## Written Scheme of Investigation for an Archaeological Watching Brief

### 1 INTRODUCTION

#### 1.1 Project background

- 1.1.1 Wessex Archaeology has been commissioned by Sam Lawn Road Ltd to produce a Written Scheme of Investigation (WSI) for proposed archaeological work on a parcel of land at 11 Lawn Road, Southampton, Hampshire centred on National Grid Reference (NGR) 442761 113637 (hereafter 'the Site', **Figure 1**).
- 1.1.2 An application for permission to demolish the existing buildings at 11 Lawn Road and redevelop the Site (16/00740/FUL) was allowed on appeal on 23rd February 2017 (16/00049/APFUL). The Appeal Decision for planning permission has been granted by the Department of the Secretary of State, subject to a number of Annexes (ref: APP/D1780/W/16/3159983). The proposed development of the Site will consist of: demolition of the existing bungalow and erection of a 3-storey replacement building to provide 9 flats (2 x three bedroom; 3 x two bedroom; 3 x one bedroom and 1 x studio flat) with associated parking (6 spaces) and other facilities (bicycle store).
- 1.1.3 Annexes 4 and 5 of the Appeal Decision relate to archaeology and the historic environment:
- 4 *No development shall take place within the site until the implementation of a programme of archaeological work has been secured in accordance with a written scheme of investigation which has been submitted to and approved by the Local planning Authority.*
  - 5 *The developer shall secure the completion of a programme of archaeological work in accordance with a written scheme of investigation which has been submitted to and approved by the Local planning Authority.*
- 1.1.4 An archaeological desk-based Assessment (DBA) in relation to the Site was not prepared as supporting information with the original planning application, however the refusal notice (Southampton City Council 14th June, 2016) did not mention this within its reason for decision. As such this WSI now provides basic information together with the results of a search of the Southampton Historic Environment Record (SHER) to inform the nature of the archaeological work to take place prior to commencement of the development.
- 1.1.5 In addition, the Southampton City Council (SCC) Historic Environment Team (HET) have issued a 'Brief for an Archaeological Investigation – Watching Brief - 11 Lawn Road, Southampton 6/3/2017' and their internal reference number is HET8076 (see **Appendix 1**). Should there be any change to the nature and extent of groundworks for the development, the brief may be amended by the HET.

1.1.6 The proposed development (**Figure 1**) comprises the demolition of whole or parts of buildings within the Site, the construction of the new building, together with new landscaping and car parking. Groundworks for the removal of existing foundations and floor slabs, new foundations and other ground intrusions such as services and drainage have the potential to adversely affect surviving buried archaeological remains.

1.1.7 The Annexes request a 'programme of archaeological works' however the HET responses to the original application (16/00740/FUL) requests an archaeological watching brief investigation [Pre-Commencement Condition]. This might include the archaeological monitoring of removal of foundations of the existing buildings and the excavation of the foundations for the proposed block of flats and any associated services and landscaping.

## 1.2 Scope of document

1.2.1 This WSI sets out the strategy and methodology that will be employed by a qualified archaeological contractor registered with the Chartered Institute for Archaeologists (CIfA) in order to undertake the archaeological watching brief. It requires the approval of Planning Archaeologist of the Historic Environment Team at Southampton City Council, prior to the commencement of the fieldwork. This WSI is intended to cover such monitoring works only as described above and if necessary, other documents may be required to address other aspects of the proposed development.

1.2.2 In format and content this document conforms with current best practice and to the guidance outlined in *Management of Research Projects in the Historic Environment* (MoRPHE, Historic England 2015a) and the Chartered Institute for Archaeologists' (CIfA) *Standard and guidance for an archaeological watching brief* (CIfA 2014a).

## 1.3 The Site

1.3.1 The Site is located on the north side of Lawn Road, within the Portswood Park area of Southampton, on the west side of the River Itchen (**Figure 1**). It comprises a rectangular parcel of land, approximately 974 m<sup>2</sup> in size. The Site is bounded on the north by plots and boundaries of Nos. 16 and 18 Spring Crescent, on the east side by two single storey buildings and one three storey building along the boundary of No. 13 Lawn Road, on the south side by Lawn Road itself, and on the west by a three storey building at No. 9 Lawn Road.

1.3.2 The Site lies at around 18 m to 19 m above Ordnance Datum (aOD) and the ground is relatively flat. The topography may have been partly altered by a World War II bomb crater, (cluster 2184) located approximately under the north-west corner of the existing house, and therefore may have been backfilled with rubble prior to the construction of the house.

1.3.3 The underlying geology across the Site is mapped as the Wittering Formation with superficial deposits of river terrace sands and gravels reflecting its presence within the former floodplain of the River Itchen (British Geological Survey, Geology of Britain Online Viewer at <http://www.bgs.ac.uk> accessed 7/3/2017). Lawn Road and the site are on the south-facing slope of a hill overlooking the estuary of the River Itchen. There are deeply cut stream valleys to the north and east of the site and the streams themselves are now culverted. The 1846 Ordnance Survey map of Southampton shows the natural contours of the area, which fall away to the north, east and south of the Site. The landscape may be relevant to the Roman remains in the area, if it formed a promontory or raised location close to the east bank of the river.

- 1.3.4 Excavation at a site just 18.5 m east of the Site (ESH 721 – SOU 721) revealed natural deposits of river terrace gravels and Bracklesham Bed deposits. At a site at 5 Lawn Road, 45 m to the west (ESH 987 – SOU 987), natural deposits included river terrace gravels, silty sand and clay from the Wittering Formation of the Bracklesham Bed group. At 1-3 Lawn Road a watching brief (ESH 1776 – SOU 1423) revealed natural deposits of River Terrace brown sandy silty loam overlain by gravel.

## 2 ARCHAEOLOGICAL AND HISTORICAL CONTEXT

### 2.1 Introduction

- 2.1.1 A summary of baseline information is presented below, including entries from the SHER and National Heritage List for England (NHLE) where appropriate. A search of the SHER was conducted on 6/3/2017 and within a search area of 800m from the site boundary, in order to exclude results of Roman Clausentum, on the opposite side of the River Itchen. A gazetteer of the search results is presented in **Appendix 2**.

### 2.2 Statutory and Non-statutory Designations on Site

- 2.2.1 The Site contains no listed buildings or Scheduled Monuments, and is not within a Conservation Area.
- 2.2.2 It is within Southampton City Council Local Area of Archaeological Potential (LAAP) 16, which 'encompasses parts of the city not marked within areas 1 to 15' and 'anywhere within the city boundary is an area of potential archaeological importance' ([https://www.southampton.gov.uk/Images/LAAPs%20descriptions\\_tcm63-360361.pdf](https://www.southampton.gov.uk/Images/LAAPs%20descriptions_tcm63-360361.pdf) accessed 7/3/2017 and defined in Policy HE6 of Local Plan Review, March 2015). This LAAP is not statutorily protected but would be a planning consideration.

### 2.3 Archaeological background by period

#### *Prehistoric (500,000 BC – AD 43)*

- 2.3.1 The prehistoric period is well represented in this area of Southampton. Palaeolithic evidence includes flint tools found close to the west end of Lawn Road and Bevois Hill (MSH 1496) and hand axes (MSH 269 from The Green in Portswood, MSH 517 from St. Denys, MSH 236 from Rockstone Place, MSH 235 from Old Ordnance Survey building, MSH 268 flint tools and roughouts from Portswood). Two Neolithic flint axes were located at Bevois Mount (MSH 245) and Cambridge Road (MSH 254).
- 2.3.2 A Palaeolithic river terrace (MSH 285) was located at the site of Northam Bridge in the 1950s, although much closer to the Site, peat deposits from Mesolithic river valley deposits were found in boreholes at the Acorn Business Centre on 1-16 Empress Road (MSH 5686). Peat deposits and a submerged forest, dated to the Early Mesolithic period (9,500 – 8000 BP), were located on the north intertidal zone of the River Itchen, off Priory Road in 1998-9 (MSH1646).
- 2.3.3 A possible prehistoric barrow was located at Bevois Hill in the 18th century, although Speed interpreted it as Roman and it had been largely quarried away by 1904 (MSH257).

#### *Romano-British (AD 43–410)*

- 2.3.4 The Site lies approximately 660m north-west of the Roman settlement of Clausentum, set on the east bank of the River Itchen within Bitterne Manor (Scheduled Monument, NHLE no. 1005538, MSH297). Roman piers and revetment (Scheduled Monument, NHLE no.

1425731) in the north bank of the river, lie 616m east of the Site. The Site is also c.378 m west of the Romano-British settlement at St. Denys (MSH 2568). Two to three human burials were located on Lawn Road or to the south, with Roman pottery, in 1852 (MSH248). Two limestone walls of possible Romano-British to post-medieval date were found to the north and north-west of the Site (MSH 1450 and MSH 1499). Four Romano-British burial urns were found at Tennyson Road to the north of the Site (MSH 184).

#### *Saxon (AD 410–1066)*

- 2.3.5 Evidence for Saxon activity includes the site of a Saxon route at Derby Road to the south-west of the Site (MSH 206), the origins of Southampton Common to the west (MSH 2463) and the manor of Northam, to the south-west of the Site (MSH 4900).

#### *Medieval (AD 1066–1540)*

- 2.3.6 The Priory of St. Denys was founded in 1124-27 and dissolved in 1536 (MSH 1501). By 1774 few remains survived and a farmhouse was present, which was cleared by 1778 and the farm removed by 1876, leaving a standing remnant of Priory wall in rear gardens of Nos. 1 and 2 Priory Avenue (MSH 2156). The Padwell Farm Estate was established in 1196 on the west side of Cedar Road, to the west of the Site (MSH 1243), together with farm buildings dating from the 14th century, although demolished before 1846 (MSH 246). Bevois Mount, alleged to be the tomb of Sir Bevis of Hampton is thought to be located on Bevois Valley Road, to the west of the Site. In the mid-18th century the mound was interpreted as a barrow, where part of a human skeleton was found at the time of construction of a summer house and cellar (MSH 257). Common land bordering The Avenue existed from medieval times (MSH 4353). At a plot west of No. 1 Lawn Road, a buried soil, two ditches and a third possible ditch were found during a watching brief in 1996-7, however undated and post-medieval building material was found (MSH 1500, SOU 782).

#### *Post-medieval (AD1540–1800)*

- 2.3.7 A grange of St. Denys Priory stood on the site of a farmhouse, dated with 'E.R. 1611' (Grade II\* listed, NHLE ref. 1302207). The core of the red brick building is thought to be earlier than this date, with an early 16th century fireplace and a timber-framed first floor. The Site lies within the boundaries of the former Portswood House Estate (MSH3651), the house of which was built in 1776 and demolished in 1852 (MSH 250). The Site is depicted on the 1846 map of central Southampton which shows that it lay within the Estate, just c.25 m south-east of Portswood House within the east garden. Three sherds of 17th century pottery were found during a watching brief of Nos. 1 to 3 Lawn Road in 2007 (MSH 2856). The former Bevois Mount Estate was situated on the west side of Bevois Hill, to the west of the Site, and dated from 1735 (MSH 1425). The grounds were sold off through the 19th century and a small area around the remnant of Bevois Mount House remained.

#### *19th century and modern*

- 2.3.8 The Site is depicted in the 1846 map as part of the east garden of Portswood House Estate, close to the house itself. In 1800, Portswood Lodge was built (later renamed Portswood House after demolition of the original Portswood House after 1875). This building was demolished in 1923 (MSH 3648). Belmont House was located close to Portswood Lodge, and existed in 1846 (MSH 5584). Portswood Terrace was built between 1846-76 (MSH 3818) and Bevois Mansions were built c.1840 (Grade II listed, NHLE ref. 1339981). The railway line had been established by the 1846 map, running along the east boundary of the Portswood House Estate. The main booking hall was built in 1867 (Grade II listed, NHLE ref. 1092028) and The Junction public house was built in the mid-19th century and remodelled in the late 19th century (Grade II listed, NHLE ref. 1387785).

- 2.3.9 Mid-19th century detached villas were constructed along Lawn Road (originally named Portswood Lawn), possibly constructed in 1875, following the demolition of Portswood House, due to their proximity to its site, rather than as selling off plots of the estate prior to its demolition (MSH 3814, 3481, 3815, 3482, 3816, 3817). The Site at No.11 had a similar detached villa present on the 1876 edition OS map, that was a mirror of the villa at No. 9 which survives, although No.11 had been extended by 1897. Other detached villas of mid to late 19th century date were constructed along The Avenue, some of which are locally-listed buildings denoted by Southampton City Council, as is No. 3 Lawn Road and Ascupart House, Portswood Road.
- 2.3.10 No. 11 was present on the 1946 OS map but absent by the 1948 edition, having been removed by a World War II bomb (cluster 2184). The existing house had been constructed by 1951. An Anderson shelter dating from World War II was located in the rear garden of No. 3 Lawn Road (MSH 249). Thomas Lewis Way was constructed after 1991, replacing Dukes Road.

### **3 AIMS AND OBJECTIVES**

#### **3.1 General aims and objectives**

3.1.1 With due regard to the ClfA *Standard and guidance for archaeological excavation* (ClfA 2014a), the aims of the archaeological works are to:

- *Determine the presence or absence of human use of the area and the date, type, state of preservation and extent of that use, to recover associated objects and to record such evidence as it survives;*
- *Record any archaeological remains within the exploratory site investigations, or the foundations excavations and other construction works down to the depth agreed upon;*
- *To enable the preservation by record of any archaeological features or deposits uncovered;*
- *Analyse and interpret the results; and*
- *Produce a report, which will present the results of the works.*

#### **3.2 Specific objectives**

3.2.1 In relation to the findings from the baseline information, the following specific objectives have been identified:

- *Identify and record any Romano-British or earlier remains or prehistoric human use evidence or deposits relating to previous levels of the River Itchen;*
- *Identify and record the nature, dimensions and relationship of natural deposits on the site and assess the potential of those deposits to contain or conceal archaeological evidence;*
- *Identify and record archaeologically significant remains and contexts defined as relating to the pre-19th century human use of the area;*
- *Identify and record any elements of boundaries or structures relating to Portswood House or the Estate gardens, as appearing on the 1846 map;*
- *Undertake environmental sampling of occupational features and horizons from deposits gathered from the exploratory site investigations to assess aspects of the diet and economy of this area of Southampton; and*

- *Assess the artefactual material recovered and where possible compare and contrast this with contemporary remains from adjacent investigations.*
- *Produce a report which will present the findings of the archaeological works that may be submitted to the Southampton HER to add to the understanding of this area of Southampton.*

## **4 METHODOLOGY**

### **4.1 Introduction**

- 4.1.1 The following methodology is proposed in order to meet the aims and objectives of the fieldwork. All works will be conducted in compliance with the standards outlined in the Chartered Institute for Archaeologists' *Standard and guidance for an archaeological watching brief* (CIfA 2014a), excepting where they are superseded by statements made below. The archaeological contractor will also be bound by the present recensions of the 'Code of Conduct' (CIfA 2014d).
- 4.1.2 In accordance with guidance given in the HET brief for the deposition of the archive with the Southampton Archives Service, a Southampton site code (prefixed with SOU) will be required from the HET prior to the commencement of fieldwork. This unique code should also be used as a site code on all archive elements, retrieved artefacts and samples. The archaeological contractor should inform the HET when the specified fieldwork has begun and when it has been completed. Archaeological staff will be issued with a copy of the HET brief and this WSI, when approved.
- 4.1.3 This WSI must be approved by the HET before the archaeological contractor starts work on site. The brief produced by the HET (Appendix 1) and this WSI will together form the Project Design and the basis of future monitoring. Any significant variations to this WSI will be agreed in writing with the Client and HET prior to being implemented.
- 4.1.4 The archaeological contractor will inform the SCC Planning Archaeologist of the start date of the specified fieldwork, and when it has been completed.
- 4.1.5 It is expected that all ground works will be observed until agreed otherwise in writing with the HET. It is the responsibility of the archaeological contractor to liaise with the developer's site manager and to ensure that archaeological staff are available at short notice. Throughout the process of fieldwork, the work may be monitored by the SCC Planning Archaeologist.

### **4.2 Health and safety**

- 4.2.1 Health and Safety considerations will be of paramount importance in conducting all fieldwork. Safe working practices will override archaeological considerations at all times.
- 4.2.2 All work will need to be carried out in accordance with the Health and Safety at Work Act 1974 and the Management of Health and Safety Regulations 1992, and all other relevant Health and Safety legislation, regulations and codes of practice in force at the time.
- 4.2.3 The archaeological contractor will need to supply a copy of their Health and Safety Policy and a Risk Assessment to the Client before the commencement of any fieldwork. The Risk Assessment will have been read and understood by all staff attending the Site before any groundwork commences.

4.2.4 The archaeological contractor staff will need to comply with the standard PPE requirements for working on construction sites (hard hat, steel toe capped boots, high visibility clothing) and any specific requirements of the Principal Contractor.

### **4.3 Services location**

4.3.1 The Client will provide information regarding the presence of any below/above ground services. Before excavation commences, the areas will be walked over and inspected to visually identify, where possible, the location of above and below ground services.

4.3.2 The excavation areas will also need to be scanned before and during excavation with a Cable Avoidance Tool (CAT) in order to verify the absence of any live underground services.

### **4.4 Archaeological Watching Brief Methodology**

4.4.1 In consultation with the SCC Planning Archaeologist, hand excavation of any remains identified during the archaeological watching brief is required. The location of any excavation areas will need to be stepped out by 1 m adjacent to any upstanding walls, to ensure they are not disturbed.

4.4.2 The location of the archaeological watching brief will need to be located using GPS/TST as a record of their location and potential archaeological deposits. If this is not recorded by the contaminated land or other contractors, the archaeological contractor should make this record. Minor adjustments to the layout of the exploratory site investigation areas may be required to take account of any on site constraints such as located footings or services. The areas will be tied in to the Ordnance Survey National Grid and Datum (Newlyn).

4.4.3 Where significant or complex deposits are encountered continuing at the agreed depth of development, further deeper excavation may be required to an appropriate defined archaeological horizon, the final level of which will be agreed on in consultation with the SCC Planning Archaeologist. Where articulated human skeletal remains are found, which extend beyond the excavated area, it may prove necessary to remove the remains and therefore extend the excavation area to archaeologically excavate them in their entirety.

4.4.4 Existing surface rubble, trample and former foundations will be removed using a tracked 360° mechanical excavator equipped with toothless ditching bucket, where appropriate or by hand, depending on the size of the excavation area, and under constant supervision of the archaeological contractor.

4.4.5 Following the removal of rubble, any archaeological deposits exposed in the archaeological watching brief area will be thoroughly cleaned and then planned, as a precursor to hand excavation thereafter of the archaeological deposits.

4.4.6 All significant archaeological features and deposits will be excavated by hand, following standard practice.

4.4.7 The archaeological contractor will recover (or where impractical, record the existence of) objects relating to human exploitation of the area that has been exposed by groundworks, and ensure the finds are retained and processed according to the standards laid down in 'Standards for the Creation, Compilation and Transfer of Archaeological Archives' (SCC 2016).

4.4.8 Where practicable, spoil from the developer's groundworks will be visually scanned and metal-detected if appropriate by trained archaeological personnel for the purposes of finds

retrieval. Metal detectors may be used as appropriate to scan stripped surfaces and archaeological features prior to and during excavation as appropriate, and to scan spoil heaps where practicable.

- 4.4.9 Exposed archaeological remains will be cleaned by hand where necessary for the acceptable definition of such. Sufficient of the features identified will be investigated by hand in order to phase, characterise and understand the Site. This will include as a minimum 50% of all discrete features, 10% of all linear features and the exposure, recording, mapping and hand-excavation of all occupation layers and other activity deposits. A larger sample of up to 100% of industrial deposits or significant features may be required. Monolith and/or contiguous column samples will be taken of significant deposit sequences.
- 4.4.10 The depth and complexity of any archaeological deposits encountered will be assessed. Sections shall always be positioned to record accurate cross-section profiles of any remains and to identify structural/phasing sequences (for example terminus and intersections).
- 4.4.11 If required, bulk environmental samples of up to 40 litres, where possible, will be taken from well-sealed and dated features following the ClfA 'Standard and guidance for the collection, documentation, conservation and research of archaeological materials' (ClfA 2014d). Where deposits or features containing significant environmental potential are identified, advice will be sought, regarding sampling size and strategy, from an appropriate specialist and/or the English Heritage Regional Science advisor. A detailed policy for assessing soil samples will be submitted to and agreed by the HET by the archaeological contractor, prior to commencement of works on site.

## 4.5 Recording

- 4.5.1 Should they be encountered, all exposed archaeological deposits will need to be recorded using *pro forma* recording system. All features and deposits will be assigned a unique context number. Soil descriptions will be based on the *Soil Science Handbook*, and Munsell colour descriptions will be used.
- 4.5.2 A complete drawn record of excavated archaeological features and deposits will be compiled. This will include both plans and sections, drawn to appropriate scales (1:20 or 1:10 for plans, 1:10 for sections), and tied to the Ordnance Survey British National Grid.
- 4.5.3 An overall surveyed Site plan and Harris matrix of stratigraphic information will be prepared and updated during the course of the excavation.
- 4.5.4 A full photographic record will be made during the fieldwork using digital cameras equipped with an image sensor of not less than 10 megapixels. Where appropriate provision will be made for black and white photography of significant features and structures. The photographic record will illustrate both the detail and the general context of the principal features, significant artefacts and the site as a whole (utilising photographic scales as appropriate). Digital images will be subject to managed quality control and curation processes which will embed appropriate metadata within the image and ensure long term accessibility of the image set.
- 4.5.5 All archaeological features or their excavation areas will be surveyed using a GPS or Total Station Theodolite (TST). All survey data will be recorded in Ordnance Survey National Grid coordinates and heights above Ordnance Datum (Newlyn), as defined by OSGM15 and OSTN15, to a three-dimensional accuracy limit of 50 mm.

- 4.5.6 Provision will be made for monitoring progress and standards throughout the fieldwork by the SCC Planning Archaeologist, in consultation with the Client. Both parties will be informed of any meeting dates and updated on the progress of the works as they proceed.

## **5 FINDS AND ENVIRONMENTAL**

### **5.1 Finds**

- 5.1.1 Should they be encountered, the contractor will recover (or, where recovery is impractical, will record the existence of) objects relating to human exploitation of the area that have been exposed by groundworks, and ensure that the finds are retained and processed according to the standards laid down in "Standards for the Creation, Compilation and Transfer of Archaeological Archives" (Southampton City Council, 2016).
- 5.1.2 At an early stage of the post-excavation process, Wessex Archaeology will enable Southampton City Council's Curator of Archaeological Collections to carry out a Collections Assessment of the material archive, as stipulated in *Standards for the Creation, Compilation and Transfer of Archaeological Archives*.
- 5.1.3 To ensure the long-term stability of the finds and their availability for future study, the archaeological contractor will ensure that an assessment of conservation needs and subsequent necessary work is carried out by a qualified archaeological conservator, or in a recognised conservation laboratory, which is approved by the Curator of Archaeological Collections. Full records (which will form a part of the archive) will be kept of any treatment given.
- 5.1.4 Based on the results of the Collections Assessment, the archaeological contractor will ensure that all finds and other items of archaeological interest removed from the site are analysed and recorded by specialists, to agreed standards, and with the approval of the HET. Specialist work may need to be carried out on all metalwork; all bone, including worked bone and human remains and other organic remains; industrial waste; ceramic material; glass; and lithic material.
- 5.1.5 The archaeological contractor will ensure that, where they exist, type series housed by Southampton City Council's Archaeology Collections are the principal ones referred to in compiling specialist reports. (At the time of issue, type series exist for pottery and stone.)
- 5.1.6 The archaeological contractor will ensure that data about complete, identifiable, itemised objects are transferred onto Southampton City Museum's Archaeological Object Record Sheets. The sheets will then be entered into the computerised Archaeological Collections Object Database, and where necessary the archaeological contractor will make allowance for the costs involved in computer entry.
- 5.1.7 There is the potential for waterlogged preservation of organic artefacts such as wood, leather and textiles, these will be recovered, recorded and stored in accordance with *Waterlogged Organic Artefacts Guidelines on their Recovery, Analysis and Conservation* (English Heritage 2012).
- 5.1.8 All waterlogged wood will be recorded, sampled and stored according to *Waterlogged Wood: Guidelines on the recording, sampling and curation of waterlogged wood* (English Heritage 2010). Should expert advice be required for any waterlogged wooden structures, an external specialist will be engaged.

- 5.1.9 All retained artefacts are to be suitably bagged, boxed in accordance with the guidance given by the relevant museum and generally in accordance with the Chartered Institute for Archaeologists' *Standards and guidance for the collection, documentation, conservation and research of archaeological materials* (CIfA 2014b) and the Museums and Galleries Commissions *Standards in the Museum Care of Archaeological Collections* (1992). On completion of the archaeological post-excavation programme and with the permission of the landowner it is anticipated that any artefacts will be deposited with the relevant museum.

## 5.2 Environmental

- 5.2.1 The collection and processing of environmental samples will be undertaken in general accordance with English Heritage guidelines (English Heritage 2011) and the geoarchaeological investigation will follow Historic England guidelines (Historic England 2015b).
- 5.2.2 Bulk environmental soil samples for the recovery of plant macro fossils, wood charcoal, small animal bones and other small artefacts will be taken as appropriate from well-sealed and dateable contexts or features such as occupation layers, floor surfaces, *in situ* burning layers, ditches and pits. Bulk samples will be 40 litres in size for large deposits such as ditch fills, or 100% of smaller deposits such as ovens, pits and postholes. Samples will not be taken from the intersection of features.
- 5.2.3 Bulk environmental soil samples will be processed by standard flotation methods and scanned to assess the environmental potential of deposits, but will not be fully analysed. The flot will be retained on a 0.25/0.5 mm mesh, with residues fractionated into 5.6 / 4 mm, 2mm, 1mm and 0.5mm and dried as appropriate. Coarse fraction (>5.6 / 4 mm) will be sorted, weighed and discarded, with any finds recovered given to the appropriate specialist. Finer residues will be retained until after analysis.
- 5.2.4 Where deposits or features containing significant environmental potential are identified, advice will be sought, regarding sampling size and strategy, from the appropriate archaeological contractor specialist and/or the Historic England Regional Science Advisor, and agreed with the SCC Planning Archaeologist.
- 5.2.5 Where appropriate, monolith and/or contiguous column samples will be taken for the recovery of molluscs and to consider sub-sampling for pollen and/or diatom assessment, and for consideration of soil micromorphological and soil chemical analyses. Appropriate specialist advice will be sought where needed.
- 5.2.6 Where appropriate samples may be taken and sieved to aid in artefact recovery. For both inhumations and cremation related deposits, the burial deposit will be sampled and processed following the specialist guidelines. In the case of samples from cremation related deposits the flots will be retained on a 0.5 mm mesh, with residues fractionated into 4 mm, 2 mm and 1 mm. In the case of samples from inhumation deposits, the samples will be artefact sieved through 9.5 mm and 1 mm mesh sizes. The coarse fractions (9.5 mm) will be sorted with any finds recovered given to the appropriate specialist together with the finer residues.

## 5.3 Human remains

- 5.3.1 In the event of discovery of any human remains (articulated or disarticulated, cremated or unburnt), they will be left *in situ*, covered and protected. The archaeological contractor will notify the SCC Planning Archaeologist and the Client and if requested, the SCC Environmental Health Department, of the remains immediately and a Ministry of Justice

Licence will be obtained by the archaeological contractor prior to any further disturbance (including where remains are to be left *in situ*).

5.3.2 Following discussions with the Client and the SCC Planning Archaeologist, the need for and appropriateness of their excavation/removal or sampling as part of the works will be determined. Where deemed appropriate, the human remains will be fully recorded, excavated and removed from the Site, subject to compliance with the relevant Ministry of Justice Licence which will be obtained by the archaeological contractor immediately on the discovery of human remains.

5.3.3 Should human remains require excavation, this and post-excavation processing will be undertaken in accordance with the archaeological contractor's protocols, current guidance documents (e.g. McKinley 2013) and in line with the standards set out in ClfA Technical Paper 13 *Excavation and post-excavation treatment of cremated and inhumed remains* (McKinley and Roberts 1993). Appropriate specialist guidance/site visits will be undertaken if required. The final deposition of human remains following analysis will be in accordance with the requirements of the Ministry of Justice Licence.

## 5.4 Radiocarbon dating

5.4.1 Where appropriate and in consultation with the SCC Archaeologist consideration will be given to the radiocarbon dating, or other appropriate technique, of significant finds, features/structures and deposits, particularly where this would enable more secure or closer dating to be obtained.

5.4.2 Other dating or scientific investigation techniques will be discussed and agreed to as appropriate in consultation with the SCC Archaeologist, particularly if evidence for industrial activity is found.

## 5.5 Treasure

5.5.1 In the event of the discovery of any material covered or potentially covered by the Treasure Act of 1996 the archaeological contractor will immediately notify the Client and the SCC Planning Archaeologist. All necessary information required by the Treasure Act (i.e. finder, location, material, date, associated items etc.) will be reported to the Coroner within 14 days. Where removal cannot be effected on the same working day as the discovery, suitable security measures will be taken to protect the artefacts from theft or damage.

## 6 REPORTING

### 6.1 Fieldwork report

6.1.1 On completion of the fieldwork, processing and quantification of finds and environmental samples will be undertaken. Within an agreed period of completion of fieldwork, a draft post-excavation assessment report will be prepared and submitted for approval to the Client and the SCC Planning Archaeologist. Once approved, full colour paper copies will be forwarded to the Client, the HET (for the HER) and the Special Collections section of Southampton Public Library. A full colour paper copy will also be submitted as part of the project archive.

6.1.2 The HET will be supplied with one copy of the approved report in PDF format, either by email or on disk as appropriate. The PDF will be text searchable with good quality figures and images. All report drawings and photographs will be included in the PDF file, with the selecting of text and graphics security option set at "allowed". A trench plan, registered to

the National Grid will be supplied to the HET; also a digital copy of trench plans and feature-distribution or phase plans (where phase plans are appropriate). The format will be preferably MapInfo TAB; otherwise Auto CAD DWG/DXF, ArcInfo ESRI Shape, or Intergraph/Microstation Design.

- 6.1.3 The HET will be supplied with digital copies of the photographs used in the report for general use by the HET and HER, in TIFF format to at least 600 dpi resolution.
- 6.1.4 The final report including figures will also be made available in digital format. Unless specifically instructed otherwise, this will be as a fully hyperlinked and bookmarked Adobe Acrobat PDF file.
- 6.1.5 The archaeological contractor will retain full copyright of the report under the Copyright, Designs and Patents Act 1988 with all rights reserved; excepting that it hereby provides an exclusive licence to the client for the use of the report by the client in all matters directly relating to the project as described in the WSI.
- 6.1.6 The information will be deposited within the Historic Environment Record (HER) maintained by Southampton City Council where it can be freely copied without reference to the archaeological contractor for the purposes of archaeological research or Development Control within the planning process.
- 6.1.7 If required, at the appropriate time, the archaeological contractor will send a short report of the evidence for inclusion in the summaries compiled by relevant journals (these are defined as any or all of: "Past", "Britannia", "Medieval Archaeology", "Post-medieval Archaeology", and "Archaeology in Hampshire").
- 6.1.8 The post-excavation assessment report will incorporate the results from the excavation and all other subsequent watching brief/mitigation undertaken within the Site, as well as statements of potential and recommendations as to a suitable means of publication. The content of the report will follow the outline given in Appendix C of the HET brief (see **Appendix 1** of this WSI).
- 6.1.9 The report will include the following elements:
- *A frontis document control grid as outlined in Appendix 2 of Management of Research Projects in the Historic Environment (MoRPHE) (HE 2015a);*
  - *A summary sheet as outlined in Appendix B of the HET brief;*
  - *A non-technical summary;*
  - *Introduction to include: planning reference numbers, site/accession code, dates of fieldwork and Ordnance Survey NGR;*
  - *An account of the background to the project and circumstances of work;*
  - *Historical and archaeological background;*
  - *The aims of the fieldwork and methods used;*
  - *Detailed description of results;*
  - *Any preservation strategies adopted on the Site;*
  - *Plans at appropriate scales to locate the Site and identified archaeological features;*
  - *Where applicable, other detailed plans and section drawings at appropriate scales to show significant archaeological deposits encountered;*

- *Plates will also be produced to illustrate specific points in the text;*
- *Findings report in full to include the tabulation of all artefacts recovered from the archaeological works, listed by context and by material type;*
- *Environmental report in full to include tabulation of all samples processed;*
- *Any other specialist reports in full, including any conservation requirements;*
- *Potential and recommendations for further work including stratigraphy, artefacts, environmental and dating;*
- *Discussion to refer to the archaeological significance of the site in its broader archaeological, historic and landscape setting;*
- *Recommendations for publication;*
- *References to all primary and secondary sources consulted; and*
- *Details of the archive, its proposed depository and timetable for deposition.*

## 6.2 OASIS

6.2.1 An OASIS online record (<http://oasis.ac.uk/pages/wiki/Main>) will be initiated and key fields completed on Details, Location and Creators Forms. All appropriate parts of the OASIS online form will be completed for submission and this will include an uploaded .pdf version of the entire report (a paper copy will also be included with the archive). Subject to any contractual requirements on confidentiality, copies of the OASIS record will be integrated into the relevant local and national records and published through the Archaeology Data Service 'ArchSearch' catalogue.

## 7 STORAGE AND CURATION

### 7.1 Site archive

- 7.1.1 The resulting project archive will need to be deposited with the Southampton City Council and a unique accession number will be issued. Deposition of any finds will only be carried out with the full written agreement (Transfer of Title) of the landowner, this will be obtained as soon as possible after the fieldwork is completed and quantities of material are known.
- 7.1.2 In an agreed timeframe of the completion of all aspects of the project, the complete project archive, which will include paper records, photographic records, graphics, artefacts, ecofacts and digital data, will be prepared, compiled and presented, in accordance with 'Standards for the Creation, Compilation and Transfer of Archaeological Archives' (SCC 2016), which is in general accordance with nationally recommended guidelines (Brown 2011; ADS 2013; ClfA 2014c). The project archive will be deposited with Southampton City Council.
- 7.1.3 All archive elements will be marked with the site code prefix **SOU** and the archaeological contractor will ensure that a full index (i.e. a summary of the contents) will be prepared, that will also form part of the archive.
- 7.1.4 The archaeological contractor will ensure that the archive is brought up to a standard that will allow for the publication of a detailed summary report.
- 7.1.5 The archaeological contractor will ensure the deposition of the archive and make allowance for the long-term archive-storage costs that will be incurred by SCC, including the costs of deposition of the digital archive with the Archaeology Data Service. The written and drawn archive should be copied onto microfiche which satisfies the criteria set

out by Historic England. The microfiche will itself form part of the archive. Historic England can make available its list of approved microfiche bureaux. A master copy will be deposited with the Historic England Record Centre at Swindon.

- 7.1.6 Where part of the archive is defined as treasure, the developer accepts responsibility for any compensation eventually awarded to the landowner.
- 7.1.7 Please Note: that planning condition will not be discharged until all reports (both in PDF and paper format) and GIS files have been received and approved by the HET/HER, and until the archive has been approved by the Curator of Archaeological Collections.
- 7.1.8 Until final deposition, the archive will be temporarily stored at the offices of the archaeological contractor under the project code. No charge will be made for the temporary storage of finds or archives during the period when the archaeological contractor are undertaking analysis or report preparation.
- 7.1.9 However, if, after completion and submission of the report, finds and archives cannot be deposited with agreed depository due to circumstances beyond the archaeological contractor's control, a charge to the Client will be made for further storage. A charge for storage may also be made where a delay is caused by a lack of confirmation of post-fieldwork analyses and reporting, if the delay exceeds three months.

## **7.2 Selection policy**

- 7.2.1 The archaeological contractor should follow the guidelines set out in *Selection, Retention and Dispersal of Archaeological Collections* (SMA 1993), which allows for the discard of selected artefact and ecofact categories which are considered to be of little or no research value. Categories of material that are likely to be targeted for selective retention include ceramic and stone building materials and industrial residues. Other categories may be targeted in the basis of provenance (unstratified or poorly stratified material or undated material from chronologically mixed contexts, e.g. animal bone). Any selection strategy proposed will be fully discussed with the museum prior to implementation, and all dispersal of artefacts from the assemblage will be fully documented in the project archive.
- 7.2.2 The discard of environmental remains and samples follows nationally recommended guidelines (SMA 1993 and 1995; English Heritage 2011).

## **7.3 Security copy**

- 7.3.1 In line with current best practice (e.g. Brown 2011) a security copy of the written records will be prepared in the form of a digital PDF/A file on completion of the project. PDF/A is an ISO-standardised version of the Portable Document Format (PDF) designed for the digital preservation of electronic documents through omission of features ill-suited to long-term archiving.

## **7.4 Copyright**

- 7.4.1 The full copyright of the written/illustrative archive relating to the site will be retained by the archaeological contractor under the *Copyright, Designs and Patents Act 1988* with all rights reserved. The HET, however, will be granted an exclusive licence for the use of the archive for educational purposes, including academic research, providing that such use shall be non-profitmaking, and conforms to the *Copyright and Related Rights Regulations 2003*.

## **7.5 Personnel**

- 7.5.1 The fieldwork will be directed and supervised by experienced archaeologists from the archaeological contractor's core staff, who will be on site at all times for the length of archaeological fieldwork as required. The overall responsibility for the conduct and management of the project will be held by the archaeological contractor's Project Manager, who will visit the Site as appropriate to monitor progress and to ensure that the scope of works herein is adhered to.

## **8 QUALITY ASSURANCE PROCEDURES**

### **8.1 Quality Management System**

- 8.1.1 The archaeological contractor should utilise a Project Management system with an individual manager to monitor their progress and quality, and control budgets from inception to completion, in all aspects including Health and Safety.

### **8.2 Chartered Institute for Archaeologists (CIfA) Registered Organisation**

- 8.2.1 The archaeological contractor should be a Registered Organisation with the CIfA and endorse the CIfA's *Code of Conduct* (CIfA 2014d) and *Regulations for professional conduct* (CIfA 2014e).
- 8.2.2 All core staff would be of a standard in line with the CIfA's *Code of Conduct*, and be members of the CIfA or a similar appropriate institute.

## **9 INSURANCE**

- 9.1.1 The archaeological contractor should have both public liability (£10,000,000) and professional indemnity insurance (£5,000,000).

### *SHER – Conservation Areas within the 800 m Study Area*

Name	Notes
Oakmount Triangle	Originally designated by Southampton City Council on 10/08/2005
Portswold Residents' Garden	Originally designated by Southampton City Council on 21/10/1996
Cranbury Place	Originally designated by Southampton City Council on 08/09/1977, amended 1/5/14
The Avenue	Originally designated by Southampton City Council on 02/01/1975, amended 1/5/14

### *SHER – Local Areas of Archaeological Potential*

Name	Notes
LAAP no.16: The Rest of Southampton - Area of Potential Archaeological Importance	Local heritage designation defined under the Southampton Core Strategy 2010. Supersedes Local Areas of Archaeological Importance, defined under a now revoked local planning policy framework.

*SHER – Locally Listed Buildings within the 800 m Study Area*

Monuid	Name	Summary	Period From	Easting	Northing
MSH3510	Portswood Library, 251 Portswood Road	Library building completed in 1915.	Modern	442836	114321
MSH3512	267 to 271 Portswood Road (Lloyds Bank)	Bank building, built originally as separate properties between 1897 and 1909, and later amalgamated into one.	Modern	442909	114363
MSH3523	14 Spring Crescent	Mid-19th century villa.	19th century	442721	113697
MSH3566	Addis Square, Portswood Road	Three-storey corner block with a parade of shops on ground floor and flats above, built in the 1920s. On the junction with Brookvale Road.	Modern	442695	114125
MSH3017	115 Portswood Road	115 Portswood Road is a late 19th century building on the corner of Portswood Road and Gordon Avenue, built between 1876 and 1897. It is likely that it was built as a shop. It was Chandlers Wines until substantial alterations in 2007 which drastically	19th century	442607	113979
MSH3483	59 Lodge Road (former Honest Lawyer Public House, now the Lime Bar)	Public house built in about 1870. Modern rear extension.	19th century	442393	113492
MSH3484	92 to 94 Lodge Road	Building designed by Herbert Collins, approved 1925.	Modern	442246	113482
MSH3485	96 to 112 Lodge Road	Building designed by Herbert Collins, approved 1925.	Modern	442224	113473

Monuid	Type	Name	Summary	Period From	Easting	Northing
MSH1648	MON	154 - 170 Priory Road and 7 - 32 Collier Close - Roman evidence	Evidence of Roman occupation was found during a watching brief at 154 - 170 Priory Road in 1998 (SOU 822). The evidence consisted of a ditch, several rubbish pits, several other pits and finds. Roman finds dated from the 1st to the 4th centuries, with	Romano-British	443417	113724
MSH5641	MON	11 - 32 Collier Close - peat, alluvium and reclamation deposits	A peat deposit of varying depth and thickness was found during a borehole survey at 154 - 170 Priory Road (now 11 - 32 Collier Close) in ?1996/1997 (ESH2359). This part of the site was reclaimed from the Itchen after 1846, and the peat was found within	Undated	443430	113700
MSH3693	BLD	St Denys Primary School, Dundee Road/St Deny's Road	Primary school on the corner of St Deny's Road and Dundee Road, built in 1881 as St Denys Board School.	19th century	443377	114119
MSH3651	MON	Former Portswood House estate	Estate and part of the former Portswood House (MSH250), built in 1776. The main railway line was constructed in c1840 across the estate, and soon after the land began to be sold off as building plots. The house was demolished in 1852. A former lodge s	Post-medieval	443128	113999
MSH4457	MON	Former gravel quarry on corner of Portswood Road and Highfield Lane	Former gravel quarry, shown on 19th century maps. The edge of the quarry was found during an archaeological evaluation excavation at 121-127 Highfield Lane in 2005 (SOU 1365, Trench 1).	19th century	442916	114388
MSH3818	BLD	4 to 14 Portswood Park, Portswood Road	Terrace built between 1846 and 1876, originally Portswood Terrace.	19th century	442626	113652
MSH3511	BLD	The Victory Centre, 154 Portswood Road (former Cinema, former Bingo Hall)	The former Broadway Cinema opened in 1930 and closed in 1963. It later became a bingo hall. In about 2011 it became a gospel church called The Victory Centre.	Modern	442758	114125
MSH3648	MON	Grounds of the former Portswood Lodge (later Portswood House)	The grounds of Portswood Lodge (later renamed Portswood House) (MSH270), built in 1800 on the west side of Portswood Road. In 1910 the estate was split up. The house was demolished in 1923. The area was redeveloped for housing (Abbotts Way, Russell Pl	19th century	442583	114303
MSH3649	PLA	Portswood Residents Garden (southern area - tennis courts)	Edwardian garden surrounded by residential housing. The garden has an Edwardian pavilion, tennis courts, a nut plantation and flower beds. Part of Portswood Residents Gardens (see also MSH3650).	Modern	442512	114310
MSH3650	PLA	Portswood Residents Garden (northern area)	Edwardian garden surrounded by residential housing. The garden is informal with woodland, a stream, allotments, informal open space and wildflower meadow. Part of Portswood Residents Gardens (see also MSH3649).	Modern	442607	114473
MSH4733	PLA	Uplands Estate, Highfield	Provisional record	Undated	442384	114606
MSH3668	MON	Grounds of the former Spear Hall	Spear Hall (MSH251) was built in about 1765. By 1846 the grounds consisted of a landscaped garden with trees, and a more formal garden. There were ancillary buildings and a lodge in the grounds. The house was demolished in about 1887 and the grounds w	Post-medieval	442496	113787
MSH4704	MON	Former Bevois Hill - site of summerhouse, wine vaults and icehouse	Somewhere on top of Bevois Mount/Bevois Hill, on the former Bevois Mount Estate, was a summer house with wine vaults underneath, built between c1723 and 1753. By 1768 there was an icehouse there, apparently adapted from the wine vaults.	Post-medieval	442533	113371

Monuid	Type	Name	Summary	Period From	Easting	Northing
MSH2568	MON	St Denys - Site of Roman Settlement	Evidence from a number of archaeological investigations since 1996/1997 has shown that the St Denys area was occupied throughout the Roman period. This explains some previous discoveries of Roman stray finds in the area.	Romano-British	443412	113971
MSH184	MON	Tennyson Road - Roman burial site	Four Romano-British burial urns from Tennyson Road. Exact location(s) unknown.	Romano-British	442759	113931
MSH3489	BLD	Mount Pleasant Junior School, Mount Pleasant Road	Opened as a school in 1898 and used as such since. WWII air raid shelters in the grounds.	19th century	442704	113027
MSH246	MON	Site of the former Padwell Farm (Buildings)	Farm buildings existed at Padwell from at least the 14th century. It is unclear when the buildings were demolished, but there was no trace of them by 1846. The exact location of the former buildings relative to modern property boundaries is very uncertain	Medieval	442219	113502
MSH3130	MON	2 to 6 Forster Road - former 19th century buildings	Former 19th century buildings at 2-6 Forster Road, probably built by 1883. They included a works and warehouse, and were variously occupied by building firms, private residents and a furniture removers'. A set of photographs were taken, probably in ear	19th century	442561	113491
MSH2987	MON	Onslow Road/Mount Pleasant Road/Blackberry Terrace - site of Blackberry Mount	Blackberry Mount was a mound on the south corner of the Onslow Road/Mount Pleasant Road junction, the name being preserved in Blackberry Terrace. It may have been a prehistoric tumulus. The mound seems to have been largely if not entirely removed	Undated	442536	113073
MSH257	MON	Former Bevois Hill/Bevois Mount - Earthwork and Finds	There was an oral tradition that the tomb of Sir Bevis of Hampton was located on Bevois Hill/Bevois Mount. In the mid 18th century, during the building of a summer house on the site of a "barrow", part of a human skeleton was apparently found. In 1770,	Medieval	442538	113384
MSH2860	MON	Padwell Road/Mordaunt Road - former field boundary	A thick line of trees shown on the 1846 map of Southampton has been identified as a major field boundary shown on the 1611 map of Padwell Farm and the 1658 map of the adjacent Manor of Portswood. The boundary can therefore be dated to 1611 at the latest	Post-medieval	442230	113271
MSH3030	MON	Peterborough Road/Southcliff Road/Onslow Road - site of possible mound	A map dating to about 1560 shows a feature at this location. It may be a natural feature associated with the steep rise of the land adjacent to two stream valleys, although it could be an artificial feature, perhaps a tumulus.	Post-medieval	442486	113136
MSH1425	MON	Former Bevois Mount Estate	The Bevois Mount Estate was established by Charles Mordaunt, third Earl of Peterborough in 1735, although he had lived on at least part of the estate since about 1723. He and subsequent owners constructed buildings and laid out the grounds, which inclu	Post-medieval	442298	113471
MSH3638	MON	Former Westwood House and grounds	The former Westwood House and Westwood Park date to the late 18th century house. The house was extended in 1827 and demolished in 1872. The land was then redeveloped and the area is now occupied by the houses and gardens of Winn Road and Blenheim Avenue	Post-medieval	442063	114044
MSH2463	MON	Southampton Common	The origins of Southampton Common probably go back to the early Anglo-Saxon settlement of the late 5th or early 6th century. The first written reference is in 1228. Throughout the medieval period it formed part of the common lands of the town or boroug	Anglo-Saxon	441605	114558

Monuid	Type	Name	Summary	Period From	Easting	Northing
MSH5213	MON	Belsize Boat Yard, western shore of River Itchen at St Denys (RCZA RECORD, NOT YET CHECKED BY SCC HER OFFICER)	Belsize Boat Yard is visible on Epoch 4 (1946) of historic 1:2500 Ordnance Survey mapping, located on the western shore of the River Itchen at St Denys. The extent of the site was given a monument polygon during the historic mapping enhancement as part	Modern	443158	113620
MSH5214	MON	Timber Pond, just north of the Northam Bridge (RCZA RECORD, NOT YET CHECKED BY SCC HER OFFICER)	An area labelled as a tTimber Pondr is visible on Epochs 2-4 (1897, 1909 and 1946) of historic 1:2500 Ordnance Survey mapping, situated on the shore of the River Itchen, just north of the Northam Bridge. MSH1243	MON	Former Padwell Farm Estate	The former Padwell Farm Estate. In 1196, the Padwell lands were given to God's House Hospital, and in 1343 were transferred to Queen's College Oxford, along with the other hospital endowments. The land was farmland. The exact limits of the estate are	Medieval	442199	113364
MSH1323	MON	73 The Avenue - Deposits and Finds	An archaeological watching brief took place at 73 The Avenue in 1998, on the redevelopment of the site as car showrooms and garaging (SOU 930). Under the northern part of the site there was a ploughsoil, probably formed by ploughing from the medieval pe	Medieval	441900	113419
MSH5584	MON	Former Belmont House, Portswood (NOT YET PUBLISHED)	Provisional record, not complete.	19th century	442913	114199
MSH3151	MON	81 - 97 Portswood Road (formerly Wickes Store) - all below-ground evidence	An archaeological evaluation excavation took place at 81-97 Portswood Road (the former Wickes store) in 2008, in advance of redevelopment (SOU 1477). This was followed in 2009/2010 by a further excavation before redevelopment, and a watching brief durin	Romano-British	442548	113907
MSH4353	MON	Asylum Green and other land bordering The Avenue/Inner Avenue - former common land	Formerly part of Southampton Common.	Medieval	442073	113143
MSH4382	MON	Rockstone Lane - former clay and sand digging	Clay and sand was dug in the Rockstone Lane area in the 16th and 17th centuries, including close to the lane itself.	Undated	442314	112994
MSH1464	MON	Magistrates Court in London Road - All Evidence	Evidence interpreted as representing non-intensive Roman occupation between the 1st and 4th centuries AD was found during observations on groundworks for the new Magistrates Court in London Road in 1994 (SOU 603).	Romano-British	442042	112938
MSH5686	MON	Acorn Business Centre, 1-16 Empress Road - peat deposits	Early river valley deposits and peat deposits were found during archaeological investigations, including a geo-archaeological borehole, at the Acorn Business Centre, 1-16 Empress Road in 2015 (SOU 1678). The site was on land reclaimed from the River Itc	Mesolithic	442733	113468
MSH4900	MON	Former settlement of Northam / manor of Northam	Northam probably existed in the Middle Saxon period, at the same time as the town of Hamwic (MSH2947). It may have been mentioned in 842 AD as North-Hamwic (Nordhunnwig). It is possibly mentioned in the Domesday Book (1086). The first indisputable ref	Anglo-Saxon	442797	112966

Monuid	Type	Name	Summary	Period From	Easting	Northing
MSH285	MON	Northam Bridge - Buried River Terrace	A buried, gravel river terrace was found in boreholes sunk across the River Itchen along the line of Northam Bridge in the early ?1950s. The river terrace is of Palaeolithic date.	Palaeolithic	443279	113015
MSH286	MON	Northam Bridge - Submerged Peat Deposit	A peat deposit was found in boreholes sunk across the River Itchen along the line of Northam Bridge in the early ?1950s. The peat is of Mesolithic date.	Mesolithic	443279	113016
MSH4313	BLD	Northam Bridge (current bridge)	Concrete road bridge opened in 1954. Said to be the first major pre-stressed concrete road bridge in the country.	Modern	443250	112960
MSH4314	MON	Northam Bridge - the original 1790s bridge	The original Northam Bridge was built in the 1790s, mainly of timber. It was replaced by another bridge in 1889. During a field survey in 1997 (ESH1851), some masonry piers were observed, thought to be part of the original bridge.	Post-medieval	443316	113047
MSH4315	MON	Northam Bridge - the 1889 bridge	Iron bridge built in 1889, replacing an earlier timber bridge. It was replaced by a concrete bridge which opened in 1954.	19th century	443303	113025
MSH5710	MON	Former Netley Branch Railway	Branch railway from Southampton (Blechynnden) to the military hospital at Netley. Opened as a single track line in 1866, and doubled in 1910.	19th century	444051	111762
MSH1514	MON	North End of Derby Road - Finds and Undated Layers	Undated layers, possibly redeposited natural in a 19th century foundation trench, were observed in a trench at the north end of Derby Road in 1988 (SOU 378).	Anglo-Saxon	442780	112949
MSH470	MON	Possible Route of the Roman Road between Clausentum and Winchester	The Roman road between Winchester and Bitterne Manor (Clausentum) is thought to have entered the present-day City of Southampton via North Stoneham and Swaythling, although the precise route is lost. From Swaythling two routes are suggested. One possib	Romano-British	443779	115076
MSH5578	MON	Former entrance road to St Deny's Priory, and later St Dennis Farm (NOT YET PUBLISHED)	Provisional record, not complete.	Post-medieval	443168	114181
MSH5000	PLA	The Avenue/Bassett Avenue route	Provisional record. Not yet complete. Main road north from Southampton to Winchester from the medieval period onwards. Probably earlier origin, Iron Age at least. [Concerning the shape of the Inner Avenue area. The western branch of the road continu	Iron Age	441908	114810
MSH2428	MON	7 St Deny's Road - Possible Former Road Line	On a late 17th century map of Portswood, the earlier line of St Denys Road appears to have been to the south of the modern road, running through the southern end of the 7 St Deny's Road property. A watching brief was carried out at 7 St Denys Road in 19	Post-medieval	442892	114211
MSH2361	MON	47 - 65 Bevois Valley Road - Limestone Wall	A limestone rubble wall of probable post-medieval date was found during a watching brief on groundworks at 47 - 65 Bevois Valley Road in 2003 (SOU 1234). The wall was aligned northeast-southwest.	Post-medieval	442552	113221
MSH485	MON	St Denys, Portswood and Swaythling - Possible Route of Roman Road	The Roman road between Bitterne Manor (Clausentum) and Winchester may have started in St Denys, at a hard on the shore of the River Itchen opposite Clausentum, which could be reached by fording the river. It would then have followed the approximate line	Romano-British	443500	114964

Monuid	Type	Name	Summary	Period From	Easting	Northing
MSH4339	MON	Former Lower Common Gate of Southampton Common (First Common Gate)	Former gate at the southern entrance to Southampton Common. It was still extant in 1846 but had been removed by 1883. The location of the gate is now marked by boundary stones.	19th century	441956	113564
MSH4362	MON	Southampton Common - boundary banks and ditches	Boundary banks and ditches of Southampton Common. Boundary banks survive on its west, north and part of its south sides.	Post-medieval	441641	114497
MSH2063	MON	Derby Road - site of Saxon route and later country lane	Derby Road is thought to have been a Middle Saxon route, surviving into the medieval and post-medieval periods as a country lane, until the 19th century urban development of the area. It is first mentioned in 1252. A gravel layer, probably part of the	Anglo-Saxon	442718	112580
