ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked * overleaf)

This is the fill of the later ditch we found in this slot.

It was moderately compact, mid brown and clayed, with some stones into it (most $\leq 0.05m$ diameter, occasionally up to $0.10m$). We also found some pottery and animal bones fragments. Thanks of the shape and color we can say this level is roman.

Darkish ~~of this~~ brown color could be interpreted as deliberated backfill.

Refer to context

SKETCHES

(consider: location plan, detailed plan showing relationships, section showing fills/deposits as appropriate)
