TO THE MEMBERS.

THE Council have great pleasure in congratulating the Members of the Society upon the completion of the Seventh Volume of the "Collections," and also upon the continued prosperity of the Society, and the highly-interesting and valuable series of Papers relating to the County of Surrey which they are enabled to publish from time to time from the pens of Members.

The Council believe that the contents of the present Volume will be found equal to, if they do not surpass, any of the preceding volumes of the "Collections;" and the best thanks of the Society are due to those Members who have contributed the several Papers and Essays.

Again the Council wish to call the attention of the Members to the desirability of raising an Illustration Fund, as suggested in the last volume, for many most interesting memorials of the past might, by the engraver's aid, be preserved to memory, although the originals may disappear.

The object of the Society being to collect and publish Papers and Essays upon matters connected with the County of Archæological interest, as supplementary to the great works of the County historians, the Council wish to impress upon the Members the importance of recording, by drawings or otherwise, any discoveries of Archæological interest in the County; in which the Council will most willingly aid if early notice be given to the Honorary Secretary of the Society.

The Council much regret that no further progress has been made in the formation of a County Museum, but still hope that ere long they may be able to establish so useful an institution, more especially as the Society possesses many valuable objects of Archæological interest sufficient to form a good nucleus; and could a County Museum be founded,

doubtless there are numerous residents in the County possessing objects of Archæological interest who would willingly contribute valuable additions.

The Annual Excursions of the Society which have taken place since the publication of the last volume have proved highly successful, and the Papers and Essays read at these meetings have furnished the chief materials for the present volume.
