Private archives

Project records for the firm of F.W.B. Charles, Architects including restoration of the Commandery, Worcester and an index of work done in Worcestershire. This collection also includes published works of F W B Charles and research notes relating to his various academic pursuits.

**Date:** mid 20th-early  
21<sup>st</sup> cent

Created by the donor's father and bequeathed on his death.

FW.B. "Freddie" Charles (1912-2002) was an architect and nationally recognised expert on the conservation and repair of timber-framed buildings. Freddie and his wife Mary (1924-2005) set up in practice in 1962 and were amongst the first to face the challenges associated with timber-frame conservation. They were involved with the restoration of many important timber-framed buildings during their career including over 250 buildings in Worcestershire, many of them of national importance. The practice also worked in a number of other counties including Gloucestershire, Herefordshire, Nottinghamshire, Shropshire, Staffordshire and Warwickshire (including Coventry) and Birmingham. Freddie died in 2002 and prior to his death the practice archive was deposited with the then Worcestershire Record Office and a number of other archive services geographically relevant to the locations where the practice had worked.
