This form is incomplete if fields marked with * are empty. Please turn over for additional information (and describing all items marked with *) and sketches.

ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked * overleaf)

Most likely this fill is part of the same silting event as (73p0980) but it was much more clearly distinguished from the natural. It was clearly darker than the orange natural.

No finds.

Natural infilling due to silting of the sandy clay sides of the feature.

Refer to context:

(73p0971)
(73p0972)

SKETCHES

(consider: location plan, detailed plan showing relationships, section showing fills/deposits as appropriate)
