Records of F W B and Mary Charles architects

**Finding Number:
705:1246
BA12857**

Private archives

Practice papers including reports, surveys, plans, photographs and slides relating to projects worked on and published works of F W B Charles.

Date:c1959-1996

FW.B. "Freddie" Charles (1912-2002) was an architect and nationally recognised expert on the conservation and repair of timber-framed buildings. Freddie and his wife Mary (1924-2005) set up in practice in 1962 and were amongst the first to face the challenges associated with timber-frame conservation. They were involved with the restoration of many important timber-framed buildings during their career including over 250 buildings in Worcestershire, many of them of national importance. The practice also worked in a number of other counties including Gloucestershire, Herefordshire, Nottinghamshire, Shropshire, Staffordshire and Warwickshire (including Coventry) and Birmingham. Freddie died in 2002 and prior to his death the practice archive was deposited with the then Worcestershire Record Office and a number of other archive services geographically relevant to the locations where the practice had worked.
