MOLA HEADLAND INFRASTRUCTURE

MOLA-Headland Infrastructure
CONTEXT RECORD FORM

Continuation Sheet	Sheet 2 of 4	Project code: A14 Context No: [761144]

Continuation sheet for the area that includes features with context numbers from [761144] until [761173]

THREE pits [761144]=[761151] [761166], [761170] in alignment NW-SE were found Based on their fill that looks the same in all we heard believe that the are contemporary. They are gradually decreasing in size (from SE to NW) Two of them [761144], [761166] are cut on top of an earlier pit [761162] that has similar infilling. However in all pits only the SW edges and the bases are clear so a possible deposit may occur in the area.

Two post holes [761146] and [761156] are cut on top of the above mentioned features.

On the top of the pits [761144]=[761151], [761166], [761162] there are three later pits [761148]=[761153], [761164]=[761168], and [761172] all filled with the same fill. In the biggest pit [761148]=[761153] there are two fills that in a way they are backfilled they give the effect of a cut. Same infilling and effect occures in post holes [761156] and [761159]. The rest of the pits

Excavated by & date: AL 07.02.18	Recorded by & date:	Checked by & date: LN 13/2/18

NA/F12A

MOLA HEADLAND INFRASTRUCTURE

MOLA-Headland Infrastructure
CONTEXT RECORD FORM

Continuation Sheet	Sheet 3 of 4	Project code: A14 Context No: [761144]

have only one Fill (same in all later pits and the above mentioned post holes).
Apparently pits and post holes are contemporary and backfilled with the same material which had concentrated charcoal and building material in one part. As it seems from the sections they dumped the dark part first and then the rest of it. The dark Fill is found in the SE-NE part of the area.
Another interpretation could be a destruction or waste material layer that spread from SE to NW.
It is directly related with the post hole cluster that occures towards NE part and it is a possible structure related with metallurgical activity based on the Finds.
Big amount of slag were found and two metal objects.

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Cut OF pit
It cuts an earlier pit [761151]
Has two fills. In section the shape of the fills gives the impression of another cut but the most probable is that the two fills are deliberate backfills that placed in the same time*
Both fills had a big amount of slag that indicates metallurgical activity in the area.
It is probable that this pit was used to discard all the waste material. In close proximity there is a cluster of post holes and a ~~probable~~ possible fire pit that they will be investigated
A possible structure is expected to be found related to a metal workshop.
*The same happens to post holes [761156] that makes believe that their cut and backfilling is contemporary
The uneven base probably is because of animal activity that spread the fill unevenly

Refer to context

(consider: location plan, detailed plan showing relationships, section showing fills/deposits as appropriate)

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

lower Fill of pit.
Looks like the material was pushed from the edges
Full of shuttered CBM and charcoal in big pieces.
One rim was Found.
A big amount of slag was collected.

For more information : see [761153]

It gives the sense that both Fills (761154) and (761155) that they look to be the same as (761149), (761157) and (761150), (761158) come from the same pile of earth and that in one place which they spread it first the concentration of charcoal was higher.

One big stone was Found probably sandstone with possible burn marks on the surface. length: 0,26 m, width: 0,17 m, hight: 0,13 m

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Cut of a post hole
In close proximity to a post hole cluster.
Probably a structure associated with metal process - based on the finds
Has two fill same as the fills in post hole [761156] and the fills in pit [761148], [761153]
In all these three Features the fills create the effect of a second cut but we believe that its just because of the way they backfilled.
No datable finds

Refer to context

ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

Cut of a shallow pit, one single fill
~~(it could be the hearth)~~
In the middle of a post hole cluster
with a clear structural pattern

It could be the hearth of the structure

In the base three possible stake holes were found. Probably pit and stake hole belong in one single structure and are contemporary but still their function remains unknown. They all were filled with the same infilling. [761180] [761182] [761184]
for more info → [761174]

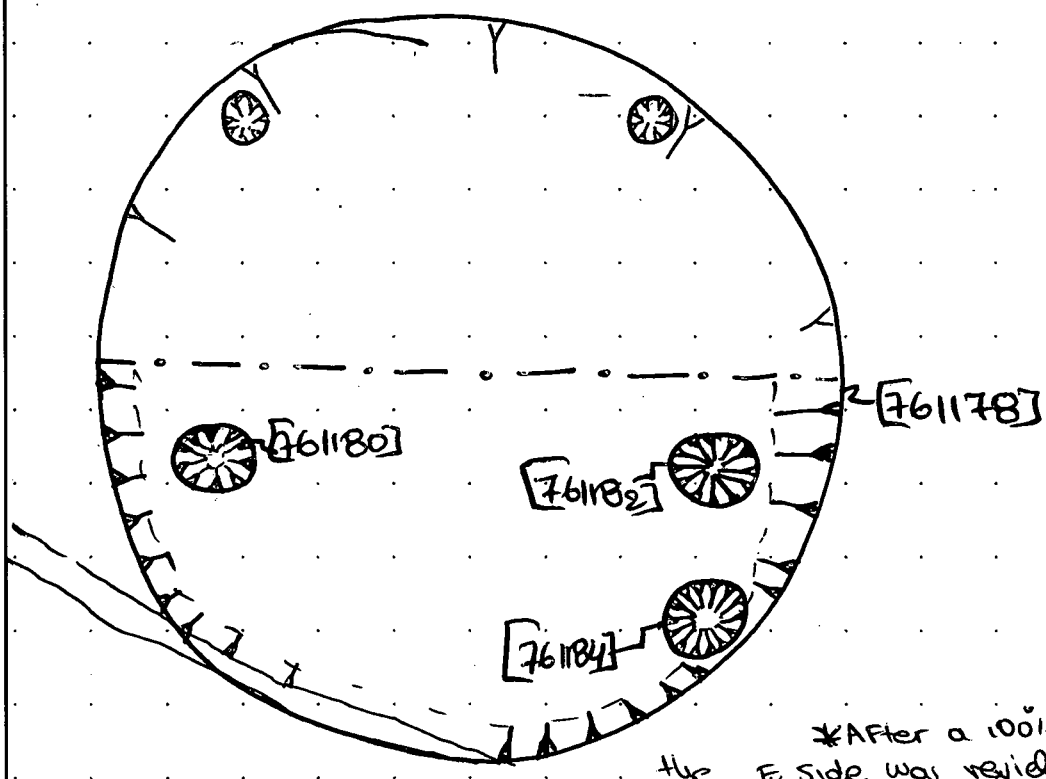

N side of pit was truncated from a possible animal burrow.

Refer to context

for general plan → [761176]
for section and ~~profile~~ → [761179]

SKETCHES

(consider: location plan, detailed plan showing relationships, section showing fills/deposits as appropriate)

*After a 100% sampling the E side was revided. gentle sloping. Two stake holes were at the N and S corner of the E part, similar to the stake holes of the W side. No photos or context numbers were taken since the area is sigued off.

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

cut of a post hole
Probably cut an an earlier feature or a possible deposit natural
The post hole was overdug because of the aboved mentioned void
One flint was retrieved from the bottom of the slot probably associated with the feature below or deposit.

It will be investigated after the conclusion of the excavation of the possible blacksmith structure

Single fill of post hole
Moderate presence of CBM but only two small pieces were retrieved as it was mostly shattered.
One medium size stone ≈ 0,12cm not worked was in the base of the post hole maybe used for packing the post.

Fill was something between loose and moderate compact.

ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

This is the cut of a linear ditch, orientated North/South. 1.03m > in length, approximately 0.38m wide and 0.13m deep.

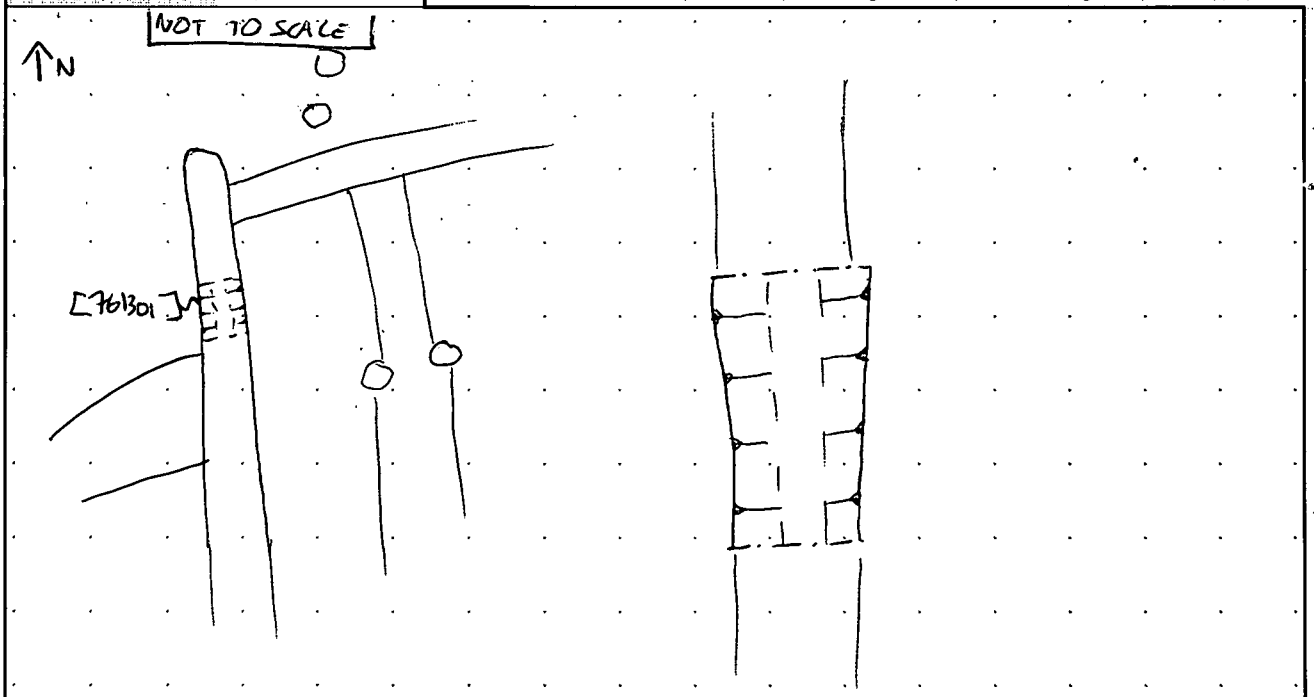

The sides are gradual (moderate) and the base is concave.

It is potentially cutting a pit located near this cut, more investigation are going to follow.

Refer to context [761301]

*This form is incomplete if fields marked with ◤ are empty. PTO for additional information (and describing all items marked with *) and sketches.*

ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

This fill is made of dark greyish brown silty clay. It contains occasional small stones, moderate charcoal and CBM. Moderately compact.

2 large fragments of pottery were found well preserved in this deposit. (late medieval?)

Deliberate backfill, probably quickly filled (presence of pockets of natural clay in the fill).

Primary and only fill of ditch.

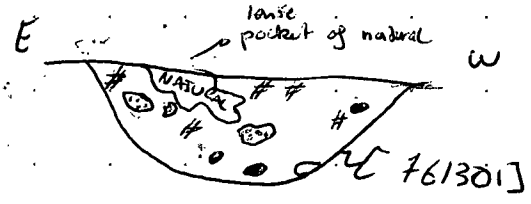

Refer to context SE [761301]

ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

This is the cut of a sub-circular feature, that can be interpeted as a postHole. It is 0.28m in diameter and 0.14 m deep.

The base qualifies as concave but it tends to be almost flat.

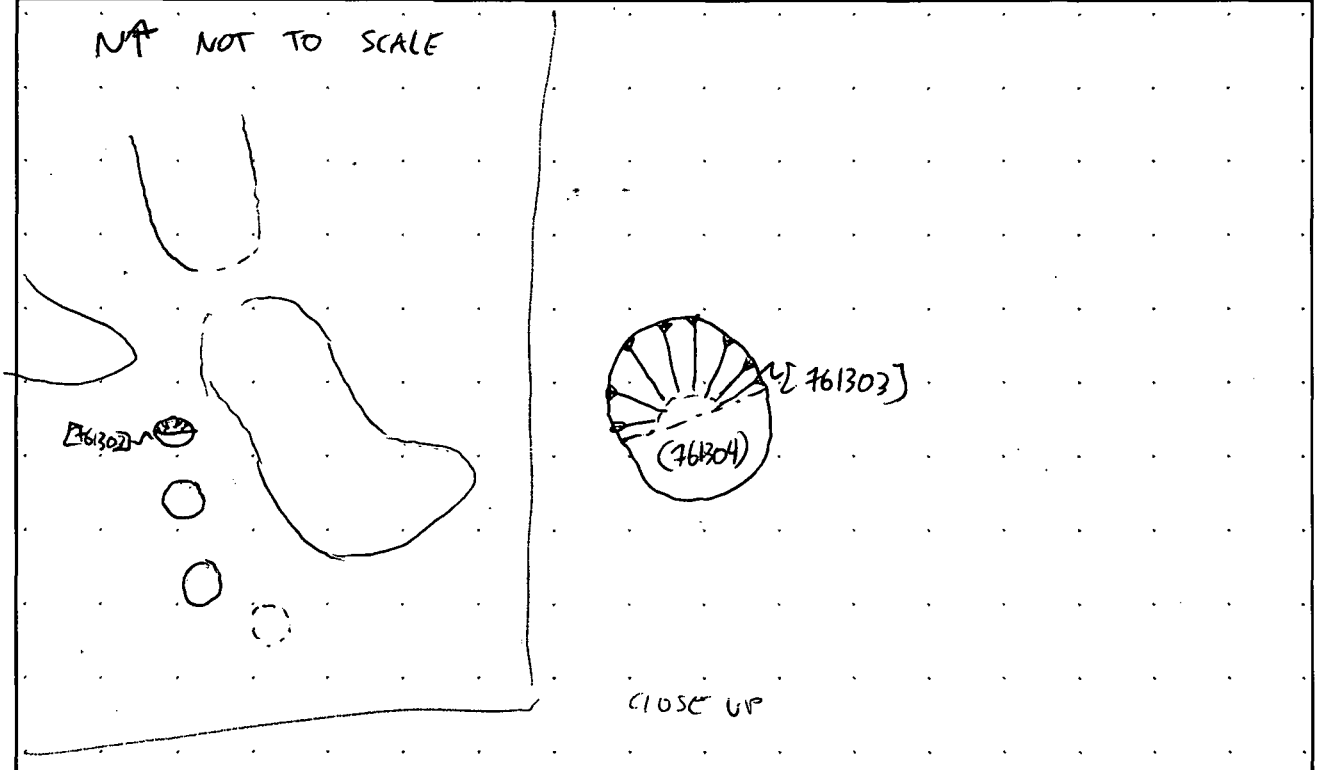

it is associated with other postholes and features that are going to be investigated.

No finds were found in the fill.

Refer to context

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

This fill is made of mid greyish brown silty clay. it is moderately compact.
Occasional small stones and pebbles were found towards the bottom of the fill.
A moderate amount of CBM was encountered throughout the fill.
Occasional charcoal flakes and chalk were found. No finds.

diameter=0.56 m.

this ellongated sub-circular feature is thaight to be a pit (STORAGE?)
IT IS CUT BY ANOTER PIT, OF A CIRCULAR SHAPE [761352].
THE LARGE AMOUNT OF FINDS IN IT (POTTERY ~~AND~~ ANIMAL BONES, ETC). MAKES IT ~~A~~ NOTICABLE.
COULD HAVE BEEN PART OF A KILN?
OR JUST A STORAGE PIT BY ANOTHER?

MID GREYISH BROWN SILTY CLAY DELIBERATE BACKFILL. INTERESTING TO NOTICE THE FACT THAT LENSES OF GRAVEL AND YELLOWISH SOIL ARE FOUND IN THIS FILL. MODERATE TO FREQUENT CHARCOAL, OCCASIONAL CHALK & CBM. LARGE PIECES OF POTTERY WERE FOUND IN THIS FILL, AS WELL AS SMALLER SHERDS. ALL BLACK OR DARK.

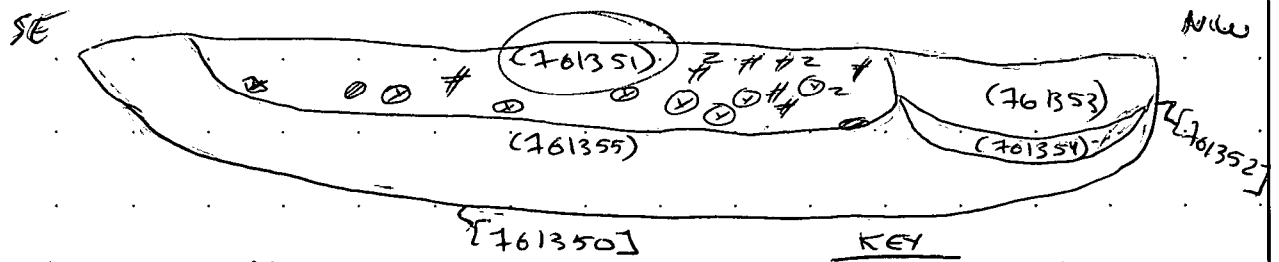

A LARGE AMOUNT OF BONES WERE FOUND, LARGE AND SMALLER ANIMALS. ALSO TEETH.

Also found in this fill, some worked flint and what could be fired clay(?)

Refer to context (761351)

ADDITIONAL INFORMATION

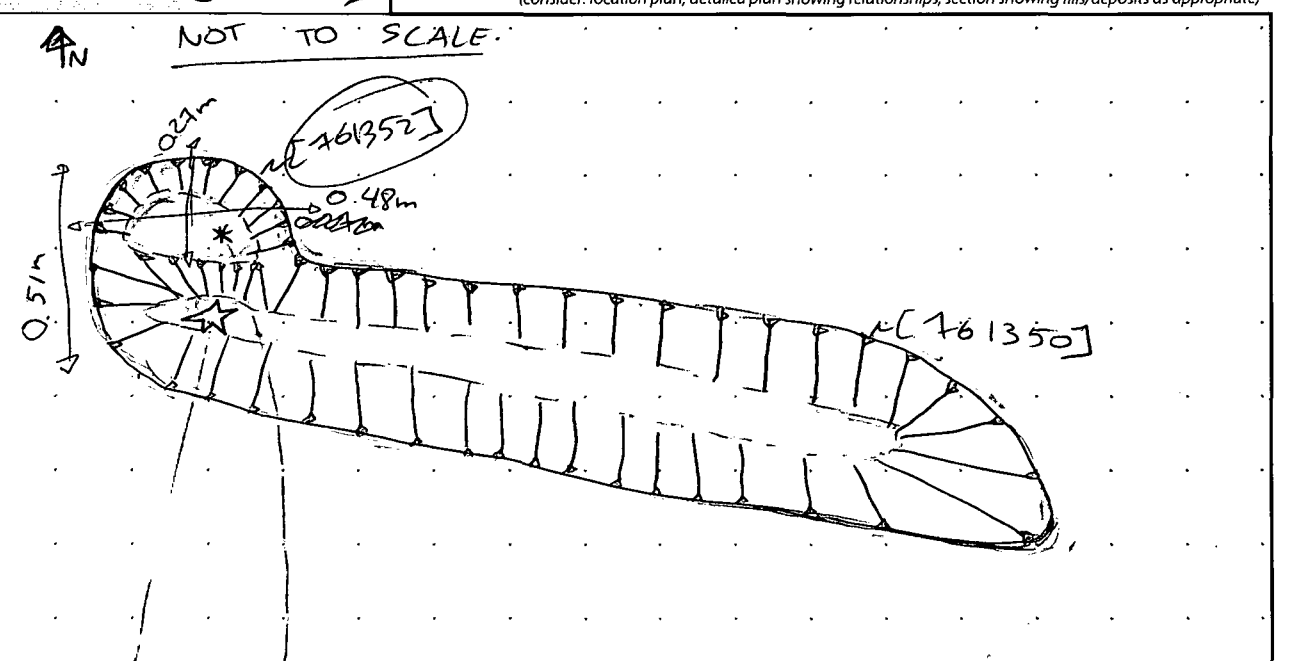

*(any further details that may be important for understanding the context, including items marked * overleaf)*

this deliberate backfill is made of mid greyish brown silty clay. Moderate to frequent charcoal was encountered in the fill, as well as a moderate amount of chalk and CBM. Occasional stones were found, ~~expect~~ just on the part of the fill going under the cut made by [761352].

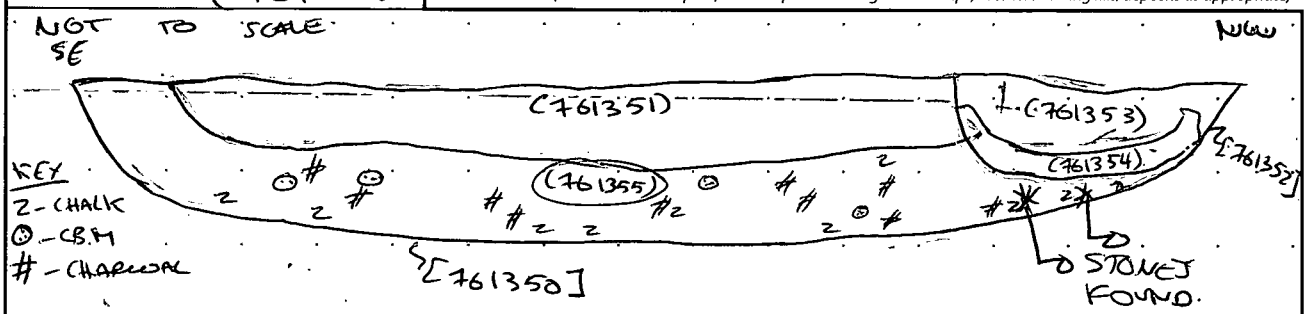

A very big amount of bones were found in this fill, including a large longbone and teeth from different species.

The pottery sherds found in this fill were also in large number, ~~are the most sort of~~ mainly black pottery.

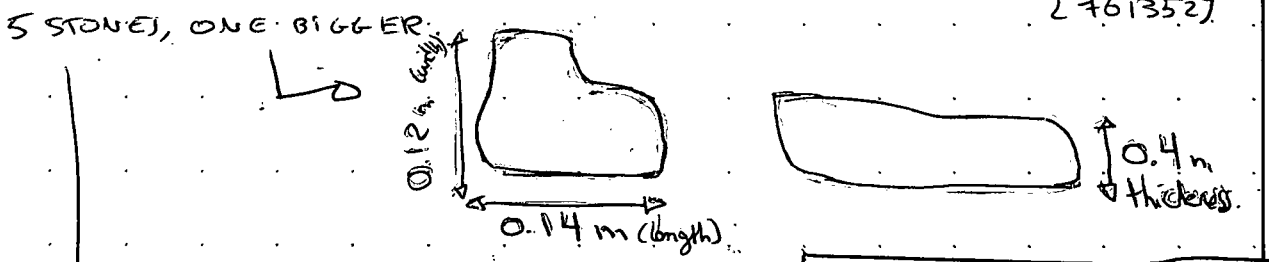

Refer to context (761355)

SKETCHES

(consider: location plan, detailed plan showing relationships, section showing fills/deposits as appropriate)

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

DELIBERATE BACKFILL OF TERMINUS OF DITCH MADE OF MID GREYISH BROWN SILTY CLAY. INCLUSIONS INCLUDE A MODERATELY FREQUENT CHARCOAL AND CHALK, AND OCCASIONAL CBM.

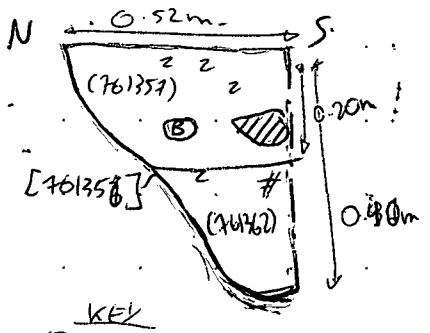

A LARGE AMOUNT OF ANIMAL BONES WERE FOUND IN THE FILL, MAINLY LARGE SIZE BONES (2 BAGS IN BULK FIND).
A SMALL PIECE OF WORKED FLINT WAS FOUND AS WELL, AND A PIECE OF BURNED CLAY.

INTERESTING TO NOTE THAT A SMALL POCKET OF ~~YELLOWISH~~/BLUEISH GREY CLAY WAS FOUND IN THE FILL AS WELL (VISIBLE IN THE HALF-SECTION DRAWING).

Refer to context (761357)

Large pit with a diameter of 1.8m. Lower down from the surface, the cut changes slightly in the form of a step & may begin to square. In order to check this it may be necessary to 100% excavate this feature (time permitting).

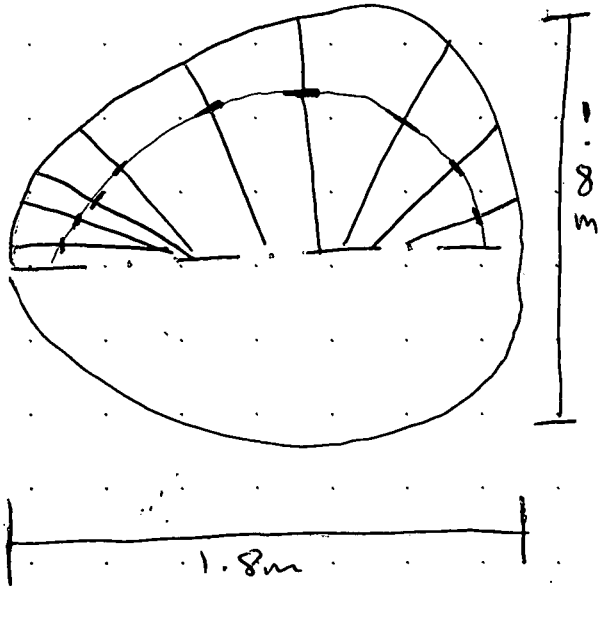

This feature contained only 1 fill (761552).

Refer to context (761552)

Cut of possible post-hole. This was interpeted as such due to other similar sized & shaped features in the surrounding area. Furthermore, it doesn't match the depth of the pit features nearby.

Refer to context [761553]

ADDITIONAL INFORMATION

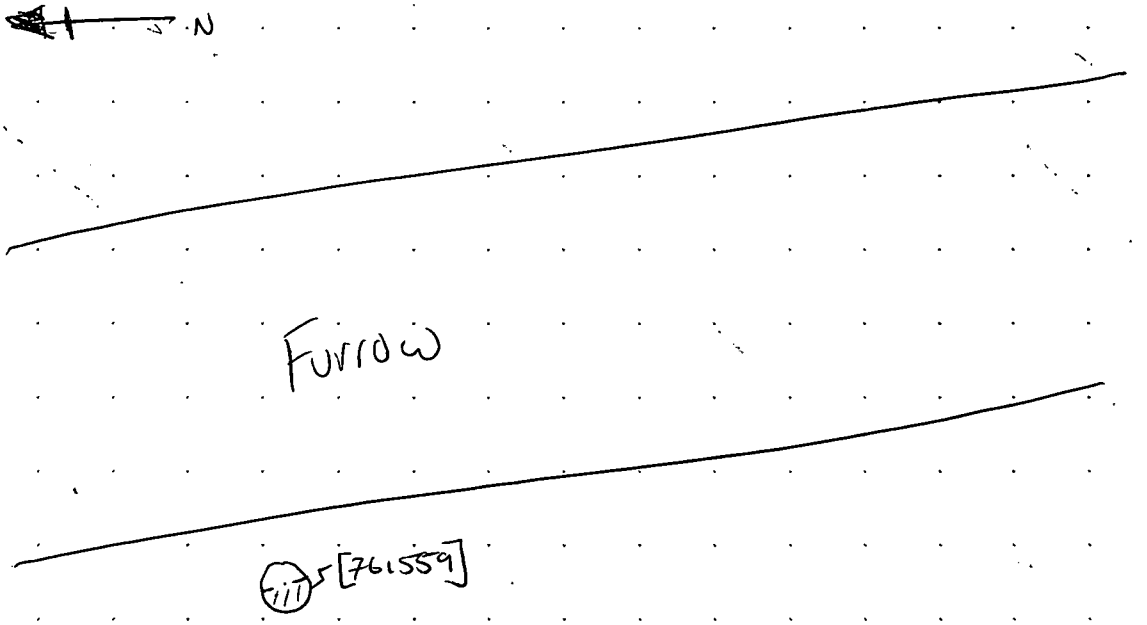

*(any further details that may be important for understanding the context, including items marked * overleaf)*

This feature is possibly a pit, however the irregularity of its overall shape and proximity to a large pond/water pit feature, are indications that it could equally be natural.

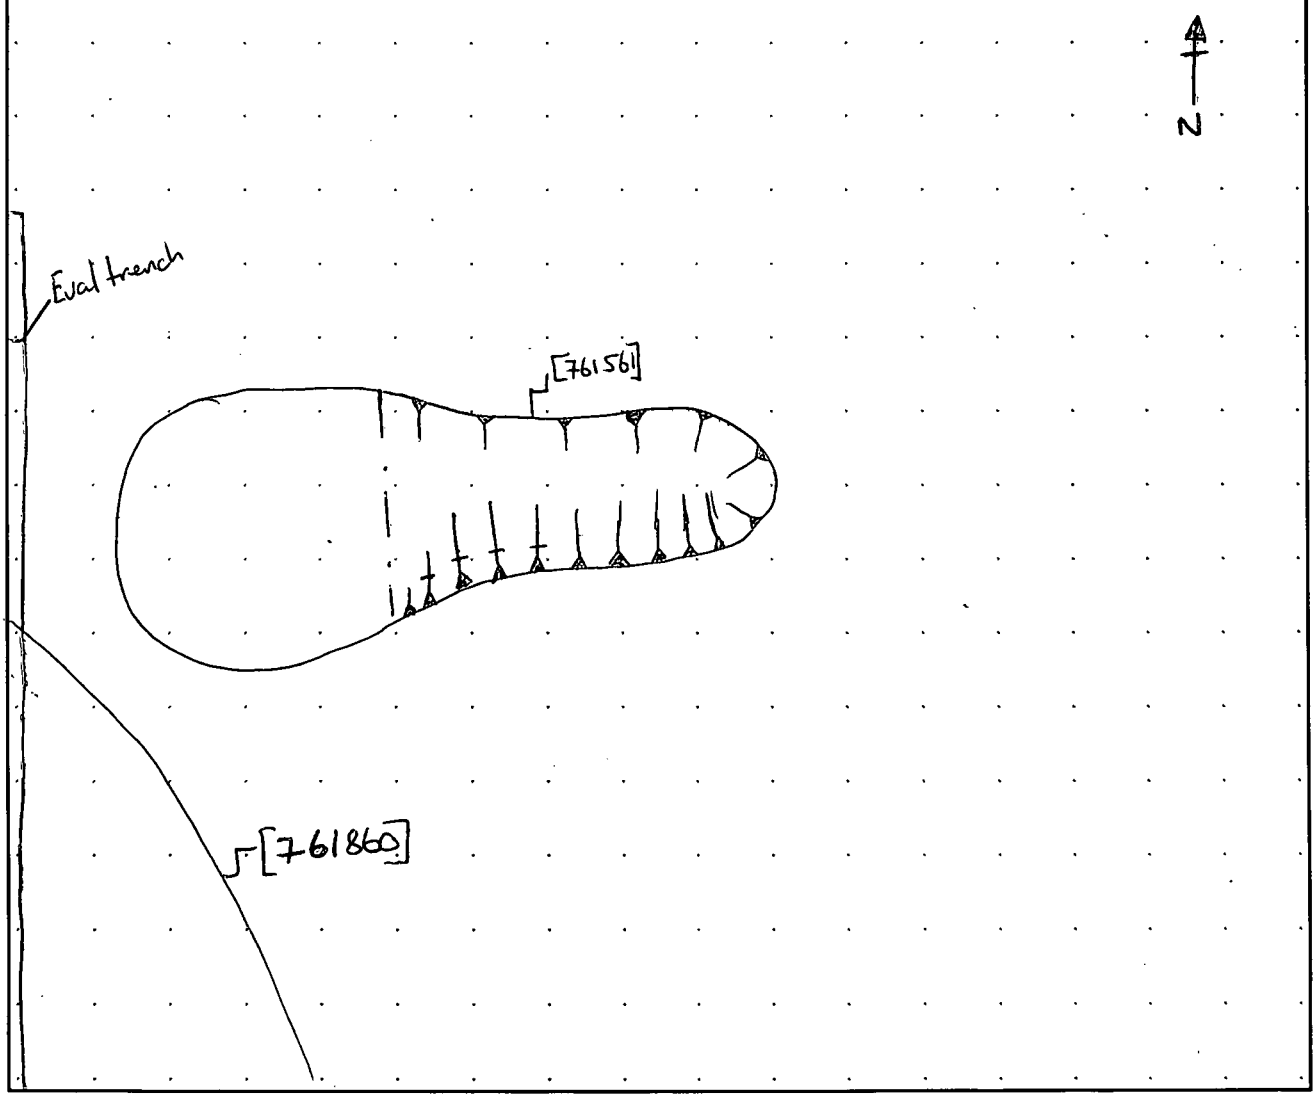

The shape of the feature lacks a sense of design, but its flat base could indicate that the feature is a pit, with the original sides being lost to erosion.

Contains only 1 fill (761562).

Refer to context (761562)

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

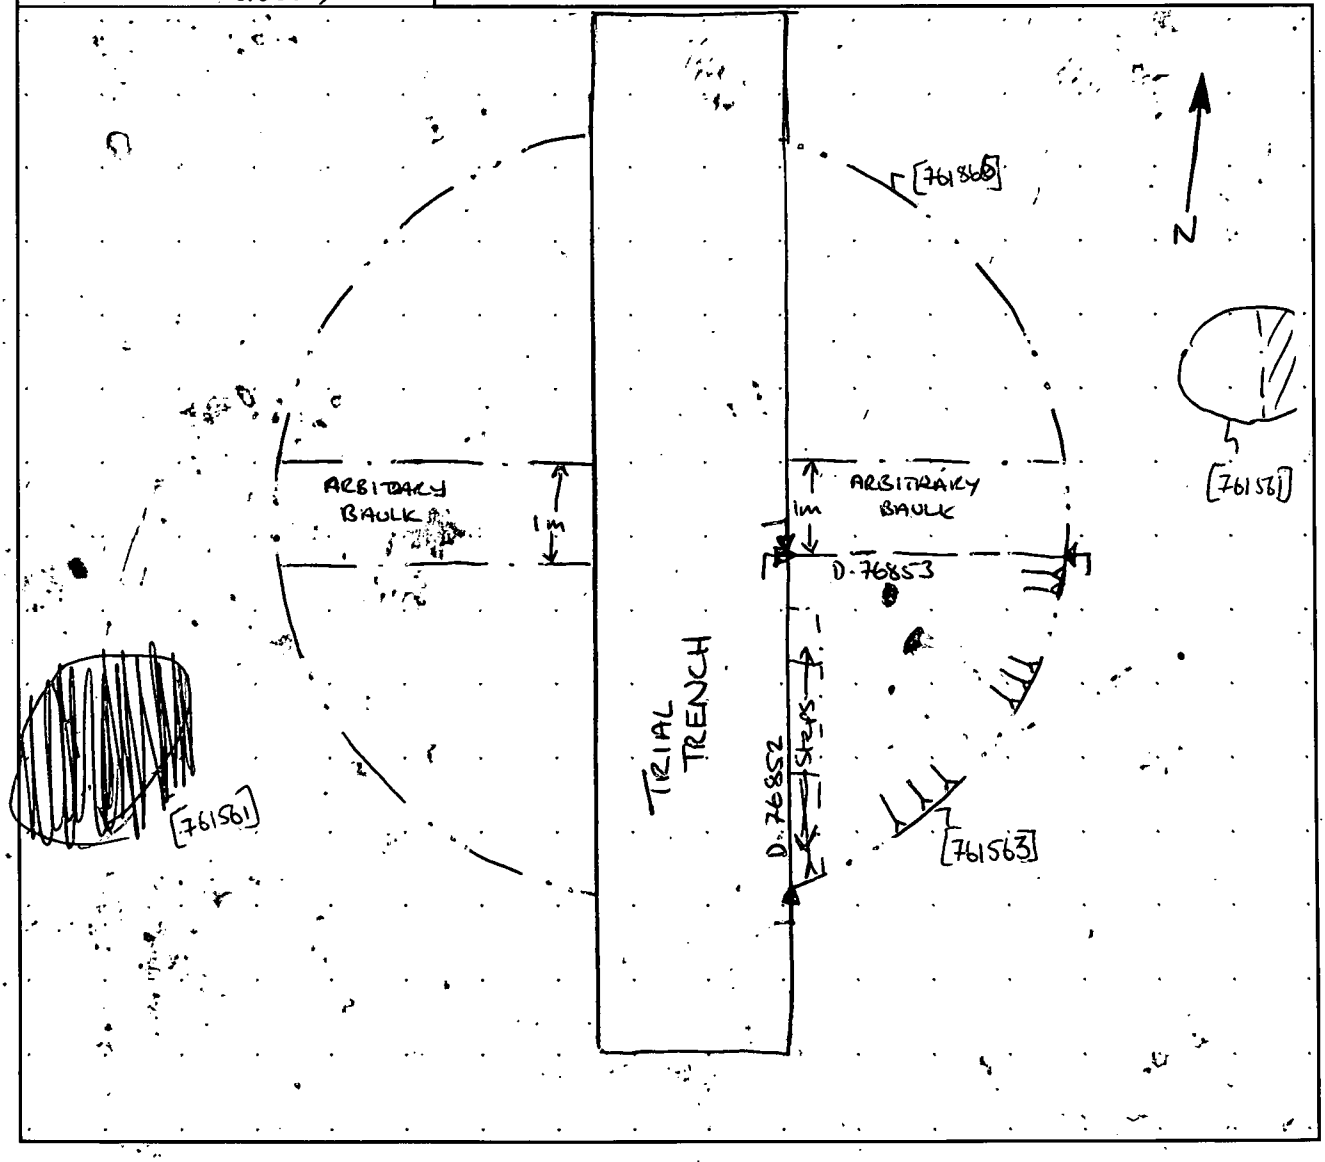

LARGE PIT / GROUP OF PITS WHICH HAVE BEEN INTERPRETED AS A POND / WATER STORAGE. THE PIT, AS VISIBLE ON THE SURFACE HAS A DIAMETER OF C.10M. THIS CUT [761563] PERTAINS TO THE SE QUADRANT.

Unlike the profile revealed in the NE quadrant, which slopes gradually, the profile in this quadrant drops steeply to a depth of 1m (continues below this, however this is depth limit for hand excavation).

This feature contains 8 fills (761564) - (761571).

Refer to context (761564) (761565)

ADDITIONAL INFORMATION
*(any further details that may be important for understanding the context, including items marked * overleaf)*

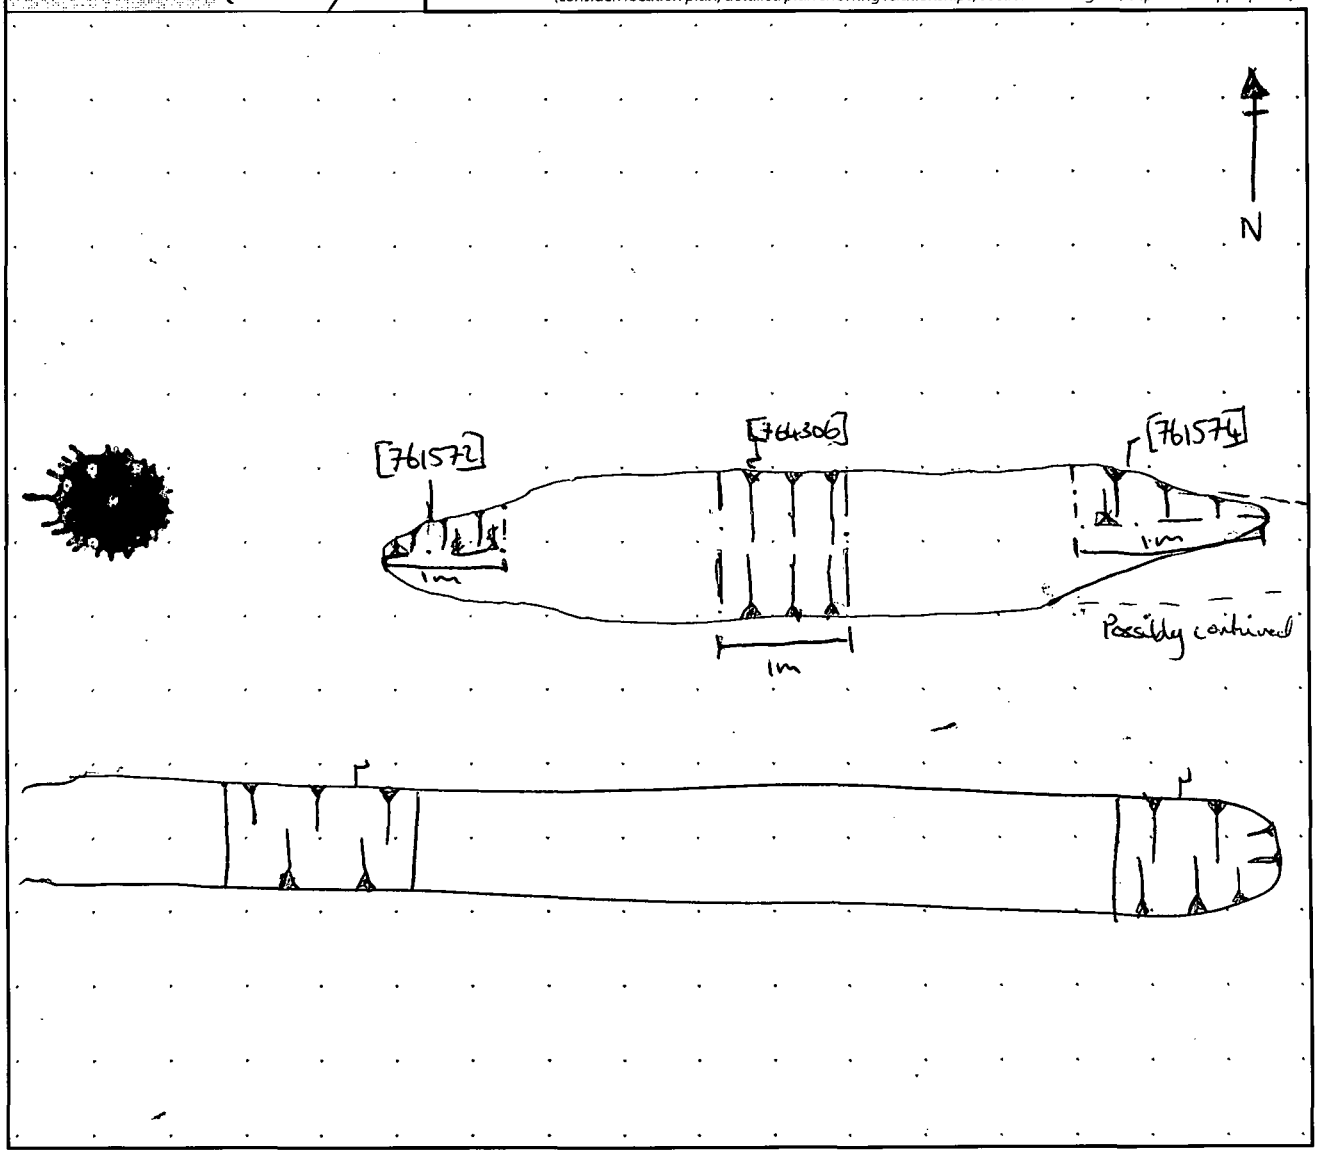

Terminus of a ditch or gully which appears to disappear, through either rooting or truncation to the east. Same as [761572] & [764306].

Contains only 1 fill

There is another ditch running parallel to this feature, it is likely that the two are contemporary and that this feature appears to end due to truncation caused during ~~marking~~ machining/ ploughing processes.

Refer to context (761573)

SKETCHES

ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

Deliberate backfill of a pit. Consist faunal remains - sheep and lamb. At the beginning it could be assume, that animal remains are in anatomical order, but it turned out only spine and some ribs are. There are some big parts missed - eg. mandible, and other parts were situated randomly. No other finds in this unit. Bones are very well preserved. There was no other finds in this unit. Context got recognized by differences in soil's colour and consistency.

LF (TN) The fill is very loose. Although no object clarity, this feature is probably post-medieval. Exact clarity

Refer to context [761790]

ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

Burnt infill of a pit. Possibly made in single event, initially burnt. Situated between two layers – natural infill (761795) on the top, and deliberate backfill (761793) beneath. Unit contained no finds, although bulk sample was taken, because of high frequency of charcoal, and other burnt material (eg. clay). Unit got recognized by clearly visible differences in soil colour and consistence.

L.E (TM): This fill was not disturbed by natural processes (rain, roots). We couldn't distinguish between the daub and natural burnt clay and the charcoal fill.

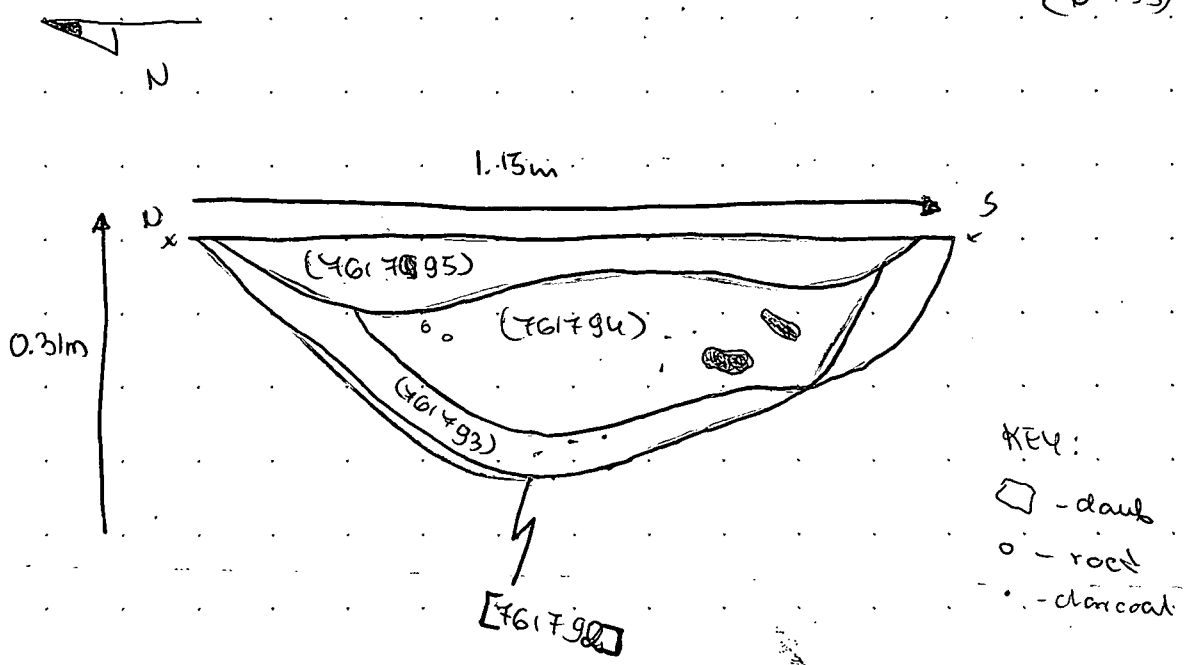

Refer to context: (761793), (761794), 4

Posible pit at building 761809. There is only 3 pits associated to this building, 2 of them are fire pits but not this one. ~~Possible~~ This pit could be a post-hole with rocking signals associated to a big timber.

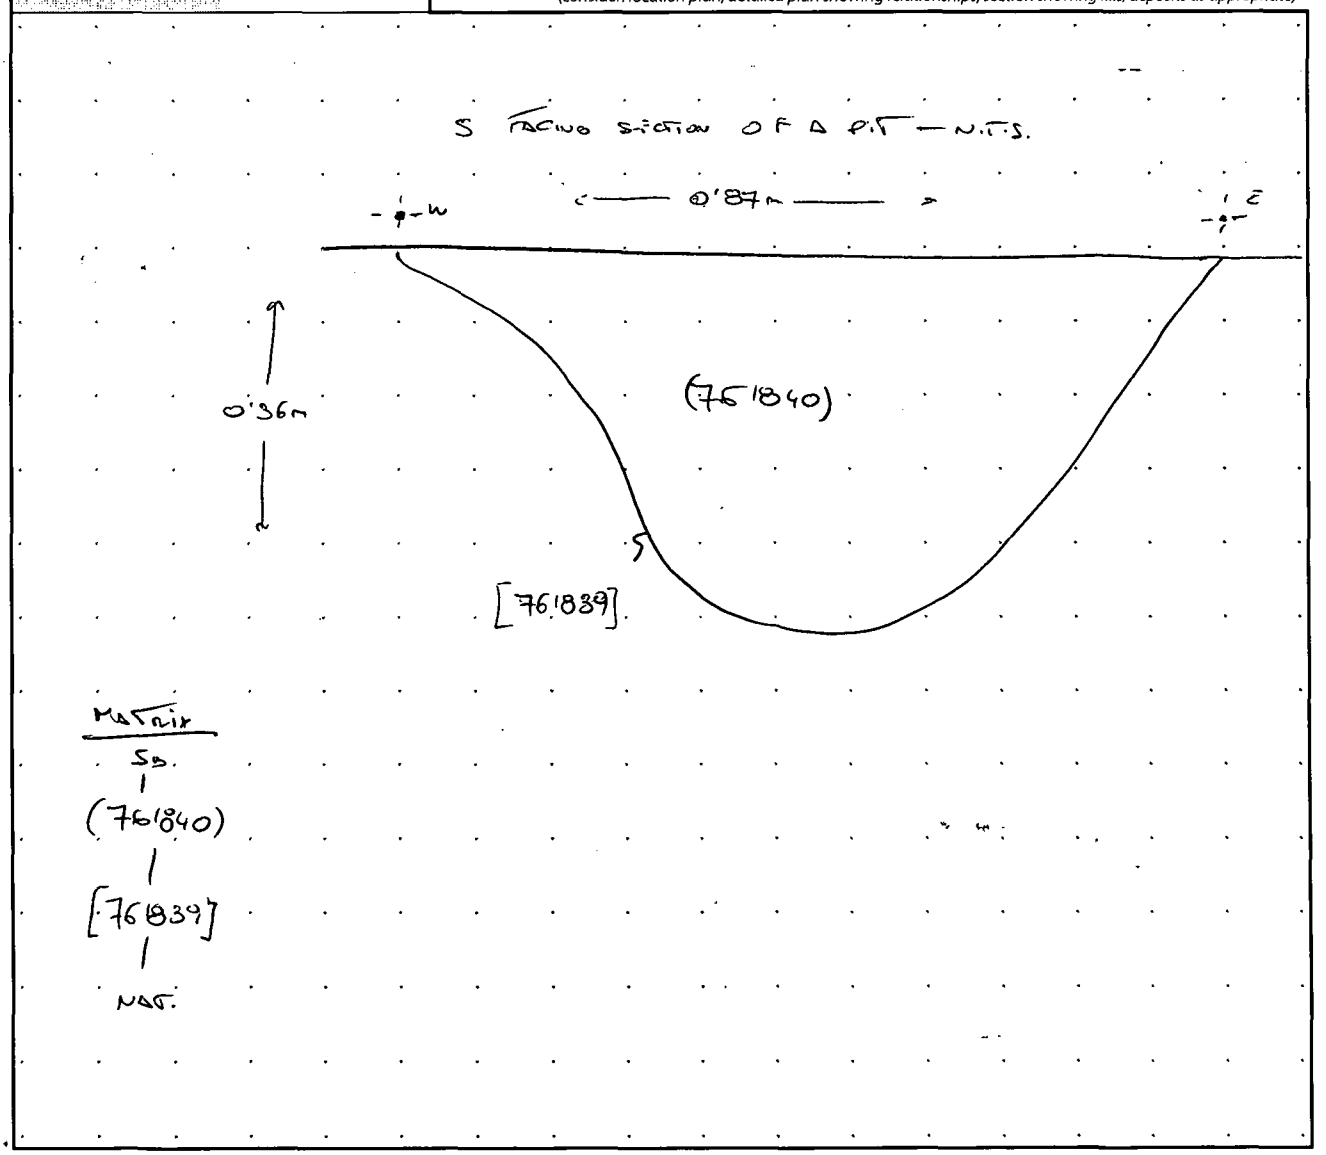

Is located at the S of the building. Posible related with the post holes: Check [761810].

~~Also is the~~ Also could be related with the only non deviated post hole [761836].

Refer to context [764611]

SUB-OVAL ~~IRREGULAR~~ PIT [761854] INVESTIGATED IN A 0,80 x 0,30 M m SLOT ONLY IN THE SW HALF PORTION OF THE FEATURE.
THE PIT WAS FILLED BY ONLY ONE NATURAL INFILLING (761853) THAT WAS WITHOUT ANY ARCHAEOLOGICAL REMAIN HELPFUL FOR DATE ~~THE~~ HIS DISUSE.
THEREFOR THIS PIT IS CLOSE TO ANOTHER SIMILAR FEATURE [761852] THAT WAS filled by similar NAT. INFILLING and CONTAINED A ROMAN POTSHERD. ~~THE FEATURE~~

THIS PIT is PART OF A GROUP OF SIMILAR FEATURES IN PART ALREADY RECORDED [761852]. IN PART OBSERVABLE IN PLAN. ~~THIS GROUP OF FEATURE~~ THE DISPOSITION OF THIS FEATURES DON'T PERMIT TO RECOGNIZE ANY PARTICULAR PATTERN. ~~OR~~ OR ORGANISATION.

DELIBERATE BACKFILL AND ONE OF THE TWO TOPFILLS OF BIG PIT/POND [761866]. INVESTIGATED IN A 5 x 5 m SLOT. THIS FILL IS VISIBLE ONLY IN THE EAST FACING SECTION AND IT WAS FILLING A PROBABLY NATURAL DEPRESSION. FOR COMPOSITION AND COLOUR IT IS SIMILAR TO A MIX BETWEEN THE NEARBY FILLS AND THE SURROUNDING NATURAL SOIL AND THE DEPOSITIONAL EVENT COULD BE CONNECTED WITH THE PLOUGH ACTIVITIES.

THE FILL CONTAINED SEVERAL SMALL STONES WITH SUB ANGULAR OR SUBROUNDED SHAPE (0,02 - 0,08 m ø), few chalk flakes, and few IRON PAN flecks.

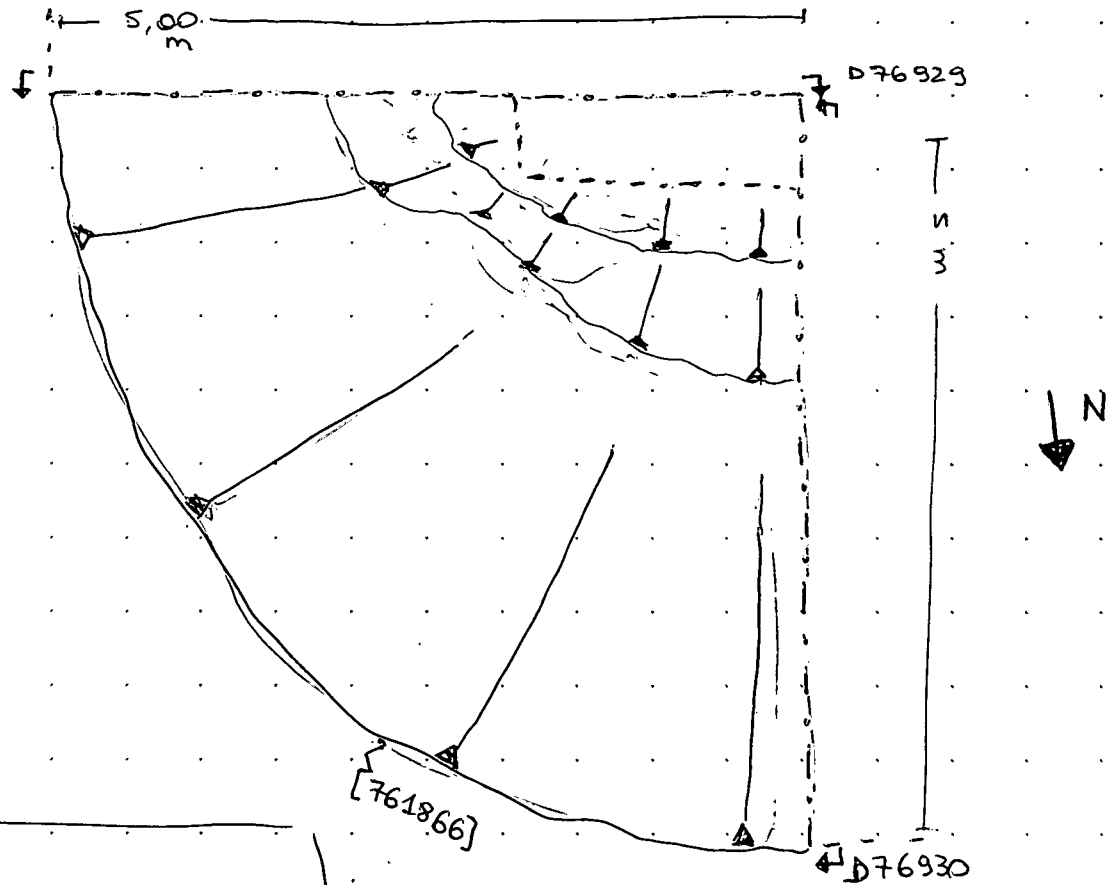

IT CONTAINED ALSO FEW ANIMAL BONES (cattle and OVICAPRID).

NATURAL INFILLING AND PRINCIPAL TOPFILL OF BIG PIT / POND [761866].
INVESTIGATED IN A 5 X 5m SLOT IN CORRISPONDANCE OF THE NORTH-EASTERN SIDE OF THE FEATURE.
AS OSSERVABLE IN SECTION, THIS FILL WAS PARTIALLY TRUNCATED BY A MODERN EVALUATION TRENCH.
IT CONTAINED FEW SMALL TO MEDIUM SIZE STONES (0,02 - 0,08 / 0,08 - 0,15 m Ø) WITH SUBANGULAR OR SUBROUNDED SHAPE, FEW chalk flakes AND FEW CHARCOAL flecks.
THE FILL CONTAINED ALSO ONE METAL SLAG, FEW HANDMADE OR WHEEL MADE POTSHERDS PROBABLY LATE ROMAN / SAXON AND AN IMPORTANT AMOUNT OF ANIMAL BONES (CATTLE, OVICAPRID, PIG, CAT).

NATURAL INFILLING OF BIG PIT/POND [761866]. THE FILL IS RICH IN gravel ~~and~~ ~~BEDS~~ MIXED WITH A SOIL SIMILAR TO THE SURROUNDING NATURAL SOIL AND WITH THE NEARBY FILLS. FOR POSITION AND COMPOSITION THIS FILLS COULD BE INTERPRETED AS NATURAL SLUMP OF NATURAL SOIL ~~AND~~ ~~IN~~ REDEPOSITIONATED IN THE CENTRAL DEPRESSION OF THE PIT DURING ~~THE~~ HIS ~~PROCESS~~ NATURAL FILLING ~~OF~~.

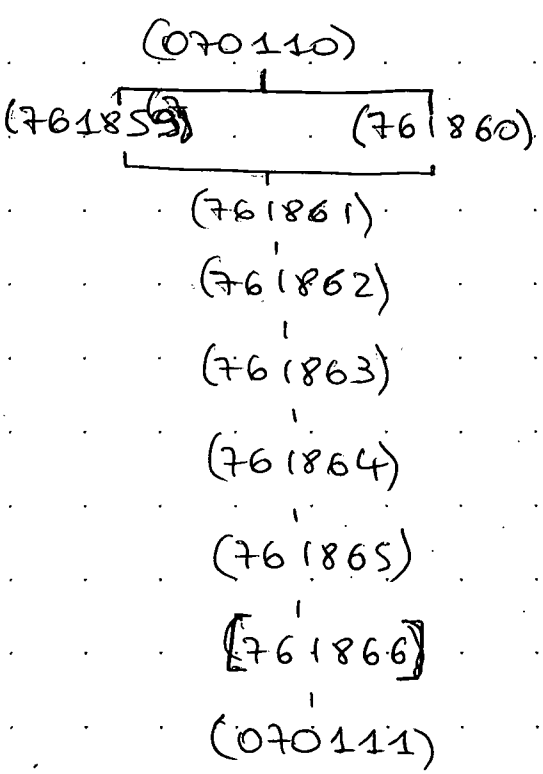

THE FILL CONTAINED SEVERAL SMALL GRAVEL STONES (0,02-0,08 mØ), few chalk ~~f~~lakes AND FEW IRON PAN flakes.

Refer to context *

*(any further details that may be important for understanding the context, including items marked * overleaf)*

NATURAL INFILLING OF BIG PIT / POND [761866] INVESTIGATED IN A 5X5m SLOT IN THE NORTH-EASTERN CORNER OF THE FEATURE. DARK IN COLOUR DUE THE PRESENCE OF SEVERAL CHARCOAL FLECKS, IT CONTAINED ALSO FEW SMALL PEBBLES AND FEW chalk flakes. ARCHAEOLOGICALLY, THIS FILL CONTAINED FEW ROMAN / LATE ROMAN POTSHERDS ([redacted]), ONE SLAG CONNECTED WITH METAL PRODUCTION, AND A IMPORTANT AMOUNT OF ANIMAL BONES (CATTLE, HORSE, ONCAPRID, PIG, CAT, DOMESTIC FOWL). IT CONTAINED ALSO A WORKED BONE PIN (F73254) AND A BRONZE PIN (F 73258). FOR COLOUR, COMPOSITION, INCLUSION AND POSITION IS POSSIBLE TO DESCRIBE THIS FILL AS NATURAL INFILLING CREATED WITH A SLOW DEPOSITIONAL PROCESS DURING A PERIOD OF MASSIVE HUMAN ACTIVITIES IN THE SURROUNDING AREA.

Refer to context:

NATURAL INFILLING AND PRINCIPAL SECONDARY FILL OF BIG PIT/POND [761866]. INVESTIGATED IN A 5x5m SLOT IN THE NE CORNER OF THE FEATURE. This fill was present IN ALL THE SLOT AND IT WAS, IN THE TOP PART OF THE FEATURE, DIRECTY IN CONTACT WITH THE NATURAL SOIL. ONLY IN THE CENTRAL BOTTOM PART IT IS COVERING TWO PREVIOUS FILLS.
IT CONTAINED SEVERAL SMALL PEBBLES AND GRAVEL (0,02-0,08 mØ), few chalk flakes AND few charcoal flecks.
ARCHAEOLOGICALLY, THE FILL CONTAINED FEW ROMAN / LATE ROMAN POT SHERDS (GREYWARE AND LOCAL HANDMADE POT), A IMPORTANT AMOUNT OF ANIMAL BONES (CATTLE, HORSE, OVICAPRID, PIG, DOG(?)) AND A PROBABLY IRON BUCKET HANDLE (F73256).
COMPOSITION, COLOUR AND POSITION PERMIT TO DESCRIBE THIS fill AS RESULT OF A NATURAL SLOW DEPOSITIONAL PROCESS.

NATURAL INFILLING OF ~~[illegible]~~ SURROUNDING NATURAL SOIL OF BIG PIT / POUND [761866].
THIS FILL WAS WITHOUT ANY ARCHAEOLOGICAL REMAIN AND IT WAS COMPOSED BY ORANGISH GRAVEL RICH IN IRON PAN AND RED/REDDISH OXIDATION OF THE IRON. VERY COMPACT.
FOR THE COMPOSITION AND THE POSITION OBSERVABLE IN SECTION IT IS DESCRIPT AS NATURAL INFILLING (BY THE NORTHERN SIDE) OF NATURAL SOIL THAT WAS REDEPOSITATED IN THE BOTTOM CENTRAL PART OF THE PIT, ABOVE THE PRIMARY FILL (761865).

*(any further details that may be important for understanding the context, including items marked * overleaf)*

NATURAL INFILLING ~~AND~~ ~~THE~~ OF BIG PIT/POND [761866].
~~PRESENT~~ IT IS PRESENT ONLY IN THE CENTRAL BOTTOM PART OF THE FEATURE. IT IS PROBABLY THE PRIMARY FILL OF THE ~~FEATURE~~, BUT DUE THE PRESENCE OF THE WATER TABLE THE EXCAVATION STOPS AT 1,20-1,30 m OF DEPTH, AND IT'S NOT POSSIBLE TO CONFIRM THIS ~~THE~~ INFORMATION.
THIS FILL CONTAINED FEW SMALL SUBROUNDED PEBBLES (0,02-0,10 m.Ø), ~~FEW~~ CHARCOAL ~~FLECK~~ FLECKS AND ONLY FEW ANIMAL BONES (CATTLE, HORSE).
FOR THE POSITION AND THE ~~THE~~ COMPOSITION IS POSSIBLE TO DESCRIBE THIS FILL AS RESULT OF A NATURAL DEPOSITIONAL PROCESS.

ADDITIONAL INFORMATION
*(any further details that may be important for understanding the context, including items marked * overleaf)*

SUBCIRCULAR BIG PIT INTERPRETATED AS ARTIFICAL POND (761866), INVESTIGATED IN A 5x5m SLOT IN THE NORTH-EASTERN QUARTER OF THE FEATURE. DUE THE INFORMATIONS OBSERVABLE IN PLAN THE FEATURE MEASURES ROUGHLY 10 X 10 M. AND IT IS TRUNCATED BY THE EVALUATION TRENCH IN HIS CENTRAL PART.
AS OBSERVABLE IN THE EASTERN AND NORTHERN SECTIONS OF THE SLOT, THIS POND IS FILLED BY SEVEN DIFFERENT NATURAL INFILLINGS (FROM (761859) TO (761865)) ALL RESULT OF A NATURAL DEPOSITIONAL PROCESS. THE PRESENCE OF ROMAN POTSHERDS IN THE CENTRAL FILLS (761863)-(761862) AND PROBABLY LATE ROMAN/SAXON POTSHERDS IN THE TOP FILLS (761860) SUGGESTS THAT THIS POND WAS IN USE FOR LONG TIME. IT IS NOT POSSIBLE TO RECOGNIZE ANY RECUT OF THE FEATURE, BUT THE PRESENCE OF TWO LAYERS OF REDEPOSITATED NATURAL (761861)(761864) SUGGESTS SOME MOMENTS OF USE THAT SEPARATED DIFFERENT MOMENTS OF MASSIVE FILLING PROCESS DURING THE USE/DISUSE OF THE SURROUNDING AREA: THIS IS CONFIRMATED BY THE PRESENCE OF IMPORTANT AMOUNTS OF ANIMALS BONES IN ALL THE FILLS AND FOR THE PRESENCE OF METAL SLAGS AND BURNT STONES IN SOME OF THEM.
THE POND IS ALSO CLOSE TO 2 WELL OBSERVABLE RECTANGULAR STRUCTURES WITH POST-HOLES, WITH PROBABLY SAXON CRONOLOGY.

ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

CIRCULAR POST-HOLE [761868] INVESTIGATED ~~NOT~~ ONLY IN THE SOUTHERN HALF PART OF THE FEATURE.

THE POST-HOLE was filled by ONLY ONE NATURAL INFILLING THAT WAS WITHOUT ANY ARCHAEOLOGICAL REMAIN HELPFUL FOR ~~DATA~~ DATATIONS. (761867)

THIS POST-HOLE IS PART OF A GROUP OF FIVE SIMILAR FEATURES THAT CREATES AN ALIGNMENT ORIENTATED E/W AND APPARENTLY NOT CONNECTED WITH ANY OTHER SURROUNDING POST-HOLE [WORKING SHOT 0740430]

THIS ALIGNMENT IN LONG 4,80 m. SOME OF THE POST HOLES ARE CIRCULAR, AND SOME OTHERS SUBOVAL. THEIR DEPTH IS BETWEEN 0,13 m [761868] AND 0,30 m [761876] AND ONLY IN ONE CASE WAS POSSIBLE TO OBSERVE THE PRESENCE OF SOME PACKING-STONES [761878]

ALSO, ONLY IN ONE CASE, THE ORIGINAL POSTHOLE [761876] WAS ~~RECUTTED~~ RECUT BY A SUBSEQUENT POSTHOLE [761874] WITH A DIFFERENT NATURAL INFILLING (DARKER THEN THE REST OF THE OTHERS FEATURES).

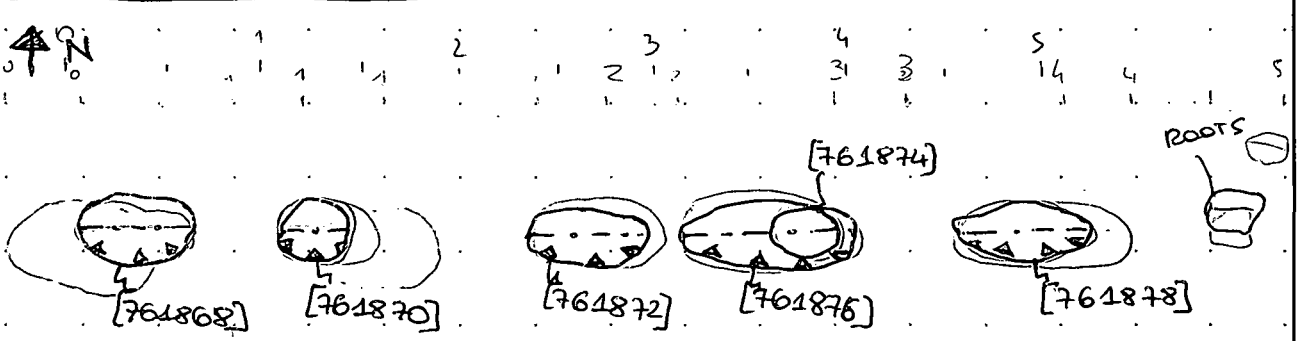

NO FUNCTIONAL INTERPRETATION FOR THIS GROUP OF POST-HOLES.

Refer to context 761867 → SECTION / PLAN / MATRIX.

ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

CIRCULAR POSTHOLE [761874] INVESTIGATED ONLY IN HIS SOUTHERN SIDE. IT WAS FILLED BY ONLY ONE NATURAL INFILLING THAT WAS WITHOUT ARCHAEOLOGICAL REMAIN HELPFUL FOR DATATION.
THIS POSTHOLE IS RECUTTING A OLDER SUBOVAL POSTHOLE [761876] AND HIS RELATED FILL (761875).

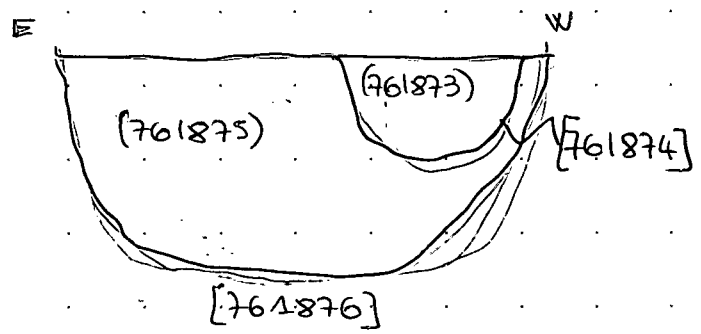

THIS POST-HOLE, FOR THE STRATIGRAPHIC POSITION, SEEMS TO BE THE LAST EVENT IN THIS AREA, BECAUSE IT IS RECUTTING A POST HOLE THAT FOR FILL AND SIZE/SHAPE.. IS PART OF A 5 POSTHOLE ALIGNMENT (LONG 4,80 m AND RUNNING E/W).
(FOR MORE INFORMATIONS ABOUT THIS ALIGNMENT REFER TO THE DESCRIPTION IN CONTEXT SHEET [761868])

SHORT GULLY [761881] THAT RUNS ROUGHLY ~~N/S~~. INVESTIGATED ONLY IN HIS EASTERN PART. IN THE SLOT IS POSSIBLE TO OBSERVE BOTH TERMINUS OF THE FEATURE.
THIS GULLY WAS FILLED BY ONLY ONE NATURAL INFILLING (761882) THAT DIDN'T CONTAIN ANY ARCHAEOLOGICAL REMAIN HELPFUL FOR DATE THE USE/DISUSE OF THE FEATURE, A PART FOR A ERRATIC SILEX BLADE.
THIS GULLY IS CUTTING IN HIS NORTHERN SIDE A OLDER PIT [761879] AND HIS RELATIVE FILL (761880).
NO EVIDENT FUNCTIONAL INTERPRETATION FOR THIS FEATURE, BUT IT IS IMPORTANT TO OBSERVE THAT IS CLOSE TO A MODERN BOUNDARY HEDGE AND TO A FIVE POSTHOLE ALIGNMENT ORIENTATED E/W. (REFER TO LOCATION SKETCH IN THIS CONTEXT SHEET.)

Refer to context *
