grid and a CAD plot produced.

Levels were calculated from Temporary Bench Marks supplied by the Principal Site Contractors.

Watching Brief and Excavation of Areas A, B and C

The locations of the areas of excavation, trench edges and sections were surveyed by MOLA Geomatics team and the Site Surveyors. The information was then transferred onto the Ordnance Survey grid and a CAD plot produced.

Levels were calculated from information supplied by both MOLA Geomatics and the Site Surveyors.

Community Dig Charterhouse Square

The location of the trenches and baselines were surveyed by MOLA Geomatics team and this information was then transferred onto the Ordnance Survey grid and a CAD plot produced.

Levels were calculated from Temporary Bench Marks supplied by the Site Surveyors.

Watching Brief on Boreholes in Charterhouse Square

The locations of the boreholes were supplied by the Principal Site Contractor.

Levels were calculated from Temporary Bench Marks supplied by the Site Surveyors.
