**Sample Nos:** 5

**Comments and Interpretation** A very shallow, single fill of posthole base [117]. The fill is quite mixed in colour and consistency, in parts more sandy and stoney than others. But it is so shallow it is difficult to derive much information from it, other than it is likely to be a redeposited natural infill.

**Comments and Interpretation**

Fill (or fills) of probable biological/natural feature. Slight variation in texture, colour is almost identical throughout of relationships between fills make little sense archaeologically. 2 pieces of possible worked chert recovered out by p/h (166) which also cuts ring gully.

Provisional date:
