

RADIOCARBON DATING CERTIFICATE

27 September 2017

Laboratory Code SUERC-75052 (GU44915)

Submitter Lizzie Wright
Northern Archaeological Associates Ltd.
Marwood House
Harmire Enterprise Park
Barnard Castle
Co. Durham, DL12 8BB

Site Reference A1L2B

Context Reference neonate skeleton

Sample Reference F179 9091

Material Human bone

$\delta^{13}\text{C}$ relative to VPDB -18.1 ‰

$\delta^{15}\text{N}$ relative to air 12.1 ‰

C/N ratio (Molar) 3.3

Radiocarbon Age BP 1866 \pm 33

N.B. The above ^{14}C age is quoted in conventional years BP (before 1950 AD) and requires calibration to the calendar timescale. The error, expressed at the one sigma level of confidence, includes components from the counting statistics on the sample, modern reference standard and blank and the random machine error.

Samples with a SUERC coding are measured at the Scottish Universities Environmental Research Centre AMS Facility and should be quoted as such in any reports within the scientific literature. The laboratory GU coding should also be given in parentheses after the SUERC code.

Detailed descriptions of the methods employed by the SUERC Radiocarbon Laboratory can be found in Dunbar et al. (2016) *Radiocarbon* 58(1) pp.9-23.

For any queries relating to this certificate, the laboratory can be contacted at suerc-c14lab@glasgow.ac.uk.

Conventional age and calibration age ranges calculated by :

E. Dunbar

Checked and signed off by :

B. Fitzroy

The radiocarbon age given overleaf is calibrated to the calendar timescale using the Oxford Radiocarbon Accelerator Unit calibration program OxCal 4.*

The above date ranges have been calibrated using the IntCal13 atmospheric calibration curve†

Please contact the laboratory if you wish to discuss this further.
