Interpretation

Wall could be a field boundary as it has no bonding material. Remaining wall probably a foundation itself for construction cut ^{partially} visible and not to be as well backfill. Date of wall is uncertain.

Runs NE-SW; only one face exposed - ~~is~~ Southeast.

| | |
|----------|----------|
| Initials | 503 |

| Is the deposit sealed? Yes | Has deposit been formed by flowing water/standing water/wind? Potentially |

Context Description

Natural layer, ~~with~~ investigated due to sub-linear shape.

Its Edges Although distinct on the surface, once excavated this distinction disappears.

Excavated as a terminus, but seems to slowly peter out / ^{get} mixed with ~~other~~ ^{other} natural.
