## ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked \* overleaf)

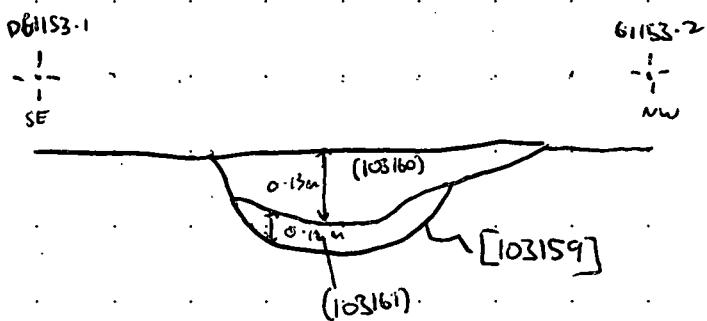

Shallow section of ditch containing two fills

Appears to be a continuation of the same ditch as [102955] and [102648], but the ditch appears to change in direction between [102648] and this slot.

~~Ditch 102955~~ Slot is cut by large post-hole at NE end. It also appears from the surface that [103156] cuts/merges with this ditch, but because of post-hole [103162] it is not possible to determine from this slot.
