

Syn1334 April 27

I logged in to take a couple of final screen captures of overall drop pod placements at the cave entrance and noticed a new communication station near my beacon. It was placed by player GalacticHeritage within the past day and notes that "This is an official Galactic Heritage site."

There are 63 comm stations at the old base site, not including mine or the one from GalacticHeritage.

Player Zaz Ariins uses the GalacticHeritage gamertag for this purpose.
