ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

FILL (768750) OF DITCH CUT [768749]. WHICH HAS OCCURRED THROUGH NATURAL INFILLING. THE FILL MATERIAL CONSISTS OF A SILTY CLAY OF MAINLY BLACK COLOUR WITH DARK GREY PATCHES.
THE BLACK FILL WAS FIRST BELIEVED TO BE CHARCOAL BUT, HAS NOW BEEN CONFIRMED AS NATURAL ORGANIC INFILLING. THIS FILL ALSO CONTAINS ORANGE INCLUSIONS WHICH INITIALLY APPEAR TO BE C.B.M. BUT, WERE FOUND TO BE NATURALLY . APPEAR FERROUS INCLUSIONS.

Refer to context 768749

SKETCHES
(consider: location plan, detailed plan showing relationships, section showing fills/deposits as appropriate)

ADDITIONAL INFORMATION
*(any further details that may be important for understanding the context, including items marked * overleaf)*

Archaeologists cut around the remains of an animal, most likely a goat. No other cut was discernable, so this cut was made to determine the extent of remaining bones. This was cut into a material that appears to sit on top of the colluvial layer, probably a fairly recent deposit as the remains sat on top of a brick that came from the demolition of the nearby farmhouse, both of which were covered by said deposit/spread.

Refer to context

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Spread/deposit around goat burial. Moderately Compact, greyish brown Salty clay, probably from a fairly recent deposit as it seems to post date the demolition of the farmhouse, as one fragment of the Soft stone brick was sat under the articulated Vertebrae of the goat. Moderate inclusions of Small-Medium Sub-angular Stones, and moderate inclusions of charcoal from a Concentrated area, a Sample was taken. Total thickness of 0.05m also Suggests this Material was a fairly recent deposit, it also sits on top of the colluvial layer.

See [768755] for plan.

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Remains (Some) of a goat. Articulated remains recovered were the top portion of Vertebrae, Rib cage and a back leg. Some bones were lifted and bagged Seperately, the ribs and Surrounding Soil were placed in a Sample bucket for Sampling. Teeth were also bagged Seperate and were in a good state of preservation. It appears to be a fairly recent death as the remains Sat on top of a brick that had come from the demolished farmhouse.

See [768755] for Plan.

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

This is the cut of a N-S ditch. On the NW side the ditch is moderately steep on the same on the SE side. On the SE side the ditch cuts into an earlier ditch [7687611] cutting fill [7687601].

Another relationship slot was dug north of this one & this is the same ditch as [7685561]. There is a larger ditch slot SE with two ditches [7686111] & [7686091].

These slots appear to be field boundaries or demarcations of land (possibly) & appear to have mixed finds assemblages from Roman to medieval pottery.

Refer to context

ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked * overleaf)

This is the cut of a NE-SW ditch. On the NE side the edge is straight whereas on the SW side the slope is moderately steep. This ditch is cut by another ditch NW-SE numbered [7687597] which is a later addition. These ditches are probably part of a larger system of boundary ~~#~~ between fields.

There are a number of others sides dug around this feature some which are into the same ditches as seen in the drawing below.

*(any further details that may be important for understanding the context, including items marked * overleaf)*

FIELD BOUNDARY DITCH - PART OF EXTENSIVE SYSTEM OF DITCHES ALIGNED NE/SW - LARGELY STRAIGHT CONCAVE BASE AND STEEP - MODERATE EDGES. LITTLE / NO ANIM. THROUGHOUT, OCCASIONAL ANIMAL BONE / MEDIEVAL POTTERY SHERDS IN UPPER FILLS INDICATING A ROUGH MEDIEVAL DATE RANGE FOR THIS SET OF FEATURES. PRESUMABLY CONTINUED WATER MANAGEMENT OF THIS AREA, SUPPORTED BY OFTEN LOWER BLUE CLAY WATER ACCUMULATED THAT MULTIPLE PHASES THAN ACROSS WIDTH OF DITCHES EXPOSING VERY FEW CONSISTENT TRACEABLE INDIVIDUAL DITCHES WITH FREQUENT TERMINATING AND DEPTH CHANGES THROUGHOUT.

[768764] REPRESENTS SE MOST DITCH UNIT AND IS ONE OF THE FEW TRACEABLE DITCHES VISIBLE IN OTHER SECTIONS - [768853].

COMPLETE DITCH SLOT MATRIX.

## ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

SINGLE FILL OF DITCH [768767]. NO FINDS - CONTAINING COMPACTION THROUGHOUT - SIMILAR TO UPPER FILL OF [768764] TO THE SE AND [768769] TO THE NW. INTERMITTING BANDS OF DITCHED, FILLING WITH SIMILAR NATURALLY DEPOSITED MATERIAL PRESUMABLY WITH DOWN OVER A RELATIVELY SHORT PERIOD - HEAVIER CONTENT PRESENTING FROM FURTHER DITCHES. ATCHING.

Refer to context

## ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

UPPER FILL OF BOUNDARY DITCH. NO FINDS.
SIMILAR FILL COMPOSITION TO SURROUNDING SERIES OF BOUNDARY DITCHES - INDICATIVE OF CONTINUED USE WITH SIMILAR / DIMINISHING PERIODS OF INFILLING - LARGELY WATER ACCUMULATED CLAY, STAINING ORANGE MOTTLING, AS SEEN IN THE IMMEDIATE ~~AREA~~ SURROUNDING AREA, PRESENT. NOTABLE FILL BY QUARTZ. PRESENCE OF SMALL STONES THROUGHOUT.

Refer to context

VERTICAL SIDED, FLAT IRREGULAR BASE, [redacted]
PART OF EXTENSIVE BOUNDARY DITCH SYSTEM.
PRESUMED MEDIEVAL, ALTHOUGH DATING EVIDENCE IS SCARCE. UNLIKE MAJORITY OF DITCHES TO THE IMMEDIATE SE AND NW [768776] IS NOTABLY DEEPER WITH MEDIUM EDGES. HOWEVER IT DOES NOT APPEAR TO CONTINUE FURTHER N OR S BEYOND THE AREA THEREFORE PROFILE MAY BE LIMITED TO THIS PARTICULAR AREA. FILL IS TYPICAL OF THE AREA WITH DARKER WATER DEPOSITED CLAYEY SILTS OVERLYING CLAY SILTS. NO SMALL THROUGHOUT. WATER BORNE FORMED UNDERCUTTING EDGE ON THE LOWER NW SIDE.

## CUT

(if you are using this section score out section **FILL/DEPOSIT** below)

DESCRIPTION

**Shape**

sub- ☐ rectangular ☐ square ☐ circular ☐ linear ☐ curvilinear ☐ irregular ☐ other* ☐

| Orientation | Sides | Base |
|---|---|---|
| ☐ N-S | ☐ vertical | ☐ flat |
| ☐ E-W | ☐ steep | ☐ concave |
| ☐ NE-SW | ☐ moderate (sloping) | ☐ v-shaped |
| ☐ NW-SE | ☐ gentle (sloping) | ☐ sloping |
| N | ☐ stepped | ☐ uneven |
| | ☐ undercutting | ☐ complex* |
| | ☐ complex* | |

| Dimensions | Length | Width | Depth | Diameter |
|---|---|---|---|---|
| in metres | | | | |

**Shape result of** *(tick all that apply)*

design ☐ material cut into ☐ natural processes ☐ degree of truncation ☐ uncertain ☐

INTERPRETATION

- pit ☐
- post-hole ☐
- stake-hole ☐
- ditch ☐
- ring-ditch ☐
- beam slot ☐
- construction cut ☐
- robber cut ☐
- gully ☐
- palaeochannel ☐
- furrow ☐
- field boundary ☐
- burial cut ☐
- other cut (describe below) ☐

## FILL/DEPOSIT

(if you are using this section score out section **CUT** above)

DESCRIPTION

**Compaction**

☑ compact
☐ moderately compact
☐ loose
☐ friable

**Thickness**

0.20m

**Colour**

light ☐ mid ☐ dark ☐ mottled ☐

| | |
|---|---|
| brownish ☐ | ☐ brown |
| greyish ☐ | ☑ grey |
| orangeish ☑ | ☐ orange |
| yellowish ☐ | ☐ yellow |
| reddish ☐ | ☐ red |
| blueish ☐ | ☐ blue |

black ☐ white ☐ other* ☐

**Composition**

| | |
|---|---|
| clayey ☐ | ☑ clay |
| silty ☐ | ☐ silt |
| sandy ☐ | ☐ sand |
| gravelly ☐ | ☐ gravel |
| peaty ☐ | ☐ peat |

other* ☐

**Inclusions**

| use the following: O: occasional M: moderate F: frequent | stones* | chalk | iron pan | manganese | charcoal | plant remains* | wood | marine shell | bone* | pot | fired clay / CBM | CTP | mortar/plaster | leather/textile | glass | metal | industrial waste | lithics | coarse stone |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| frequency | | | | | | | | | | | | | | | | | | | |
| bulk find | ☐ | ☐ | ☐ | ☐ | ☐ | ☐ | ☐ | ☐ | ☐ | ☐ | ☐ | ☐ | ☐ | ☐ | ☐ | ☐ | ☐ | ☐ | ☐ |

INTERPRETATION

- topsoil ☐
- subsoil ☐
- geological subsoil ☐
- remnant topsoil ☐
- surface ☐
- occupation layer ☐
- dumped layer ☐
- deliberate backfill ☐
- destruction debris ☐
- bedding layer ☐
- natural infilling ☑
- colluvial layer ☐
- in situ burning ☐
- post-pipe ☐
- packing ☐
- cremation ☐
- other fill/deposit (describe below) ☐

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Nearly E-W dir. shallow, mod. sloping sided ditch. The base is slightly concave.

It was cut by a bigger, N-S dir. no [768798] ditch.

The slot was meant to clarify the chronology of the two features: the shallower ditch was dug earlier.

So the two features dimensions are not completely known (as the depth of [768798]

Location: W - L.O.E nearby of SOUTH PART OF TEA 7C.

Refer to context [768796]

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

DITCH SLOT FILL (768806) IS THE FINAL FILL OF THIS FEATURE, SITUATED ABOVE FILL (768805) AND OF LATER DATE STRATIGRAPHICALLY. FILL (768806) HAS LIKELY BEEN DEPOSITED DUE TO THE NATURAL INFILLING OF DITCH CUT [768002] AS A RESULT OF DISUSE. FILL (768806) DEMONSTRATED SOME SMALL STONE INCLUSIONS IN THE SOUTH-WESTERN PART OF THE FILL.

Refer to context [768804] + (768805)

ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

Cut of ditch. Moderately steep on S & N sides. Clear defined edges. No finds in fill. Same as [ ]. There is a larger number of other E-W linear ditches which are around this feature. There appears to be some sort of possibly roman enclosures which act as ~~ditch~~ field demarcations.

Refer to context [768811]

SKETCHES

*(consider: location plan, detailed plan showing relationships, section showing fills/deposits as appropriate)*

## ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

LINEAR DITCH RUNNING NE-SW WITH A SUDDEN B.O.S AT THE TOP + QUITE STEEP SLIGHTLY CONCAVE SIDES + A QUITE GRADUAL B.O.S TO A FLATISH BASE.

LIKELY TO BE A BOUNDARY DITCH FOR A LONG STANDING BOUNDARY WITH MANY PHASES AS THERE ARE SEVERAL DITCHES + RE-CUTS RUNNING ALONG THE SAME ALIGNMENT.

SLOT IN LARGE BOUNDARY DITCH, SAME AS [768592], [768840]

POSSIBLY THE SAME AS [768595] IN SEC 76943 CAUGHT AT AN OBTUSE ANGLE BUT IT DOES NOT SHARE ANY OF THE SAME CHARACTERISTICS.

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Cut of ditch running NE - SW that is cut by ~~ditch~~ smaller ditch [768849].

The ditch runs into the LOE c. 4 m NE and appears to terminate where it is cut by [768849] - it can be seen becoming shallower in section and doesn't appear to continue on the surface

Part of relationship slot so full profile of ditch cannot be seen

Refer to context

SKETCHES
(consider: location plan, detailed plan showing relationships, section showing fills/deposits as appropriate)

## ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

The feature was hard to see on the top after cleaning & so the cut of the feature was overcut on N & S sides. The actual feature itself was fairly steep on the S side & moderately steep on the N side. The feature is the same as [768764] + [ ]. The feature yielded one fragment of Pottery & is possibly Roman. There are a number of other long linears running E-W around this feature & they could be field boundaries that have been moved over the years as the enclosure changed.

Refer to context

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

INITIALLY DITCH CUT [768869] WAS HALF SECTIONED DUE TO ITS NATURE AS A TERMINUS FEATURE.
DITCH CUT [768869] REMAINS FAIRLY SHALLOW ~~0.80m~~ ALONG 0.80m OF the ~~1m~~ 1.05m Slot, whereby it deepens from 0.05m TO 0.10m. FURTHERMORE, IN THIS SAME AREA THE DITCH CUT WIDENS FROM 0.15m TO 0.3m.

ON EXCAVATION OF THE REMAINING HALF-SECTION OF THE 1m DITCH CUT TERMINUS SLOT [768869], THE CUT WAS A VERY GENTLE SIDED SLOPE. WITH IT GRADUALLY FADING OUT INTO THE NATURAL ON ITS SOUTH-WEST SIDE.

Refer to context 768870

## ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

This is the primary fill of ditch [768872], the fill was similar in texture & consistency to (768852). This feature is cut by the later ditch [768853]. There were no finds in the fill. This ditch is the same as ditch fill (768768) [768767] & is a slot dug 3m East of that slot which covers multiple ditches.

Refer to context

ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

This slot was dug as a relationship slot to show the relationship between gully [768877] & [768879]. No relationship was seen between the two gullies which narrowly miss one another. The base of this feature was undulating & so the depth of feature was taken at the deepest pot to be 0.16m. The fill (768876) was very similar in texture & composition to (768878), both being a brownish grey clay. A wrap around section of the feature was drawn and can be seen on drawing #77013.

Refer to context [768877]

ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

This slot was dug to show the relationship between [7688771] & [7688791]. The cut of the feature was fairly clear & easy to see thanks to the bright orange natural gravel. There was no relationship between features as seen on back of [7688761]. ~~The edge of the cut on the N~~ A Wrap around (pair of trousers less) was dug to test the relationship, on it you can see on the N side the cut is clear & defined & moderately steep. The lenght of the features base was undulating & on the opposite N side the edge was clear & moderately steep.

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

This Slot was dug to show the relationship between gully [768879] + ditch slot [768877]. It appeared that both the slots were dug & neither cut one another which establishes that their gully & ditch are probably co-terminus.

The cut of the feature was undulating & the edges were clear. The natural orange gravel underneath was clear & made the cut evident on both sides.

A terminus of C ] in the gully slot [768879] was also dug approx 0.5m from this gully.

Also there was a slot put through SE of this feature [768853].

ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked * overleaf)

Fill of small ditch

Occasional charcoal + pot

Possibly part of a likely deliberate backfill

Loose fill attributed to extremely wet conditions.

Refer to context

SKETCHES

(consider: location plan, detailed plan showing relationships, section showing fills/deposits as appropriate)

ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

Small rounded linier running through fill (768899). Possibly a small gully or ditch cut, or a later cut, to initial ~~[illegible]~~ ditch (?)

No evidence of human activity, fill is of organic material - consistent with the composition of plant material.

Refer to context [768901]

## ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

Cut of possible ditch, changes substantially along linear – See DR NO: 77020 + 77021. The cut rises going East and the cut becomes shallow and squares.

The linear continues unexcavated to the East and another slot, [768599] to the West.

Refer to context

*This form is incomplete if fields marked with ◤ are empty. PTO for additional information (and describing all items marked with *) and sketches.*

## ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

Cut of moderately sized ditch that is possibly cut by smaller ditch [768909] to the south- the fills are near identical so the relationship is hard to determine.

The ditch is likely the same as ditch termini [768800] which lies c. 5m west of [768907]. The ditch runs a further c. 8m east of [768907] before reaching the LOE.

[768907] is part of a series of ditches running through the southern part of TEA 7C, possibly related to drainage.

Refer to context [768909] for section sketch

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

This slot is the terminus of a drip gully which is the same as relationship slot [7688797]. This slot was dug to show the relationship between ditch [7688777] & gully [7688797], it ~~t~~ined at neither feature at either. This fill was a shallow fill only 0.09m deep. No finds were recovered from this fill & it is of unknown date.

Refer to context

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

This is the cut sked for [7688911]. The base was fairly flat & the East edge of terminus rises at a gentle slope. Another slot was dug into this feature to determine the relationship between this gully & the neighbouring ditch. The gully slot seen on the drawing below is [7688879] & the ditch slot [7688877]. Neighther slots had a relationship. No finds or diagnostic material were recovered from this slot. One more linear slot into ditch was also dug see [7688872].

Refer to context

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

This is the cut of a posthole. A total of three postholes were in close proximity of one another. One, [768931] had one fragment of pottery (possibly medieval). The postholes were all very shallow, possibly due to the machine scrapping off too much of the fill. The three postholes are approximately 0.5cm apart from one another.

Refer to context

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

upperfill of ditch; no Bone found; part of a mandible, likely horse or cattle; other finds of pot & CBM material part of a relationship slot, where this ditch cuts a gully (?) to the E's

Also may be refered to as a beamslot due to burntremains of ore in [768599] which has been sampled. Now my section just looks like part of the burning phase.

Refer to context [768934]

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Single fill of possible gully: Cut by [7068934] Ditch / poss beamslot. to N. Also looks potentially like a colluvial layer w/ possible terminus ≥ 10cm to south, so its to be investigated to confirm. 1 piece CBM found

↓

extended approx 50cm; possibly did terminate & due to natural processes & waterflow the fill spread further than the orginal feature → so possible its ~~not~~ terminating but v. unsure

Refer to context [7068934]

SKETCHES
(consider: location plan, detailed plan showing relationships, section showing fills/deposits as appropriate)

## ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

Cut of ditch orientated NW-SE, ~~which~~ its shape is sublinear, its sides have a very gentle slope and the base is concave. As the surface was unclear, the excavation was extended ~~some~~ about 3m looking for more features, but only the ditch was found.
Further interventions will take place in the same ditch to continue the investigation.

*This form is incomplete if fields marked with ◤ are empty. PTO for additional information (and describing all items marked with *) and sketches.*

ADDITIONAL INFORMATION
*(any further details that may be important for understanding the context, including items marked * overleaf)*

Fill of ditch, composed by a compact mottled orangeish brown clay which is found in many other ditches in the area. It is the result of a natural process. No finds were found in it.

Refer to context [768945]

SKETCHES
*(consider: location plan, detailed plan showing relationships, section showing fills/deposits as appropriate)*

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

On both sides of the cut the edges were gentle & the base of the ditch was flat.

No finds or dating material was recovered from the slot.

The terminus of this feature was dug out west of this slot, it's number is [7689B].

Located at North side of TEA 7C (Heart-shaped ditch complex)

This ditch cut no. [769074] shallow ditch/cut → fill Dr. 77073

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

FILL OF ~~ANIMAL BURROW [768987]~~. LARGELY CLEAN CLAY ~~PROBABLY THE RESULT OF RAPID NATURAL SILTING. CONTAINS OCCASIONAL SMALL ROUNDED~~ STONES. ~~GIVEN THE DISTINCTION BETWEEN THIS FILL AND THE FILL OF DITCH [768988], IT SUGGESTS THAT ANIMAL BURROW [768987] WAS CREATED AND THEN FILL WHILE DITCH [768988] WAS OPEN AND UNSILTED.~~ MOST LIKELY JUST NATURAL CLAY IN BETWEEN BANDS OF NATURAL GRAVELS AS NOTICED ON THE WHOLE OF THE SITE. THE INTERVENTION WAS OVER-DUG.

Refer to context (768991)[768992]

ADDITIONAL INFORMATION
*(any further details that may be important for understanding the context, including items marked * overleaf)*

CUT OF ANIMAL BURROW. TRUNCATES THE BASE OF LARGE DITCH [768988], AND WAS PROBABLY CREATED WHILE DITCH [768988] WAS OPEN AND UNSILTED, GIVEN THE REASONS OUTLINED IN ITS FILL (768986). ANIMAL BURROW WAS DETERMINED DUE TO EVIDENCE OF THE CUT UNDERCUTTING THE NATURAL.

MOST LIKELY NOT ANIMAL BURROW BECAUSE THE RELATIONSHIP BETWEEN DITCH AND THIS CUT WOULD HAVE BEEN THE OPPOSITE, THE BIO-TURBATION WOULD HAVE DISTURBED THE DITCH. RESULT OF OVER-DIGGING.

Refer to context ([illegible][768992])

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

FIRM, MID BROWNISH GREY GRAVEL (75%) WITH A SILT MATRIX. THE GRAVEL CONSISTS OF SMALL (0.01m) SA/SR PEA GRIT. ALSO CONTAINS OCC CHARCOAL FLECKS.

APPEARS TO BE NATURAL SILTING OF DITCH [768797] AFTER IT WENT OUT OF USE.

* MATRIX REFERS TO PHYSICAL STRAT VISABLE WHEN THE SLOT WAS EXTENDED. IT IS LIKELY THE DITCH HAS BEEN TRUNCATED BY DITCH [768710] BUT NO EVIDENCE OF THIS IS LEFT TO PROVE IT.

*This form is incomplete if fields marked with ◤ are empty. PTO for additional information (and describing all items marked with *) and sketches.*

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Cut of a likely modern field boundary ditch. Situated Slightly South of the farm building, so most likely would have been contemporary with this, and probably used to dispose of some rubbish.

Refer to context

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Darker upper fill of likely field boundary ditch. Modern finds came from this fill, which included a C20th glass bottle, a bottle cork screw with "Day & Sons Brewers; ST Neots" inscribed, and a couple fragments of china. Therefore safe to assume this ditch was connected with the nearby farm building and likely used to dispose of rubbish.

Refer to context [769002]

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

This is the cut of a N/S running gully in the northern area of site located near to [768977] which is a 2m slot into this gully. This was a very shallow gully and the base was fairly flat. The terminus was half sectioned N-S then after section was drawn was half sectioned E-W. No finds or dating evidence was recovered.

Refer to context

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Mod compact, dark brown, silty clay fill of no [769018] ditch at the North side of N-S strip of ~~trench~~

No finds were in this fill → Period: ?

▽ The relationship is supposed to highlight the relation between [769020] N-S ditch (or furrow) and [769018] ditch

There is no proper evidence for which was first (they could be contemporary) ⇒ ⇒ judging from the section [769018] was dug into [769020] PARTLY as it could terminate there (see sketch drawn / section below)

Refer to context (769019)

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Cut of a nearly N-S dir ditch (or furrow?) no [769020] → it had gentle sloping sides and flat base.
↓ it had one fill no (769021) without any finds → Period?

* Probably it was partly disturbed by no. [769018] E-W dir. ditch → they could be almost ~~to~~ contemporary.

FOR MATRIX & SKETCH SECTION → SEE CON. SHEET (769021)!

Refer to context [769020]

SKETCHES
(consider: location plan, detailed plan showing relationships, section showing fills/deposits as appropriate)

## ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

Very sticky wet clay BM layer which lies below fill (69022) in ditch [69024] and also appears to continue below the natural gravel to the south of the ditch, possibly formed this way through water course activity + erosion?

Finds of plant remains + animal bone.

Appears to be same as (69026) which lies c. 0.3 m north

Refer to context

## ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

Cut of ditch which ~~this~~ was W-E and likely terminates shortly to the east of section 77053.

Possibly the same as ditch [768909] which lies c. 5m west but as there are multiple ditches which appear and terminate in the area it is hard to be certain

Likely was ditch [769027] to the north but the ditch fills are near identical so not 100% certain

Refer to context

## ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

Cut of ditch that is cut by ditch [769024] to the south and has an uncertain relationship with ditch [769029] to the north - likely contemporary.

The ditch appears to terminate around section 77053 and may be on a continuation of ditch [768907] which lies c. 5m west but the number of ditches which appear + terminate in the area make it hard to be sure if it's the same ditch.

Ditch was likely dug as some kind of water channel, with the multiple short ditches in the area being dug as needed for water management

Refer to context | [769024]

*This form is incomplete if fields marked with ◤ are empty. PTO for additional information (and describing all items marked with *) and sketches.*

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Shallow ditch presenting uneven sides and base, likely due to collapse. Shape and waterlain fills suggests the ditch may have been part of a hedgerow

Refer to context [768942]

SKETCHES
(consider: location plan, detailed plan showing relationships, section showing fills/deposits as appropriate)

## ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

Cut of possible drainage ditch.

In plan this cut crosses another as shown in section #77059 and adjacent section #77053

Cut uneven to N where natural slump forms stepped edge Uneven sides and proximity to cut [769041] indicate overlapping ditches or possible cleaning/re-cut of original which continues on the same NW-SE orientation across site.

Possibly contemporary with [469041] due to small gullys (10cm max) in plan connecting the two ditches. also connecting with [769035]

Refer to context

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Cut of possible linear terminus. Terminus of drainage ditch

Terminus unclear in pre-ex as spread/trample makes edges unclear.

Terminus on level above possibly contemporary ditch [769039]
Small gullys cut (7cm - 10cm) seemingly connecting [769041], [769039] and [~~769035~~]

Sections #77059 and #79061 both indications of a possible re-use cleaning where fills seem identical though a cut is not clear in the sections

Refer to context [769039]

SKETCHES
(consider: location plan, detailed plan showing relationships, section showing fills/deposits as appropriate)

ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked * overleaf)

Shallow cut ditch • Possibly trample-gulley.

Same orientation as adjacent ditches and gulleys (NS-SE) but shallow (10cm)

Linear in plan with uneven but parallel sides it has similarities to a furrow but has straighter sides in plan and runs between ditches of the same orientation.

[76903~~5~~]

Refer to context [~~77035~~]

SKETCHES

ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

Fill of shallow gully - possible trample walkway.

The clay possibly formed through prolonged waterlogged natural had a more orangey brown/reddish hue to the grey clay around the feature.

Pen got at the interface of the cut [769043] and - to a lesser extent - part of the fill indicates formation contemporary to adjacent features and of the same method of alluvial deposit settling.

Refer to context [769039]

*This form is incomplete if fields marked with ◤ are empty. PTO for additional information (and describing all items marked with *) and sketches.*

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Cut of possible ditch.

Ditch seems to traverse the site on NW-SE orientation running parallel with adjacent ditches & gullys. Though may overlap others in its construction.

It's flat base and not dissimilar profile, it may be contemporary to [769039] though shallower and may form part of an industrial zone in the area around the cluster of linears SE of the site.

Refer to context [769039]

SKETCHES

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Cut of ditch orientated E-W. Its shape is sublinear, its sides have a moderate sloping and its base is concave.
It is part of an intricated pattern of ditches in the area.
Dating of the ditch is still unknown, so further interventions are still taking place to unravel more information.

Refer to context (769052)

SKETCHES
(consider: location plan, detailed plan showing relationships, section showing fills/deposits as appropriate)

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

This is the construction cut for a farmyard wall possibly delineating the external & internal part of the farm building. The masonry wall had three tiers of English style bricks & underneath there was a layer of yellow sand as the bedding layer for the bricks. This is all part of a larger system of farmbuildings from approximately the 17th Century. Lots of small metal objects have been recorded from around this area relating to the farm. Immediately to the South of this wall it appears to have a slip or some sort of break in which there is a pit which has hundreds of metal objects.

Refer to context

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Cut of a N-S dir. ditch no. [768074]. It had v.gd. sloping sides and flat base. It was really shallow, 0.07m deep.

It contained one fill no. (769075) → no finds were found in it → but the surrounding features categorised as med. objects → this could be med. as well.

Location: North part of N-S dir. strip of TEA 7c. (closer to W-L.O.E)

It was cut by a slightly NW-SE dir. ditch no. [768977] → see dir. 77073 on sketch drawing on sheet (768045).

Refer to context [769074]

Mid-dark mottled brown, gravelly clay fill of no. [769074] N-S dir. cut/ditch → no finds were found in it → the other features are medieval so this ditch could be that as well.

Location: North part of N-S dir. strip of TEA 7c.

FOR SKETCH PLAN → see con sheet [769074] (NW-SE) N-S dir. ditch

This ditch was cut by [768977] ↓ see dr. 77073 below.

Refer to context (769075)

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Natural culuvial infill of linear ditch/gully
Very similar to infills of adjacent ditches and pits.
with pea gravel at the interface with underlying deposits/layers

Possible field boundary or drainage ditch. Lack of rooting or bio turbation likely with fill darker than surrounding natural indicates organic fill washed in by culuvial from hill to West and flooding alluvial from East.

Small sherd (75mm * 100mm) of Medieval tile (with markers exhibiting a bond-scar) within the pea-grit at interface may date the ditch to Medieval - possibly contemporary with farm structure to South of the feature.

Refer to context [709 & 705]

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

E-W Linear shallow cut (0·15m) AS SHOWN in section drawing ~~SH 77080~~ Terminating in slot to the W of [769015] the linear seems to continue East across the site though deviating slightly from a straight line in plan.

The relationship slot dug indicates that it cuts the N-S Linear ditch

Possible field boundary ditch cutting earlier drainage ditch. Supported by the medieval tile found in the fill (769104).

Refer to context

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Cut of gully orientated E-W. Its shape is sublineal, its side in section has a moderate sloping and the base is concave. It is the result of human activity.

A relationship plot was dug to understand the chronology between this gully [769135] and [769137] as both coincide at the point ~~that~~ where the intercation was done.

Apparently this gully [769135] is earlier than the other [769137] that cuts it.

Refer to context (769136)

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

N-S dir. ditch at the N-S ~~strip~~ of TEA 7c (North Side)
It had mod-steep sides and nearly flat base.
It had one fill no. (769141) in which a. bones were found.
Period = Prob. medieval

▽ This ditch cut a shallower one no [769143] which goes NW-SE dir. (Heart-shaped ditch "complex")

FOR SKETCH PLAN/MATRIX → see con sheet (769143) & (769141)!

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Dark brown, gravelly clay fill of no. [769142]
NW-SE dir ditch/cut at the N side of N-S chip of TEN 7c.
No finds were in the fill

? This fill shows high similarity with (769141) fill (of no. [769140] cut) ⇒ Maybe the two ditches were dug similar/same time → but [769140] was dug later (slightly)

FOR SKETCH PLAN SEE CON. SHEET [769142]!
FOR THE OTHER/SOUTH FACING SEC. SKETCH SECTION SEE CON SHEET (769141)!

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Cut of ditch terminus that terminates to the east and runs west. The terminus doesn't taper out to a large degree, with moderate sloping sides similar to the sides of the ~~the~~ ditch. The ~~ditch~~

The terminus lies c. 4m east of slot [ ] and ~~c.~~ c. 12m east of ditch slot ~~[769]~~ [769113]. c. 10m west of [769113] the ditch begins to curve to run south-north

Two as-yet unexcavated ditch terminuses lie several metres north + northwest of [769147]

Refer to context (768145) for section

*This form is incomplete if fields marked with ◤ are empty. PTO for additional information (and describing all items marked with *) and sketches.*

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Natural + colluvial deposit formed from hillwash (from West) and sedimentation.

Pea gravel at interface with cut [769152] and (769002)

Natural around cut [769152] seemed clayey orangy brown so assuming the darker (769153) had organic content though little or no evidence of rooting.

Refer to context [769152]

SKETCHES
(consider: location plan, detailed plan showing relationships, section showing fills/deposits as appropriate)

please see [769152]

ADDITIONAL INFORMATION

BEDDING LAYER FOR CONSTRUCTION (any further details that may be important for understanding the context, including items marked * overleaf)

~~FILL OF A CONSTRUCTION CUT~~. IT HAD OCCASIONAL SUB ANGULAR MEDIUM STONE INCLUSIONS. IT DID NOT CONTAIN ANY MASONARY DEBRIS FROM THE ABOVE DECRUCTION MEANING IT PROBABLY FORMED BEFORE THE DEMOLITION OF THE MASONARY ABOVE. IT IS A WELL SORTED, LOW ENERGY FILL PROBABLY NATURALLY SILTED. IT DID NOT CONTAIN ANY FINDS OR DATING MATERIAL.

Refer to context 769160

## ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

Furrow

Cut of ~~[illegible]~~ that runs NW-SE and ~~[illegible]~~ longer ditch [69165] running NE-SW. Furrow

cuts

The ~~[illegible]~~ is very shallow with only a 0.03m deep clay fill but it is distinct from the gravel natural and visible on the surface.

The ditch grass ~~[illegible]~~ grass was more ephemeral to the NW and appears to terminate c. 5m NW of [69167]. It continues SE for >20m and grows a lot wider and clearer

Refer to context | [69165]

The gravelly fill of ditch [769174]. No finds ~~Attributed~~ to this fill; like in ditches [769054] & [769126] it could be possible for the gravels to have been dumped or for them to be a natural infill via blow in etc..

See [769170] for desc. on fills & formation to see why it may not be the same as fill [769122].

Refer to context

ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

Single fill (769181) of ditch, mid reddish grey Silty Clay that appears to be naturally infilled as the ditch fell out of use. Material suggests some degree of standing water. Occasional inclusions of small sub-angular stones and flecks of pea gravel. This material is cut by a posthole [769178] giving it an earlier phase of construction.

See [769180] for Section.

ADDITIONAL INFORMATION
*(any further details that may be important for understanding the context, including items marked * overleaf)*

Single fill (769185) of ditch, mid brownish grey silty clay that appears to be naturally infilled as the ditch fell out of use. Material suggests a degree of standing water. Occasional inclusions of small sub-angular stones and flecks of chalk. This context is cut by the ~~earlier~~ later ditch construction [769182]

See [769184] for Section.

ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

Cut of ditch [769186] Sub linear in shape as majority is truncated by ditch [769189], running on an E/W alignment. Part of a Series of ditches for water management probably. Filled by two contexts (769187) & (769188). This ditch is cut through the colluvial (768627) and into the natural gravels (760002), and is also cut by a later ditch construction [769189]. It is possible that the parallel ditch [769191] was contemporary with this ditch, but any relationship has been truncated by [769189]

(any further details that may be important for understanding the context, including items marked * overleaf)

Cut of ditch [769191] Sub linear in shape as the top is heavily truncated by ditch [769189], running on an E/W alignment. Part of a series of ditches most likely for water management. Filled by two contexts (769192)+(769193). This ditch is cut through the colluvial layer (768627) and into the natural gravels (760002), and is also truncated by a later ditch construction [769189]. This may have been open contemporary with [769186], but any relationship has been truncated by [769189]

See [769186] for Section
(769179) for Plan
(769181) for location

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Secondary fill (769193) of ditch, mid grey/ish brown silty clay, that appears to be natural infilling as the ditch fell into disuse. Occasional inclusions of small sub-angular stones, with a small lens of pea gravel at the top of the fill. This is cut by the later ditch construction [769189]. This context is not seen on opposing East facing Section DWG # 77099, probably truncated by [769189]

See [769186] for Section

*This form is incomplete if fields marked with ◤ are empty. PTO for additional information (and describing all items marked with *) and sketches.*

ADDITIONAL INFORMATION
*(any further details that may be important for understanding the context, including items marked * overleaf)*

Single Fill (769197) of ditch, mid brownish grey silty clay, that appears to be naturally infilled from when the ditch fell into disuse, material suggests some degree of standing water. V. occasional inclusions of small sub-angular stones, 2x sherds of Saxon pottery.

See [769196] for Section.

ADDITIONAL INFORMATION
*(any further details that may be important for understanding the context, including items marked * overleaf)*

Single fill (769204) of ditch terminus, mid brownish grey silty clay, naturally infilled as ditch fell into disuse. Material indicates some degree of standing water. Occasional inclusions of small sub angular stones, 2x small frags of CBM, one appears to be burned. 5x sherds of possible Saxon cooking pot & 1x small flint flake.

See [769233] for Section.

ADDITIONAL INFORMATION
*(any further details that may be important for understanding the context, including items marked * overleaf)*

This is the cut for a Post (beam) slot dug. The top fill is wider than the bottom where the slope was kept in plan. The top is slightly overcut and the bottom has a rectangular slope to it where the beam sat. It appears to be structural and is small finds numbered 76450. It was well preserved through anerobic preservation!! & the wood. The wood number is C769931).
There are other features in the vicinity including a long capped gully & a wall immediately adjacent to it. Also to the west are more post (beam) slots not dug due to time constraints.

ADDITIONAL INFORMATION
*(any further details that may be important for understanding the context, including items marked * overleaf)*

THE DITCH CUT [769210] DEMONSTRATES A STEEP SIDE ON ITS NORTH EASTERN EXTENT. HOWEVER, THE SOUTH-WESTERN SIDE IS LESS UNIFORM, WITH TWO STEEP AREAS NEAR THE GROUND LEVEL AND BASE OF THE DITCH, BUT WITH A GENTLER SLOPE BETWEEN 0.35M AND 0.5M IN DEPTH. ALTHOUGH, THIS GENTLE SLOPE IS GREATER IN HEIGHT TO THE NORTH-WEST OF THE SLOT.

Refer to context (769211) FOR SECTION.

SKETCHES
*(consider: location plan, detailed plan showing relationships, section showing fills/deposits as appropriate)*

*(any further details that may be important for understanding the context, including items marked * overleaf)*

DITCH FILL (769211) IS OF SILTY CLAY COMPOSITION, AND DARK GREY IN COLOUR. IT WAS FOUND TO CONTAIN SMALL FIND 76955 which is A 0.2 - 0.25M LONG Metal IMPLEMENT. WHICH WAS IN SITU BELOW SOME OVERLAPPING TIMBER. LARGE ~~PROP~~ PIECES OF TIMBER WERE EXCAVATED FROM THIS FILL, INCLUDING BEAMS BELOW A COFFIN SHAPED PIECE OF TIMBER, BELIEVED TO BE A DITCH-CROSSING BRIDGE.

A SMALL MICROLITH WAS ALSO EXCAVATED AT THE VERY BASE OF THIS FILL.

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

DITCH FILL (769213) IS OF GREYISH BROWN COLOUR AND COMPOSED OF SILTY CLAY WITH MODERATE GRAVEL INCLUSIONS. - THIS FILL APPEARS SIMILAR IN APPEARANCE TO FILL (769217) HOWEVER, FILL (769213) LAYS ACROSS THE ENTIRE DITCH AS A BAND.
SMALL FINDS 76951 AND 76952 APPEAR MODERN IN ADDITION TO THE BONE EXCAVATED.
HOWEVER A PIECE OF POTTERY EXCAVATED WAS ESTIMATED TO BE MEDIEVAL.

Cut of ditch terminus [769233], linear in shape, running on an E/W alignment, part of a series of ditches for water management probably. Filled by a single fill (769234). This ditch is cut by ditch [769194] and is cut into the colluvial layer (768627) and natural gravels (760002). Any relationship with parallel ditch [769191] has been truncated by ditch [769194].

ADDITIONAL INFORMATION
*(any further details that may be important for understanding the context, including items marked * overleaf)*

Secondary fill (769237) of ditch recut, mottled reddish grey clayey silt, naturally infilled as the ditch fell into disuse, material suggests standing water has been present. Occasional inclusions of small sub-angular & sub-rounded stones.

See [769198] for Section.
(769179) for Plan.
(769181) for location.

Refer to context

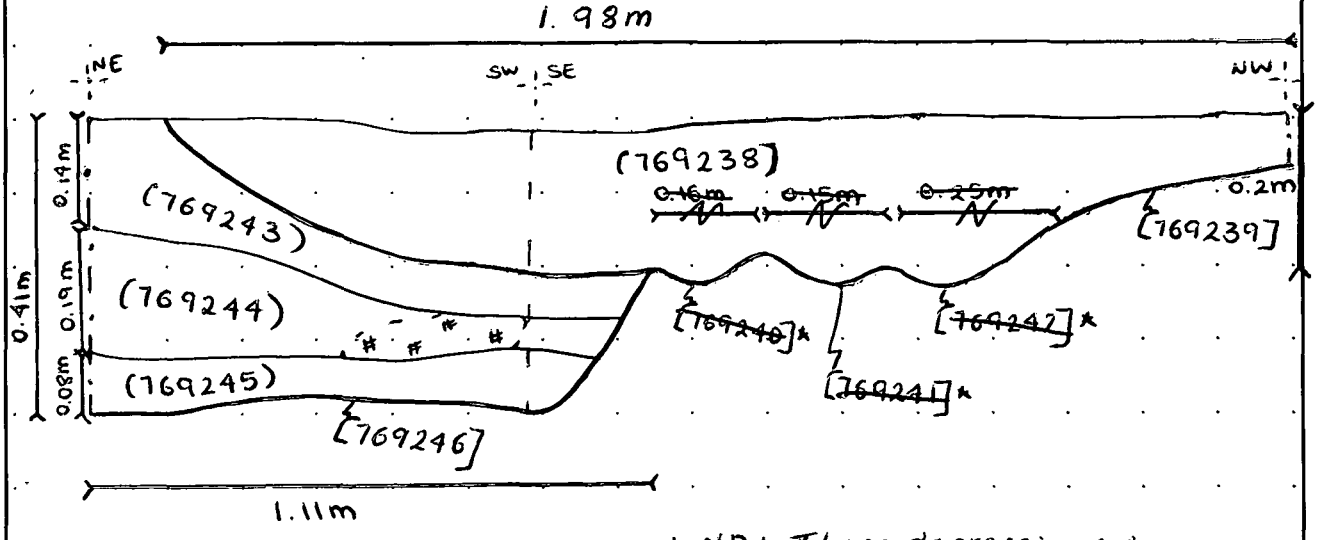
ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Waterlain fill of pond [769239], also fills PHs at the base of the pond (thus presumed contemporary) [769240][769241] [769242]; no dating evidence was recovered.
Fill likely accumulated gradually over time following disuse; some rooting disturbance was noticed, likely owing to the presence of water-loving plants.

Refer to context

SKETCHES
(consider: location plan, detailed plan showing relationships, section showing fills/deposits as appropriate)



* ~~NB: These depressions in the ground within the base of pond [769239] appear to be PHs, though no difference in fills has been recorded.~~

ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

Cut of oblong pond presenting four postholes on its side [769240][769241][769242][769248] - all filled by the same material thus suggesting a contemporary dating. the PHs may have ~~formed~~ part of a hurdle or fish weir.
the pond truncates early medieval ditch [769246], and filled gradually over time following disuse.

ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

This deposit appears to be made up of several 'bands' either more orange or near black in colour, and it presents a charcoal rich lens. This may indicate numerous quick successions of erosion / silting and perhaps tipped burnt material. Presented fired clay / CBM but was too brittle to be retained.

Refer to context (169238)

## ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

NW-SE ditch turning to E some 4m past the excavated slot. Filled by quick successions of backfills and eroded / alluvial material, presented ~~charcoal~~ burnt material throughout and degraded fired clay / CBM in the top fills. Dating evidence recovered from its top fill appears to belong to the early medieval period. The feature runs near parallel to another ditch filled with burnt material [768886]:[768709], and is truncated by pond [769239]

Refer to context [769239]

## SKETCHES

## ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

This is the cut of a pit located in the SW region of the railroad. It is next to a linear ditch & various other features.

The pit itself had shallow edges on the sides & the break of the slope was gentle on E & W sides.

Immediately to the E of the pit are a terminus & two ditch slots seen in the sketch plan.

Refer to context (769249)

ADDITIONAL INFORMATION
*(any further details that may be important for understanding the context, including items marked * overleaf)*

Cut of ditch, which wasn't shown on the pre-ex plan, and has a natural base which is quite fine gravel. Looks like it extends further north fairly clear in-plan, but is not so obvious as to its southern extent.

Has 2 fills, though the definition of these probably isn't obvious in the photos.

Refer to context

*This form is incomplete if fields marked with ◤ are empty. PTO for additional information (and describing all items marked with *) and sketches.*

ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

Lower fill of large linear ditch, which had some animal bones, likely burnt, and a small amount of fragmented pottery.

Looks fairly homogenous, and would've naturally infilled.

Refer to context [76253]

## ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

Latest phase of natural infilling of ditch, which only contained a few pieces of bone. Fairly homogenous.

Hard to date from just bone, but likely medieval.

Refer to context [7692537] (7692547)

*This form is incomplete if fields marked with ◤ are empty. Pl0 for additional information (and describing all items marked with *) and sketches.*

## ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

Cut of ditch, which appears to have been cut by a furrow. Unsure of date, as nothing was found to date it.

It appears that a natural gravelly layer is cutting this feature, so potentially this event was linked to the construction of the larger adjacent ditch.

Refer to context [769253] (769254)

ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

Fill of smaller ditch, with a fairly straight side to the east. Homogenous in appearance, and did not contain any finds. Potentially the earliest feature within this slot. Looks somewhat more like a natural colluvial infilling event than its neighbours.

Refer to context [769253] (769254)

## ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

THIS IS THE FILL OF A DITCH ~~SEEN~~. IT APPEARS TO BE SANDY CLAY, WHICH IS STONY (BUT NOT NEARLY AS STONY AS THE GRAVELLY CLAY OF THE SURROUNDING NATURAL), WITH RELATIVELY FEW OTHER INCLUSIONS. ~~THESE INCLUSIONS CONSIST OF ONE OR TWO ARE BOTH IN~~ AMONG THESE INCLUSIONS ~~WERE~~ ARE/WERE: ONE OR TWO FOSSILS ('DEVIL'S TOENAIL' TYPE), WHICH COULD INDICATE THAT THIS FILL HAS NATURAL ORIGINS; A SMALL AMOUNT OF BONE AND POTTERY (AND A TINY AMOUNT OF CHARCOAL), WHICH INDICATES THE PRESENCE OF HUMANS BUT ISN'T ENOUGH TO INDICATE A 'DUMPED LAYER' OR 'DELIBERATE BACKFILL', AND A SMALL AMOUNT OF WHAT SEEMS TO BE EITHER MANGANESE OR VERY DEGRADED POT (OR BOTH). THE CLAY HAS A MOTTLED APPEARANCE, WITH A BACKGROUND OF MID BLUE/GREEN-GREYISH-BROWN AND HIGHLIGHTS OF ORANGEISH-RED AND REDDISH-BROWN. THIS CONTRASTS WITH THE SURROUNDING NATURAL, WHICH IS (MOSTLY) YELLOWISH-BROWN/ORANGEISH-BROWN. IN CONCLUSION THIS FILL IS MORE LIKELY TO BE NATURAL THAN MAN-MADE BUT MAY HAVE COME FROM AN OUTSIDE SOURCE (EG. ~~SOME~~ ~~KIND~~ TYPE OF COLLUVIAL OR FLUVIAL LAYER).

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

This is the single fill of [769272]. It contains very few small gravels and a lot of marine shells (same type of those in (769275). A little bit of bone was present, however extremely tiny fragments. The fill is slightly darker than (769275) and it is characterised by red mottling.

Refer to context [769272] + [769289]

SKETCHES

ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

A large deep feature containing x3 fills with Iron age pottery, animal bone + a fragment of human bone. The ditch curves towards the west before heading SW. The feature has been truncated by ditch [769283] which also contained iron age pottery. The feature is not clear on plan but is evident in several other slots. [769627], [769305], [769689] and [770101]. There is a faint edge that could be perceived to be the edge or could be part of a seperate ditch that cuts this feature. From the similar features it would suggest that this would have been used as an enclosure/boundry ditch being circular in shape. Unable to clarify for sure as there is no clear outline in plan.

ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked * overleaf)

Second ditch cutting [769279]. Feature is present in nearby slots [769619], [769305], [769689] + [770098]. The feature is not visible in plan but seems to follow the same route as [769279] until it reaches [770098] then appears to continue straight. Contained bone and pot dated to Iron age so possibly could have been a re-cut of the original boundry/enclosure. Ditches cross over between slots [769639] and this one.

Refer to context [769279]

SKETCHES

(consider: location plan, detailed plan showing relationships, section showing fills/deposits as appropriate)

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

[769289] is the cut of a ditch (terminus)
It is relatively wide ca 1.60m and on its south side it was truncated by [769289].
The slot was extended. See (769991)

Refer to context (769917) (769918) (769991)

ADDITIONAL INFORMATION
*(any further details that may be important for understanding the context, including items marked * overleaf)*

FILL (769292) CONSISTS OF A TIMBER/WOODEN PLANK WHICH IS LIKELY INTERPRETED AS A WALKWAY FOR A COLLAPSED DITCH CROSSING OR SMALL BRIDGE. FOLLOWING THE COLLAPSE THE WALKWAY REMAINED HORIZONTAL AND IS STRATIGRAPHICALLY ABOVE FILL (769294) WHICH, LIKELY ACTED AS PART OF THE BRIDGE SUPPORT. FILLS (769293) AND (769295) ARE ALSO LIKELY TO HAVE BEEN DEPOSITED DURING THE BRIDGE COLLAPSE. FURTHERMORE, SMALL FINDS 76952, 76953, 76954 AND 76955 COULD BE INTERPRETED AS PARTS OF THE BRIDGE STRUCTURE.

Refer to context [769210] FOR PLAN (769211) FOR SECTION.

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

~~THE~~ FILL (769293) IS A RELATIVELY WELL PRESERVED TIMBER BEAM MEASURING APPROXIMATELY 0.09M IN HEIGHT, 0.28M IN WIDTH AND, DUE TO ITS NATURE OF CONTINUING INTO THE NORTH-FACING SECTION IT WAS NECESSARY TO CUT THE BEAM, ALLOWING ~~LEAVING~~ APPROXIMATELY 0.2M TO BE RECOVERED. THE REMAINDER WAS LEFT IN SITU AS PART OF THE SECTION, AS SEEN IN ~~DRAWING~~ # 77101.

INTERESTINGLY, FILL (769293) STILL APPEARED TO DEMONSTRATE BARK-LIKE MATERIAL ON ITS UPPER SURFACE HOWEVER, THIS WAS DAMAGED ~~BY~~ REMOVED BY MATTOCK ~~TROWEL~~ ACTION.

Refer to context [769210] FOR PLAN (769211) FOR SECTION.

ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

FILL (769294) IS AN APPROXIMATELY 0.50M LONG, TIMBER BEAM WITH APPROXIMATELY 0.15M DEPTH AND 0.25M WIDTH. IT APPEARS RELATIVELY WELL PRESERVED AND LAYS STRATIGRAPHICALLY BELOW FILL (769292) WHICH, INDICATES IT WAS A SUPPORTING BEAM OF THE DITCH CROSSING / BRIDGE BEFORE A COLLAPSE.

Refer to context [769210] FOR PLAN (769211) FOR SECTION

SKETCHES

*(consider: location plan, detailed plan showing relationships, section showing fills/deposits as appropriate)*

ADDITIONAL INFORMATION
*(any further details that may be important for understanding the context, including items marked * overleaf)*

FILL (769295) ~~IS~~ APPEARS TO BE AN UNWORKED PIECE OF WOOD WHICH, POTENTIALLY COULD HAVE BEEN PART OF THE DITCH CROSSING / BRIDGE STRUCTURE THAT IS BELIEVED TO COLLAPSED AGAIN, THIS WOODEN OBJECT WAS REQUIRED TO BE CUT FROM THE SOUTH-EAST FACING SECTION FOR RECOVERY. ITS PRESERVATION WAS POORER THAN OTHER TIMBER FILLS, PROBABLY DUE TO ITS SMALL NATURE. ~~0.1m~~ APPROXIMATELY 0.1m IN DEPTH, 0.25m IN LENGTH AND 0.07m IN WIDTH.

Refer to context [769210] FOR PLAN (769211) FOR SECTION.

*This form is incomplete if fields maiked with ◤ are empty. PTO for additional information (and describing all items marked with *) and sketches.*

ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

Very gravelly fill of ditch [76935]. The fill is partially overlain by fill (76928) which lies in the centre of the ditch. On the surface the fill is in places indistinguishable from the gravel natural.

finds of pottery + animal bone

Refer to context (76928)

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Cut of a large ditch running E-W that was smaller ditch [769307] to the north. The ditch appears deceptively small ~~in plan~~, on the surface, ~~and it is only when digging that it can be~~ as it a dark fill can be seen in the middle of the ditch but some of the gravel fill appears indistinguishable from natural gravel on the surface and when dug the ditch was much wider than expected.

lies c. 6m SSE of ditch slot [769290]

Update 22/5/19 - This is the same feature that appears in several slots over the North of site. [770098], [769283], [769629] + [769185] It appears to be a recut of ditch [770213] that was used as an Iron age enclosure boundry. Terminus evident in slot [770196]

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

The Fill was one single homogenous layer which consisted of silty Sand gravel & had some bone & lithics in it.

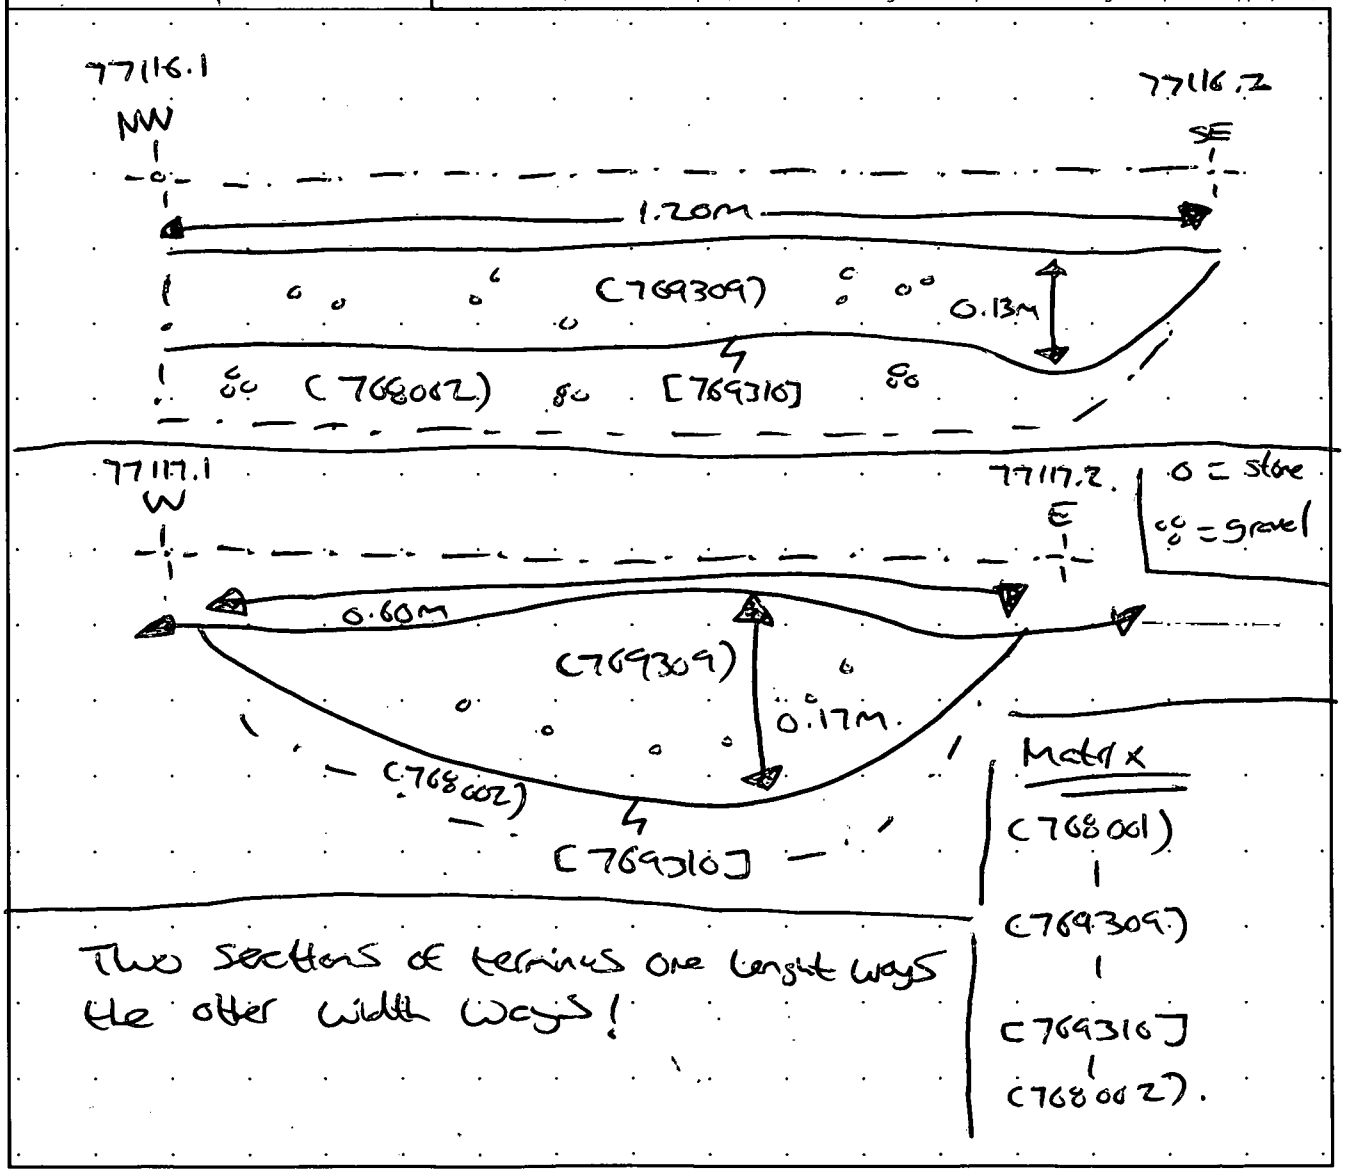
The Fill depth was fairly shallow at it's deepest at 0.17m deep. The Section was recored lengthways & width ways.

Underneath the Fill was a gravelly natural which was orangeish but also in parts grey with small ~~stones~~ rounded stones.

The Fill is the same as the other slots that were dug into this same ditch - (769433) (769435).

Refer to context

SKETCHES
(consider: location plan, detailed plan showing relationships, section showing fills/deposits as appropriate)



Two sections & terminus one lenght ways the other width ways!

## ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

This is a ditch terminus slot in the Northern part of the hallroad in area Trg 7C. The terminus was half sectioned to get the profile & information about the length, it was then sectioned across the width to get that information. The terminus is 5m NW of Pit [7682963] & about 5m NE of the geotech pit.

There are a number of other slots to be dug into this region, a 1m slot into this same ditch was also dug 2m S NW of this feature & is numbered [7693434] & another slot was dug into this ditch [7694367].

## ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

Steep sided linier ditch, continues to the SW of the site, to the NW is the terminus.

Cut has five fills within it, including one, (769312) which might suggest two phases of use regarding the ditch.

The top of the feature is covered by a layer of colluvial.

## ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

Clay fill, backfill for ditch [769311] due to shape of the fill it could suggest a smaller ditch was opened in a later phase, which this was the backfill for.

No finds within fill, one small animal bone though.

Stones found within fill are very small angular and sub-angular, (0.01 - 0.02m in diameter).

Refer to context

ADDITIONAL INFORMATION
*(any further details that may be important for understanding the context, including items marked * overleaf)*

- Fill of Ditch [769311]
- Frequent angular and sub-angular stones in clay. Various sizes (from 0.01 – 0.1 diameter).
- Probably backfill to ditch, no finds within fill.
-

Refer to context

SKETCHES

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Thin layer of bluey/purpley Organic fill at bottom of ditch [769316]. This is probably created by the rotting of organic material when trench was open in the standing water indicated by fill (769314).

No finds, ~~SAMP~~ very small white pca appear found at the bottom of the fill just above natural.

Cut of E-W Linear - possibly part of drainage 'system'

The linear appears to traverse the site broken only by intersections with N-S Linear features and field drainage through the depth varies as shown in [769019] where it seems to terminate, through [769152]; [769165] and [769051]

This cut [769317] cuts fill of the N-S Linear [769616]

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

FILL OF LINEAR DITCH

ORGANIC fill mixed with cultural ~~fill~~ resulting in darker fill than the surrounding natural on (768919) - the fill of NE-SW aligned linear cut by [769317]. Some signs of RARE rooting in the base of the layer.

In the E-W linear; pea grit was ~~ok~~ in this fill from the surface to depth of 0.15m - see drawing #77119 and followed parallell to the base of the cut - this may indicate a trample-deposit over ditch

Refer to context [769317]

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Fill of N-S ditch comprising of mottled grey/brown clay

Some bone fragments found by sondage to N of Section # 77119

Moderate distribution of unsorted small stone (2 - 7mm) with the mottling made it similar to ditches in the close vacinity and possibly of the same colluvial/alluvial mix.

No finds

No indication of a ~~cut~~ clear cut for the edge of the linear (N-S)

Refer to context [76931?]

SKETCHES
(consider: location plan, detailed plan showing relationships, section showing fills/deposits as appropriate)

Cut of fairly small linear ditch, which is cut by a larger ditch [769570]. It was thought that this could be a continuation of [769256], but that would mean this linear, and the larger one would cross over each other, though in plan things weren't particularly clear.

Refer to context

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Fill of E ditch terminus, naturally infilled. Has been cut by a larger ditch. Hearing filled with gravel and small stones. No finds.

Potentially the same as (769757), as because in plan it looks as though they form part of the same linear, however things are not quite as they seem in plan in this area, possibly due to slight under-machining.

Refer to context [769320]

ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked * overleaf)

Cut of NW-SE Iron Age boundary ditch. Fully truncated in the middle by an electric service trench, the reason why only a small part was dug in section. Truncating (769337), fill of cut [769338]. The base is uneven, dips and rises. Hard to tell if it was extended at one point.

Refer to context

## ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

Cut of sub-rectangular pit orientated W-S. Iron Age pot was found in its fill. Its natural infilling suggests that it was open for a certain time after disuse then backfilled with (769372). There is a possibility it was used as an overflow cut for ditch [769335]. Its base is even, slightly stepped to sides

Refer to context

NATURAL INFILLING AND A PRIMARY FILL FROM THE DITCH. [769376] INVESTIGATED IN A 1,00 m x 0,90 m SLOT. THIS FILL CONTAINED OCCASIONAL STONES (0,03-0,05 m ⌀) WITH A SUB-ANGULAR SHAPE.
WE ALSO FOUND OCCASIONAL POT SHERD POSSIBLY FROM LATE ROMAN PERIOD.

Refer to context 769374

SKETCHES

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

This is the construction cut for a wall structure [769378]. The cut is stepped at 0.55m Bgl were there is a deliberate backfill layer to support the foundation and 0.40 Bgl were the is a ≈10 cm wide and 5cm thick stripe of gravel going along-side the wall and seems to go under it (bedding layer).

Refer to context (769380)(769379)

2. Size of materials
3. Finish of stones
4. Coursing / bond
5. Form
6. Direction of face
7. Bonding material
8. Dimensions of masonry as found
9. Other comments

1. Red bricks (not machine-produced) and lighter yellow bricks with a higher content of limestone
2. PTO

4. Four courses of bricks. The highest one is only strechers. The one below seems to be 2 strechers followed by 1 header. The two lowest courses which are *projected (each by approx 5 to 6 cm) thus making two "steps" seem to be apart by bricks mainly arrange by headers. The lowest one right above the bedding layer (769379) seems to be the one that is not that aligned (a bit irregular).
6. The four exposed courses of bricks seem to be the inner face of the wall (its foundation).
7. The bonding material is mortar, in some areas as thick as 1 cm.

8. Refer to scaled plan and section and context sheets (769379) and (769380)

*This form is incomplete if fields marked with ◤ are empty. PTO for additional information (and describing all items marked with *) and sketches.*

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

This is a 5cm thick bedding layer laid as a primary surface to support the wall 769378. It extends 10 cm further than the lower course of bricks forming a "stripe". It consists of fine gravels (0.5–1 cm diameter) (sub-rounded) and dark sand (possibly containing coal?). The fill appears to have had some type of heat effect.

Refer to context 769380

ADDITIONAL INFORMATION
*(any further details that may be important for understanding the context, including items marked * overleaf)*

CUT OF PIT. NOT VISIBLE AT THE SURFACE DUE TO REMNANT SUBSOIL. POTTERY CONTAINED IN QUATERNARY FILL SUGGESTS A c. C13TH OR EARLIER DATE. WHILE ONLY A 1m SLOT WAS EXCAVATED, THE BASE SUGGESTS A LARGELY IRREGULAR SHAPE. WHILE FINDS WERE PRESENT, THE QUANTITY SUGGESTS IT IS UNLIKELY TO HAVE BEEN A REFUSE PIT. IF AN EXTRACTION PIT, NO TRACES OF THE MATERIAL IN QUESTION REMAINS. BOTTOMING OUT AT THE TYPICAL SAND/GRAVEL NATURAL, AND THERE IS NO CLAY LINING THE SIDES. POSSIBLY COMPACTED BY MACHINE.

Refer to context [769391] (769392)

SKETCHES

ADDITIONAL INFORMATION
*(any further details that may be important for understanding the context, including items marked * overleaf)*

THIS IS THE FILL OF A PROBABLE GULLY TERMINUS. THERE ARE FEW INCLUSIONS, MOST OF WHICH ARE NATURAL, SUGGESTING THAT IT FORMED THROUGH SOME NATURAL PROCESS. ~~ALTHOUGH~~ THERE IS A NOTICEABLE ~~DI~~FFERENCE, IN COLOUR, BETWEEN THE FILL AND THE NATURAL, ALTHOUGH THE INTERFACE IS SLIGHTLY BLURRED IN SOME AREAS. THIS COULD INDICATE ~~A COLLUVIAL~~ AN ALLUVIAL ~~&~~ OR COLLUVIAL LAYER. BG

ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

THIS IS THE CUT OF WHAT APPEARS TO BE A GULLY TERMINUS. MUCH OF THE FEATURE HAS BEEN TRUNCATED, EITHER BY THE MACHINE ~~DURING EXCAVA~~ THAT WAS STRIPPING THE SITE, OR DURING SOME OTHER ACTIVITY, BEFOREHAND. THE FEATURE MIGHT ALSO BE A VERY SMALL DITCH; THIS IS SUGGESTED BY THE PRESENCE OF SIMILAR FEATURES NEARBY, WHICH MAY OR MAY NOT BE RELATED. THE IRREGULARITY OF THE BASE COULD INDICATE THAT THE FEATURE IS NATURAL BUT THE DEGREE OF TRUNCATION MAKES IT DIFFICULT TO BE CERTAIN

ADDITIONAL INFORMATION
*(any further details that may be important for understanding the context, including items marked * overleaf)*

LARGE SUB CIRCULAR PIT WITH A SUDDEN B.O.S AT THE TOP, STEEP SLIGHTLY CONCAVE SIDES + A QUITE SUDDEN B.O.S TO A CONCAVE BASE.
THERE IS A LARGE AMOUNT OF BIOTURBATION FROM ROOTING CAUSING IRREGULARITIES IN THE SIDES + BASE.

CUT FOR A CREMATION, IT IS NOT CLEAR IF [769574] IS A SEPARATE CREMATION PIT OR A SIGNIFICANT DISTURBANCE CAUSED BY ROOTING ON THE EASTERN EDGE OF THIS PIT.

Refer to context

## ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

Cut of posthole that lies c. 2m north within the boundary of a ring ditch. Part of a series of postholes in a line running NE-SW, with Posthole [69149] c. 4m SW of [69404], and posthole [69066] c. 4.7m SW of [69404].

Very small and ephemeral posthole, visible on surface but unclear in section due to small size and very dry baked ground

Refer to context

ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

DITCH FILL (769422) IS THE SHALLOW FILL OF DITCH CUT [769421]. DUE TO ITS SHALLOW DEPTH, SOIL COMPOSITION, LACK OF RAIN AND MANY SUNNY DAYS. THIS FILL HAS BECOME CONCRETE-LIKE AND DIFFICULT TO INTERPRET. HOWEVER, IT IS LIGHT IN COLOUR, AND POSSIBLY SUN-BLEACHED TO A ~~GREY-BROWN~~ BROWNISH-GREY COLOUR WITH SOME MINOR ORANGE AND BLACK INCLUSIONS.

Refer to context [769421]

ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

This is the cut for ditch [769434]. On the SW side the edge is very steep (almost vertical) whereas on the NE side the cut is more shallow & gentle.

This is one of three slots into this ditch and is positioned between termini [769310] & ditch slot [769436]. There is also a pit SW of feature [769296] & a geotestpit SE of the feature.

Refer to context

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Cut of ditch? terminus with sublinear shape, orientated E-W. Its sides have a steep sloping, the base is concave. It is the result of human activity.

When digging the feature, it was thought that only the furrow [769442] was present in this area, but the investigation revealed that below it's there was a ditch terminus, which is [769451] that is part of the ditch [769305] and [769307].

It is the ~~fourth feature~~ most recent feature on the relationship sheet after ditch [769447] and before ditch [769453].

Refer to context (769441) [442]

SKETCHES

## ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

NATURAL INFILLING OF FURROW [769479] INVESTIGATED IN 1 m OF SLOT

IT CONTAINS OCCASIONAL STONES (SMALL SIZE, WELL SORTED, SUB. ROUNDED AND SUB. ANGULAR SHAPE); & OCCASIONAL CHALK (POORLY SORTED).

NO FINDS WERE RECOVERED

THE FILL WAS DRY SO ~~THE EXCAVATION WAS DIFFICULT~~ IN SOME PARTS OF THE BASE IS OVERCUT (SAME IN THE SECTIONS) WITH AN UNEVEN BASE DUE TO THE WEATHER CONDITIONS.

Refer to context

ADDITIONAL INFORMATION
*(any further details that may be important for understanding the context, including items marked * overleaf)*

Cut of potential cremation / small pit.

Shape was originally thought to maybe be a cremation due to close proximity to other cremations.
However small size and shallowness suggest it may just be a small pit.

Refer to context [769481]

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

SLIGHTLY FIRM, DARK BLACKISH BROWN SILT WITH MODERATE SMALL SA/SR GRAVEL + OCCASIONAL LARGER SA/SR STONES, MOST OF WHICH WERE HEAT AFFECTED. ALSO HAD COMMON CHARCOAL FLECKS + SMALL FRAGMENTS OF CHALK.

IT CONTAINED A LARGE AMOUNT OF PRE-HISTORIC POT + BONE. THE BONE IS A MIXTURE OF UNBURNT ANIMAL BONE FROM AT LEAST 2 DIFF SPECIES + SMALL FRAGMENTS OF BURNT BONE WHICH IS LIKELY TO BE HUMAN.

* THIS WAS 100% SAMPLED IN 10CM SPITS TO CREATE A FULL SPATIAL SAMPLE OF THE CREMATION

- CLEANING THE TOP: 76866 10L
- FIRST 10CM SPIT: 76867 + 76868 80L
- 2ND 10CM SPIT: 76869 + 76870 70L
- FINAL 10CM SPIT: 76871 + 76872 70L

THIS IS PROBABLY A PRE-HISTORIC CREMATION

(769489) DELIBERATE BACK FILL OF PIT

THIS FILL SHOWS A COMPACT CLAY COMPOSITION, WITH CHARCOAL INCLUSIONS, CONCENTRATED ON THE SIDES OF THE FACING SECTION, AND MANGANESE TRACES MORE PRESENT ON THE CENTER OF THE LOWER PART OF THE FILL.
BY OBSERVING THE CHARACTERISTICS ABOVE, WE CAN OBSERVE AS THE DELIBERATE BACKFILL LOOKS LIKE DIFFERENT FROM THE NATURAL GROUND. THE NATURAL GROUND SHOWS A MORE LOOSE COMPACTION WITH GRAVEL.

NO FINDS FROM THIS FILL.

Refer to context [769488] FOR PLAN SKETCHES
*(consider: location plan, detailed plan showing relationships, section showing fills/deposits as appropriate)*

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

~~Primary fill~~ Primary Fill of ditch Slot [769493] - Same as fills of other slots into same ditch listed - (769435), (769433), (769309). Fill had no finds however other slots into this ditch had medieval Pottery in them.

>10% charcoal >10% Small Sized Stones

This Fill Sits on top of a layer of burnt material (769505) ~~[illegible]~~ and underneath the cut for this ditch is another ditch [769495].

This ditch is therefore a recut however it is interesting to note that there are no ~~recut~~ ~~cuts~~ representations of the earlier ditch [769495] in any other of the three slots dug into this ditch [769436], [769434] & [769310] which may indicate the latter ditch is a terminus.

Refer to context [769493]

Edge of cut for ditch on SW is a ~~harsh~~ harsh sharp break of slope however this is U-Shaped overall on the NE side of the ditch the break is less harsh. This is a recut of an earlier ditch [769495]. On the SW side underneath this cut there is also a layer of burning. No finds were recorded from this slot.

Two other slots & a terminus were dug into this ditch and are ~~numbered~~ numbered in order [769436], [769434] & [769310]. However these slots had no evidence of a ditch slot beneath them.

Refer to context (769492)

Primary fill of ditch slot [7694495]. Fill had no finds. This fill is cut by a later ditch [7694493]. The fill was very blue & could be colluvium silting causing the infilling of the slot.

>5% small sized stones.

ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

The break of slope of the ditch is fairly steep on the SW side & is steep on the NE side & the ditch is V-shaped. This ditch is cut by a later ditch [769493] which is seen in three other slots [769436], [769434] & terminus slot [769310]. This particular ditch has not been seen in any other slots & appears to start in this ditch which has just picked it up. Therefore it could be a terminus.

Refer to context [769494].

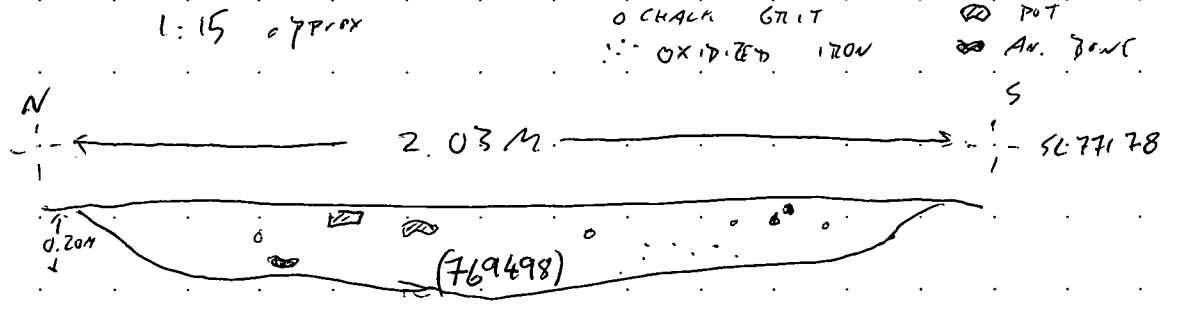
ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

NAT. SILTATION INTO POSS. PIT BOUNDARY WITH (769508) SLIGHTLY BLURRY, BOTH SIMILAR IN ~~COLOUR~~ COMPACTION AND COMPOSITION, BEING (769508) MUCH MORE GREY SAMPLED TOP AND BOTTOM LEVEL BECAUSE THEY WERE SEEN (THOUGH VERY STARSE) POSS. BURNT BONES, BUT DIFFICULT TO IDENTIFY BETWEEN OCCASIONAL BOTH CHALK GRIT AND VERY SMALL LAND SNAIL'S SHELLS (THESE ONES TOWARDS THE NE QUARTER OF THE FILL) OCCASIONAL POT. (A POT ALSO ⇒ UNDERSTOOD INITIALLY AS POSS. CREMATION (ALTHOUGH WITH MASSIVE BIOTURBATION ⇒ ROOTING TOWARDS THE SIDES OF THE FILL), BUT ON SECTION ~~IS~~ IS NOT POSS TO IDENTIFY A PROPER CREMATION'S CUT. OCCASIONAL AN. BONE ALSO, MOSTLY SMASHED IN THE HEAVE CLAY.

Refer to context ~~[769499]~~

SKETCHES
(consider: location plan, detailed plan showing relationships, section showing fills/deposits as appropriate)



Note: Because this was thought to be a cremation, it was dug in this way but is another fill rather than a fill & cut.

ADDITIONAL INFORMATION
*(any further details that may be important for understanding the context, including items marked * overleaf)*

This is a layer of burning which sits underneath ditch fill (769492). It appears to sit isolated & its function is unknown. It does not look like a kiln & is likely a rake spread. It could be in relation to Fill (769492) because this fill of ditch had charcoal in it. It is possible something was burnt & then the ditch was slowly filled over time. No bones or finds came from this layer.

Refer to context (769492).

SKETCHES
*(consider: location plan, detailed plan showing relationships, section showing fills/deposits as appropriate)*

See (769492) for section drawing

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

MODERATELY DISTINGUISHABLE FROM (769498), THIS FILL HAS MORE GREYISH HUE, SLIGHTLY LIGHTER, AND MORE SPARSE IRON PAN GRAVEL AT 50% IN VOL, JUST BELOW THE 60-70% SEEN IN (769498)
FOR THIS REASON BOUNDARIES BETWEEN BOTH FILLS ARE VERY BLURRY
OCCASIONAL AN. BONES BASICALLY TOWARDS TOP LEVEL (PERHAPS "EMBEDDED" FROM (769498)?) AND BOTTOM LEVEL OF THE FILL
UNDERSTOOD AS MAIN SILTATION OF MODERATELY WATER LOGGED, INTO [769509], BEING THAT EITHER VERY SHORT DITCH OR VERY LONG OVAL PIT

Refer to context: (769498) [769497]

SKETCHES

## ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

THIS IS THE CUT OF THE NORTHWESTERN QUADRANT OF ~~A~~ AN IRREGULAR, SUB-LINEAR, FEATURE. ~~THE SLOPING END~~ THE ENDS OF ~~BOTH~~ THIS CUT AND THAT OF THE OPPOSITE QUADRANT, [769665], ARE SLOPING, AS IS THE END OF THE NEIGHBOURING CUT, [769497]. THIS COULD INDICATE A BOUNDARY DITCH, WITH SOME AREAS LEFT UNEXCAVATED, TO SERVE AS WALKWAYS. THE UNEVENNESS OF THE CUT SUGGESTS THAT IT WAS DUG BY HAND.

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Cut of large ditch, which runs NW-SE, and is cutting a terminus [769320]. In plan it looked like this was also a terminus of a ditch, though clearly this isn't the case, likely meaning the ditch continues to run NW but becomes less visible.

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Fill of ditch, which is fairly homogenous in appearance. Contained a small piece of likely medieval pot.

Cuts in to a natural, which is very mottled, and looks like there's a layer of blue clay, probably from a colluvial backwash. There's also pockets of gravel above that layer, followed by some more clay above that with a line of gravel at the top. This has been recorded as overcut, due to the dispersed nature of the natural throughout.

Within the fill of the ditch itself are small stones dotted throughout, and is likely that it has infilled naturally over time, and not been deposited.

Refer to context

This is the natural infilling of a Pit. The fill was the same as Pit fill [769525]. It is likely that this Pit was formed from larching along the side of the ditch that these pits ~~are~~ of trees & bushes demarcating the edge of a field boundary.

Refer to context [769524]

ADDITIONAL INFORMATION
*(any further details that may be important for understanding the context, including items marked * overleaf)*

The break of slope on the NE side is fairly shallow as is the SW side. The base of the feature is flat. This pit is located along a NW-SE ditch. & the interpretation of the pits is likely larching. This is bushes & trees located along the bank of the ditch. They probably helped demarcate the edge of the ditch & could be field boundary of land.

These two larching pits are ~~be~~ SE of relationship slot between ditch & Arrow [769542] + [769544].

Refer to context (769523)

This is the natural infilling of a Pit Probably bioturbation or some form of tree/Shrub bowl. They were likely Pits that had bushes & trees along the side of the ditch. It is the same fill as (769523). The Pits were thus likely remnants of bushes on the side of ditches.

NATURAL INFILLING OF SHALLOW PIT [769528] INVESTIGATED AT SOY.

IT WAS FOUND OCCASIONAL ANIMAL BONES NOT WELL PRESERVED DUE TO THE CLAY COMPOSITION OF THE FILL.

IT CONTAINS OCCASIONAL STONES (SMALL SIZE; S.ROUNDED & SUB-ANGULAR; WELL SORTED) & OCCASIONAL CHALK (SMALL SIZE; POORLY SORTED CONCENTRATED IN NW AREA)

HIGHLY ORGANIC INTERFERENCES

## ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

CUT OF POSSIBLE PIT WITH ONE NATURAL INFILLING (769527) INVESTIGATED AT 50%.

THE INTERPRETATION OF THIS FEATURE IS NOT CLEAR, THE SHAPE IN PLAN, AND AS IS CLOSE TO SIMILAR FEATURES [769526] & [769524]; COULD INDICATE CONNECTED BEAM SLOTS, BUT THE DEPTH OF IT (0'12 m) IS NOT SUPPORTING THIS THEORY. FOR THAT REASON, IT WAS RECORDED AS A SHALLOW PIT WITH UNKNOWN CHRONOLOGY.

IN THE ~~SE~~ NE THE SIDE IS GENTLE, CUTTING A LIGHT NATURAL (THE BASE IS CUTTING A GRAVEL NAT); IN THE ~~SW~~ SW, THE SIDE IS VERTICAL AND IS CUTTING A DARKER NAT, REASON WHY THE BASE HAS THIS COLOUR.

REFER TO CONTEXT (769527) FOR PLAN SKETCH.

INTRODUCTION.

THE AREA AT EAST FROM THE DITCH [769114] SHOWN, ON THE SURFACE, BLACK CIRCULAR SPOTS CONSISTING OF CHARCOAL. HALF-SECTION SLOTS WERE OPENED IN ORDER TO CHECK, AND EVENTUALLY DETECT, THE ARCHAEOLOGICAL CONSINSTENCE OF THESE SPOTS. FIVE POST-HOLES WERE INDIVIDUATED (SEE PLAN SKETCHE BELOW). THESE POST-HOLES ARE VERY SHALLOW, WITH A MINIMUM DEPHT OF 0.2M (POST-HOLE 5) AND A MAXIMUM DEPHT OF 0.7M (POST-HOLE 4). A SINGLE DELIBERATE BACKFILL, RICH IN CHARCOAL, WAS INDIVIDUATED IN ALL POST-HOLES. NO ARCHAEOLOGICAL MATERIAL.

[769531]: CUT OF CIRCULAR POST-HOLE

(769540) DELIBERATE BACKFILL OF POST-HOLE

GENERAL OBSERVATIONS.
THE POSITION OF THE POST-HOLES, CLOSE EACH OTHER, MAKES ME THINKING ABOUT A KIND OF STRUCTURE OR ACTIVITY PRESENT IN THIS AREA. IT HAS BEEN NOTICED THE PRESENCE OF CBM TRACES IN THIS AREA ALSO.
FINALLY, WE DON'T HAVE ELEMENTS THAT CAN SUGGEST A CHRONOLOGY. WE JUST GIVE AN INTERPRETATION AS A COMPLEX OF POST-HOLES.

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Cut of furrow orientated NW-SE, with linear shape, sides with a moderate sloping and a flat base. It is the same furrow as on [769442].

It cuts [769543] which is a fill of ditch part of [769544], this fact makes the furrow to be the most recent feature in the relationship slot.

Refer to context (769541)

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

N-S orientated linear ditch, previous slot placed in it to demonstrate the depth and width.

Ditch truncates ditch [769547], relationship slot (DN: 77192) demonstrates that ditch [769545] cuts [769547].

In plan the cut continues both to the north and south.

Refer to context

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Single fill of Ditch [769545]. Inclusions include a small trace of charcoal, Potentially flotting (?), and the occasional white flint fragment.

No finds or Evidence of human activity. Presumably fill has been formed as a result of colluvial build up within ditch.

Above fill is a layer of white chalk with trace within it across the entire Area.

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Very Shallow cut with Single fill (769548)

~~It~~ obvious in plan that the linier continues Eastward until it reaches terminus. Westward the ditch [769547] is truncated by [769545]. Relationship slot (DN: 77192) proves that 769547 is older.

Assumed to be an agricultural ditch of some kind

Refer to context

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

PRIMARY FILL OF PIT [769522]. A COMPACT, GREY CLAY WITH GRAVEL INCLUSIONS. IT CONTAINED TWO QUERN STONE FRAGMENTS. IT CONTAINED SOME LARGER BONE FRAGMENTS THAN PRESENT IN (769549) THAT APPEAR TO BE FROM THE SAME SOURCE, SUGGESTING THE FILLS ARE CONTEMPORARY. THE FILL APPEARS TO BE A DUMPED LAYER OF BONE, POT, FIRED CLAY AND COURSE STONE. SOME OF THE STONE HAS BEEN HEATED, PROBABLY USED FOR BROILING.

## ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

Natural infilling of ditch [769567], on top of the feature, investigated in a relationship slot (1x1.80m).
It contains occasional stones (small size; sub-rounded; sub-angular and angular; well sorted).
~~No pottery were recovered~~
Is cut by the gully [769563]
It was found occasional animal bones, not well preserved due to the clay composition of the fill.

Refer to context

## SKETCHES

NW - SE RUNNING DITCH WITH THREE NAT INFILLINGS (769564) + (769565) + (769566).
NO FINDS (ONLY A. BONE) ⇒ UNKNOWN CHRONOLOGY.
THIS DITCH HAS BEEN INVESTIGATED IN SEVERAL SLOTS [769351] BUT ~~AND~~ ANY OF THEM SHOWS THE SAME SHAPE OR DEPTH. THERE COULD BE THE OPTION THAT THIS DITCH HAS THE TERMINUS BETWEEN THIS SLOT AND THE SLOT (769344)
THE "V" SHAPE OF THE DITCH ~~AS~~ COULD BE SIMILAR WITH THE ROMAN FEATURES USED AS A ENCLOSURE (IN ORDER TO BUILT A FORTIFICATION), MAYBE BEING THE UNKNOWN FEATURE [769569] PART OF THE SUPPORT OF THIS CONSTRUCTION.
THIS WILL BE CONFIRMATED OR NOT IN FUTURE SLOTS.

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Primary fill (769571) of unknown discreet feature [769572] appears to be the Colluvial deposit washed down from the hill to the West of site. Very occasional inclusions of small sub-angular stones. Deposit laid down as the site was out of use.

See [769570] for Section.

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Cut of unknown discreet feature [769572]. Sub-circular (oval) in shape, alligned N/S and sitting within an undermachined spread of remnant subsoil. Vertical sides of hillwash clay changing to steep sides of natural gravels c 15-20cm depth. Base is V shaped, and level suggesting initial interpretation of a tree bole to be wrong. Shape is the result of unknown processes. Filled by two fills, primary = (769571) & Secondary (769570). Definitely archaeological but function remains unknown.

See (769571) for Plan.

## ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

Very shallow cut in a circular shape. Possibly a post-hole that has been machined away leaving only the bottom of the cut.

The post-hole is situated next to a large ditch and a pit [769522] to the west.

Refer to context

CUT OF DITCH. COULD BE POSSIBLE RELATED TO DRAINING AWAY WATER IN THE AREA.

~~THE CUT IS AS THE FEATURE IS DEEPER THEN~~

THE FEATURE IS DEEPER AT THE TERMINUS. THEN AT THE INTERFACE BETWEEN [769597] & [769547] THIS COULD BE DESIGN AS TO ALLOW WATER THAT REACHES AT A ~~AREA~~ CERTAIN LEVEL TO DRAIN INTO IT, DRAINING WATER FROM THE SURROUNDING AREA. POSSIBLY SUGGESTING THAT THE ASSOCIATED CUTS ARE RELATED TO THE MOVEMENT OF WATER. THIS IS SUPPORTED BY THE FLAT BASES OF THE FEATURES.

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

CUT OF POSSIBLE PIT, RECORDED INITIALLY AS A LARGE DITCH [76857], BUT THE FULL EXTENT OF THE FEATURE IS NOT VISIBLE IN THE CURRENT AREA OF EXCAVATION.

THE PIT APPEARS TO CUT TWO DITCHES, [76960] AND [76963]. THESE WERE NOT VISIBLE IN SECTION #76946, POSSIBLY DUE TO THE GREATER DEPTH OF THE CUT FOR THE PIT.

NO RELATIONSHIP WAS VISIBLE IN THE SECTION AT A RIGHT ANGLE TO #77217, SO THIS SECTION WAS NOT RECORDED.

Refer to context [76960] + P (76962) - S.

*(any further details that may be important for understanding the context, including items marked * overleaf)*

NATURAL INFILLING AND A PRIMARY FILL OF THE DITCH [769611] INVESTIGATED IN A 2,00 m X 2,00 m SLOT.
THIS FILL CONTAINED OCCASIONAL STONES (0,03-0,04 m ø) WITH A SUB-ANGULAR SHAPE.
WE HAVE FOUND OCCASIONAL POT SHERD PROBABILY FROM ROMAN PERIOD.

Refer to context: 769608

## SKETCHES

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Fill of terminus (769613) very dense hard material, trowel impossible to use, had to use mattock. Hard clay texture/density

Perhaps fill is product of both natural infilling and deliberate backfill.

~~Terminus cross section & two more fills in fully excavated~~

Refer to context [769612]

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

UPPER FILL OF "PIT" [769644], WITH VERY FREQUENT BURNT BONES (OCCASIONALLY CREMATED) AND A FEW FLAGS OF BURNT CLAY, MEANING REMAINS OF A SMALL DEBRIS PIT (PROBABLY) OR, ANYWAY, LESS PROX. REMAINS OF A POSS. CREMATION WITH MASSIVE BIOTURBATION. THIS SECOND CONCEPT IS SUPPORTED BY THE FACT THAT THIS FILL HAS SEVERAL SIMILARITIES WITH FILLS FOUND AT [769499], [769480], [769485], AND [769400], ALL OF THEM NO MORE THAN 10 M AWAY.

Refer to context (769639, 769640)

*This form is incomplete if fields marked with ◤ are empty. PTO for additional information (and describing all items marked with *) and sketches.*

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Cut of small pit [769646]. The cut had a maximum depth of 0.35m. The cut had a length of 1.17m and a width of 0.68m.

The cut had relitively steep sides and a slightly uneven flat base.

The cut might represent natural processes rather than a deliberate pit cut - however it remains unclear as to why it was formed / constructed.

Two fills (769647) and (769648)

Refer to context (769648)

SKETCHES
(consider: location plan, detailed plan showing relationships, section showing fills/deposits as appropriate)

ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

Fill of cut [7696 46]. The fill had a maximum thickness of 0.29m.

The fill was composed of mottled mid orangish brown sandy clay.

The fill appears to be a phase of natural infilling - The motted nature of the fill might suggest rooting or natural processes.

No finds recored from the fill context

Refer to context [7696 46]

Top fill / deposit of pit cut [7696461]. The fill had a maximum thickness of 0.09m.

The fill was composed of a dark greyish-black silty clay

The fill is most likely a layer of alluvial infilling.

No finds were recovered from the context.

Refer to context [7696461]

ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked * overleaf)

THE TOP FILL OF TRENCH [769651], CONSISTS OF A MIXTURE OF THE FILLS OF [768492] & [768494] WHERE THE TWO DITCHES FLOW INTO [769651], SEEMS TO HAVE ORGANIC ELEMENTS WITH A DARK SILTY COMPOSITION. DESPITE NO CULTURAL MATERIAL FOUND THE FILL IS SIMILAR TO TOP FILLS IN THE AREA. SUGGESTING A SIMILAR DATE TO OTHE LINEAR FEATURES IN THE AREA

Refer to context [769651] For plan

ADDITIONAL INFORMATION
*(any further details that may be important for understanding the context, including items marked * overleaf)*

~~THE TERTIARY~~ THE TERTIARY FILL OF [769651] CONSISTS OF A YELLOWISH CLAY WITH INCLUSIONS OF CHARCOLE DISTRIBUTED THROUGHOUT THE FILL. THE CLAY COULD BE THE RESULT OF NATURAL INFILLING WITH THE CHARCOLE BEING ELEMENTS OF NEARBY PROCESSING OR RAKEOUT. THE CLAY ELEMENT OF THE FILL COULD BE DUE TO THE ~~EARLIER~~ MOVEMENT OF WATER WITHIN THE FEATURE THIS WOULD EXPLAIN THE RANDOM DISTRIBUTION OF THE CHARCOLE.

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

THE SECONDARY FILL OF [769657] CONSISTS OF A BLUEISH GREY CLAY. THERE IS A MODERATE AMOUNT OF CHARCOLE DISTRIBUTED THROUGHOUT THE CONTEXT. THE BLUEISH CLAY COMPOSITION OF THE FILL COULD BE DISTRIBUTED BY STAGNANT WATER WITHIN THE TRENCH. THE BLUE COLOUR IMPLYING THAT IT WAS SEALED BY THE ABOVE LAYER DENYING IT OXYGEN

ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

THIS IS THE FILL OF THE SOUTHEASTERN QUADRANT OF AN IRREGULAR, SUB-LINEAR, FEATURE (SEE [769518]). THE FILL IS SIMILAR TO THE FILL THAT WAS TAKEN OUT OF THE NORTHWESTERN QUADRANT OF THE SAME FEATURE (SEE (769518)), HOWEVER, IT SEEMS THAT SOME OF THE BLUEISH-GREY CLAY THAT OCCASIONALLY OCCURS IN THE SURROUNDING NATURAL MAY HAVE BECOME MIXED IN WITH THE FILL. AS WITH (769518), THERE ARE A FEW INCLUSIONS THAT INDICATE PAST HUMAN ACTIVITY NEARBY BUT NOTHING TO INDICATE THAT THE FILL IS THE RESULT OF ANYTHING OTHER THAN A NATURAL OCCURENCE.

ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

THIS IS THE CUT OF THE SOUTHEASTERN QUADRANT OF AN IRREGULAR, SUB-LINEAR FEATURE, (SEE [769519]). THE ~~FIRST~~ SHAPE OF THIS CUT IS MORE IRREGULAR THAN THE SHAPE OF THE NORTHWESTERN QUADRANT. THERE IS ALSO A DEGREE OF OVER-CUTTING DUE TO ~~THE PRESENCE OF~~ A POCKET OF CLAY IN THE NATURAL, NEXT TO THE FEATURE. THE OVERALL SHAPE OF THE FEATURE (INCLUDING [769519]) SUGGESTS THAT ~~IT~~ IT WAS DUG BY HAND. IT IS POSSIBLE THAT IT IS PART OF A ~~DITCH SYSTEM~~ BOUNDARY DITCH, WITH THE ~~SLOPE OF THIS CUT AND THE END SLOPE O~~ GAP BETWEEN THE END SLOPE OF THIS CUT AND THE END SLOPE OF [769497] SUGGESTING A POSSIBLE CROSSING POINT.

1318-1320

## ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

Cut of small linear ditch, which is cutting a larger ditch. The relationships weren't too obvious in the section facing North, which is why it has been dashed in. The ditch it cuts is probably around Medieval in date, making this later, ~~the~~ or at least in the same age range.

Refer to context (769667) Rev section

1318-20

ADDITIONAL INFORMATION
*(any further details that may be important for understanding the context, including items marked * overleaf)*

Fairly homogenous fill of ditch, no finds - so dating is tricky, though it does cut a ditch which is likely medieval in date.

Likely formed through natural siltation, rather than a deliberate backfill event.

Refer to context [769666] For plan

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Cut of linear ditch, which is the same as [769627]. The natural was an orangey gravel, but underneath there seemed to be a layer of a blue colluvial clay in which a Sondage was placed, and was determined that this was also natural, and not a fill.

This ditch is truncated by a later smaller ditch - [769666].

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Quite a gravelly fill, looks like there's some chalky inclusions too, as there are numerous white streaks throughout. Not too dissimilar from the natural, however this also has silty clay throughout too.

Formed through ~~natural~~ natural infilling.

[769675]: CUT OF TERMINUS OF N-S ORIENTED DITCH

1M SLOT WAS DUG IN THE SOUTHERN PORTION OF THE N-S ORIENTED DITCH IN ORDER TO DETECT THE TERMINUS HERE LOCATED (SEE THE PLAN SKETCHE BELOW). ONE NATURAL INFILLING ON THE BASE AND A DELIBRATE BACKFILL WERE INDIVIDUATED. POTTERY AND ANIMAL BONES WERE RECOVERED FROM THE DELIBERATE BACKFILL.

AS SHOWN IN THE PLAN SKETCHE, THE N-S ORIENTED DITCH IS RELATED WITH A E-W ORIENTED DITCH ([769402] AND [769680]). FROM THE RELATION SLOT WE CAN OBSERVE THAT THE N-S ORIENTED DITCH CUTS THE E-W ORIENTED DITCH.

CUT NUMBERS:

N-S ORIENTED DITCH → [769675]=[769353]=[769680

E-W ORIENTED DITCH → [769402] =[769683]

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

(769676): DELIBERATE BACKFILL OF TERMINUS OF N-S DITCH

BY OBSERVING THE COMPACTION AND INCLUSIONS THIS FILL WAS INTERPRETED LIKE A DELIBERATE BACKFILL. A COMPACT MID ORANGEISH-GREY CLAY NATURAL INFILLING, WITH MANGANESE TRACES, RESTS ON THE BASE OF THE TERMINUS. ON TOP OF IT THERE IS THE DELIBERATE BACKFILL. THIS FILL IS LESS COMPACT THAN THE PREVIOUS ONE AND SHOWS A MID-GREY COLOUR WITH OCCASIONAL MANGANESE TRACES AND MODERATE CHARCOAL INCLUSIONS. POTTERY AND ANIMAL BONES WERE RECOVERED FROM THE FILL ALSO.

POTTERY OBSERVATIONS.

POTTERY SHOWS A ROUGH DARK-GREY SURFACE AND A DARK, BURNT AND ROUGH CORE WITH MICA NATURAL INCLUSIONS. WE SUGGEST AN IRON AGE CHRONOLOGY FOR THE POTTERY.

ANIMAL BONES OBSERVATIONS.

ANIMAL BONES ARE JUST REPRESENTED BY TWO FRAGMENTS. [1] CONTINUES IN THE (769677) CONTEXT SHEET

*This form is incomplete if fields marked with ◤ are empty. PTO for additional information (and describing all items marked with *) and sketches.*

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

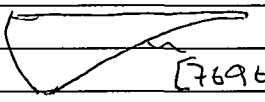
Irregular shaped cut of Ditch, gradual sloping convex shape on east hand side and steep concave side on west.



No Evidence of cut in plan presumably continues in a N-S orientation. To the North it might terminate? To the South it will continue into ditch [769152]

Cut has a Single fill - (769679)

The shape of the cut has been 'suggested' to indicate some kind of 'defensive' aspect to the ditch?

Refer to context (769679) For plan

SKETCHES
(consider: location plan, detailed plan showing relationships, section showing fills/deposits as appropriate)

ADDITIONAL INFORMATION
*(any further details that may be important for understanding the context, including items marked * overleaf)*

Single fill of Ditch [769675]. Fill is a much darker organic material than natural cut of ditch.

No Finds or Evidence of human activity - probably a natural infilling of ditch. Small inclusions of white stones (Angular/sub-angular) are found within the fill.

Refer to context

SKETCHES
*(consider: location plan, detailed plan showing relationships, section showing fills/deposits as appropriate)*

~~For Sketch plan see~~ context sheet [769678]

ADDITIONAL INFORMATION
*(any further details that may be important for understanding the context, including items marked * overleaf)*

Linear ditch terminus on hallroad of area Tea Tc. Located South of [769675] & immediately north of E-W Linear terminus [769146]. To the SW is another ditch Slot [769311] & SE is a Pit [769322].

The break of Slope of the terminus is moderately steep & has a declining Slope on the N-S axis. On the E-W axis the break of Slope is moderate & the base is flat. The feature was slightly overcut.

This feature is the same as [769675] which is a 1m linear ditch slot.

Refer to context: (769701)

*This form is incomplete if fields marked with ◤ are empty. PTO for additional information (and describing all items marked with *) and sketches.*

## ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

Cut of a furrow terminus. Was really shallow as it tapered up. The natural beneath was a silty gravel. Not sure on age as no finds were located.

Refer to context

## SKETCHES

*This form is incomplete if fields marked with ◤ are empty. PTO for additional information (and describing all items marked with *) and sketches.*

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Fairly homogenous, sterile fill of shallow terminus of furrow.

Naturally infilled over time, from partly hill-wash most likely. Age is unsure as no material evidence was found.

Refer to context [769710]

NE - SW RUNNING DITCH. INVESTIGATED IN A 2,00 cm x 2,00 m SLOT. IN THIS SLOT WE CONCLUDED THAT THE DITCH [769720] IS CUT BY THE EARLY DITCH [769718].
THE ONLY CRONOLOGICAL INFORMATION ARE THE PRESENCE OF ROMAN POT SHERD ON THE TOP FILL (769719), THAT PERMITE TO DATE THE AGE OF THE DISUSE OF THE DITH.
THIS DITCH IS THE SAME AS [769611] AND [769695] FORMELY RECORDED ON THE EAST PART [SEE LOCATION SKETCH]

Refer to context: 769717.

ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

Fill of Animal burial.
Contains animal bone, very gravelly, moderate amount of Stones/pebbles.
Very compact, hard fill.

Refer to context: [769736]

SKETCHES

*(consider: location plan, detailed plan showing relationships, section showing fills/deposits as appropriate)*

~~No to scale drawing~~

## ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

THIS IS THE CUT OF A POSTHOLE WITH ONLY ONE FILL: (769739) THIS POSTHOLE WAS QUITE EASY TO IDENTIFY IN PLAN BUT UPON EXCAVATION APPEARED VERY SIMILAR TO THE NATURAL WHILE DIGGING THE FILL HAD A HIGH VOLUME OF INCLUSIONS OF CHARCOAL AND CLAY HOWEVER THE SECTION IS NOT REPRESENTATIVE OF THIS. THIS POSTHOLE CAN BE ASSOCIATED WITH THREE OTHER, SIMILAR FEATURES. WHILE IT IS UNCLEAR, IT IS POSSIBLE THAT THEY COULD BE PART OF A STRUCTURE

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Primary Fill of ditch Slot which is a colluvium layer of a linear ditch Slot running NW - SE across the site up against the bulk on the W side of site (this is adjacent to the lake on the other side) which is of unknown origin or date.

The Fill is 1.10m in width & 0.46m in depth & is full of ~10% chalk & ~5% small rounded stones & ~50% shell fish.

No finds were recorded from this colluvium layer of silting.

Refer to context

ADDITIONAL INFORMATION
*(any further details that may be important for understanding the context, including items marked * overleaf)*

Break of slope on the SW side is moderately steep & also is the same on the NE side. This cut has three fills all naturally infilled numbered (7699746) a silting layer of blue sand; (7699747) an oxidized layer of orange clay; and (7699748) a clay layer. All layers have small stone inclusions & chalk.

A Terminus 2m SE of this linear ditch slot was also dug to identify the end of the ~~ditch~~ feature which is numbered [ ]. There are no other features in the immediate vicinity of this feature.

Refer to context (7699746)

*This form is incomplete if fields marked with ◤ are empty. PTO for additional information (and describing all items marked with *) and sketches.*

## ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

THIS IS THE CUT OF A POSTHOLE WITH ONLY ONE FILL (769751). THIS POSTHOLE WAS EASILY IDENTIFIABLE IN PLAN BUT MUCH LIKE THE OTHER POSTHOLES ASSOCIATED WITH IT, IT WAS INCREDIBLY DIFFICULT TO DIFFERENTIATE THIS FEATURE FROM THE NATURAL WHEN DIGGING. THIS, PLUS 3 OTHER POSTHOLES, HELPS TO MAKE UP WHAT APPEARS TO BE A RECTANGULAR STRUCTURE.

Refer to context [769738]

## SKETCHES

*(consider: location plan, detailed plan showing relationships, section showing fills/deposits as appropriate)*

NATURAL INFILLING AND A PRIMARY FILL OF THE GULLY [769760.]
INVESTIGATED IN A 2,80 m x 1,00m SLOT.
THIS FILL CONTAINED OCCASIONA STONES (0,02 - 0,04 m ø) WITH A SUB-ANGULAR SHAPE
WE ALSO HAVE FOUND SOME POTSHERD PROBABILY FROM ROMAN PERIOD.

Refer to context 769512.

## SKETCHES

## ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

FIRM- CONCRETED, PALE GREYISH BROWN CLAY WITH OCCASIONAL SMALL SA/SR GRAVEL + CHALK.

APPEARS TO BE A DELIBERATE BACKFILL IN A SINGLE INSTANCE OF THE SURROUNDING CLAY NATURAL.
UNLIKELY TO BE NATURAL INFILLING DUE TO THE LACK OF GRAVELS + SILTS THAT WOULD HAVE MIXED WITH THE CLAYS IF INFILLED OVER A PERIOD OF TIME.

*This form is incomplete if fields marked with ◤ are empty. PTO for additional information (and describing all items marked with *) and sketches.*

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

SOLID - CONCRETED, DARK MOTTLED GREYISH BROWN GRAVELS (75%) WITH A CLAYISH SAND MATRIX (25%).

APPEARS TO BE A SLUMP OF GRAVEL FROM THE NW EDGE OF THE PIT WHICH COLLAPSED + MIXED WITH SANDS + SILTS WHILE PIT [769770] WAS OPEN.

THE GRAVEL THAT IT COLLAPSED FROM (769774) IS SIMILAR WITH A HIGHER GRAVEL COMPOSITION + NO DARK CLAYISH SAND MATRIX.

ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

Darker top-fill of ditch [769782]. Occasional white pipe-clay flecks and a modern field drain. Cuts too large for modern drain.

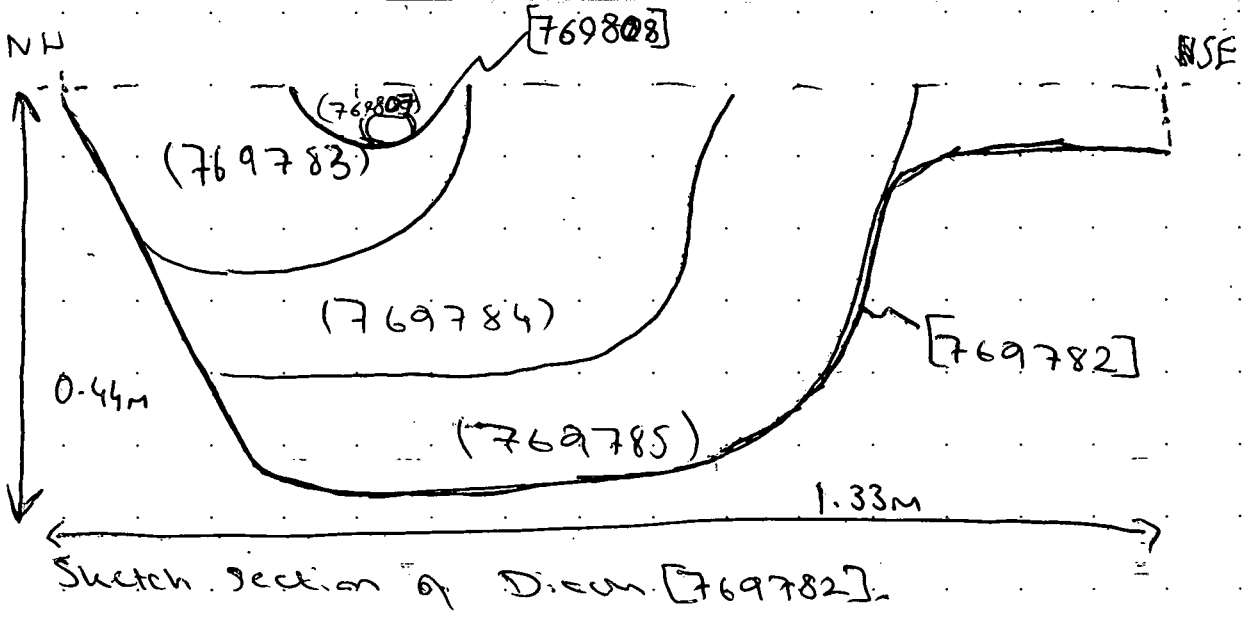
No Evidence of human activity.

Probably a re-fill of ditch by natural hill-wash.

Refer to context [769782]

SKETCHES

*(consider: location plan, detailed plan showing relationships, section showing fills/deposits as appropriate)*



Sketch Section of Ditch [769782].

*This form is incomplete if fields marked with ◤ are empty. PTO for additional information (and describing all items marked with *) and sketches.*

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

This is the secondary fill of a large Pit which is Probably due to natural silting which explains the orange blue colour which is Probably due to water sitting & silting & the oxidization of the fill giving it it's orangeish colour. The fill was compact clay. >5% small stones & >10% chalk.

The fill is 0.80m deep & 1.50m in width.

Refer to context [769792].

SKETCHES
(consider: location plan, detailed plan showing relationships, section showing fills/deposits as appropriate)

*This form is incomplete if fields marked with ◤ are empty. PTO for additional information (and describing all items marked with *) and sketches.*

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Homogenous fine grained segment, friable with medium grained sand content. Rare small angular gravels. Heavy Fe staining throughout.
Natural deposition as result of low energy water action, then subject to moisture retention allowing the clay as result of fluctuating water levels.

Refer to context

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

MID FILL OF DITCH TERMINUS [769879]
VERY SIMILAR BY COMPOSITION THAN THE OTHER FILLS OF THIS CUT (MEANING PROB. A CYCLE OF DRY / WET SEASONS).

DISTINGUISHABLE FROM ADJACENT* FILLS BY VERY SCARCE IRON PAN AND EXTREMELY SCARCE CHALK GRIT.

FOUND VERY OCCASIONAL AN. BONES, AS IN (769874) THEY ARE TOO WATERED BY THE FILL, => SOME OF THEM WITH VERY SOFT ~~CRACKS~~ COMPACTION

Refer to context 769871-2

*This form is incomplete if fields marked with ◤ are empty. PTO for additional information (and describing all items marked with *) and sketches.*

ADDITIONAL INFORMATION
*(any further details that may be important for understanding the context, including items marked * overleaf)*

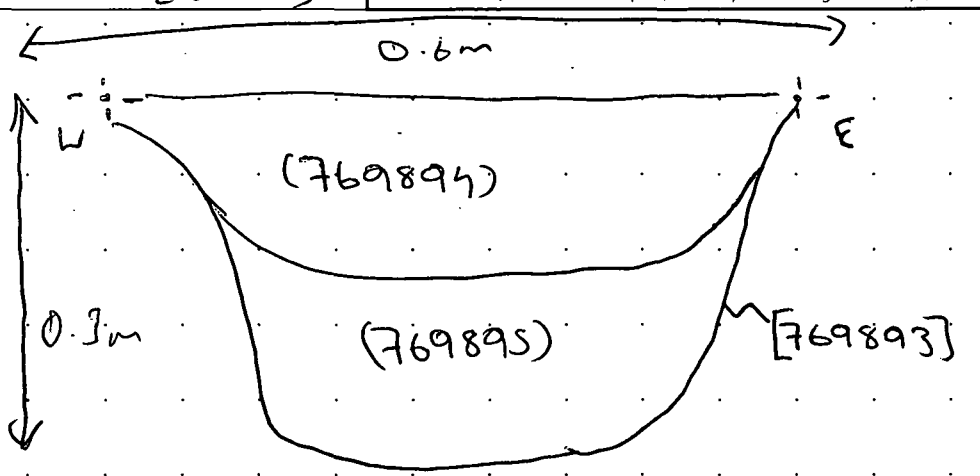
Fill of Ditch [769893]. It is a much lighter colour then the lower fill (769895).

Inclusions of the occasional flech of chalk and very small angular/sub-angular stones (0.01–0.02 m).

No Evidence of human activity. Therefore presumably a natural infill of the ditch. Probably colluvium from near-by hills.

Refer to context: [769893]

SKETCHES
*(consider: location plan, detailed plan showing relationships, section showing fills/deposits as appropriate)*



South facing section of ditch [769893].

ADDITIONAL INFORMATION
*(any further details that may be important for understanding the context, including items marked * overleaf)*

Single fill of Ditch [769910]. Dark organic fill with charcoal and iron pan with small angular/sub-angular stones (0.01 – 0.10 m).

No finds of human activity.

Fill is under the alluvial (769912) and the section shows the edge is cut by it. This fill appear to have been an ~~backfill of~~ earlier backfill of the ditch [769910] before the later infilling covered the top of it and also ditch [769909].

~~No~~ The organic nature of the fill suggests it was natural.

Refer to context

SKETCHES
*(consider: location plan, detailed plan showing relationships, section showing fills/deposits as appropriate)*

*This form is incomplete if fields marked with ◤ are empty. PTO for additional information (and describing all items marked with *) and sketches.*

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Single fill of Ditch [769909]. Inclusions include Small angular / Sub-angular Stones (0.01 - 0.03m in diameter). Moreover, there are also flecks of Chalk and a small amount of Iron Pan and charcoal.

~~Overall this~~ The fill also has Pot and bone (Animal) within it.

The fill sits over the top of the earlier, more organic, fill [769911] Therefore I believe that this fill is colluvial hill-wash which has filled ditch/furrow [769909] and covered the top of the already backfilled ditch [769910].

Refer to context

SKETCHES

ADDITIONAL INFORMATION
*(any further details that may be important for understanding the context, including items marked * overleaf)*

THIS IS THE FILL OF WHAT APPEARS TO BE A SHALLOW GULLY. THE ONLY INDICATIONS OF HUMAN ACTIVITY WITHIN THIS FEATURE ARE SMALL AMOUNTS OF CHARCOAL; THE ONLY OTHER INCLUSIONS ARE A FEW (VERY) SMALL STONES AND RANDOM TRACES OF GRAVEL/GRIT. THIS SUGGESTS THAT THIS FILL IS THE RESULT OF NATURAL INFILLING, RATHER THAN HUMAN ACTIVITY.

* IT IS DIFFICULT TO TELL WHETHER

ADDITIONAL INFORMATION
*(any further details that may be important for understanding the context, including items marked * overleaf)*

Fill of ditch terminus composed by a compact greyish brown clay which is the result of a natural process. It is the same context as [769051] which is a big slot previously dug. A fragment of pottery made by hand suggests a dating of either Iron Age or Anglo-Saxon period.

Refer to context | [769926]

## ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

Single fill of Ditch terminus [769929]. Inclusions of frequent charcoal and very occasional sub-angular stones (Diameter 0.05m).

Probably a natural infilling of the ditch, similar to as seen in the fill of [769575], the SIA further along the feature.

Refer to context

## SKETCHES

*(consider: location plan, detailed plan showing relationships, section showing fills/deposits as appropriate)*

ADDITIONAL INFORMATION
*(any further details that may be important for understanding the context, including items marked * overleaf)*

PRIMARY FILL OF PIT [769950]. LARGELY CONSISTS OF CARBONISED WOOD, OFTEN IN LARGE FRAGMENTS, MIXED WITH ORGANIC BLACK CLAY AND CLEAN MID GREY SAND. SOME POSSIBILITY THE WOOD HAD BEEN INTERWOVEN, BUT THE OVERALL STRUCTURE HASN'T SURVIVED. UNABLE TO HAND EXCAVATE THIS CONTEXT TO ITS FULLEST EXTENT AS IT LIES BELOW 1.00m, BUT SUBSEQUENT SAMPLE EXTRACTION SUGGESTS IT IS THICKER THAN 0.30m. STERILE FOR FINDS APART FROM WOOD. NOT FULLY EXCAVATED.

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Senary fill (769953) of Pit [769959] which is a compact, light greyish brown, Sandy Silt. Appears to be a natural infilling after the pit fell into disuse. occ inclusions of Small sub angular stones, with frequent Small fragments of chalk. A later ditch was then cut into this material [769952].
*occ animal bone, 5x fragments including possible femur, most likely from a cow. Similar to colluvium found across site, and several "Devils toenails" found.

ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

Secondary fill (769957) of Pit [769959] which is a loose, light brownish orange, sandy gravelly clay. Some degree of redeposited natural, that is a deliberately backfilled context. Most likely as the second phase of use of the pit fell into disuse. Occ inclusions of small sub-angular stones 6x bone fragments recovered, most likely from a bird, considering size & density of fragments. 1x possible worked flint/fossil?

See [769950] for Sections
(769949) for Plan & Matrix.

ADDITIONAL INFORMATION
*(any further details that may be important for understanding the context, including items marked * overleaf)*

Primary Fill (769958) (NFE) of Pit [769959] which is a compact, dark greyish black, Sandy clay, ~~which is possibly~~ with frequent inclusions of wood, appears to be fairly consistant in size 3mm - 10mm in diameter. It is very possibly a saxon "weaving" together of tree branches and twigs to form a platform structure as either a reinforcement to existing clay extraction pit to prevent sinking whilst working, or the start of a second function after clay has been fully extracted; Possibly an animal trap? though no branches appear to have been worked to a point. As the organics decayed it left a dip at the top, which was then naturally infilled (769953) before the ditch [769952] was cut through during final phase of activity. Sample 7910 was taken and showed a further fill under this layer which was a grey clayey Sand, possibly final layer of original phase. Could not excavate further due to 1m max depth. No other finds or inclusions.

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

DITCH CUT [769995] IS A MODERATELY SLOPING, CONCAVE BOTTOMED ~~DITCH~~ CURVILINEAR DITCH.
IT IS STRATIGRAPHICALLY ABOVE THE BLUE CLAY NATURAL (768002) AND BELOW (769996) WHICH IS ITS LATER FILL ~~THROUGH NATURAL PROCESSES.~~
DITCH FILL (769996) IS A GREYISH-BROWN, SANDY-CLAY COMPACTED FILL WHICH EXHIBITED FEW INCLUSIONS EXCEPT ONE SMALL PIECE OF CHARCOAL, A LIMITED AMOUNT OF SMALL STONES AND MANGANESE. THIS FILL APPEARED TO BE HEAVILY MIXED, POSSIBLY AS THE RESULT OF INTENSE ROOTING.

Refer to context [769995]

ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked * overleaf)

Single fill of Ditch [769997].

NO Archaeological evidence, inclusions are small angular/sub angular stones (Diameter 0.01 - 0.03) which are very infrequent. Also small pieces of charcoal, again very infrequent.

The fill colour is a more reddish-brown, as opposed to the yellower [illegible] (770000).
