

Data Table 1 Details of disarticulated human bone from Roman contexts at XSM10

Period	Land use	Context	Feature type	Elements	Sex	Age	Pathology	Comments
-	-	+	-	right humerus	undetermined	adult	-	-
	-	+	-	left femur	undetermined	adult	-	-
	-	+	-	right tibia	undetermined	adult	-	-
	-	+	-	left tibia	undetermined	adult	-	-
	-	+	-	right fibula	undetermined	adult	-	-
	-	+	-	right femur	undetermined	adult	-	-
1	OA1	[6869]	bioturbated brickearth	frontals, left temporal, sphenoid, occipital, maxillae, left zygomatic	probable male	adult	-	-
3	OA3	[1403]	Walbrook floodplain deposit	left parietal	undetermined	adult	-	-
		[6870]	fill of water-related feature [6871]	2x left humeri	undetermined	adult	-	-
		[6872]	fill of water-related feature [6873]	right femur	undetermined	adult	-	-
	S16	[8410]	silty clay fill within posthole [8409]	right femur, left patella	undetermined	adult	-	-
4 phase 1	OA4	[6766]	Walbrook floodplain deposit	right humerus	undetermined	adult	-	-
			Walbrook floodplain deposit	left humerus	undetermined	adult	-	-
			Walbrook floodplain deposit	right ilium, ishium & pubis	male	adult	-	-
			Walbrook floodplain deposit	left femur & fibula	undetermined	adult	-	-
		[6822]	waterlain sandy clay deposit	occipital	undetermined	adult	-	-
			waterlain sandy clay deposit	right humerus	undetermined	adult	-	-
			waterlain sandy clay deposit	left ischium	undetermined	adult	-	-
		[6856]	organic & sandy clay deposit	right parietal, maxilla, zygomatic & mandible	undetermined	adult	-	-
			organic & sandy clay deposit	left humerus	undetermined	adult	-	-
			organic & sandy clay deposit	left tibia	undetermined	adult	periostitis	from orangey-blue clay removed in eastern slot
		[6875]	fill of gravel quarry pit [6876]	right femur	undetermined	adult	-	-
		[716]	external dump	left humerus	undetermined	adult		
R1 ph1	[1337]	Roman road bedding layer	right ulna	undetermined	adult	-	-	-
S10	[8436]	fill of ditch [8437]	right mandible	intermediate	adult	-	-	-
S4	[6886]	fill of gully [6887] containing timber [6881]	left fibula	-	adult	-	-	-
S5	[6891]	fill of ditch [6890]	unsided rib	undetermined	adult	-	-	-
		fill of ditch [6890]	left ilium & fibula	undetermined	adult	-	-	-
S7	[6879]	fill of ditch [6878]	left scapula	undetermined	adult	-	-	-
4 phase 2	OA5	[1440]	Walbrook floodplain deposit	right femur	undetermined	adult	-	dark staining
			Walbrook floodplain deposit	right tibia	undetermined	adult	-	dark staining
		[6777]	compact gravelly silty clay deposit	left zygomatic	undetermined	adult	-	-
			compact gravelly silty clay	2x left ribs	undetermined	adult	-	-

	deposit					
	compact gravelly silty clay deposit	left humerus	undetermined	adult	-	-
	compact gravelly silty clay deposit	right femur, 3x left femora, right tibia & fibula, left tibia, 5x left metatarsals, 3x proximal phalanges, middle phalanx, distal phalanx	undetermined	adult	-	-
	compact gravelly silty clay deposit	right femur	undetermined	13–16 years	-	-
[6793]	finds-rich deposit within hollow	right radius	undetermined	adult	-	-
[6795]	fill of charnel pit [6794]	2x mandibles	probable male	adult	2x enamel hypoplasia	-
	fill of charnel pit [6794]	4th & 5th lumbar, 1st sacral vertebrae	undetermined	adult	-	-
	fill of charnel pit [6794]	left scapula	undetermined	adult	-	-
	fill of charnel pit [6794]	2x right humeri	undetermined	adult	-	-
	fill of charnel pit [6794]	2x right ulnae	undetermined	adult	-	-
	fill of charnel pit [6794]	2x right femora, 5x left femora, 6x right tibiae, 3x left tibiae, 3x right fibulae, left fibula	undetermined	adult	periostitis: right tibia, 2x left tibiae	-
	fill of charnel pit [6794]	right ischium, left ilium & ischium, right femur	undetermined	subadult	-	-
	fill of charnel pit [6794]	right & left ilium, right & left ischium	male	adult	-	-
[6819]	external dump rich in finds	left temporal	probable male	adult	-	-
[6862]	external dump rich in finds	left humerus	undetermined	adult	-	-
	external dump rich in finds	right & left rib	undetermined	adult	-	-
[6863]	external dump rich in finds	right femur	undetermined	adult	-	-
S12 ph1	[6781]	secondary fill of E–W ditch [6782]	mandible	male	≥46 years	-
		secondary fill of E–W ditch [6782]	right rib, 3x left ribs	undetermined	adult	-
		secondary fill of E–W ditch [6782]	right humerus	undetermined	adult	-
		secondary fill of E–W ditch [6782]	right femur, 2x left femora, right fibula	undetermined	adult	-
	[6800]	secondary fill of E–W ditch [6782]	frontals, parietals, temporals, sphenoid, occipital, maxillae, left zygomatic	probable male	18–25 years	bathrocephaly dark staining
	[6801]	secondary fill of E–W ditch [6782]	frontals, parietals, temporals, sphenoid, occipital, left zygomatic	male	adult	bathrocephaly dark staining & polished appearance

[6802]	secondary fill of E-W ditch [6782]	frontals, parietals, temporals, sphenoid, occipital, maxillae, zygomatics, nasal bones	male	26–35 years	-	dark staining & polished appearance
[6803]	secondary fill of E-W ditch [6782]	frontals, parietals, temporals, sphenoid, occipital	probable male	adult	porotic hyperostosis; possible healed blunt force trauma on right frontal	orange staining on ectocranial surface
[6804]	secondary fill of E-W ditch [6782]	frontals, parietals, temporals, occipital	probable male	adult	-	dark staining & polished appearance
[6805]	secondary fill of E-W ditch [6782]	frontals, parietals, temporals, sphenoid, occipital	probable male	adult	bilateral grade 2 cribra orbitalia	dark staining
[6806]	secondary fill of E-W ditch [6782]	frontals, parietals, temporals, sphenoid, occipital, zygomatic	male	adult	porotic hyperostosis; healed blunt force trauma on both parietal bones	-
[6807]	secondary fill of E-W ditch [6782]	frontals, parietals, temporals, sphenoid, occipital	male	adult	porotic hyperostosis	dark staining & polished appearance
[6808]	secondary fill of E-W ditch [6782]	frontals, parietals, temporals, sphenoid, occipital, maxillae, right zygomatic, nasal bones	male	26–35 years	porotic hyperostosis	orange staining on endocranial surface
[6809]	secondary fill of E-W ditch [6782]	frontals, parietals, temporals, sphenoid, occipital	male	adult	-	scratches on endocranial surface
[6810]	secondary fill of E-W ditch [6782]	frontals, parietals, temporals, sphenoid, occipital, maxillae, left zygomatic	male	18–25 years	left orbit grade 2 cribra orbitalia	dark staining with surface damage to the endocranial surface; possible tidemark along both parietals
[6811]	secondary fill of E-W ditch [6782]	frontals, parietals, temporals, sphenoid, occipital, maxillae, zygomatics, nasal bones	probable female	18–25 years	-	dark staining & polished appearance; yellow/orange staining on endocranial surface
[6812]	secondary fill of E-W ditch [6782]	frontals, parietals, temporals, sphenoid, occipital, maxillae, zygomatics	male	26–35 years	-	dark staining & polished appearance; yellow/orange staining on endocranial surface
[6813]	secondary fill of E-W ditch [6782]	frontals, parietals, occipital	male	adult	-	differential colouration, paler on back of cranium; concretions
[6814]	secondary fill of E-W ditch [6782]	frontals, parietals, temporals, sphenoid, occipital, maxillae, zygomatics	female	26–35 years	-	dark staining & polished appearance; yellow/orange staining on endocranial surface
[6815]	secondary fill of E-W ditch [6782]	frontals, parietals, temporals, occipital, maxillae, zygomatics, nasal bones	male	26–35 years	-	dark staining with scratches & gouges; orange/yellow staining on endocranial surface
[6816]	secondary fill of E-W ditch [6782]	frontals, parietals, temporals, sphenoid, occipital, maxillae	male	26–35 years	porotic hyperostosis; bilateral grade 1 cribra orbitalia; possible blunt force trauma on right parietal; dental caries; periapical lesion	dark staining with multi-directional scratches & gouges on endocranial surface of the calvarium; orange concretions on frontal, left parietal & occipital
[6817]	secondary fill of E-W ditch [6782]	frontals, parietals, temporals, sphenoid, occipital, maxillae, left zygomatic	male	26–35 years	-	yellow/orange staining on endocranial surface
[6818]	secondary fill of E-W ditch	frontals, parietals, temporals,	male	adult	-	orange/yellow staining on endocranial surface; iron

	[6782]	occipital				fragment adhering to outer table
	[6820]	secondary fill of E-W ditch [6782]	right tibia	undetermined	adult	-
	[6821]	secondary fill of E-W ditch [6782]	right femur	undetermined	adult	-
	[6827]	secondary fill of E-W ditch [6782]	left humerus	undetermined	adult	-
	[6828]	secondary fill of E-W ditch [6782]	left humerus	undetermined	adult	-
	[6829]	secondary fill of E-W ditch [6782]	right ulna	undetermined	adult	-
	[6830]	secondary fill of E-W ditch [6782]	right ilium	undetermined	adult	-
	[8455]	silty clay fill within ditch [8447]	right ilium & ischium	probable female	adult	-
	[8456]	silty clay fill within ditch [8447]	frontals, parietals, occipital	male	adult	-
	[8457]	silty clay fill within ditch [8447]	frontals, parietals, left temporal, sphenoid, occipital, left zygomatic	male	adult	-
S13 ph1	[2076]	fill of northern roadside ditch	frontals, parietals, temporals, occipital	female	adult	porotic hyperostosis very pale yellowish/grey colouring with orange staining & concretions; uni-directional micro-striations on the right parietal (anterior to posterior)
S32	[6780]	linear cut	right parietal, occipital	undetermined	adult	-
4 phase 3	S14	[1397]	external dump	right tibia	undetermined	adult
		[1437]	gravel consolidation	skull 1: cranium minus nasal bones	male	26–35 years impacted 3rd molars C14 dating tooth 47: cal date (2 sigma) AD 80–380; polishing
			gravel consolidation	skull 2: frontals, parietals, occipital, temporals	probable male	adult porotic hyperostosis white stain
			gravel consolidation	skull 3: frontals, parietals, occipital, temporals, nasal bones	probable male	adult polishing; scratch marks; tidemark
			gravel consolidation	skull 4: frontals, parietals, occipital, temporals	probable male	adult bathrocephalic polishing; scratch marks; tidemark
			gravel consolidation	skull 5: maxillae, parietals, occipital, temporals, left zygomatic	probable male	adult orange staining; scratch marks; tidemark
			gravel consolidation	skull 6: frontals, parietals, occipital, left temporal	probable male	adult white, orange & dark brown stains; striations
			gravel consolidation	skull 7: frontals, parietals, occipital, right temporal	probable male	adult white, orange & dark brown stains; striations
			gravel consolidation	skull 8: parietals, occipital	probable female	adult white staining; striations
			gravel consolidation	skull 9: frontals, parietals, temporals, occipital	probable male	adult cribra orbitalia orange stains
			gravel consolidation	skull 10: cranium minus right maxilla & nasal bones	probable male	adult enamel hypoplasia orange concretions
			gravel consolidation	skull 11: frontals, parietals, occipital, temporals	probable male	adult severe post-mortem damage
			gravel consolidation	skull 12: frontals, parietals, occipital, left temporal	probable female	adult -
			gravel consolidation	skull 13: frontals, parietals,	intermediate	adult severe post-mortem damage

	occipital				
gravel consolidation	skull 14: cranium	probable male	adult	caries, enamel hypoplasia	diffuse post-mortem damage
gravel consolidation	skull 15: cranium	probable male	adult	porotic hyperostosis; cribra orbitalia; enamel hypoplasia; periapical lesion	
gravel consolidation	skull 16: frontals, parietals, occipital, temporals	male	adult	porotic hyperostosis	diffuse post-mortem damage
gravel consolidation	skull 17: frontals, parietals, occipital, temporals, nasal bones	probable male	adult	-	orange stains
gravel consolidation	skull 18: mandible	undetermined	adult	caries	orange stains
gravel consolidation	skull 19: parietal, occipital, right temporal	probable male	adult	-	-
gravel consolidation	skull 20: frontals & parietals	probable male	adult	-	-
gravel consolidation	skull 21: frontals	probable male	adult	-	-
gravel consolidation	2x right temporals	undetermined	adult	-	-
gravel consolidation	left temporal	undetermined	adult	-	-
gravel consolidation	3x occipitals	undetermined	adult	-	-
gravel consolidation	2x left ribs	undetermined	adult	-	-
gravel consolidation	lumbar vertebra	undetermined	adult	Schmorl's nodes	-
gravel consolidation	right clavicle	undetermined	adult	-	orange stains
[1438]	sandy gravel fill	cranium minus right squamous temporal	male	adult	tooth 27 fracture dark staining; slight blue stains; fragment [1314] may match this cranium
[1391]	gravel consolidation	skull 1: mandible	male	26–35 years	- C14 dating tooth 47: cal date (2 sigma) BC 25–AD 130
	gravel consolidation	skull 2: mandible	male	26–35 years	- may match [1391](7)
	gravel consolidation	skull 3: mandible	male	26–35 years	- matches [1391](5); C14 dating tooth 38: cal date (2 sigma) AD 130–265
	gravel consolidation	skull 4: mandible	male	18–25 years	- may match [1391](6); C14 dating tooth 48: cal date (2 sigma) AD 135–200
	gravel consolidation	skull 5: frontals	male	adult	- surface damage, tidemark
	gravel consolidation	skull 6: frontals, parietals, temporals, occipital	intermediate	26–35 years	porotic hyperostosis; caries; enamel hypoplasia surface polishing
	gravel consolidation	skull 7: frontals, parietals	male	adult	cribra orbitalia orange concretions
	gravel consolidation	skull 8: frontals, parietals, temporals, occipital	probable female	adult	porotic hyperostosis surface polishing & striations; orange concretions
	gravel consolidation	skull 9: frontals, parietals, occipital	probable male	adult	cribra orbitalia orange staining; tidemark
	gravel consolidation	skull 10: frontals, parietals, left temporal, occipital	probable female	adult	- orange staining; tidemark
	gravel consolidation	skull 11: frontals, right parietal, right temporal, occipital	probable male	adult	porotic hyperostosis orange staining; tidemark
	gravel consolidation	skull 12: frontals, parietals, occipital, left maxilla	intermediate	18–25 years	porotic hyperostosis; caries surface polishing

gravel consolidation	skull 13: right frontal, right maxillary, right zygomatic	probable female	26–35 years	-	tidemark
gravel consolidation	skull 14: frontals and occipital	intermediate	adult	cibra orbitalia	surface polishing and orange concretions
gravel consolidation	skull 15: frontals	male	adult	porotic hyperostosis; button osteoma	polished endocranum
gravel consolidation	skull 16: frontals	male	adult	-	surface polishing and orange concretions
gravel consolidation	skull 17: frontals, right parietal, nasal bones	intermediate	adult	blunt force trauma	surface polishing; orange concretions
gravel consolidation	skull 18: occipital	undetermined	adult	-	light brown colour
gravel consolidation	skull 19: occipital	undetermined	adult	porotic hyperostosis	light brown colour
gravel consolidation	5x right frontal	undetermined	adult	-	-
gravel consolidation	4x left frontal	undetermined	adult	-	-
gravel consolidation	3x right parietal	undetermined	adult	-	-
gravel consolidation	3x left temporal	undetermined	adult	-	-
gravel consolidation	2 x occipitals	undetermined	adult	-	-
gravel consolidation	right zygomatic	undetermined	adult	-	-
gravel consolidation	5x right ribs	undetermined	adult	-	-
gravel consolidation	8x left ribs	undetermined	adult	-	-
gravel consolidation	6x unsided ribs	undetermined	adult	-	-
gravel consolidation	2x thoracic vertebrae	undetermined	adult	osteophytes; Schmorl's nodes	-
gravel consolidation	2x lumbar vertebrae	undetermined	adult	Schmorl's nodes	-
gravel consolidation	3x sacral vertebrae	undetermined	adult	-	-
gravel consolidation	right scapula	undetermined	adult	-	-
gravel consolidation	left scapula	undetermined	adult	-	-
gravel consolidation	right clavicle	undetermined	adult	-	-
gravel consolidation	2x right humerus	undetermined	adult	-	-
gravel consolidation	2x left humerus	undetermined	adult	-	-
gravel consolidation	right radius	-	Subadult		-
gravel consolidation	right radius	undetermined	adult	-	-
gravel consolidation	left radius	undetermined	adult	-	dark-stained & polished
gravel consolidation	left ulna	undetermined	adult	-	-
gravel consolidation	2x right ilium	male	36–45 years	-	-
gravel consolidation	right ilium	male	adult	-	-
gravel consolidation	right ilium	probable female	adult	-	-
gravel consolidation	left ilium	male	36–45 years	-	-
gravel consolidation	right ischium	male	adult	-	-
gravel consolidation	right ischium	male	36–45 years	-	-
gravel consolidation	right ischium	probable female	adult	-	-
gravel consolidation	left ischium	male	36–45 years	-	-
gravel consolidation	right pubis	male	36–45 years	-	-
gravel consolidation	right pubis	probable female	adult	-	-

	gravel consolidation	2x right femur	undetermined	adult	-	1x dark staining
	gravel consolidation	5x left femur	undetermined	adult	-	-
	gravel consolidation	2x right tibia	undetermined	adult	-	-
	gravel consolidation	left tibia	undetermined	adult	-	-
	gravel consolidation	right fibula	undetermined	adult	-	-
	gravel consolidation	2x left fibula	undetermined	adult	-	-
	gravel consolidation	2x left 4th metatarsal	undetermined	adult	-	-
	gravel consolidation	left 5th metatarsal	undetermined	adult	-	-
OA6	[715]	silty clay deposit	left tibia	undetermined	adult	
	[6771]	ground raising deposit	left parietal & zygomatic	-	adult	-
		levelling deposit	left ulna	undetermined	adult	-
	[6772]	levelling deposit	3x right parietals	undetermined	adult	-
		levelling deposit	right rib	undetermined	adult	-
		levelling deposit	left scapula	undetermined	adult	-
		levelling deposit	right clavicle	undetermined	adult	-
		levelling deposit	left clavicle	undetermined	adult	-
		levelling deposit	right humerus	undetermined	adult	-
		levelling deposit	2x left humeri	undetermined	adult	-
		levelling deposit	3x left femora, right tibia & fibula, left fibula	undetermined	adult	-
S12 ph1	[6783]	top fill sealing ditch [6782]	mandible	probable male	adult	-
S18	[1393]	fill of ditch [1394]	right clavicle	undetermined	adult	-
5 phase 1	OA7	external dump	mandible	undetermined	adult	-
	[6726]	waterlain deposit	left parietal	undetermined	adult	-
		waterlain deposit	right & left rib	undetermined	adult	-
		waterlain deposit	left fibula	undetermined	adult	-
	[6888]	sandy clay deposit	right ilium	male	adult	-
		sandy clay deposit	right ilium	female	adult	-
	[8359]	sandy clay deposit	right parietal	undetermined	adult	-
	[8381]	waterlain deposit	mandible	probable male	adult	enamel hypoplasia
R1 ph3	[1322]	Roman road deposit	right parietal	undetermined	adult	-
S12 ph3	[6747]	fill of southern roadside ditch [6746]	right parietal	undetermined	adult	-
		fill of southern roadside ditch [6746]	left humerus	undetermined	adult	-
		fill of southern roadside ditch [6746]	right radius	undetermined	adult	-
		fill of southern roadside ditch [6746]	left ilium	male	adult	-
	[8460]	fill of southern roadside ditch [8395]	frontals, parietals, temporals, sphenoid, right zygomatic	male	adult	bilateral grade 1 cribra orbitalia
S12 ph4	[6752]	primary fill of roadside ditch [6740]	frontals, parietals, left temporal, occipital	probable male	adult	porotic hyperostosis
						orange/yellow staining & concretions; found on bottom of ditch cut [8395], positioned superior side up & facing north
						dark staining & polished appearance; yellow/orange staining on endocranial surface; found in primary fill of

							Roman roadside ditch [6740]	
5 phase 2	OA8	[1314]	waterlain silty clay sealing Roman road	right temporal	undetermined	adult	-	dark staining; may match cranium [1438]
		[1352]	clay-sand dump deposit	left ulna	undetermined	adult	-	-
		[6602]	Roman/early medieval layer	left humerus	undetermined	adult	-	-
		[6716]	waterlain deposit	right frontal, occipital	female	adult	ante-mortem tooth loss; enamel hypoplasia	-
			waterlain deposit	right parietal, occipital	undetermined	adult	-	dark staining; polishing
			waterlain deposit	left humerus	undetermined	adult	-	-
		[8321]	compact gravel layer, possible simple cobbling surface	right frontal, sphenoid, temporals	probable male	adult	-	orange/yellow staining; concretions
		[8325]	coarse sand-gravel layer, possibly a surface	right tibia	undetermined	adult	-	-
	S12 ph6	[6611]	upper fill of E-W ditch [6612]	right rib	undetermined	adult	-	-
	S30	[8311]	silty clay fill of ditch [8327]	right parietal	undetermined	adult	-	-

Data Table 2 Samples from the site (XSM10) assessed for diatoms

Section	Monolith	Elevation of sample (m OD)	Diatom sample no.	Context
308	344	9.45	D128	[6756]
308	344	9.29	D127	[6756]

Key:

Abundance of waterlogged plant remains was estimated semi-quantitatively on a four-point scale: + <10 items (scarce);

++ 10–50 items (moderate); +++ 50–100 items (frequent); ++++ >100 items (abundant)

Key:

Ecological codes for beetles (Coleoptera) and bugs (Hemiptera) are as follows: d – damp ground/waterside; g – grain pests; l – wood-associated; oa – outdoor taxa; ob – probable outdoor taxa; p – strongly plant-associated; rd – dry decomposers; rf – foul decomposers; rt – eurytopic decomposers; sf – facultative synanthropes; ss – strong synanthropes; st – typical synanthropes; u – uncoded; w – aquatics

Minimum numbers of individuals have been calculated for adult beetles and bugs

Occurrence of insects other than beetles and bugs was recorded semi-quantitatively on a four-point scale: + 1–3 individuals;

++ 4–10 individuals; +++ 11–50 individuals; +++++ >50 individuals

Invertebrates other than insects are recorded as: P – present; C – common; A – abundant
