NATURAL INFILLING OF LINEAR [60007]. SINGLE FILL OF DITCH PART OF A LINEAR DITCH THAT RUNS E-W ACROSS THE TRENCH. FILL HAD OCCASSIONAL PIECES OF CHARCOAL AND MAD. TWO OYSTER SHELLS THAT WEREN'T FOSILISED SO MAY BE ROMAN AND WERE USED AS A FOOD SOURCE AND THIS DITCH IS ~~A DUMP OF~~ PART OF A DUMP, OTHER SLOTS WERE EXCAVATED ALONG THIS LINEAR AND FINDS INCLUDED BONE AND ROMAN POT.

THIS FILL IS MODERATELY COMPACT AND WAS A BLUEISH GREY SILTY CLAY,

ADDITIONAL INFORMATION

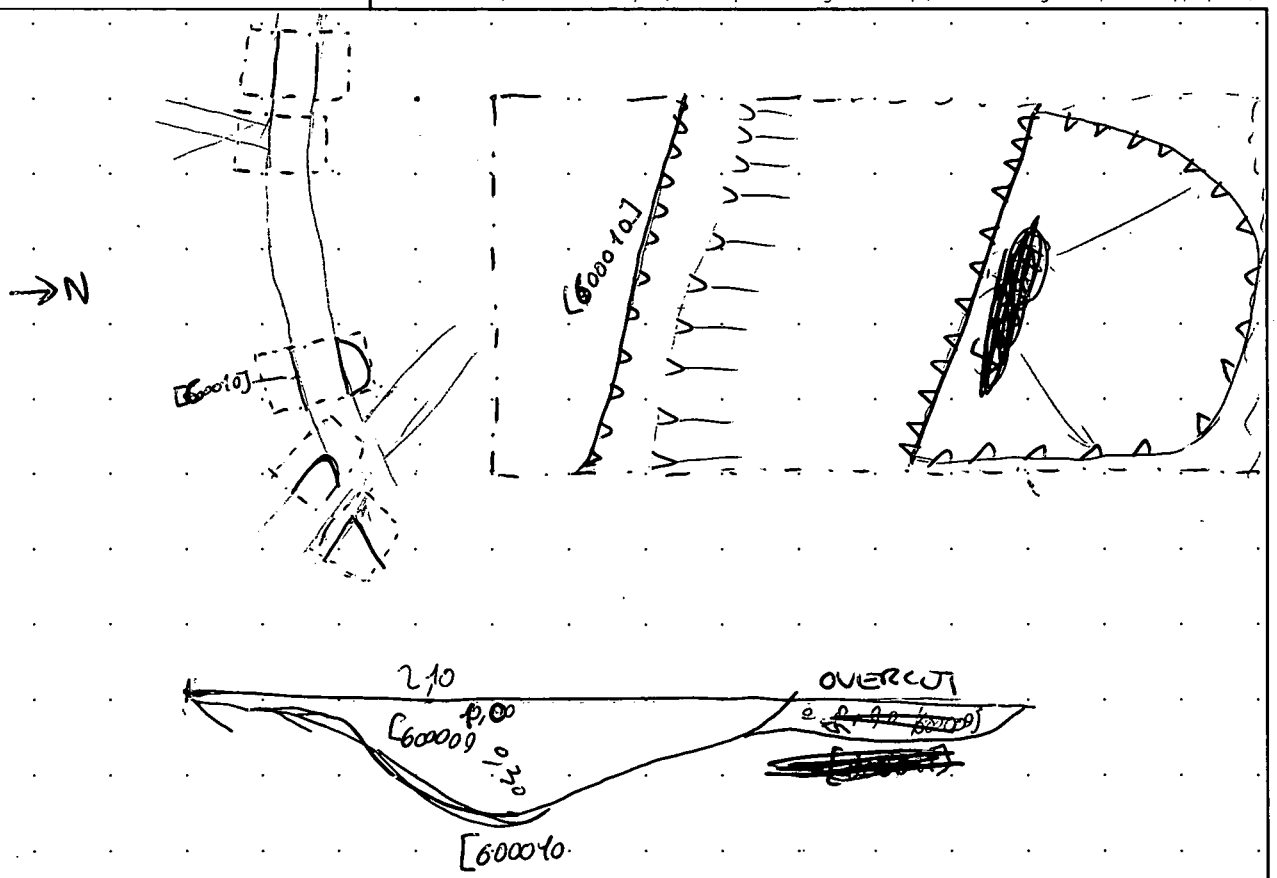

*(any further details that may be important for understanding the context, including items marked * overleaf)*

This is the only fill in the cut [600014]; the colour is orangeish grey, more orange in the sides possibly by the contact with the natural; it's silty clay and moderately compact. Pieces of pottery were found, possibly roman. It looks like a natural infilling of the ditch once it was abandoned; could be a fill of a boundary ditch who runs NE-SW. across the site.
Inclusions: small pieces of charcoal occasional.

Refer to context [600014]

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

The cut is linear and runs NE-SW; the dimensions are 1 m (slot) (E-W) the width 1.10 m and 0.29 m the depth. The sides are gentle and the base is moderately concave. It's a cut of a ditch who runs NE-SW across the site; it's only one fill inside with roman pottery. It could be a boundary ditch and the infilling is a natural process once it was abandoned

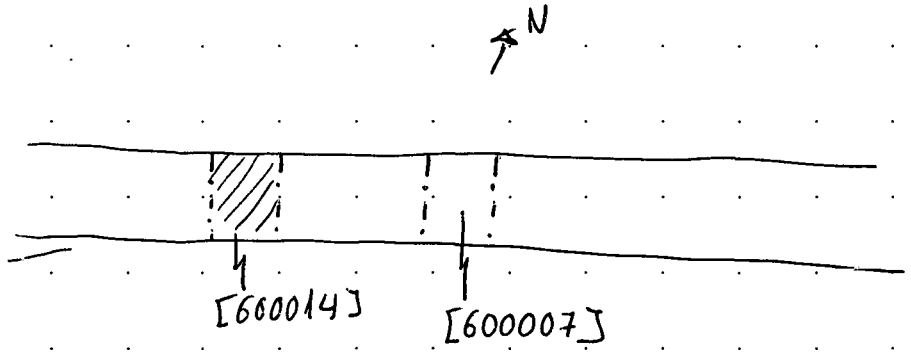

Refer to context [600014]

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

THE CUT OF A DITCH. THE SOUTHERN SIDE IS ERODED, POSSIBLY DUE TO THE WATER BEING PUSHED THERE BY THE WIND, SHAPING IT AS IT IS, LIKE A STEP. THE DEGREE OF EROSION CAN BE SEEN ON (600038) ON THE SECTION. THE NORTHERN SIDE IS STEEPER AND ON THE SECTION OF (600039) WE CAN SEE THAT THAT IS THE SIDE THAT THE SPOIL WAS THROWN TOWARDS TO AND IN TIME IT FELL BACK IN.

Refer to context

THIS FILL SEEMS TO HAVE FALLEN INTO THE DITCH FROM THE ~~NOR~~ SIDES AFTER BEING CUT, POSSIBLY DUE TO RAINS AND/OR WINDS. IT DID NOT PREVENT THE DITCH FROM BEING USED AS IT COVERED SOME OF THE BASE (15-25cm DEEP) AND THE NORTHERN SIDE (20cm THICKNESS).

Refer to context [600031] for section (600032) for plan

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

FILL OF DITCH WHICH LIKELY FORMED AS A RESULT OF NATURAL INFILLING OVER TIME. THERE ARE OCCASIONAL SMALL STONE INCLUSIONS AND FREQUENT ANIMAL BONE INCLUSIONS IN THE FILL.
THIS FILL IS CUT BY SLUMPING FILL (600044) ON ONE SIDE OF THE DITCH AND BY THE FILL (600046) OF A GULLY [600047] ON THE OTHER SIDE, MAKING IT AN EARLIER FILL THAN THE GULLY AND THE SLUMPING FILL. IT IS LIKELY THAT HAD THE GULLY NOT CUT INTO THIS DITCH, A SIMILAR SLUMPING EFFECT OF SOILS AS IN FILL (600044) COULD ALSO BE SEEN ON THE OTHER SIDE OF THE DITCH (WHERE THE GULLY CAN BE SEEN IN THE SECTION), AS THIS DITCH SLOT LIES AT THE BOTTOM OF A SLOPE IN THE LANSCAPE.

Refer to context (600044) (600046) + [600045]

ADDITIONAL INFORMATION

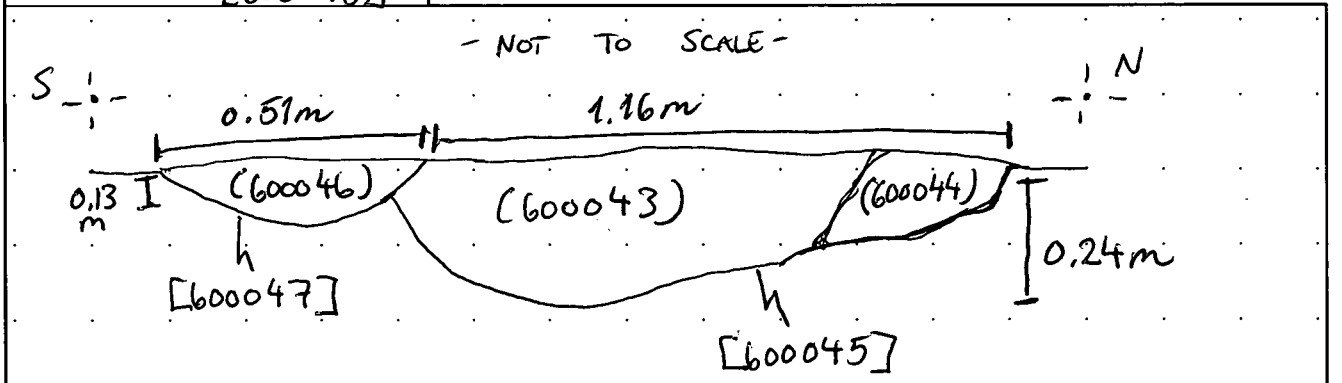

*(any further details that may be important for understanding the context, including items marked * overleaf)*

A STERILE FILL OF DITCH [600045], WHICH IS LIKELY THE RESULT OF MATERIALS SLUMPING DOWN THE EDGE OF THE DITCH. THEREFORE, THIS FILL IS THE RESULT OF NATURAL INFILLING. THIS DITCH SLOT IS LOCATED AT THE BOTTOM OF A SLOPE, WHICH MAKES IT LIKELY THAT COLLUVIAL SOILS AND OTHER MATERIALS TRAVELLED DOWN THE SLOPE AND GRADUALLY CREATED A SLUMPING EFFECT AT THE SIDES OF THE DITCH. THIS SLUMPING WOULD LIKELY ACCUMULATE ALONG BOTH SIDES OF THE DITCH BUT THIS DITCH IS CUT BY A GULLY ON THE SOUTHERN EDGE, WHICH EXPLAINS WHY SLUMPING CAN ONLY BE SEEN ON ONE SIDE OF THE DITCH.

Refer to context (600043) [600045]

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

CUT OF DITCH WHICH IS LIKELY AN EARLIER FEATURE IN THE LANDSCAPE THAN THE GULLY [600047], THE FILL (600046) OF WHICH CUTS THE FILL (600043) OF THIS DITCH. THE NEARBY FURROW IS PROBABLY A LATER FEATURE THAN THIS DITCH.
THIS DITCH IS SHALLOW AND APPEARS TO INTERSECT WITH A N-S RUNNING DITCH, WHICH RUNS ACROSS THE LENGTH OF THE SITE, FORMING A "SPINE" FOR THE AGRICULTURAL NETWORKS OF DITCHES AND ENCLOSURES IN THIS AREA. THE "SPINE" DITCH IS LIKELY EARLIER THAN THIS DITCH BUT FURTHER RELATIONSHIP SLOTS BETWEEN THESE TWO DITCHES OUGHT TO ELUCIDATE THE SITE TIME LINE. THIS WAS THE FIRST SLOT ALONG THIS DITCH SO ITS RELATIONSHIP TO OTHER, INTERSECTING DITCHES IS NOT CLEAR AT THIS STAGE.

Refer to context [600047]

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

CUT OF GULLY WHICH WAS NOT PICKED UP ON THE INITIAL SURVEY BUT APPEARS TO BE A LATER FEATURE IN THE LANDSCAPE THAN DITCH [600045], THE FILL (600043) OF WHICH IS CUT BY THE FILL (600046) OF THIS GULLY. THE GULLY IS VISIBLE IN A CLEAR WAY ON THE E-FACING SECTION OF THE DITCH BUT DISAPPEARS ON THE OPPOSITE SIDE OF THE SECTION. IT IS LIKELY THAT THE GULLY TERMINATES SOMEWHERE IN THE MIDDLE OF THE DITCH SLOT. THERE IS AN IMPRESSION ON THE SIDE OF THE EDGE OF THE DITCH WHICH MAY BE THE TERMINUS OF THE GULLY BUT IT IS NOT CERTAIN AT THIS STAGE WHETHER THE GULLY TRULY STOPS HERE.

Refer to context [600045]

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

CUT OF THE DITCH IS CLEARLY VISIBLE ON NATURAL ORANGEISH SORROUNDING. SHAPE OF BOTTOM OF THE CUT IS DOUBLE CONCAVE. ON IT'S DEEPER N SIDE DITCH IS INTERRUPTED BY: ANOTHER DITCH COMMING FROM N DIRECTION [600054] WHATS MEAN [600052] IS OLDER THAN [600054]. DITCH CONTINUES ON W AND E DIRECTION (ON E DIRECTION BECOMES SHALLOW).

Refer to context

ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

Fill of ditch. Only inclusions were very occasional gravel. Fill created due to weathering, although weathered to a lesser extent than the NE side (600056).

CUT OF LINEAR E-W DITCH, WITH THREE NATURAL INFILLED FILLS (600061), (600062) (600063). THIS CUT HAS BEEN ALTERED BY WEATHERING AND EROSION AND SO THE PROFILE IS DIFFERENT TO WHAT IT WAS ORIGINALLY. THIS LINEAR IS PART OF A FIELD BOUNDARY DITCH THAT EXTENDS THE LENGTH OF THE TRENCH.

ONLY FINDS WERE PIECES OF SAXON POT, WHICH DATES THIS DITCH, AS THESE FINDS WERE FOUND IN THE MAIN FILL OF THE DITCH TO SAXON.

SKETCHES

(consider: location plan, detailed plan showing relationships, section showing fills/deposits as appropriate)

ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

THIS FILL IS THE MAIN NATURAL INFILLING OF DITCH [600060]. A MODERATELY COMPACT MID BLUEISH GREY SILTY CLAY.

THE EDGES OF THIS FILL ARE SURROUNDED BY NATURAL SILTING THAT OCCURED PRIOR TO THE DISUSE OF THE LINEAR BUT AFTER THE DITCH WAS CUT, (600062) & (600063).

THE FILL IS PART OF A LINEAR FIELD BOUNDARY DITCH, E-W.

OCCASIONAL PIECES OF CHARCOAL WERE FOUND AS WELL AS PIECES OF SAXON POT. THIS DATES THE LINEAR TO AT LEAST THE SAXON PERIOD.

↳ TERMINUS ANTE-QUEM: THIS IS THE FILL OBLITERATING THE LINEAR

Refer to context (600060)

A DELIBERATE BACKFILL OF A DITCH * WITH CHALK INCLUSIONS, SOME IRON PAN CLOSER TO THE BOTTOM OF IT AND FEW STONES. (VARIOUS SIZES >1cm and <1cm) SILTY CLAY, BUT ALSO A SANDY TEXTURE.

THE DITCH IS CLEARLY CUT BY ANOTHER DITCH, WHICH HAS THE SAME ATTRIBUTES.

@ THERE WERE NO FINDS.

ETA: & UPON REFLECTION IT SEEMS UNLIKELY THAT THE DITCH WAS DELIBERATELY BACKFILLED AS THERE ARE NO TIP LINES OR OTHER INDICATORS. IT LOOKS MORE LIKE A SLOW PROCESS OF INFILLING AFTER THE DITCH WAS ABANDONED HM 8.5.17

Refer to context [600066]

SKETCHES
(consider: location plan, detailed plan showing relationships, section showing fills/deposits as appropriate)

A CUT OF A DITCH (~~[illegible]~~) WITH A FILL (~~[illegible]~~) (600065)
THIS DITCH (~~[illegible]~~) CAME FIRST (STRATIGRAPHICALLY) AND THEN CUT BY ANOTHER (~~[illegible]~~) LATER DITCH.

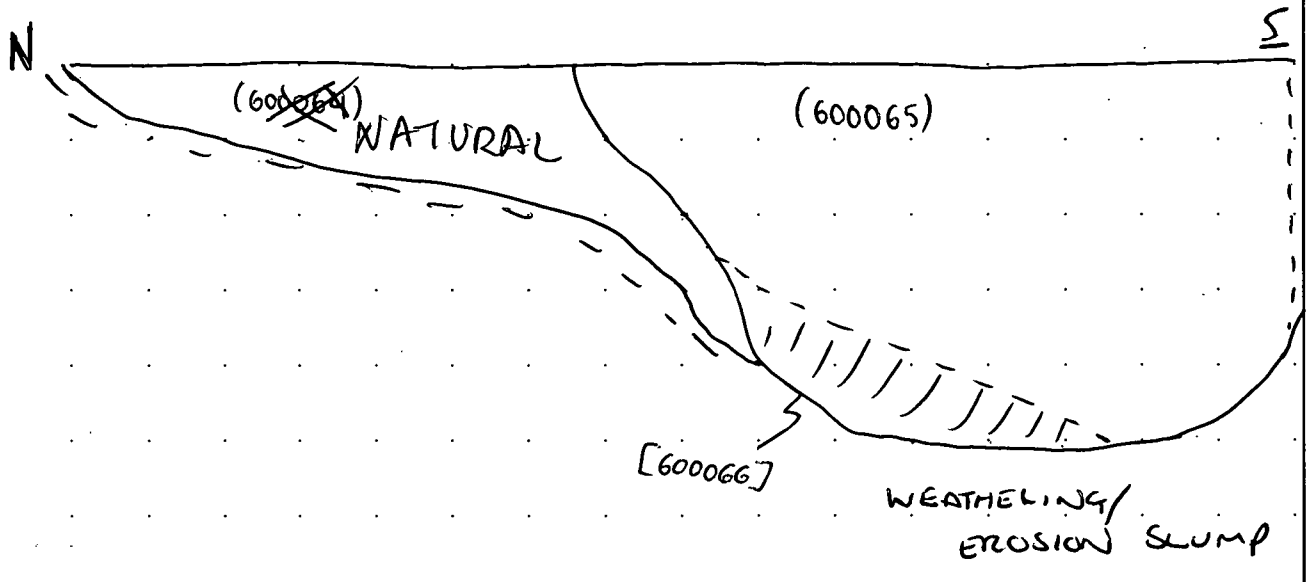

THE FIRST CUT SHOULD BE FILLED DELIBERATELY AND BY NATURAL PROCESSES THE DITCH WAS EXPANDED AT ITS NORTHERN SIDE (THAT'S THE "ERODED" FILL (600064).

*see (600067) for plans.

CUT OF DITCH TERMINUS. DITCH GOES LINEAR NE, AND IT IS HIS E END. AFTER IT ENDS HERE AND BEING NOT VISIBLE ON SURFACE IT CAN BE OBSERVED AGAIN ~5M FAR ON E DIRECTION. AS FEATURE IS SHALLOW IT IS POSSIBLE MACHINING JUST GET BITT DEEPER ON THAT PART, SO IT LOOKS LIKE DISSCONTINUATION. ANYWAY CUT IS EASY TO OBSERVE AND CLEAR EVEN WHEN DITCH IS SHALLOW ITSELF.

ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

It's the only fill of a ditch [600085] who runs N.S. The fill is moderately compact the colour is greyish orange an silty clay. The thickness is 0.26m.
Not finds in the fill; some small stones at the bottom close to the natural and some specks of charcoal occasional.
The fill looks like as a result of natural process.

Refer to context [600085]

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Lineal cut of a ditch who runs N.S; the dimensions are: length 1 m (slot) width 0.65m and depth 0.26m; the sides are moderate sloping and the base is concave.
There is only one fill inside (600084) without finds.
The cut is a ditch that cuts another [600087]
The ditch is very shallow, probably because was preserved only the bottom of the ditch.
As another ditches similar that are in the area could be a boundary ditch. but it's very small

*This form is incomplete if fields marked with ◤ are empty. Please turn over for additional information (and describing all items marked with *) and sketches.*

ADDITIONAL INFORMATION

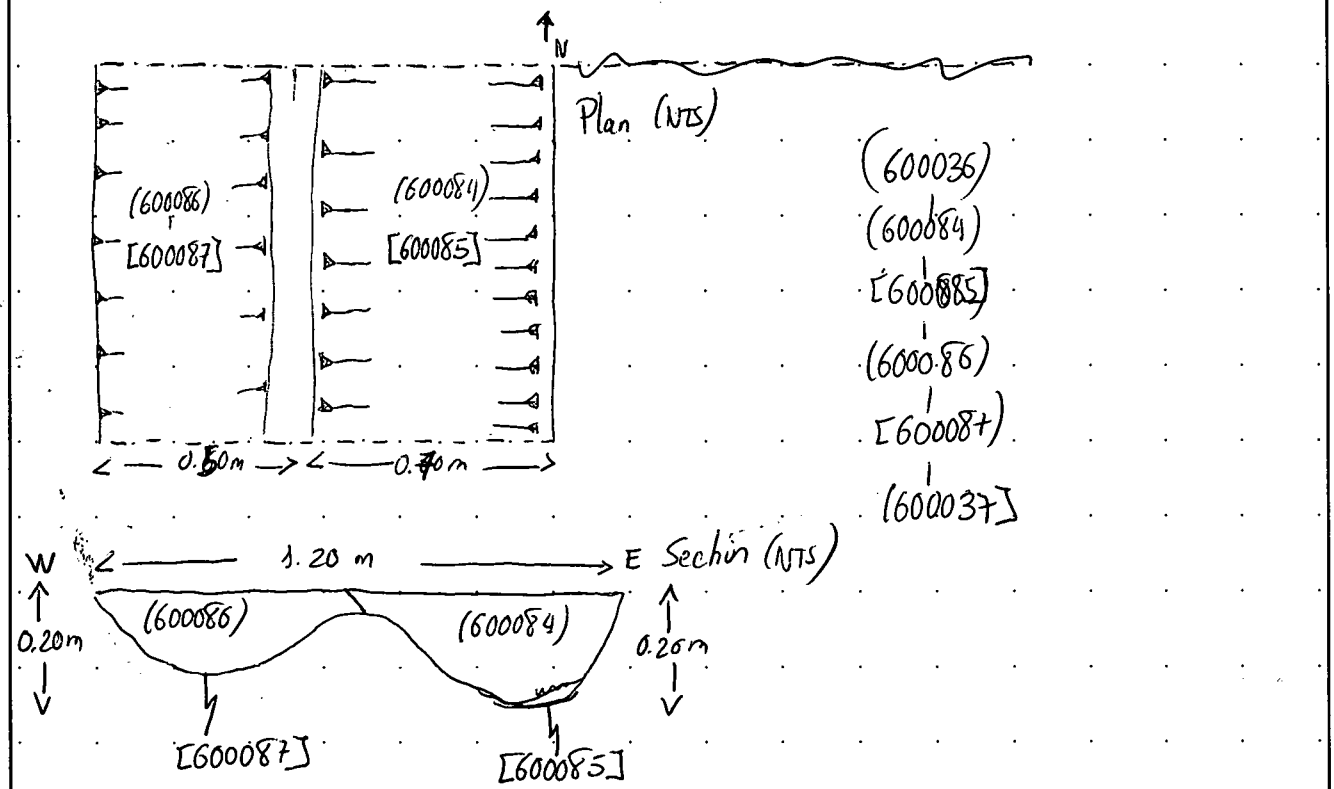

(any further details that may be important for understanding the context, including items marked * overleaf)

It's the single fill in the cut [600087]; it's silty clay and moderately compact; the colour is greyish yellow. The thickness of the fill is 0.20 m.
The fill is very homogeneous and uniform, probably as a result of natural processes of infilling of a linear ditch.
Not finds or inclusions.

Refer to context [600087]

*This form is incomplete if fields marked with ◤ are empty. Please turn over for additional information (and describing all items marked with *) and sketches.*

ADDITIONAL INFORMATION

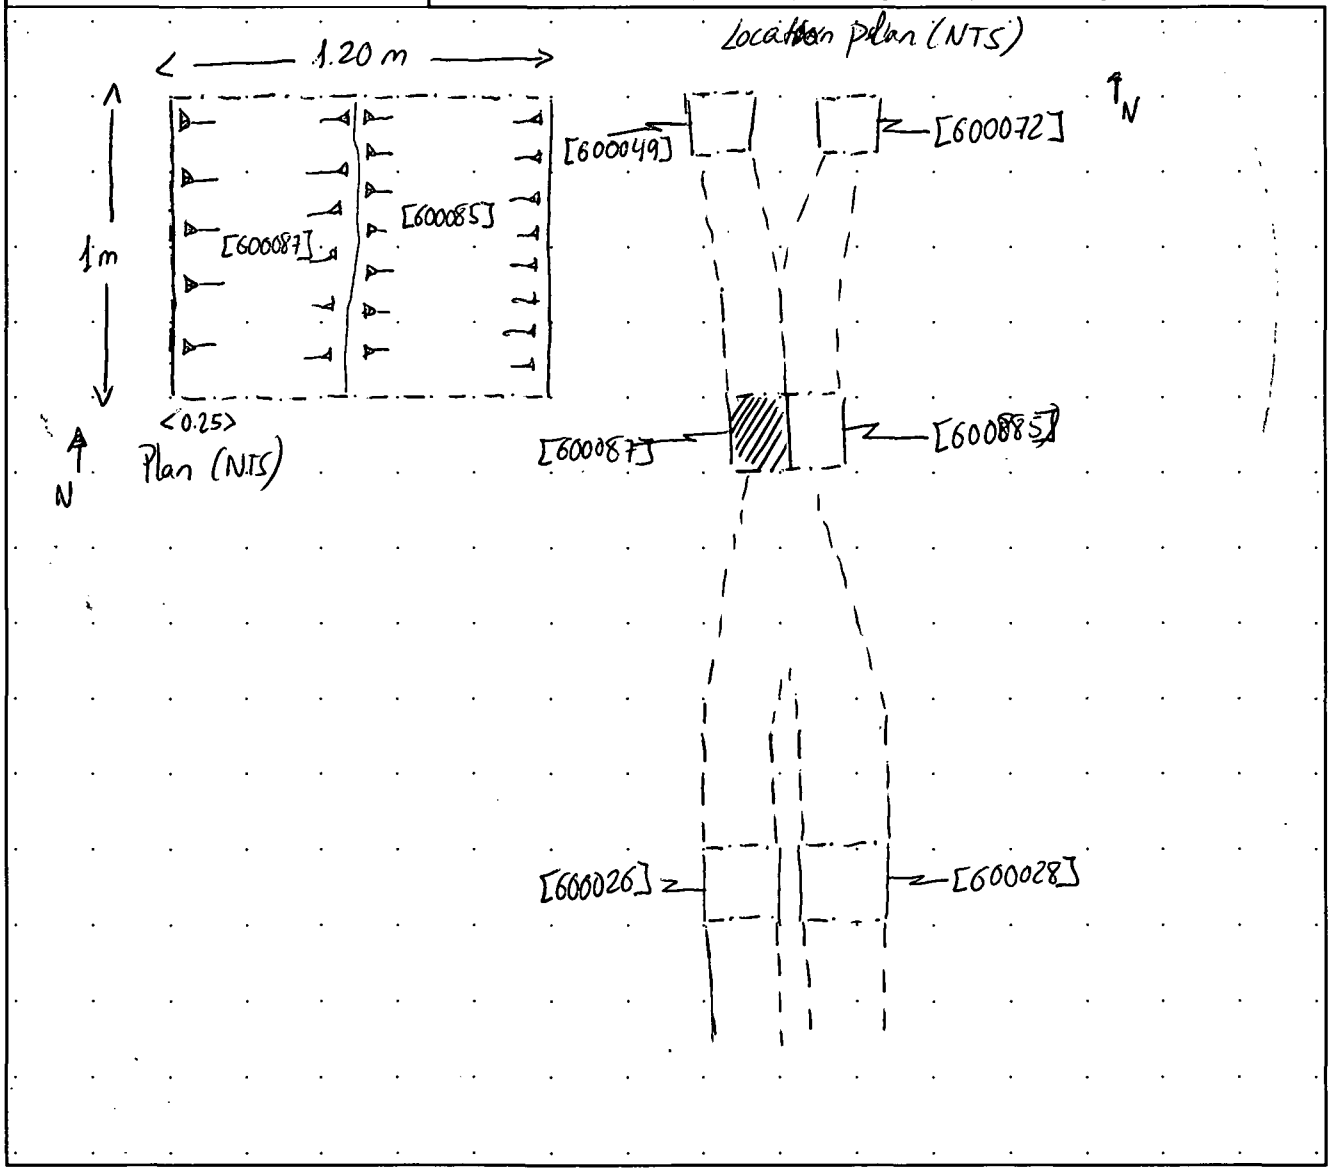

*(any further details that may be important for understanding the context, including items marked * overleaf)*

Lineal cut that runs S-N; the width is 0.50 m, the length 1 m (slot) and the depth only 0.20 m. The sides are gentle and the base is concave.
There is only one fill inside (600086) without finds.
The infilling is natural process; the cut is part of a ditch who runs N-S and was cutting by another ditch [600085].
It could be a boundary ditch but is very small and shallow

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Fill of ditch running E-W. It was moderately compact, light grey orangeish, with clay sandy composition.
It looks like a natural infilling.
This fill is cut by context [600 132]
It is possible to see it by the section W
PHOTO → 600 105 - 600 106

*(any further details that may be important for understanding the context, including items marked * overleaf)*

½ SECTION OF WESTERN TERMINUS OF E-W ORIENTATED DITCH.
SHARP BREAK OF SLOPE AT TOP WITH STEEPLY SLOPED SIDES AND SHARP BREAK OF SLOPE AT BASE. BASE APPEARS FLAT BUT MAY BE SLIGHTLY CONCAVE. TERMINUS IS ROUNDED AND SLOPES MUCH MORE GRADUALLY.
POST-MEDIEVAL WEATHERING & DRYING OF SITE FEATURE HAS COMPLICATED THE ORIGINAL EXTENT OF THE FEATURE MAKING IT MUCH HARDER TO ACCURATELY DEFINE, DESPITE BEST EFFORTS. POTTERY WAS COLLECTED FROM THE FILL ENABLING DATING (BY SOMEONE ELSE).

Refer to context [600136 for sections]

SLOT DUG IN TO LINEAR GULLY ORIENTATED E-W FILLED BY (600160) SAME AS [600139] SLIGHTLY WIDER & DEEPER - AS I DON'T HAVE ACCESS TO LEVEL DATA I CAN ONLY PRESUME THAT THIS IS EITHER BECAUSE IT HAD SUFFERED LESS HORIZONTAL TRUNCATION SO IT IS AT A HIGHER LEVEL, OR BECAUSE IT SLOPED SLIGHTLY FROM [illegible] WEST TO EAST. OR SOMETHING ELSE ENTIRELY.
I SUPPOSE POTENTIALLY IT MIGHT ALSO BE A SEGMENTED GULLY BUT THIS SEEMS UNLIKELY, AND THE NATURE OF THE POST MEDIEVAL EXCAVATION CONDITIONS HAVE BASICALLY MUNTED ANY WAY OF TESTING THIS HYPOTHESIS (TO UNCLEARABLE).

ADDITIONAL INFORMATION
*(any further details that may be important for understanding the context, including items marked * overleaf)*

THE DEPOSIT APPEARS TO BE A DUMPED LAYER. IT COVERS THE NATURAL 600037 AND THE FILL OF THE DITCH [600164]. THE SHAPE IS CURVILINEAR BUT THERE IS NO INTENTIONAL CUT.
THE DEPOSIT IS MADE OF CLAY WITH SOME CHARACOAL AND THE REST OF A CRUMBLED RED BRICK.
IT SEEMS THAT THE DEPOSIT WAS JUST DUMPED IN THE PLACE WITHOUT ANY SPECIFIC PURPOSE.

Refer to context [600164] FOR PLAN

SKETCHES
(consider: location plan, detailed plan showing relationships, section showing fills/deposits as appropriate)

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Fill of ditch [600182], it's moderately compact and it's grey clay; the fill is very homogeneous and has very small pieces of charcoal and CBM (less than 0.001m).
No finds in the fill.
It could be result of natural infilling of a hollow.

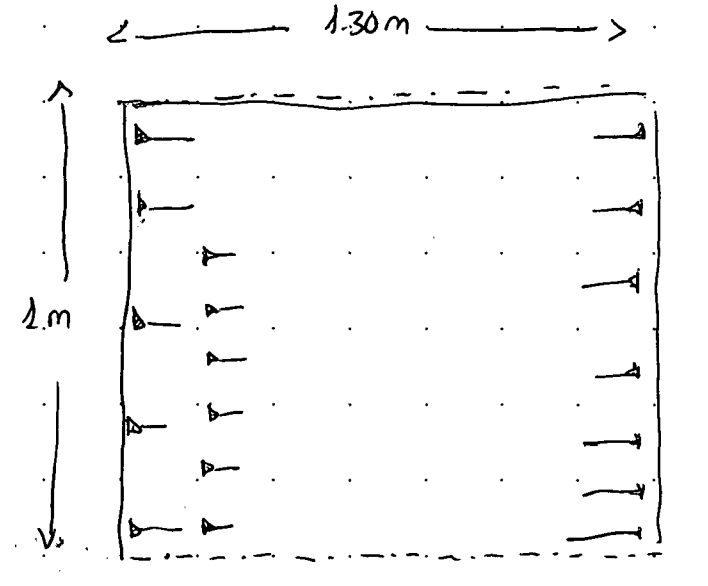

Refer to context [600182]

ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked * overleaf)

Cut of a ~~ditch~~ linear ditch who runs NE-SW across the site. The sides are gentle and the base is concave with disruption at the side N (if it could be a bowl but it's not very clear).
Inside the cut there are three different fills: in the fill that is at the bottom (600179) appeared a small piece of pottery that it could be roman.
The ditch is very shallow we only can see the bottom and probably it is related with another which have similar characteristics around. It could be part of a group of ~~ditches~~ boundary ditches.

Refer to context: [600182]

*(any further details that may be important for understanding the context, including items marked * overleaf)*

EXCAVATED SLOT IN EASTERN W-E DITCH [600188], DATED AD [600137]. PREDOMINANTLY HEAVILY TRUNCATED BY LATER AGRICULTURAL PROCESSES AND DISTURBED BY POST MEDIEVAL WEATHERING. NARROWING OF FEATURE IN THIS SLOT MAY SUGGEST THE APPROACHING TERMINUS? HOWEVER THE INITIAL INTERPRETATION OF THE DITCH SUGGESTED IT RAN TO THE EASTERN L.O.E OF THE AREA, HOWEVER THIS DOESN'T APPEAR TO BE THE CASE.

FEATURE RUNS PARALLEL TO GULLY [600139], WHICH DOES CONTINUE

Refer to context (600137) for SECTION

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Ditch running NE to SW fill (600189) parallel to ditch [600192]
The base of this ditch is very flat in the west side but really uneven on the east side close to the section #60091
North edge is a bit unclear, it's difficult to understand which ditch cut which or if there is any relationship between the two ditches.
Probably [600192] cut [600190], not sure (?)

Refer to context

ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

Ditch [600192] running NE-SW parallel to ditch [600190].
The base of the ditch is a bit uneven in the SW side, more flat in the centre and close to the NE section. South edge is not really clear, and it's difficult to understand what cuts what (at least in this slot) but it seems like [600192] cut [600190] (?)

Refer to context

TSL 6.1.17

ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

This slot was dug into an area of suspected linear / field irrigation systems. However, upon removal of a small remnant of topsoil, it appears there were no archaeological features in the slot. Present are what appear to be a series of sandbars, between which is a silty clay fill containing occ. pockets of marine shells (small) & v. occ subangular small stones. These finds, contained with the fill colours suggests this was a submerged environment – perhaps part of a pond or lake, until field irrigation allowed tilling of the soil – evident in small furrows found in the section.

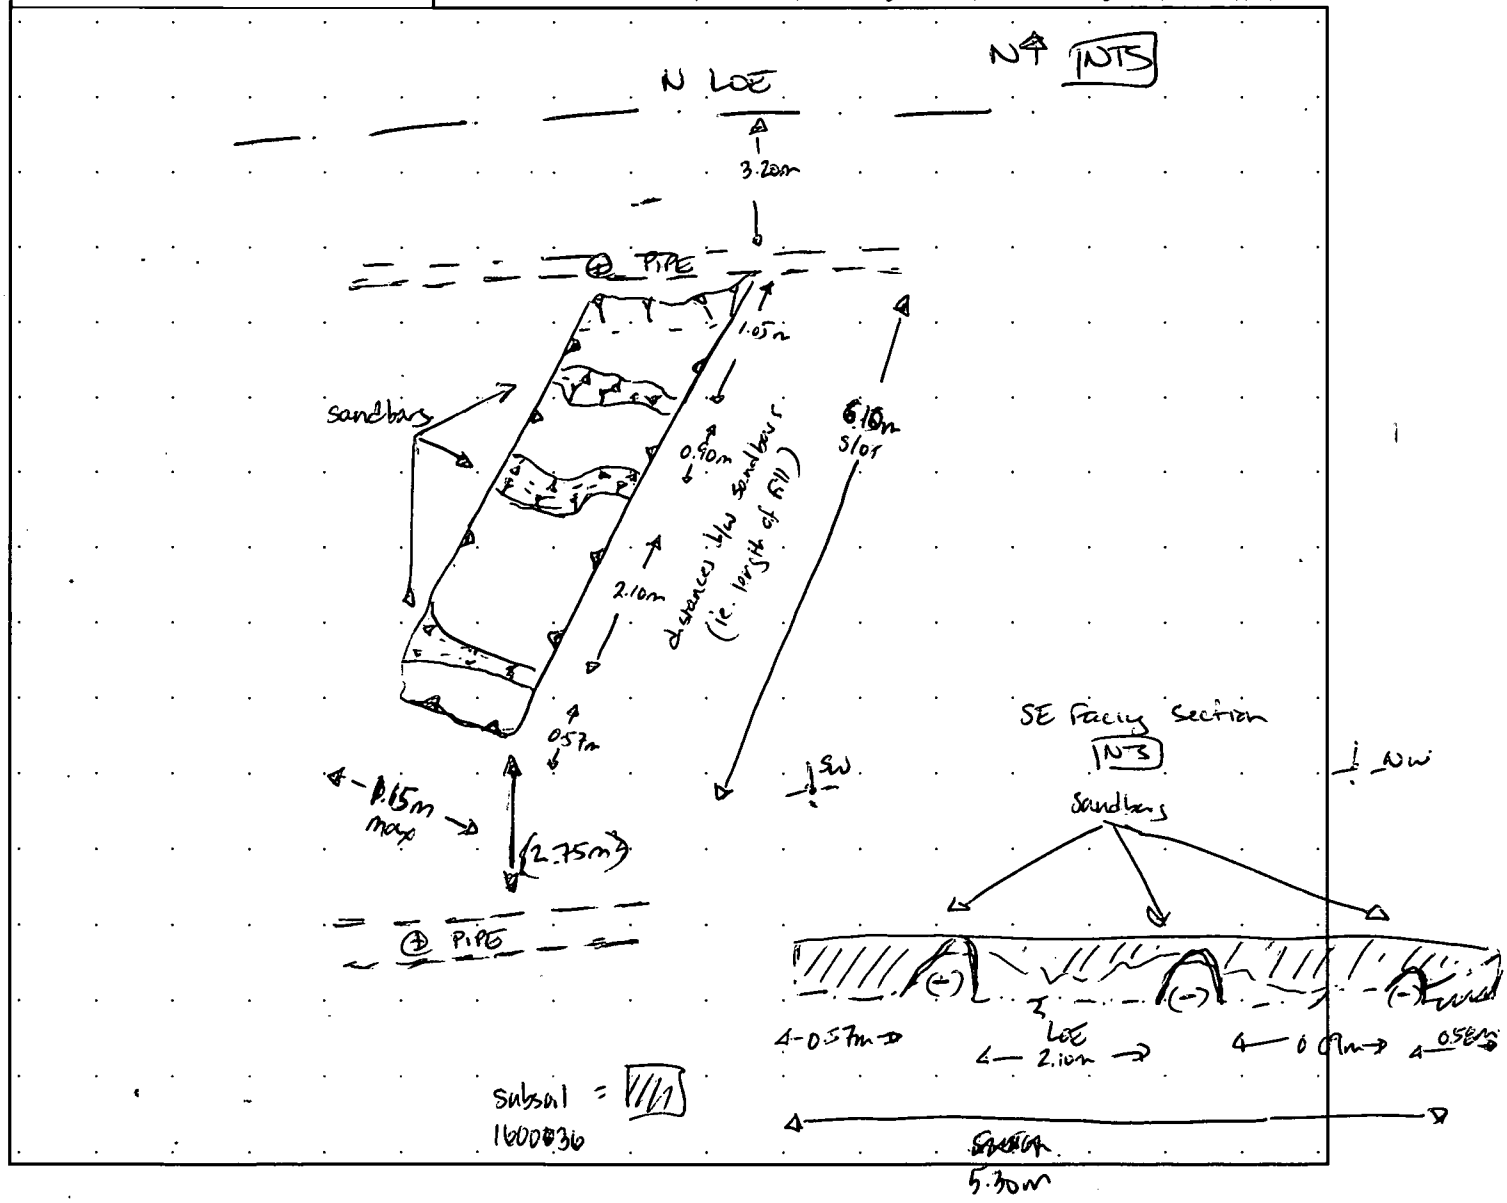

To the south of the slot is a field drain (2.75m S). & two boundary ditches likely run (2.5m to SW), The latter were identified in slot further SE & E of (1600199). Another field drain is located at the N EOE of the slot

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

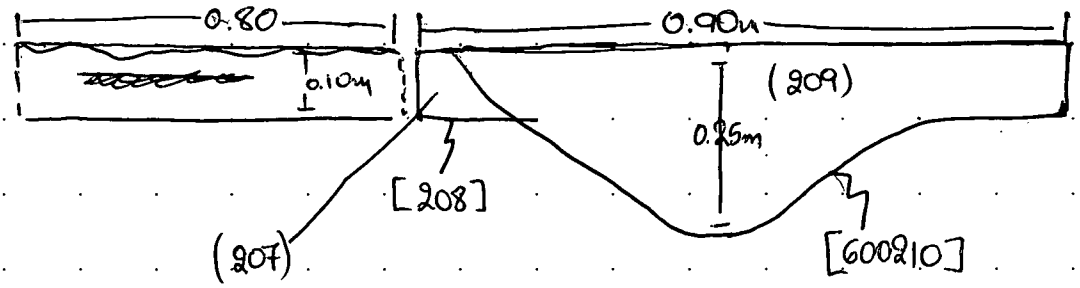

THE CUT OF ~~AN~~ A NARROW AND SHALLOW DITCH. (AT LEAST AT THIS PART OF ~~THE~~ IT).

WE DUG THE RELATIONSHIP BETWEEN THE DITCH ~~6~~ (WITH PARENT CON) No. [6000] WITH A FEATURE ~~CUT~~ CUTTING IT ~~[illegible]~~.
WE FOUND OUT THAT THE FEATURE IS A NATURAL INFILLING — HENCE DISTURBANCE OF THE DITCH => A TREE BOLE.
(SEE SKETCH BELOW)

HERE WE FOUND JUST THE EDGE OF THE DITCH AND THE TREE BOLE WHICH ~~CUT~~ CUT THAT.

Refer to context 600207

ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

THE CONTEXT IS THE FILL OF THE DITCH [600252].
IT SEEMS TO BE THE SAME FILL OF THE DITCH [600251], SIMILAR WITH THE FILL (600050) (600105) (600163).
THE FILL IS CUT BY THE DITCH [600254] AND IS IT POSSIBLE TO SEE IN THE "S" FACING SECTION.
THE DIFFERENCE BETWEEN THE FILLS IS HARD TO SEE BUT IN THE SECTION IN THE FILL (600251) THERE IS MORE CHARCOAL AND THE COLOR IS DARKER.

Refer to context [600252] FOR SECTION [600254] FOR PLAN

THE CUT APPEARS TO BE THE SAME OF THE DITCH [6002S1].
THE CUT IS DISTURBED BY THE PRESENCE OF A SHRUB HOLE THAT OBSCURED THE ORIGINAL EDGE AND THE CORNER WITH ANOTHER DITCH [6002S4].
THE PRESENCE OF THE SHRUB MODIFIED THE EDGES OF BOTH DITCHES.

Refer to context [6002S4] FOR PLAN

THE CUT CUTS THE FILL (600251) OF THE DITCH [600051].
THE CUT IS IN PART MODIFIED BY A SHRUB/TREE BOLE.
(SEE [600252] CONTEXT SHEET) SETTLED NEXT TO THE CORNER BETWEEN THE TWO DITCHES.
BECAUSE OF THE TREE BOLE THE PLAN IS UNCLEAR.
THE CUT SEEMS PART OF A LONGER DITCH [600049] BUT AFTER CUTTING THE DITCH [600051], GOING NORD, IT SEEMS DIFFERENT AND MAYBE IT'S NO LONGER THE SAME DITCH BUT ANOTHER [600075].

FILL OF A TREE BOLE. CUT.
THERE ARE CHARCOAL INCLUSIONS SPREAD IN THE SOIL.
ALSO, THERE IS OCHRE MIXED IN THE FILL.
WATCHING THE SECTION, A LINE IS OBSERVED; CROSSING THE GREY CLAYEY SOIL. (OF OCHRE)

SOME ROOTING IS ALSO DUG OUT.
FINALLY,
FEW IRON PAN PIECES WERE FOUND IN THE GROUND.

Refer to context [600265]

ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked * overleaf)

The only fill of a ditch who runs N-S. The fill is moderately compact, the colour is brownish grey and it's silty clay. The fill is very homogeneus and it's getting lighter towards the bottom.
The thickness in the deepest part is 0.33 m (south)
The process of formation of the fill looks like natural prosasly it's a / collumtal proces.

Refer to context [600267]

Cut of a ditch ; it's lineay and runs N-S.
The sides looks like stepped and gentle ; the base could be concave but we can see only a part of the ditch in the slot.
It has only one fill (600266) without ~~fractured~~ finds or inclusions
The cut is part of a ditch with is related with another ditches in the area probably they are boundary ditches

Refer to context [600267]

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Cut of a lineal ditch who runs N-S. The length is 1.50m (slot) the width 0.80 m and the depth 0.21m. The sides are gentle and the base is concave. This cut is cuts by another ditch [600269]
The ditch is very shallow: we can only see the botton.
~~It could be~~ It looks like be part of a group of another boundary ditches.

Refer to context [600271]

SKETCHES
(consider: location plan, detailed plan showing relationships, section showing fills/deposits as appropriate)

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

The Deposit is moderately compact and silty clay; the colour is greyish orange and very homogeneus.
It finds and occasional small stones (0.01m)
It looks like the remain of geological subsoil, The process of formation is natural.
The deposit is cut for two ditches [600269] and [600267]

Refer to context (600272)

CUT of GULLY - PARENT #[600306]
FILLED BY (600325) - No FINDS OR DATEABLE EVIDENCE RECOVERED.

GULLY CONTINUES NORTHWARD TO SLOT [600306] APX. 10m AWAY + SOUTHWARD FROM THIS SLOT FOR AT LEAST 7M.

COULD POSSIBLY BE FOR DRAINAGE PURPOSES?
PERIOD FOR FEATURE UN-KNOWN.

Refer to context

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Ditch terminus [600329] running E-W
The edges of the ditch in this slot are not really clear like in the others slot [600302] [600304], probably because of a slightly change in the geology of the ground (?) Weather conditions are not so good too (really sunny in the morning and bright / raining in the afternoon = photo can be not really clear!)

FILL OF LINEAR DITCH THAT RUNS E-W [100338]

FILL CONTAINED OCC. SMALL SUB-ROUNDED STONE, + X1 PIECE OF A-BONE (SHEEP METAPODIAL) POSSIBLY BURNT? OR COULD JUST BE BLEACHED FROM CLAY? IT COULD ALSO HAVE POSSIBLY BEEN PRESSED IN + NOT IN-SITU AS ALOT OF MACHINE TRACKS RUN OVER THE FEATURE. OCC. FLECKS OF CHARCOAL WERE ALSO FOUND + OCC. SMALL FLECKS OF IRON PANNING. THIS MIGHT INDICATE THE PRESENCE OF WATER BUT WITH NO CONCENTRATION COULD SIMPLY BE EVIDENCE OF WATER OVER TIME WHILST THE FEATURE NATURALLY BACKFILLED RATHER THEN RUNNING WATER THAT COULD SUGGEST IT WAS A DRAIN?

Refer to context

CUT of GULLY RUNNING SOUTH-WEST-WEST TO NORTH-EAST-EAST, FILLED BY (600351).

NO DATABLE EVIDENCE FOUND IN FILL.

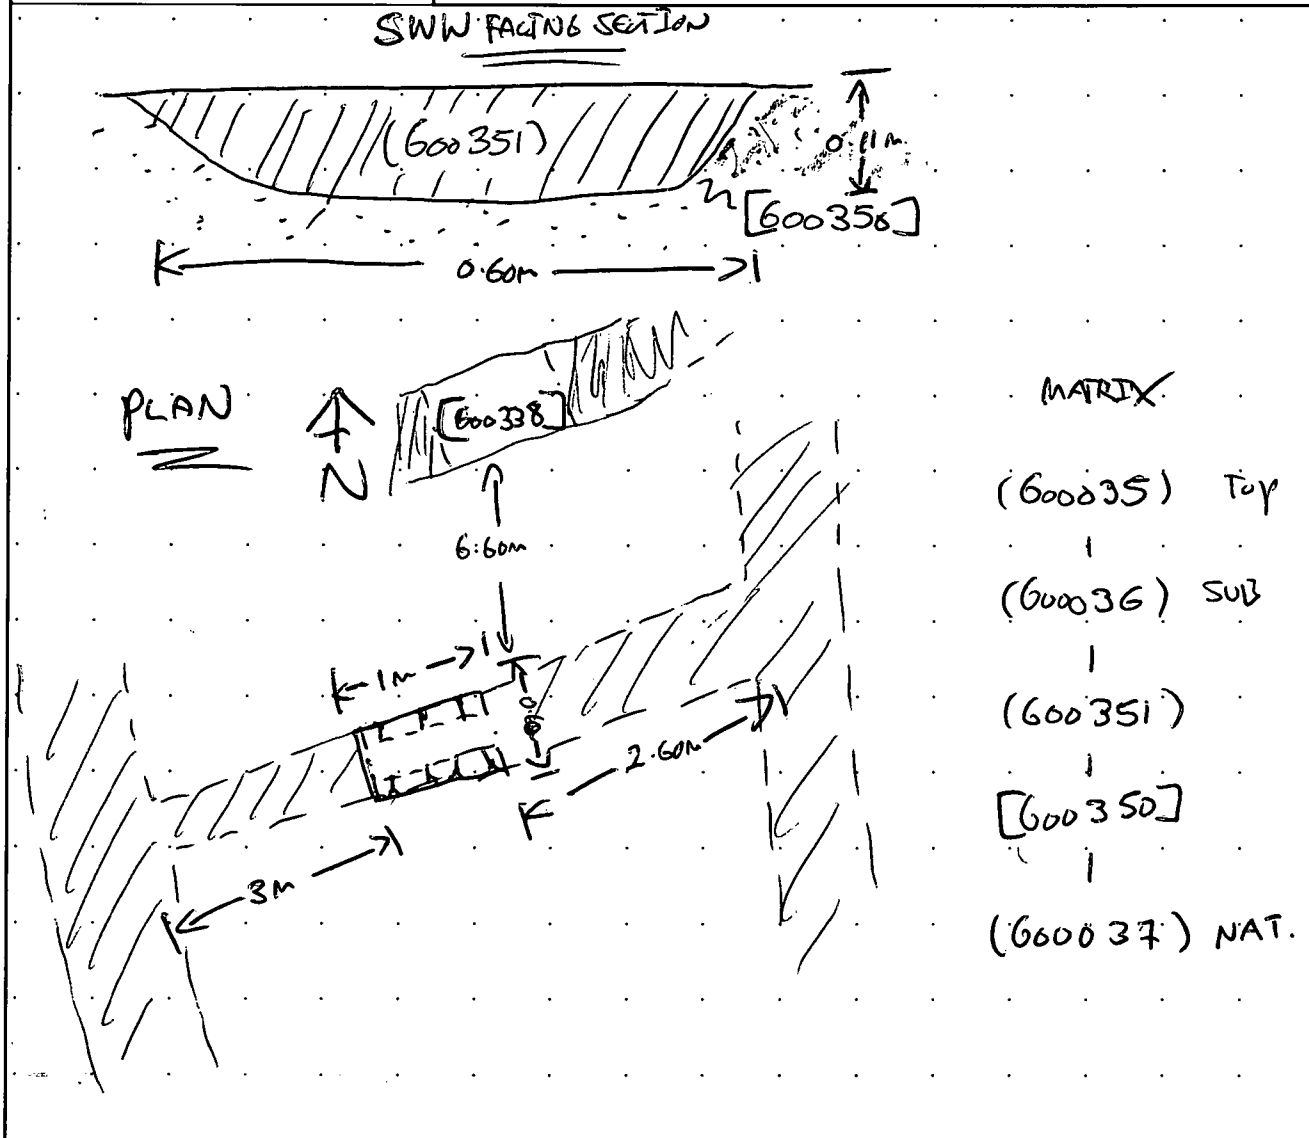

AGAIN COULD POSSIBLY BE A DRAINAGE DITCH AS IT SEEMS TO SHALLOW + SMALL TO BE A BOUNDARY.

I CANT ACCESS WHAT PERIOD IN TIME IT'S FROM AS NO DATABLE EVIDENCE WAS RECOVERED.

GULLEY RUNS INTO A N-S RUNNING LINEAR ABOUT 2.60M TO THE EAST + ANOTHER N-S LINEAR ABOUT 3M TO THE WEST.

ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

Ditch [600361] running NE - SW
This area is not really clear, the ground is being disturbed (modern pipe and probably the machinary?).
~~Yesterday~~ the ditch in this slot is not really deep and clear, edge a bit disturbed.

Refer to context

FRIABLE REDDISH-BROWN FILL, WITH FREQUENT GRAVEL (FLINT, ABOUT 2/3 cm OR SMALLER) AND CHALK. POSSIBLY NATURAL INFILLING DUE TO DISUSE OF THE FEATURE, IN FACT THIS FILL LOOKS EXACTLY LIKE THE NATURAL GROUND SURROUNDING THE DITCH, AND AS SUCH HAS MADE THE DITCH REALLY HARD TO IDENTIFY FROM THE SURFACE, (~~MIMETISING~~ CAMOUFLAGING) IT. EFFECTIVELY

8.5.17

ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

PLASTIC CLAY FILL, FEATURING A CONCENTRATION OF MANGANESE NODULES IN THE TOP PART OF THE FILL AND THE PRESENCE OF MEDIUM-BIG (6-10 cm) STONES (CHALK SHARDS AND PEBBLES) AT THE BOTTOM. THE FILL IS OTHERWISE STERILE OF MATERIAL, BUT GETS SLIGHTLY SANDY TOWARDS THE BOTTOM OF THE CUT. THIS SUGGESTS PASSAGE OF WATER.

SHEET 23

ADDITIONAL INFORMATION
*(any further details that may be important for understanding the context, including items marked * overleaf)*

CUT OF A DITCH RUNNING N-S WITH [600375] TO THE SOUTH. DITCH IS FILLED BY (600386), (600387), (600388) + (600389).
NO DATABLE EVIDENCE WAS RECOVERED FROM ANY OF THE FILLS HOWEVER BOTH (600387) + (600388) WERE SAMPLED S.60052 + S.60053. THIS WAS BECAUSE BOTH THESE FILLS CONTAIN ALLUVIAL DEPOSITS + DEAD PLANT REMAINS. WHAT THIS SUGGESTS IS AT SOME STAGE AFTER THE DITCH WAS CUT + AFTER SOME GRADUAL NATURAL SLUMPING + BACKFILLING WHICH PRIMARY FILL (600389) SUGGEST THERE WAS STAGNENT WATER/OR RUNNING WATER IN THIS PART OF THE DITCH FOR A CONSIDARABLE TIME UNTILL NATURALLY BACKFILLED AT A LATER DATE WHEN IT DRIED OUT AS (600386) SUGGESTS. THESE ALLUVIAL FILLS WERE NOT REPRESENTED IN [600375] TO THE SOUTH. POSSIBLY INITALL DUG FOR BOUNDARY PURPOSES + THEN AFTER IT FELL OUT OF USE IT WAS REUSED AS A DRAINAGE DITCH?

PRIMARY FILL OF N-S RUNNIN DITCH CUT [60385]

NO DATABLE FINDS WERE RECOVERED, ONLY OC. SUB-ROUNDED STONE + CHALK FLECKS. SIMILAR TO SURROUNDING NATURAL HOWEVER IT IS AT THE BASE OF THE CUT CLAY THAT IS CUT INTO NATURAL GRAVEL. WHICH SUGGESTS THIS IS A FILL THAT REPRESENT NATURAL SLUMPING OR BACKFILLING AFTER THE DITCH FELL OUT of USE. ONLY TO POSSIBLY BE RE-USED AS A DRAIN AS ABOVE FILLS (60388) + (60387) ARE ALLUVIAL IN NATURE + INDICATE THE PRESENTS of WATER. POSSIBLY THE DITCH WAS DUG INITIALLY FOR BOUNDARY PURPOSES + THEN AT/AC IT FELL OUT of USE BECAME A DRAINAGE DITCH?

Refer to context [60385]

ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

Cut of pit. Nature of pit unknown. The shape of the pit is irregular. There was a considerable amount of charcoal in the fill, but it doesn't appear as if the pit itself was used for any sort of firing.

Refer to context 600406

THE CUT OF THIS E-W LINEAR DITCH IS MODERATELY STEEP BUT THE DITCH IS SHALLOW. ONE FILL WITH NO DATEABLE FINDS. THIS LINEAR IS CUT BY ANOTHER [600411] THAT RUNS N-S BUT HAD ONLY ONE ~~FINDS~~ FILL AND NO DATEABLE FINDS. HOWEVER THE TERMINUS OF [600409] MIGHT BE CUT BY [600411] AS THE DITCH DOES NOT CONTINUE ON THE OTHER SIDE.

DIMENSIONS ARE FOR HALF OF THE FEATURE AS ONLY A RELATIONSHIP SLOT WAS EXCAVATED ~~FOR~~ AND NOT A FULL PROFILE.

THE CUT OF A LINEAR N-S DITCH THAT CUTS THE POSSIBLE TERMINUS OF [600409]. THIS LINEAR HAS MODERATELY SLOPING SIDES BUT IS FAIRLY SHALLOW. ONE FILL AND NO DATEABLE FINDS. DUE TO ~~THE~~ ITS SHALLOW NATURE AND SURROUNDING DRAINS, THIS DITCH IS MOST LIKELY A DRAINAGE DITCH.
THE DIMENSIONS ARE ONLY FOR THE EXCAVATED HALF OF THIS FEATURE, ~~NOT~~ THE FULL PROFILE AS ONLY A RELATIONSHIP SLOT WAS EXCAVATED)

Refer to context [600409]

22.4.17

ADDITIONAL INFORMATION

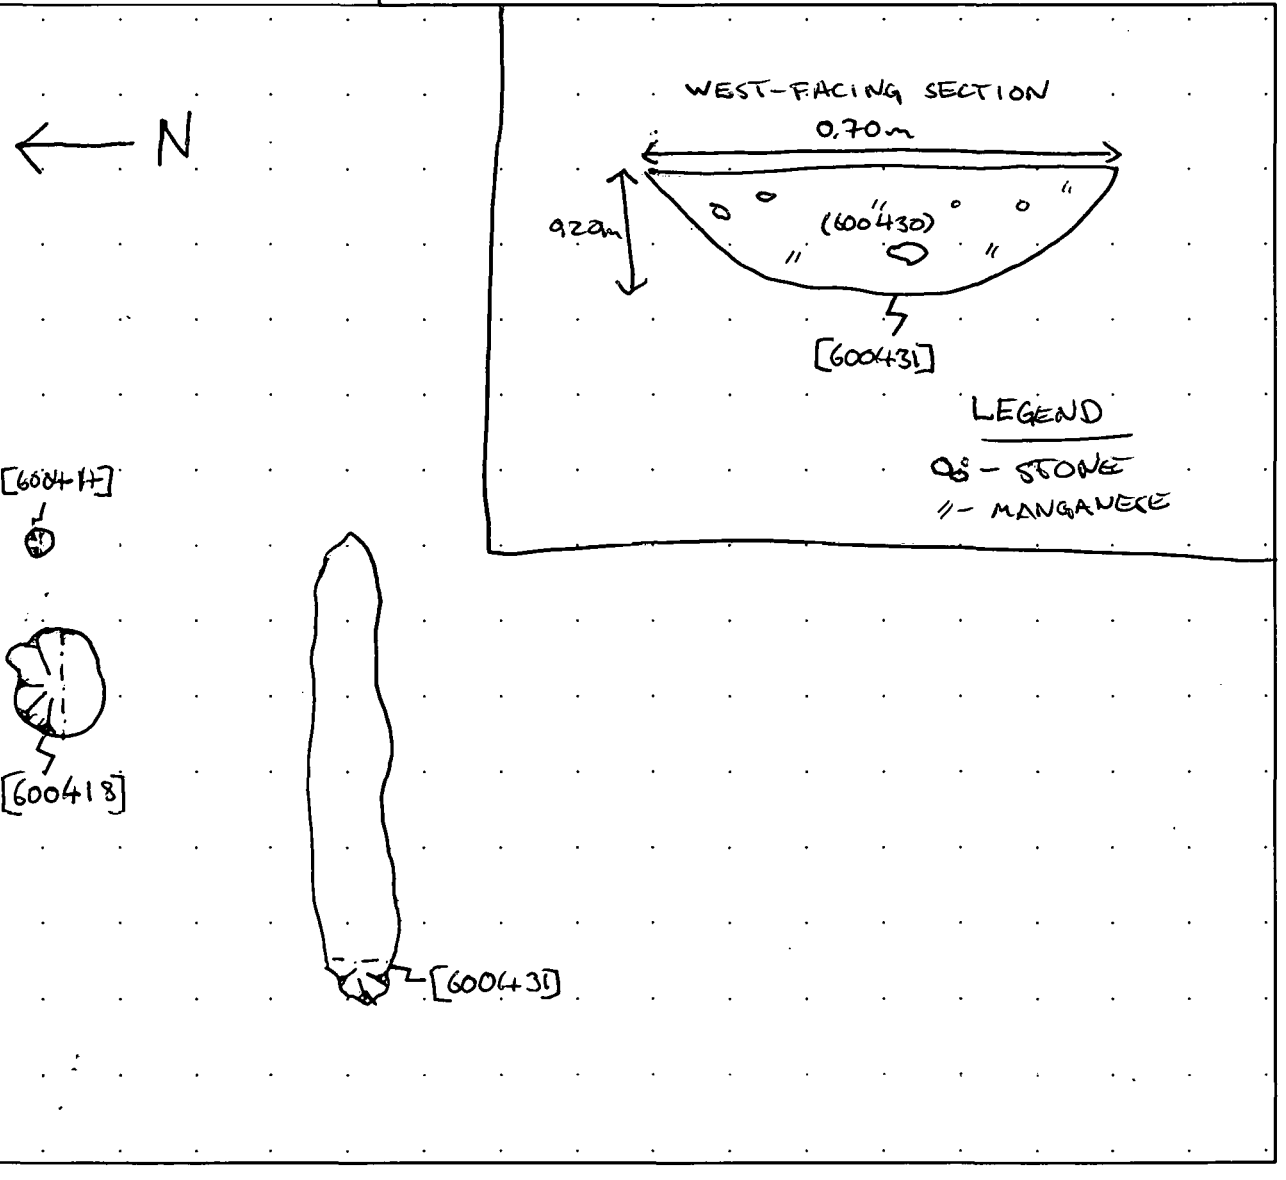

*(any further details that may be important for understanding the context, including items marked * overleaf)*

Cut of ditch. Possibly a boundary ditch that served to separate plots in a field system. The ditch was ostensibly no more than about 10m-ish long (see plan below), and there are other ~~streaks~~ of a similar shape and size in the vicinity that could all be boundary ditches. My slot is at the western terminus of the ditch. It was slightly overcut due to difficult soil conditions.

NA: INTERPHASE BETWEEN FILL OF DITCH [600432] AND THE NATURAL.

VERY QUITE COMPACT WITH A LARGE AMOUNT OF CHALK INCLUSIONS.

NO FINDS PRESENT.

Refer to context [600432]

27.4.17

ADDITIONAL INFORMATION
*(any further details that may be important for understanding the context, including items marked * overleaf)*

CUT OF A LINEAR DITCH, ~~THAT~~ HOWEVER MAY ALSO BE A HEDGE LINE DUE TO ~~THE~~ CHARCOAL RICH FILL WHICH INDICATES EITHER IN-SITU BURNING OF BUSHES/WOOD OR A ~~DUMP~~ DELIBERATE BACKFILL OF A BURNT DUMP OF MATERIAL. NO DATEABLE FINDS FOUND. THE LINEAR DITCH SEEMS TO BE SAT IN AN ACOMPLEX AREA OF ACTIVITY THAT IS MORE THAN DRAINAGE. HOWEVER THE DITCH IS MOST LIKELY A HEDGE LINE BECAUSE IT STRETCHES THE LENGTH OF THE TRENCH AND APPEARS TO HAVE THE SAME DARK CHARCOAL FILL.

Refer to context: 600435

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

FILL OF LINEAR DITCH OR HEDGEROW. SINGLE FILL. THE SILTY CLAY, MOD-COMPACT FILL ~~WAS~~ FULL OF CHARCOAL, THE FILL PREDOMINANTLY CHARCOAL. NO FINDS TO HELP DATE WERE FOUND HOWEVER DUE TO DENSE NATURE OF THE CHARCOAL THERE MAY HAVE BEEN IN SITU BURNING OF BUSHES OR WOOD OR HEDGE ~~LINE~~ ROW. A SAMPLE WAS TAKEN <6000AD. HOWEVER THE SURROUNDING NATURAL HAS A LOT OF MAGENESE IN IT WHICH MIGHT SUGGEST THE ~~SURROU~~ LINEAR IS SITUATED/SITTING IN A COMPLEX AREA OF LOTS ACTIVITY MORE THAN JUST DRAINAGE.

CUT OF E-W LINEAR DITCH OR HEDGE LINE. ONE FILL THAT IS PREDOMINANTLY FULL OF CHARCOAL. DUE TO THIS LARGE AMOUNT OF CHARCOAL THROUGHOUT THE LINEAR THAT STRETCHES ACROSS THE TRENCH, THERE MAY HAVE BEEN HEDGE ROW/BUSHES THAT WERE BURNT/PUSHED (THEN FLATTENED) INTO THE DITCH AND BURNT IN SITU. THIS LINEAR IS CUT BY ANOTHER LINEAR DITCH [600456]. NO DATEABLE FINDS IN EITHER LINEAR.

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

CUT OF E-W LINEAR DITCH. CUTS INTO (600454), ANOTHER E-W LINEAR. GENTLEY SLOPING SIDES WITH SLOPING BASE AS ONLY HALF OF THE PROFILE WAS EXCAVATED AS THE SLOT WAS DUG TO UNDERSTAND THE RELATIONSHIP BETWEEN [600453] AND [600455]. ONE FILL BUT NO DATEABLE FINDS. DUE TO THE LENGTH OF THE DITCH ACROSS THE TRENCH AND ITS WIDTH, THIS LINEAR MAY BE A BOUNDARY DITCH.

Refer to context (600454)

SKETCHES
(consider: location plan, detailed plan showing relationships, section showing fills/deposits as appropriate)

ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

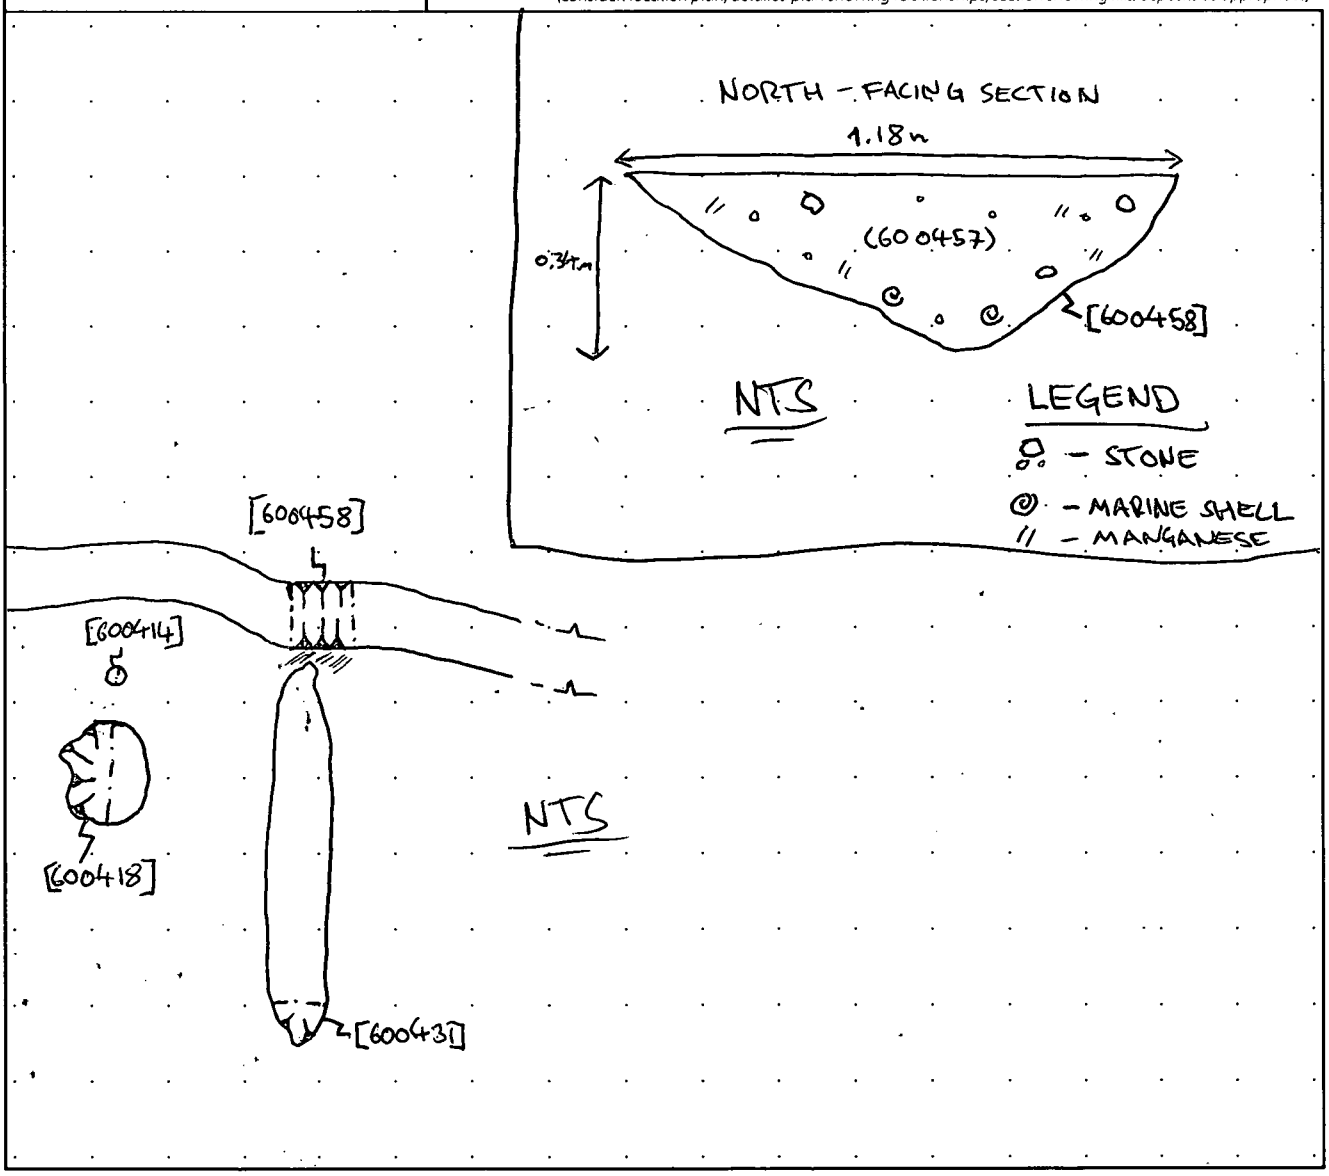

Fill of ditch [600458]. The fill yielded no valuable information. There were no finds or notable inclusions in it.

On the surface it looked as though it might have a relationship with ditch [600431], but this turned out to not be the case.

CUT OF E-W LINEAR, MOST LIKELY A DRAINAGE DITCH. ~~STEEP~~ STEEP SLOPING SIDES WITH CONCAVE ~~BASE~~ BASE. ONE FILL WITH A RANGE OF DATES FROM THE FINDS. ~~POT~~ DIFFERENTIATED POT ≠ PART OF A FLINT CORE. THE COLLECTION OF FINDS AS WELL AS THE PRESENCE OF A MODERN DRAIN PIPE IN THE SIDE OF THE DITCH PROVES IT IS A DRAINAGE DITCH THAT HAS BEEN RE-USED.

CUT OF DITCH [600483]. SLOT LOCATED TERMINUS, WHICH IS UNUSUALLY SHALLOW. 8 CM. WITH A FLAT BASE. NO FINDS ASSOCIATED WITH DITCH AS OF YET.

OUR E-W RUNNING DITCH IS CUT, OR CUTS, A N-S RUNNING DITCH APPROX. 5 M TO THE W. SOM EVIDENCE OF BURNING CAN BE FOUND NEXT TO THE SLOT (SEE SKETCH).

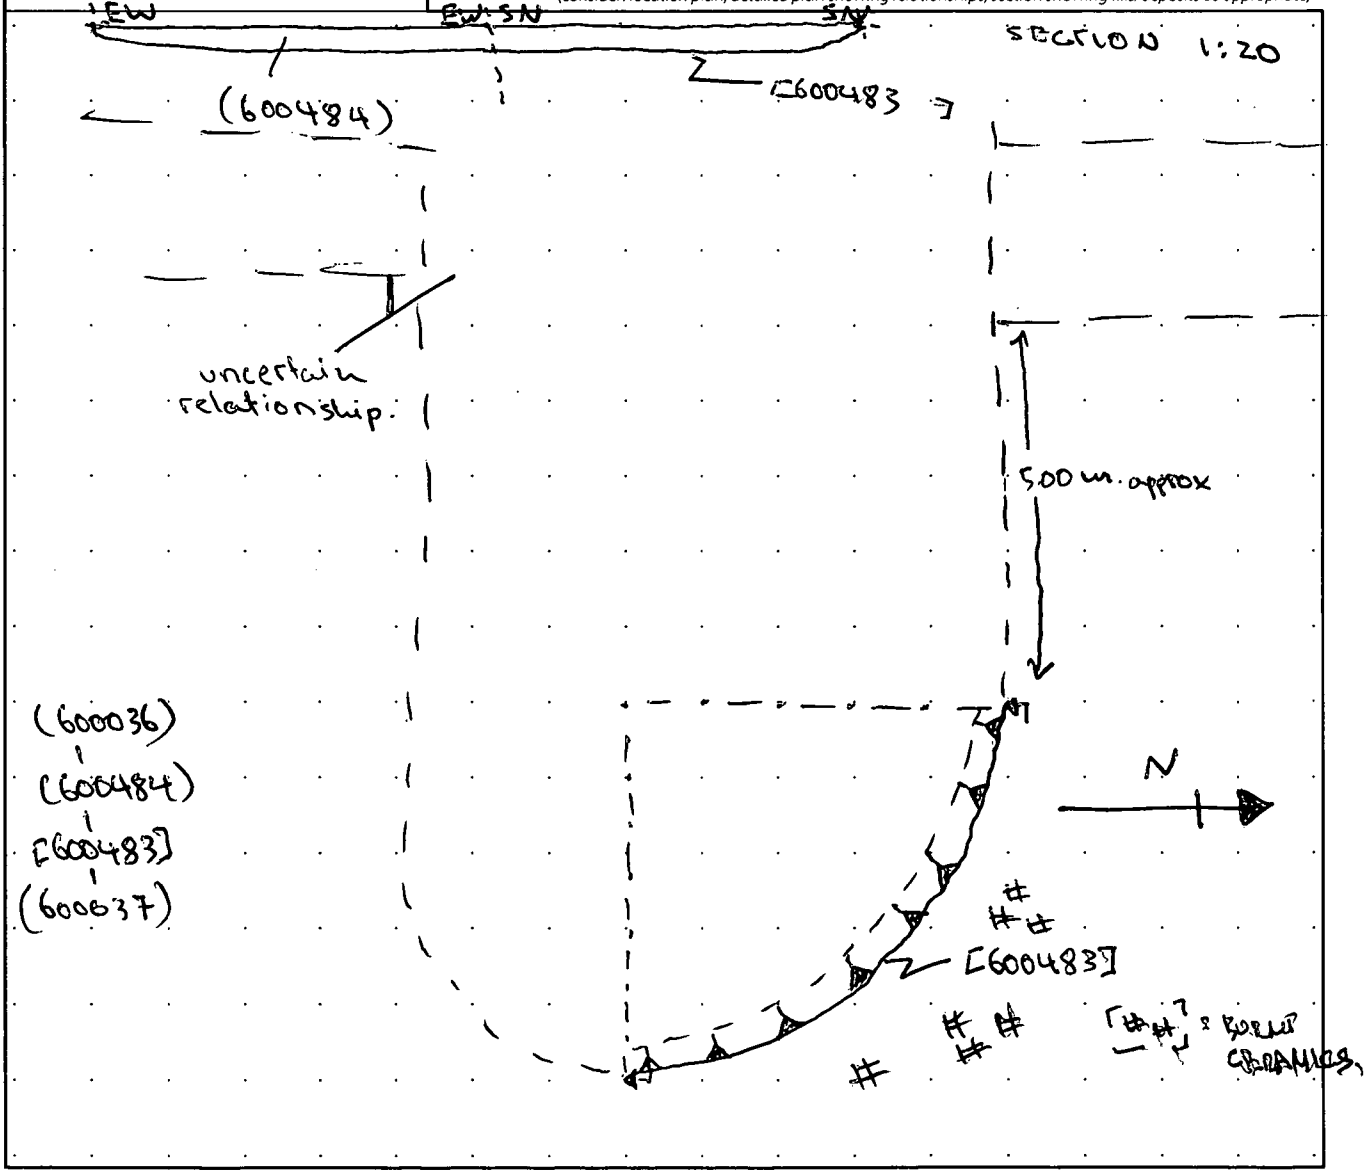

THE DITCH IS LIKELY TO BE PART OF A GREATER FIELD-SYSTEM.

[IT'S A POSSIBLE TERMINUS, AS OF 5.05.2017 — A. RUSU —]

FILL OF E-W LINEAR DITCH [600487]. THE SINGLE FILL OF THE DITCH AND IS A DELIBERATE BACKFILL DUMPED INTO THE DITCH MOST LIKELY AT THE END OF ITS USE. THE DITCH IS V-SHAPED AND POTENTIALLY MIGHT ORIGINALLY DATE BACK TO THE IRON AGE PERIOD AND BACKFILLED LATER ON. MOD-COMPACT MID BROWNISH GREY SILTY CLAY. FINDS INCLUDE BURNT/STAINED BONE AND POT THAT MAY EITHER BE IRON AGE/SAXON. DUE TO THE MIX OF FINDS AND SURROUNDING MODERN DRAINS AS WELL AS A SIMILAR V-SHAPED DITCH, THIS LINEAR IS MOST LIKELY A DRAINAGE DITCH

CUT OF E-W LINEAR DITCH. ONE FILL WITH FINDS THAT ARE AT LEAST SAXON / (POST) MED DATE. SHAPE OF DITCH IS SIMILAR OF THAT OF THE ROMAN 'V' SHAPE, IT HAS STEEP SIDES AND A FLAT/CONCAVE BASE. THEREFORE THE CUT AND FILL MAY HAVE OCCURED AT VERY DIFFERENT TIMES. THIS LINEAR RUNS PARALLEL TO ANOTHER LINEAR DITCH THAT IS VERY SIMILAR IN SHAPE, FILL AND FINDS.

Refer to context 600489

ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

FILL OF [600489] AN E-W LINEAR DITCH. SINGLE FILL IN THE DITCH, MOST LIKELY DELIBERATELY BACKFILLED AT THE END OF THE USE OF THE DITCH.
MOD-COMPACT, MID GREYISH BROWN SILTY CLAY WITH VARIOUS FINDS: BONE, CHARCOAL, POT AND SOME STONES.
ANOTHER SLOT WAS EXCAVATED IN THIS DITCH [600487] WHICH PRODUCED SIMILAR FINDS. THE PROBABLE DATE FOR THE FILL IS AROUND SAXON / POST MED. HOWEVER THE SHAPE OF THE DITCH APPEARS ROMAN.

Refer to context [600489]

CUT OF DITCH [600491] RUNS N-S WHICH IS THEN CUT BY A LAND-DRAIN TO THE NORTH AND THEN CUTS A E-W RUNNING FURROW APPROX 5 m NORTHWARDS

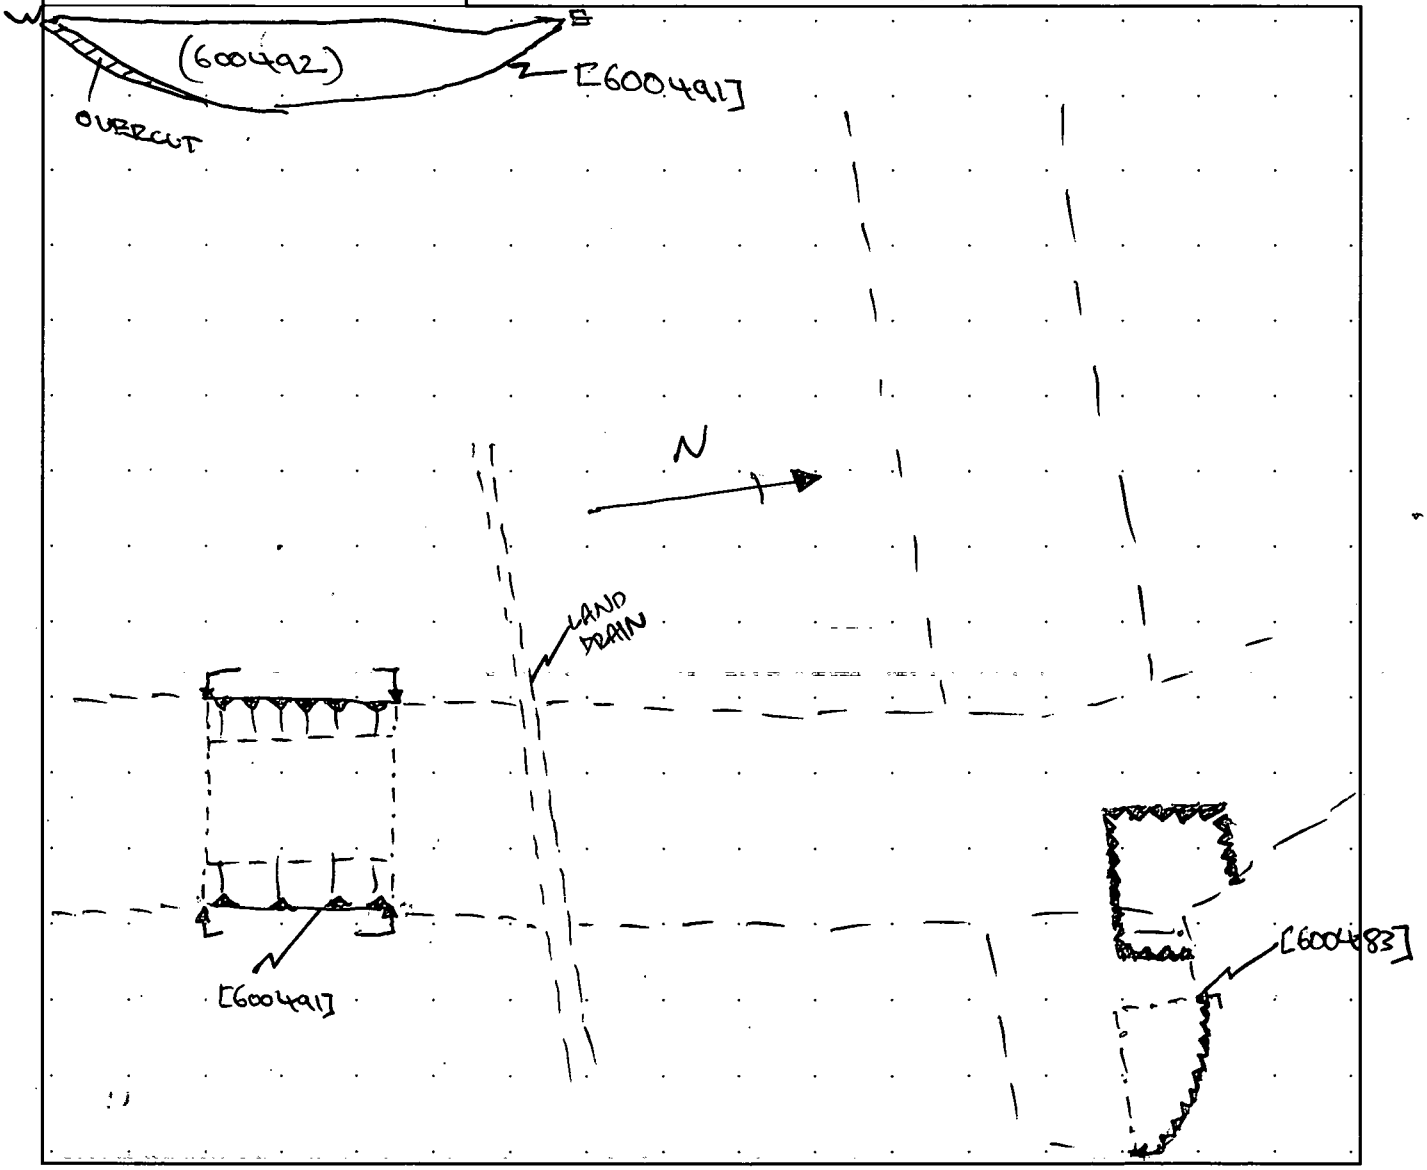

THE PROFILE OF THE CUT HAS SHALLOW EDGES AND A VERY SLIGHTLY CONCAVE BASE.

A SMALL AMOUNT OF DEGRADED POTTERY WAS PRODUCED WHICH MEANS DATING IS UNSURE. POSSIBLY SAXON?

Refer to context: 600491

CUT OF E-W RUNNING FURROW. 4 M TO THE EAST IT IS CUT BY A N-S RUNNING DITCH [600491]. THE FURROW'S TERMINUS IS APPROX 8 m. TO THE EAST.

THE PROFILE OF THE CUT IS VERY SHALLOW WITH A ROUGHLY CONCAVE BASE BUT WITH PATCHES OF UNEVEN GROUND.

NO DATING AS OF YET BUT IT IS KNOWN THAT IT ~~POST DATE~~ PRE-DATES DITCH [600491] AS IT IS BEING CUT BY IT.

Refer to context 600499

CUT OF DITCH. [600491] WHICH RUNS N-S. THE RELATIONSHIP SLOT INDICATES THAT IN SECTION THE DITCH CUTS THROUGH THE EARLIER E-W RUNNING FURROW [600499]+[600511]. THE PROFILE OF THE DITCH MATCHES THE SLOT FURTHER SOUTH (SEE PLAN (600510)), WITH MODERATELY SLOPING BANKS.

BOXING OF THE FEATURE OCCURED AS IT WAS UNCLEAR AT WHAT POINT THE INTERSECTING FEATURES MET.

A SMALL AMOUNT OF POTTERY WAS FOUND IN THE FILL. POSSIBLY SAXON?

Refer to context (600510)

SKETCHES
(consider: location plan, detailed plan showing relationships, section showing fills/deposits as appropriate)

ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

Fill of what looks like some sort of pit. The feature looks like it might be a ditch if you look at its outline on the surface, but it is irregular and the base is uneven, which makes me think it is a pit. The fill contained one piece of pottery and an unknown metal object.

Refer to context

*(any further details that may be important for understanding the context, including items marked * overleaf)*

CUT OF CURVILINEAR DITCH. THIS DITCH HAS BEEN CUT BY ANOTHER N-S LINEAR DITCH, IT HAS [600522] TRUNCATED THE TERMINUS OF [600520] MAKING THE TRUE DIMENSIONS AND NATURE OF THE TERMINUS NEGLIGIABLE. ONE FILL IN THE DITCH THAT WAS MOST LIKELY DELIBERATE BACKFILL, THIS IS CONSIDERED AS TWO OTHER PROFILE SLOTS WERE EXCAVATED WITHIN THIS LINEAR [600475] & [600498]. THIS LINEAR AND ANOTHER RUNNING PARALLEL LINEAR WITH A SIMILAR FILL AND CUT AND VERY DIFFERENT TO OTHER DITCHES AROUND SO THEY MIGHT BE A PART OF AN EPHEMERAL STRUCTURE RATHER THAN A FIELD SYSTEM DUE TO THE GREATER PROPORTION OF POT/BONE FINDS DATING TO SAXON/POST MED.

Refer to context: 600520

FILL OF [600520] * CURVILINEAR DITCH. THE ~~BASE~~-SOLE FILL THAT WAS A DELIBERATE BACKFILL AT THE END OF THE DITCHES USE. THE FILL/TERMINUS OF THIS LINEAR IS CUT BY A N-S LINEAR DITCH [600522]. THE FILL IS MOD-COMPACT MID BROWNISH GREY ~~SILTY~~ SILTY CLAY WITH A LOT OF IRON STAINING IN IT. FINDS INCLUDE ~~MODERATE~~ MODERATE AMOUNTS OF CHARCOAL PIECES, BURNT BONE, A VERY SMALL PIECE OF CREMATED BONE, ~~AND~~ NON-BURNT BONE AND ANIMAL TEETH. NO DATEABLE EVIDENCE BUT A PIECE OF SAXON POT WAS FOUND IN THE ~~NEAR~~ OTHER DITCHES FILL (600523).

CUT OF N-S LINEAR DITCH. POTENTIALLY COULD BE PART OF A CURVILINEAR FEATURE BUT THAT WAS UNKNOWN WHEN SLOT WAS EXCAVATED. ONE FILL WITH SAXON POT IN IT. THIS LINEAR TRUNCATES THE POSSIBLE TERMINUS OF [600520], ANOTHER LINEAR. MOD-SLOPING SIDES WITH A SLOPING BASE, THE EXACT SHAPE OF THE BASE IS UNKNOWN DUE TO THE TRUNCATION.

Refer to context [600520]

ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

Cut of unknown feature. Very irregular.
This slot was just a test slot dug to try to figure out what this feature actually is. It does not span the entire width of the feature.

Refer to context

SKETCHES

12.05.17

ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

Cut of ditch. Nature of ditch unknown. The pipe in the ditch is not on the same angle as the ditch itself, so it does not appear as if the ditch was cut for the laying down of the drainage pipe. The ditch is also far too wide to have been dug for the pipe. At the same time, there is no apparent cut for the pipe, which suggests that it was put in place before the ditch was filled.

This whole area is a bit confusing. A number of features have turned out to be quite different from what we expected from just studying the lines on the surface. This feature, for instance, does not line up with plans I drew on context sheets for previous features, such as [600555] and [600525]

Refer to context 600 582

(any further details that may be important for understanding the context, including items marked * overleaf)

Cut of ditch. Roughly parallel to another ditch [600582].

Possibly related to/same as [600525].

FROM THE SKETCHED PLAN BELOW, AND FROM THE ACTUAL SLOT & BY COMPARING [600584] WITH [600582] & [600515] I UNDERSTAND THAT ALL 3 FEATURES ARE SIMILAR & PART OF THE SAME EVENT & USE/UTILITY.
(RA. 10/5/12)

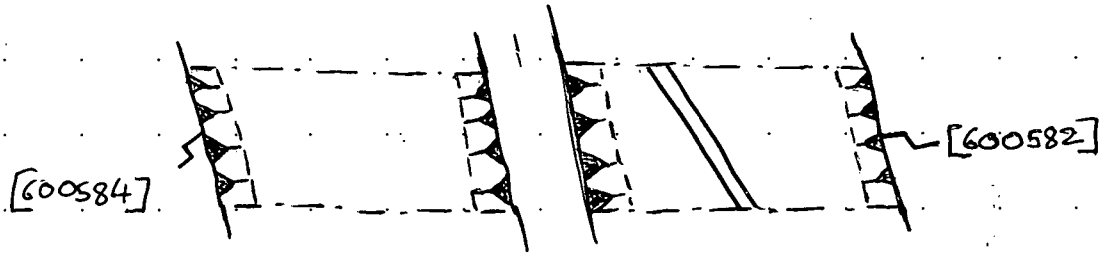

Refer to context 600584

SKETCHES
(consider: location plan, detailed plan showing relationships, section showing fills/deposits as appropriate)

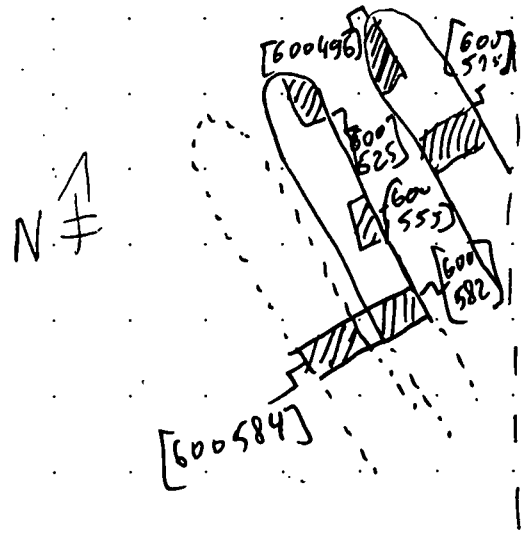

N

NTS

For sketch, see [600583]

For plan of the lager area, see [600582].

CUT OF N-S POTENTIAL LINEAR. ORIGINALLY ASSUMED TO BE A PIT BUT BECAME CLEAR THAT IS MORE LIKELY TO BE A DITCH. A ~~LAYER~~ DEPOSIT LAYER OF DISTURBED CLAY SITS ON TOP OF THE ARCHAEOLOGICAL FEATURES OF THE ~~AREA~~ SURROUNDING AREA AS WELL AS ON TOP OF THIS FEATURE. THE FULL EXTENT OF THE FEATURE IS THEREFORE NOT VISIBLE FROM THE SURFACE. TWO FILLS IN THIS LINEAR, THE UPPER IS CHARCOAL STAINED WITH LOTS OF POTENTIALLY BURNT POT/CBM PIECES AND THE LOWER/PRIMARY FILL - HAS A FREQUENT AMOUNT OF CHARCOAL PIECES IN. NO DATE FOR THIS LINEAR AND THE USE IS UNKNOWN.

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

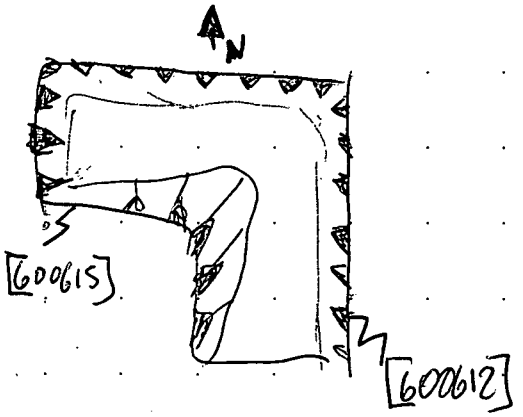

Cut of ditch running E-W. The shape is irregular because of the relation with an other ditch [600612]. It has moderate sloping sides with a flat base. The height is 1 m, the width is 0,60 m and the depth is 0,40m.
This context cuts only the natural context (600037).

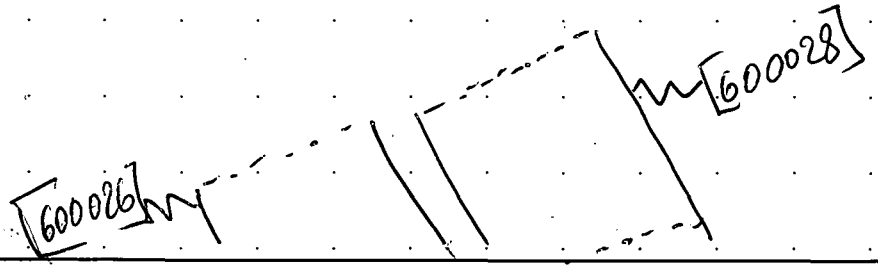

Refer to context

(any further details that may be important for understanding the context, including items marked * overleaf)

F/O [600622] IS CLAYEY WITH SOME SILT AND SAND. FILL IS DARKER ON TOP THAN BECOME LIGHTER BUT STILL CLAYEY (NOT LIKE SOURROUNDING MATERIAL - SIMILAR IN COLOUR BUT DIFFRENT (LESS CLAY) IN COMPOSITION. NATURAL UNDER FEATURE IS NICE ORANGEISH/GRAVELY - EASY TO OBSERVE DITCH CONTINUES GOING ON NE DIRECTION, SIMILAR FILL CAN BE OBSERVE IN OTHER SLOT (600232) BUT THERE IT IS WITH SOME OTHER FILLS AND DEPOSITES THAT DID'NT OCCURED (SUPRISINGLY!) IN MY SLOT!

Refer to context [600622]

ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

THE CUT IS A PART OF A LONGER DITCH. IT CUTS THE FILL (600635) OF ANOTHER DITCH [600637]

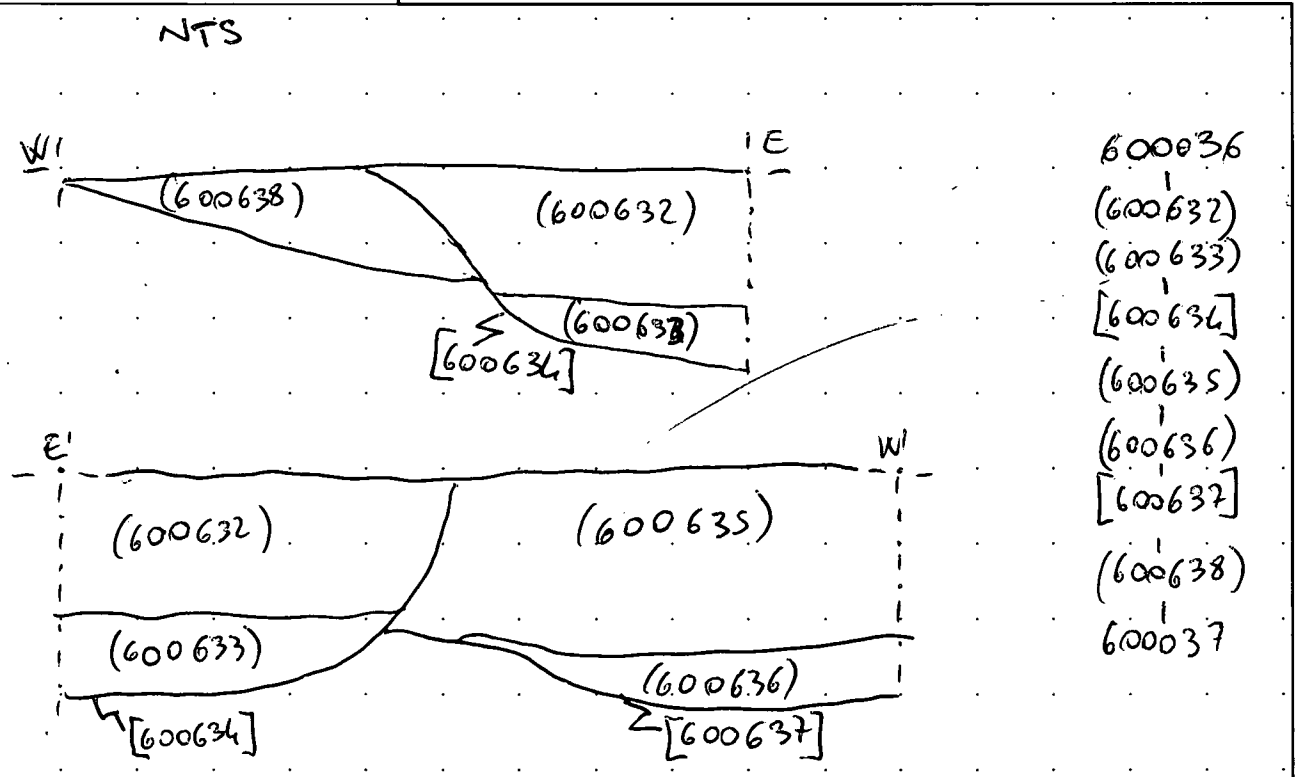

THE CUT WAS MADE IN PART IN THE NATURAL AND IN PART IN AN ANCIENT SUBSOIL (600638), A DEPOSIT THAT HAD COVERED THE NATURAL. AS SHOWED BY OTHER SECTIONS OF THE DITCH IT SHOULD BE DEEPER BECAUSE IN THIS SLOT IT WAS EXPOSED ONLY PART OF THE EDGE (SEE PLAN). IT SEEMS THAT THE CUT IS PART OF THE DITCH [600075].

THE CUT IS PART OF A LONGER DITCH [600051] THIS DITCH APPEAR TO BE CUT BY DITCHES [600079] AND [600075] MAY BE PART OF THE SAME DITCH. > CROSSED BY ANOTHER DITCH IT IS DIFFICULT TO SAY BECAUSE THEY MEET IN ONE POINT AND HAVE SIMILAR DIRECTIONS BUT THEY DONT APPEAR TO BE EXACTLY THE SAME.

ADDITIONAL INFORMATION

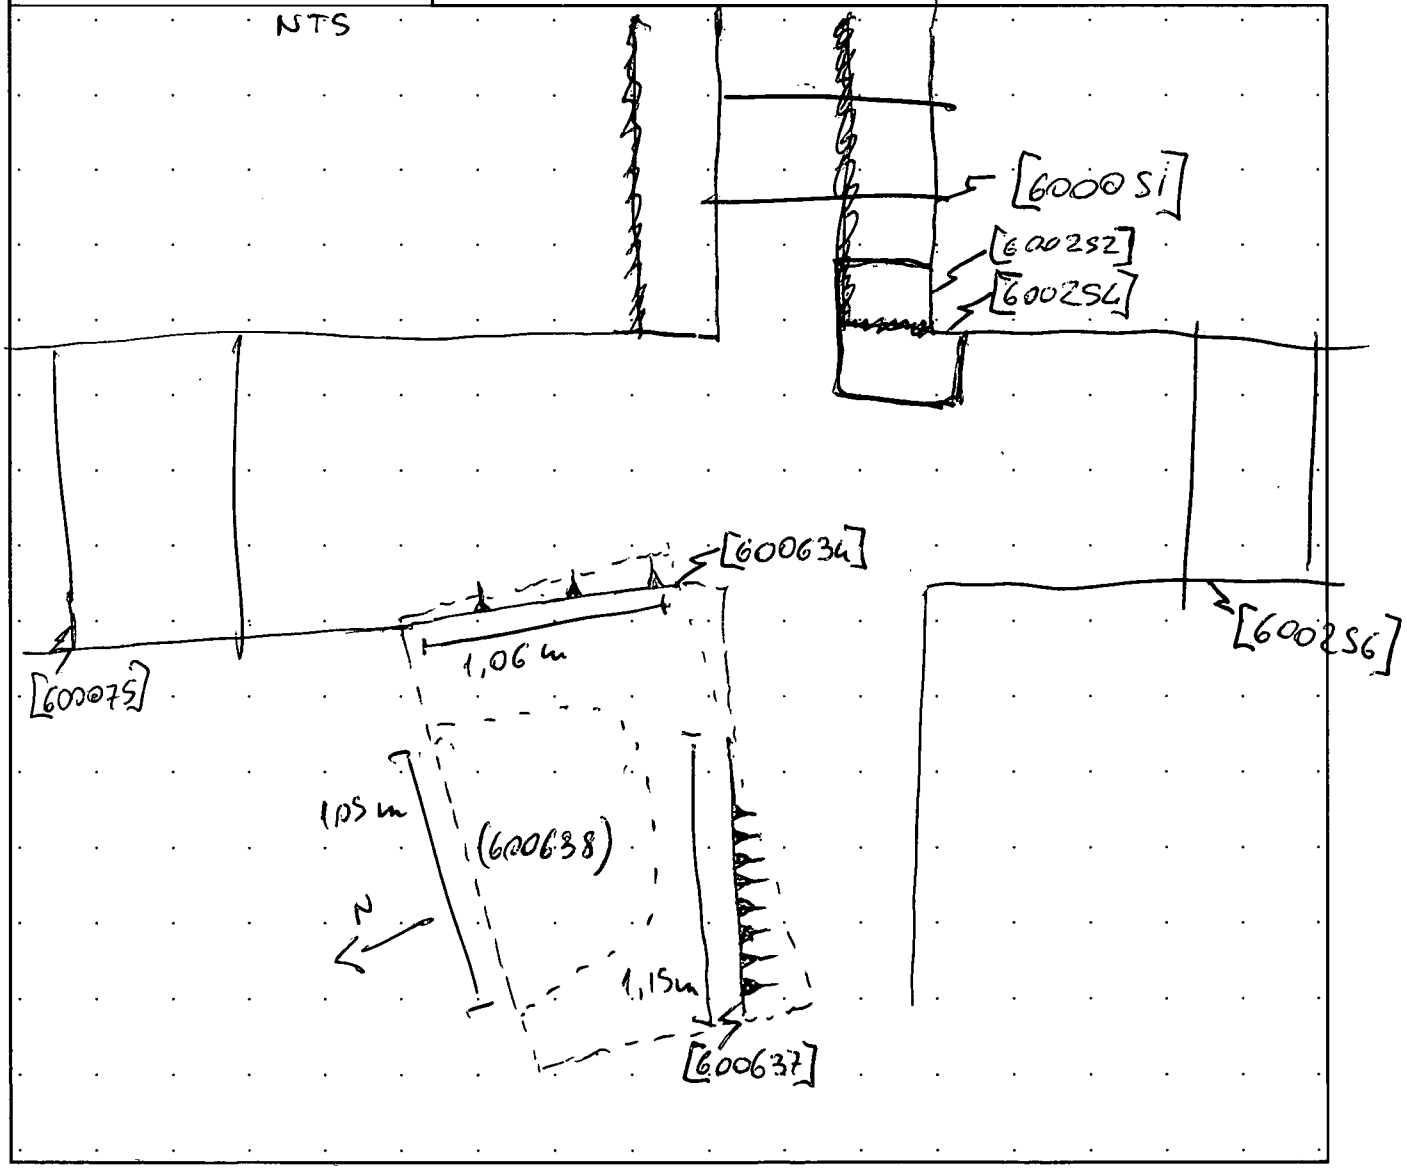

*(any further details that may be important for understanding the context, including items marked * overleaf)*

Cut of ditch, likely used for drainage. Possible truncation by machine as the depth of the cut was quite reduced compared to the adjacent slots from the ditch.

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

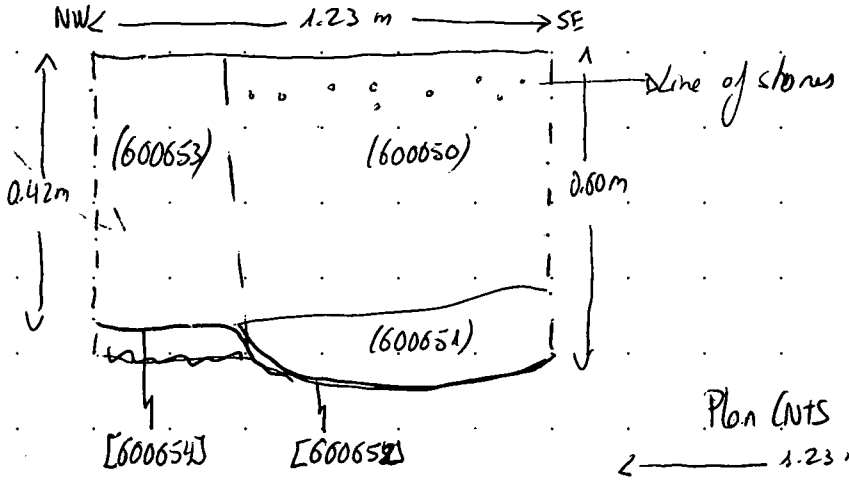

First fill of a ditch wich runs SW NE. The fill is silty clay wich is moderately compact and greyish brown. The fill is very uniform but at 0.005 m of the bottom there is a a thin line of very small stones.
There are no other inclusions and dose to the bottom there is an animal bone (teeth).
The limit with the second fill of the ditch (600654) wich is above is very ambiguous.
It's a natural process of formation (prossesy colluvial process)

Refer to context [600652]

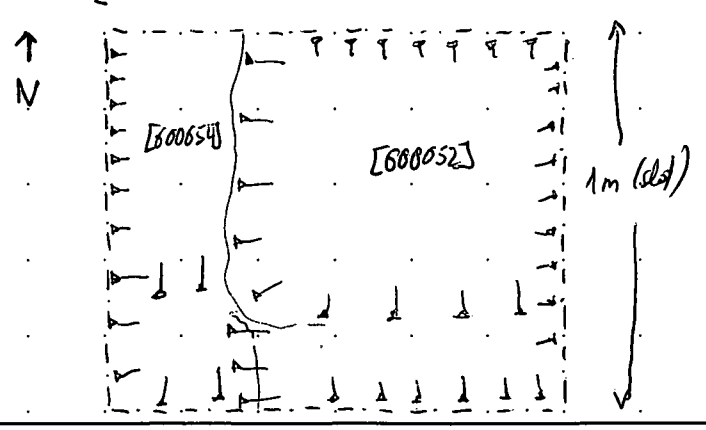

SKETCHES

14/6/17

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Second fill of a ditch which runs SW-NE. The fill is silty clay and the colour is orangish grey and moderately compact. The fill is very similar to the fill that is above it (600650) which is very unclear, in fact both fills are very similar but this is more greyish.
No inclusions or find
It's a natural process of formation once the ditch was abanded.

Refer to context. [600652]

ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

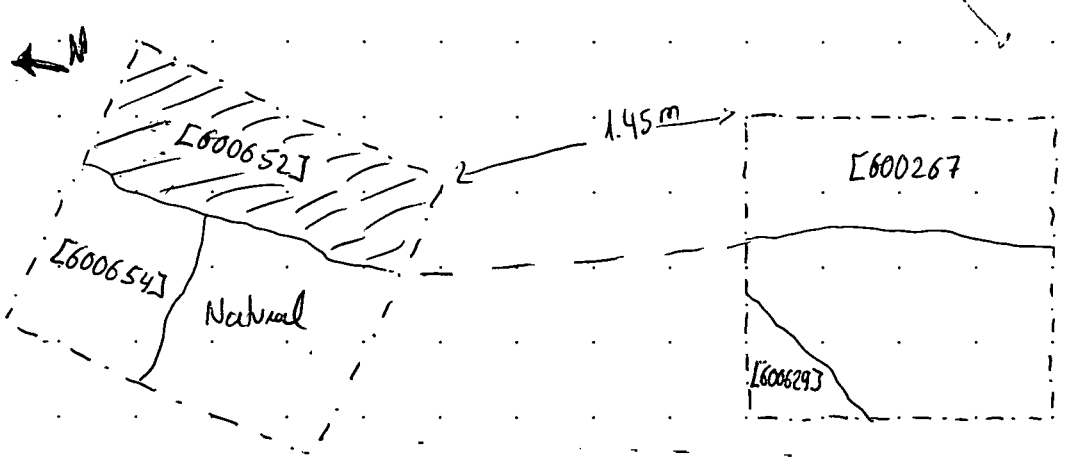

Cut of a linear ditch, the direction is SW-NE. The width is 0.80, the length 1 m (slot) and the depth 0.60 m. The side is gentle (in the slot we only can see the NW side) and the base is flat. The cut has two fills (600650) and (600651) and cuts the natural (600037); also this cut is cutting another ditch (600654) who was NW-SE [600654]. The cut in the other ditch [600652] is very ambiguous but is evident in a small line of very small stones which was at the top of this ditch (600650). ~~which stop~~
It could be a ~~ditch~~, boundary ditch.

Refer to context [600654]

ADDITIONAL INFORMATION

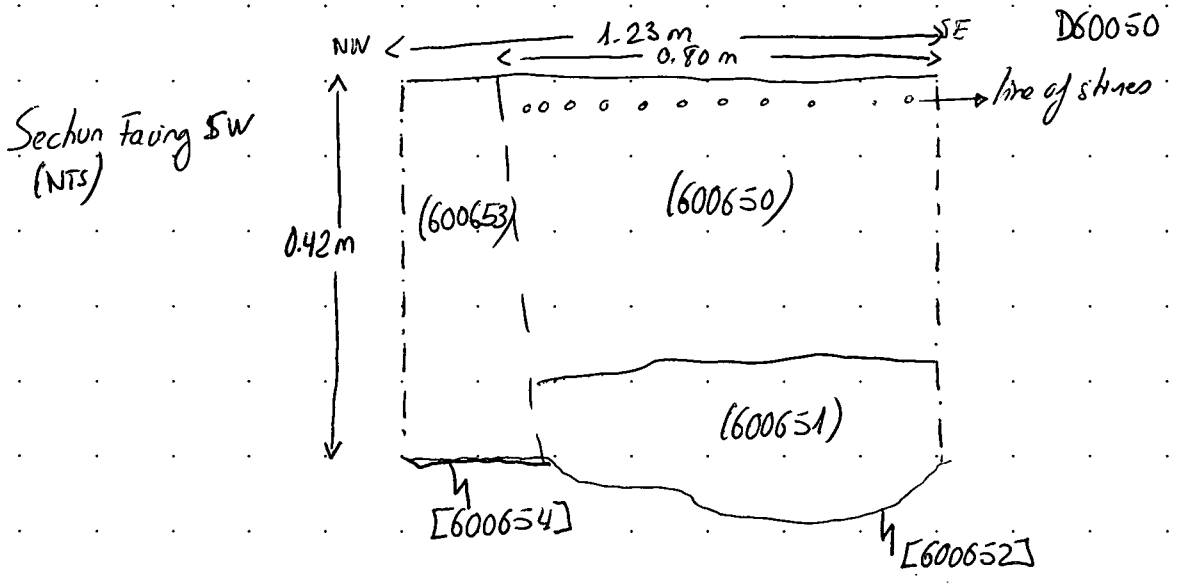

*(any further details that may be important for understanding the context, including items marked * overleaf)*

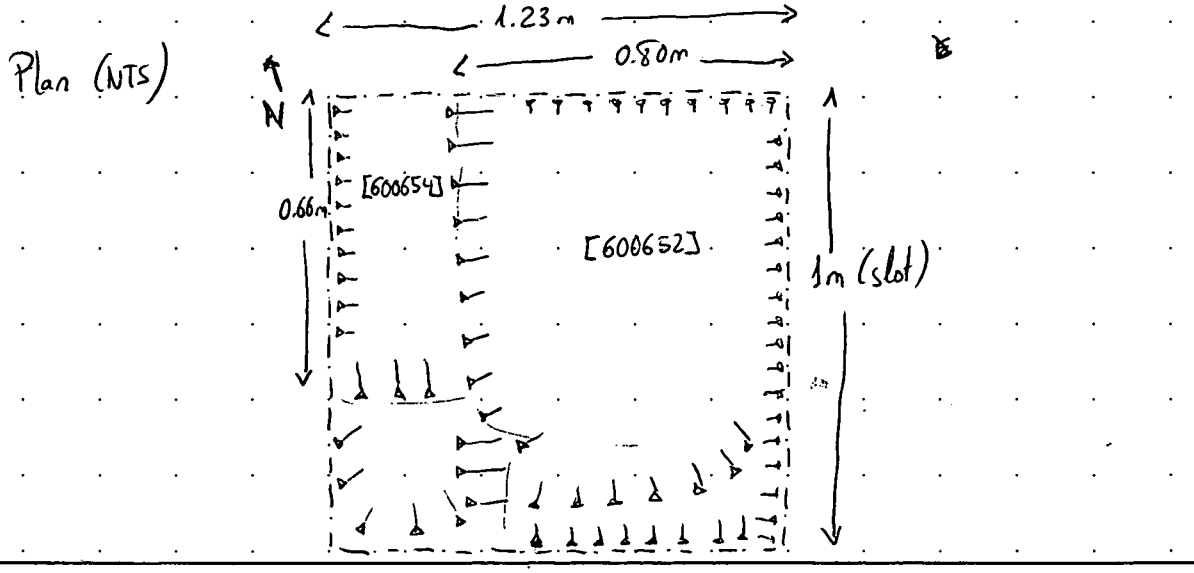

Fill of a ditch [600654] which runs NW-SE; the fill is silty clay, moderately compact and the colour is yellowish brown.
The fill is cut by another ditch [600652] which runs SW-NE. The limit with the fill of this other ditch (600653) is very mixed but is mark by a thin line of a small stones which disappeared in the fill.
There is one "tile" (CBM) at the bottom and small fragment of bone.
It's the only fill of a ditch [600654]
It's a natural infilling.

Refer to context [600652]

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Cut of a ditch, which runs lineal NW-SE. The base is flat and the side is gentle (we only can see part of the cut in the plot, the side sout).
This ditch is cutting by another ditch [600654] the limit between both is very unclear and ambiguous but a small line of stones is only in the fill (600650) of the other ditch [600652] and it's interrupted in this ditch (600653).
It could be a boundary ditch as other similars in the area.

Refer to context [600654]

ADDITIONAL INFORMATION
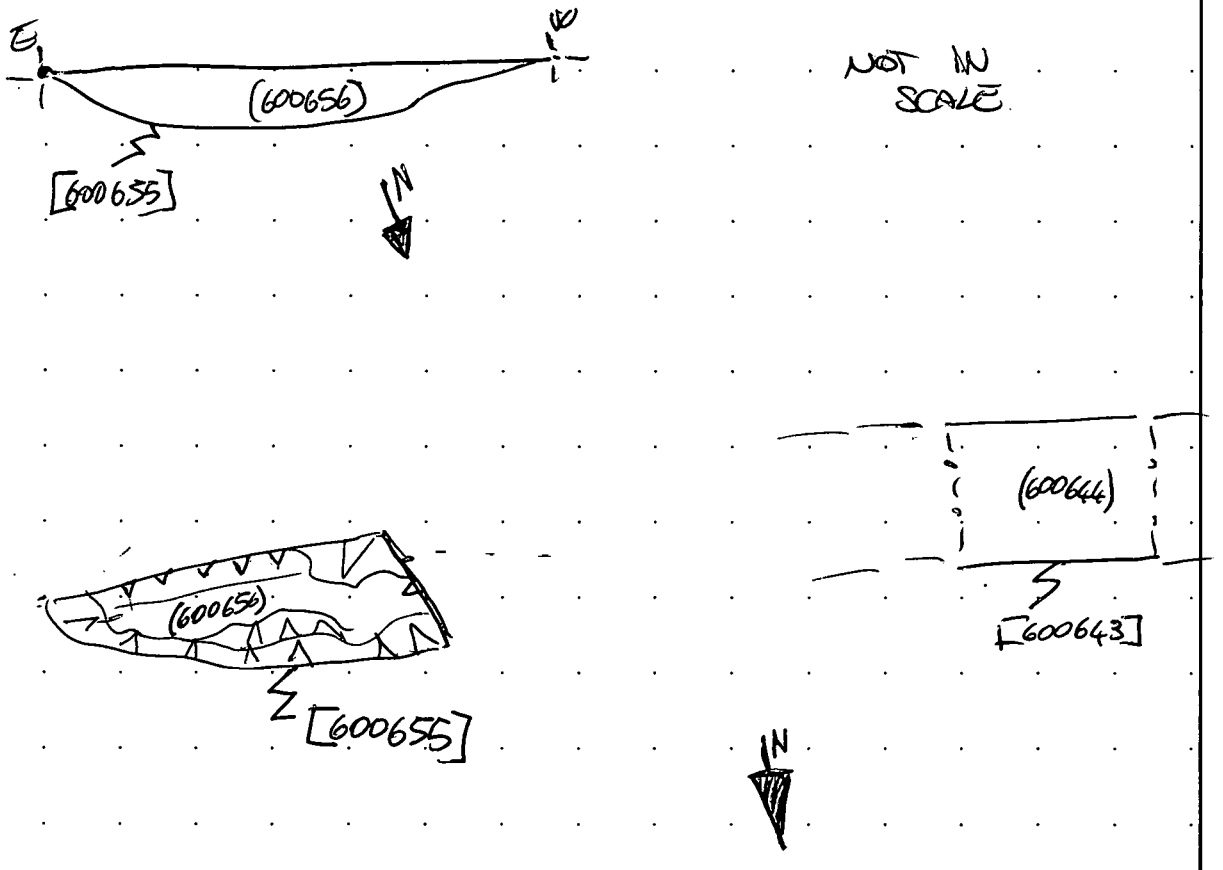

*(any further details that may be important for understanding the context, including items marked * overleaf)*

UT IS NOT VERY CLEAR ON N SIDE OF S FACING SECTION BECAUSE OF TREE BOLE. ON N FACING SECTION IT IS WITHOUT ANY DISTURBATIONS. DITCH CONTINUES ON NN DIRECTION CURVING A BIT, MEETING ANOTHER DITCH AND BEEING SEPARATE AGAIN. ON EXCAVATED SECTION THIS DITCH IS ON TOP OF ANOTHER [600663].
SIDES OF DITCH ARE COMPLEX, ON THE E SIDE STEP AND MORE GENTLE, ON THE W SIDE MORE STRAIGHT (~ 45°). SEEM LIKE ON E SIDE OF THIS DITCH SITUATION IS MORE COMPLEX, MORE GEOLOGICAL ACTION HAPPENED HERE (CORROSION, SLUMPING, ACCUMULATION)

Refer to context [600657]

FIRST F/O DITCH HAPPEN TO ACCUMULATE WHEN DITCH [600658] WAS STILL IN USE. IT IS MORE SANDY THAN MAIN FILL (600662) AND LIGHTER (MORE ORANGEISH/YELLOWISH THAN IT BUT DARKER THAN (600661) FILL : ON THE BOTTOM OCCURED GRAVEL AND IN THE CURV OF CUT IN THE FILL OCCURED BIGGER STONES IRREGULARLY SHAPED. THE SIZE OF STONES 7-8 CM, AMMOUNT 5, ON EXCAVATED AREA OF 1 M LONG SLOT.

ADDITIONAL INFORMATION
*(any further details that may be important for understanding the context, including items marked * overleaf)*

F/O DITCH [600663] WAS QUITE GRAVELLY ESPECIALLY ON THE BOTTOM WHERE IT MIXED WITH UNDERLYING LAYER OF NAT. GRAVEL FILL IS VERY CLAYEY BIT MORE YELLOWISH THAN (600662) AND SLIGHTLY LIGHTER. IT IS HARD TO TELL FOR SURE IF THIS INFILLING WAS FOR CERTAIN RESULT OF USE OR DISUSE A DITCH BECAUSE IT HAVE BEEN CUTTEN BY YOUNGER [600658] DITCH SO THE ORIGINAL DEPTH OF DITCH [600663] AND THE WAY IT WAS INFILED TO THE TOP IS INVISIBLE THANKS TO THIS YOUNGER, DESTRUCTIVE CUT.

Refer to context [600658] [600657]

ADDITIONAL INFORMATION

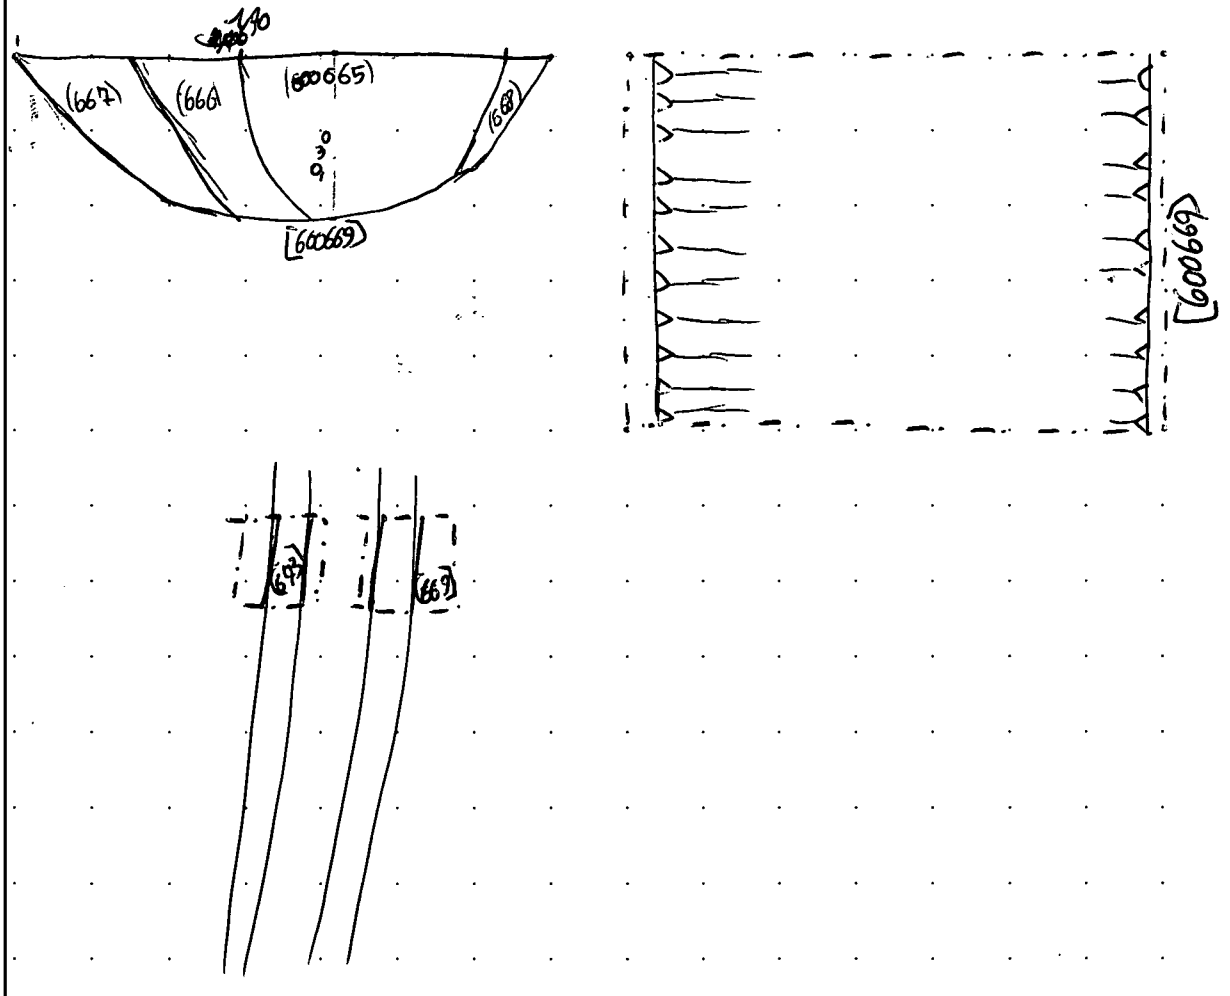

*(any further details that may be important for understanding the context, including items marked * overleaf)*

Cut of natural feature, probably peri-glacial, in a linear form. Edges indistinct upon clearing and excavation, so a box sondage was added into the slot to remove any uncertainty as to whether the feature was anthropogenic or otherwise.

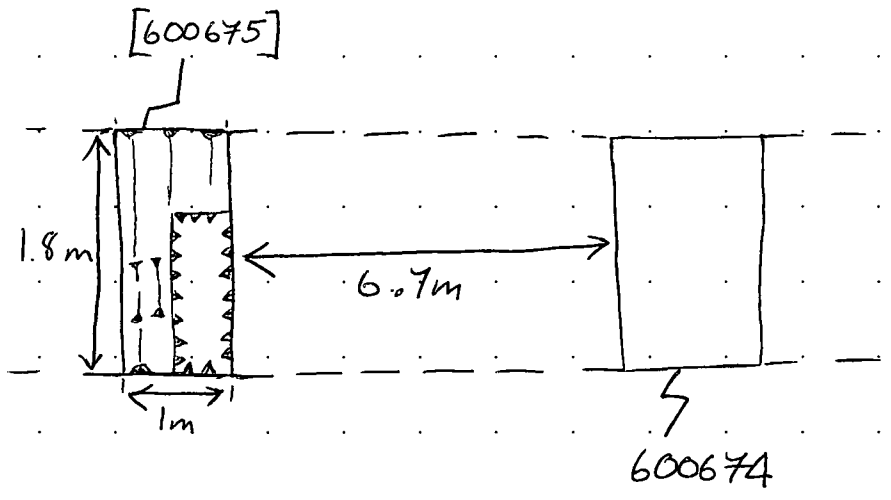

N.B. This is being reinterpreted as a furrow due to excavation of [600694]

ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

THE CONTEXT IS THE FILL OF THE CUT [600678].
THE CUT IS PART OF THE DITCH
THE FILL WASN'T DEEP MAYBE BECAUSE IT WAS ERASED BY THE MACHINE AND FOR THE SAME REASON IS DIFFICULT TO GIVE SOME INTERPRETATION. THE FILL APPEARS TO BE A NATURAL INFILLING.
THE FILL WAS DISTURBED BY A TREE BOLE (SEE PLAN).

Refer to context [600670] FOR PLAN AND SECTION

ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

Cut of drainage ditch. Section in SE corner overcut slightly during excavation as the texture of the natural was quite different to the rest of the slot. This is likely due to disturbance caused by the installation of a landdrain ~~in close pr~~ diagonally over the ditch (see sketch section on (600692) or D60099)

Refer to context

SKETCHES.

(consider: location plan, detailed plan showing relationships, section showing fills/deposits as appropriate)

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Cut of furrow running E-W. The shape is rectangular. It has gentle sloping sides and a flat base. The length is 1 m, the width 1,28 m and the depth is 0,12 m!
The furrow in the south side is cut by a modern pipe.

Refer to context

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

The only fill of a linear ditch [600801]. The fill is clayey silt, the colour is brown and moderately compact. The fill is getting orange colour at the bottom and ~~a~~ there are a lot of pebbles at the bottom also; that is as a result of the contact with the natural.
There are some fragments of pottery, some are romans and someone is age.
At the SW there is a whole vessel that was broken "in situ". The vessel looks like ~~that age~~ Roman.
The fill is as a result of natural process of infilling

Refer to context [600801]

CUT OF DITCH ORIENTED E-W AND THEN TURNING SOUTHBOUND, WHERE THE SLOT HAS ~~BEEN DIGGED~~ DUG.
HAS GOT SOUTH SIDE SLOPING VERY GENTLY AND REGULAR, WHILE NORTH SIDE STEEP SLOPING AND SHOWS A CURVILINEAR PROFILE.
IT CUTS NATURAL SOIL WHICH IS A SANDY GRAVEL LAYER.
THE CENTRAL PART OF THE BASE GOES LITTLE DEEPER TO WEST SIDE AND HIGHER ON THE EAST SIDE

Fill of ditch terminus [600707]
same as fill (600305).
Composition and colour of the fill
are pretty similar to natural but
a bit less compact and with few concentrations
of greyish clay.

Refer to context

600236 TO 39

MF 31/7/17

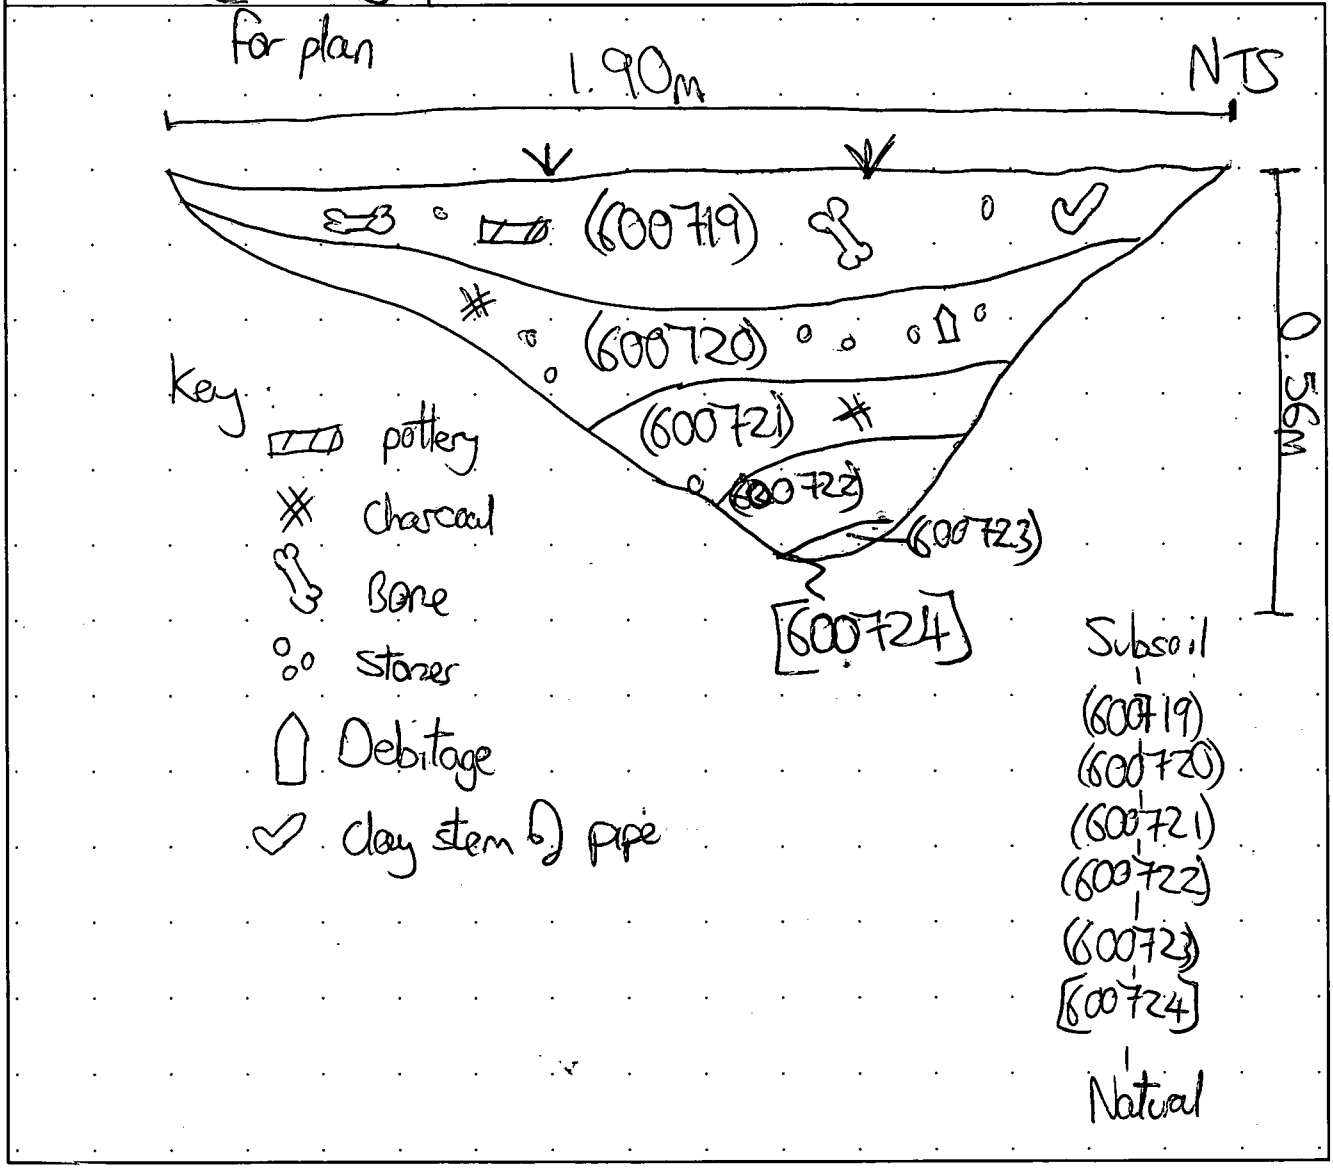

ADDITIONAL INFORMATION
*(any further details that may be important for understanding the context, including items marked * overleaf)*

- 16 5 Fills
- fill of [600724]
- compact reddish grey clay fill
- clay stem pipe part, probably 1870-1890
- piece of pot - possibly Medieval
- Moderate amount of bone

ML 27/6/2017: This context is the same as the following: 60101~~3~~, 6010~~3~~, 60149~~5~~, 60151~~2~~, 60160~~5~~. It also appears in DV60233 & DV60284, as well as photos 600124 to 28 & 600136 to 39.
The ditch is likely the remnants of a barrow, possibly Bronze Age in date. This would put it as being contemporary with features further south on TEA10B which have had datable evidence within them, however the primary fills of this ditch have been sterile of finds. This context has contained a large proportion of roman pottery around the ditch, as well as animal bone.

Refer to context [600724]

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

This ring ditch likely represents the presence of a barrow in area TEA10B, ~~probably~~ possibly Bronze Age. This would make it the contemporary of Bronze Age features towards the southend of TEA10B, however there is no datable evidence from the lowest fills to confirm this. The middle fill of the ditch is a soil containing high amounts of gravel. This possibly represents ~~or~~ the active or passive destruction or damage to the barrow superstructure inside the ditch. This fill is interestingly absent in part of the northern section of the ring ditch,* possibly due to the construction of a pit within the ditch (use/purpose unknown). This pit ~~is either contemporary~~ cannot be easily dated, though it is likely Roman in period as the topmost fill of the ditch contained multiple pieces of pottery from the period. Whether the superstructure was removed around this time is unknown, but any inhumations contained within seem to have been removed at the same time. Certainly by the post-Medieval period ~~positive~~ evidence of the barrow was no longer present and two furrows had been placed across the north & south parts along an E-W axis. The barrow seems to predate a ditch immediately to the East of the ditch

* or rather the amount of gravel within the fill is greatly reduced. The context maybe present but it does not have a clear differentiation from the fill below

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

- 2nd of 5 fills
- fill of [600724]
- compact reddish brown fill
- clay composition
- moderate amount of coarse stone
- 1 small debitage found

ML 27/6/2017: This context is the same as the following: 601012, 601029, 601496, 601606. It also appears in D60233 & D60284, as well as photos 6001924 to 28 & 6002136 to 39.
No datable evidence has been found from this context, but due to the high gravel content of the fill this is likely representing the ~~slumping~~ or partial destruction of the barrow superstructure & it slumping into the ditch. Whether this was a purposeful act cannot be known, ALTHOUGH THE SLOPING SHAPE OF THIS DEPOSIT MIGHT BE A SIGN OF NATURAL WEATHERING OF SAID STRUCTURE MORE THAN DESTRUCTION AND BACKFILL PERHAPS

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

- 3rd b) S fills
- fill b) [600724]
- moderately compact mid orangish brown silty/clay fill
- occasional coarse stone

ML 27/6/2017: This context is the same as the following: 601013, 601028, 601497 & 601607. It also appears in D60233 & D60284 as well as photos 6001924 - 28 and 6002136-39. This primary ~~clay~~ clay fill represents the initial sedimentation and areas of silting groundwater in the barrow ringditch. This was sterile in regards to datable evidence so may have been slowly accumulating over many years or even decades prior to the partial or maybe total destruction of the superstructure.

*This form is incomplete if fields marked with ◤ are empty. Please turn over for additional information (and describing all items marked with *) and sketches.*

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

- ditch slot in a possible round house feature
- Steep sides with concave base
- all other features around the possible round house are for agricultural purposes, having a round house here doesn't quite fit
- seems to be another possible round house the the South
- no obvious entrance/exit

ML 28/6/2017: This context is the same as the following: 601014, 601027, 601498, 601510 & 601608. It also appears in D60233 & D60284 as well as photos 6001924-28 and 6002136-39. The lack of any terminus or entranceway suggests this ringditch is more likely to be associated with a barrow than a place of settlement. However, a slot was put in between 601498 & 601027 and any inhumations that may have been present are no longer there.

Refer to context (600719)

*(any further details that may be important for understanding the context, including items marked * overleaf)*

THE FILL IS AN ALMOST FLAT BEDDING LAYER. THE COLOUR (YELLOWISH BROWN) SUGGESTS AN EROSION OF THE SOILS SUCH AS THE PRESENCE OF FREQUENT MANGANESE.
THE DITCH HAS TO BE REMAINED OPEN FOR A CERTAIN TIME.
MODERATE PRESENCE OF FLINT STONES AND GRAVEL..

NATURAL INFILLING OF A DITCH, THAT IS TOTALLY OBLITERATED BY THIS. NOTE TOO THICK, IS PERHAPS DUE TO THE ACTION OF WATER VERY HARD AND DRY DESPITE THE PROXIMITY OF A SMALL WATER MIRROR. NOT VERY DIFFERENT BY THE NATURAL SOIL. IT BECAME YELLOW THICK ON THE NORTH SIDE

CUT OF DITCH RUNNING S/W-N/E. FILLED BY MANGANESE RICH FILL (600756). NO DATABLE FINDS WERE RECOVERED, ONLY FRAGMENTS OF A BONE WERE FOUND. AT THIS POINT IN TIME WE DONT KNOW WHERE THE DITCH STARTS TO THE ~~EAST~~ WEST BUT IS SEEN RUNNING S/W FROM SLOT INTO A VERY BOGGY AREA. IT ALSO DISSAPEARS INTO A LARGE "BLOB" FEATURE TO THE EAST WHERE IT MINGLES TOGETHER WITH DITCH [600757] WHICH CONNECTS WITH & TRUNCATES IN THIS SLOT.

THE MAGANESE RICH FILL INDICATES THE PRESENTS of WATER SO POSSIBLY WAS USED FOR DRAINAGE PURPOSES? OTHERWISE ITS USE IS UNKNOWN.

Refer to context (600756) FOR SECTION + [600757] FOR A CLOSE UP PLAN of SLOT SKETCHES
(consider: location plan, detailed plan showing relationships, section showing fills/deposits as appropriate)

CUT of POSSIBLE DITCH FOR A HEDGEROW? BASE OF CUT IS VERY IRREGULAR WITH DIPS + HOLES. HOWEVER THEY DO NOT APPEAR TO BE POST/STAKE HOLES SO ARE POSSIBLY CAUSED BY BIOTERBATION FROM ROOTING POSSIBLY FROM A HEDGE? SIMILAR BASE IS SEEN IN CUT [600356] WHICH IS LOCATED TO THE N/W OF THIS SLOT BUT DOESE NOT LOOK LIKE THE CONNECT.

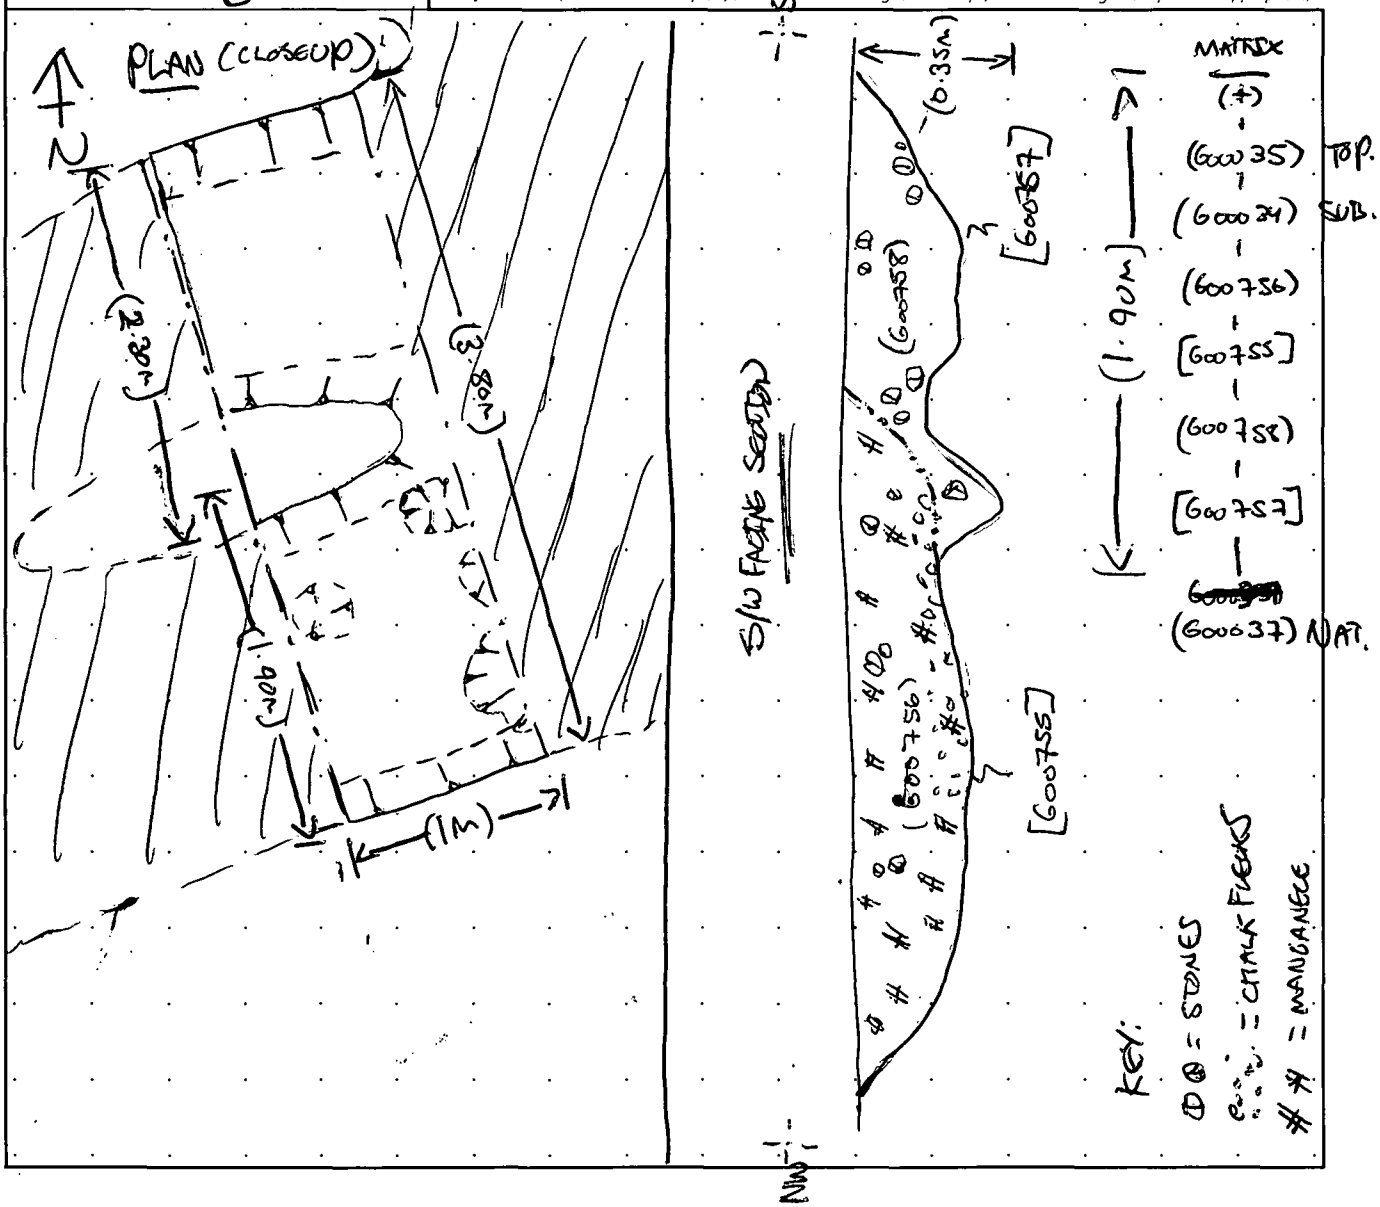

THE FILL (600758) HAD NO DATABLE FINDS BUT LOOKS SIMILAR IN APPEARANCE TO FILL (600339) IN CUT [600338] ~~[illegible]~~ LOCATED TO THE WEST OF THIS SLOT + COULD POSSIBLY CONNECT? THIS NEEDS TO BE VERIFIED FIRST! BEFORE WE ARE CERTAIN!.

IF SO THESE SLOTS MIGHT INDICATE HEDGEROWS BEING USED AS BOUNDARY SEPERATION BETWEEN ~~[illegible]~~ PROPERTYS.

Refer to context [600755]

FILL OF POSSIBLE HEDGEROW CUT [600757]

NO DATABLE FINDS FOUND IN FILL ONLY OCC. SUB-ANGULAR STONES + VERY RARE FLECKS OF CHARCOAL.

FILL IS VERY SIMILAR IN APPEARANCE TO (600339) IN CUT [600338] WHICH IS ALOT FURTHER WEST, WHICH COULD SUGGEST THEY ARE THE SAME BUT THIS HAS to BE VERIFIED BEFORE WE ARE CERTAIN!

BECAUSE IF SO IT COULD BE A HEDGEROW PROPERTY BOUNDARY RUNNING W—E ACCROSS THE ARE!

Refer to context [600757]

SKETCHES
(consider: location plan, detailed plan showing relationships, section showing fills/deposits as appropriate)

ADDITIONAL INFORMATION

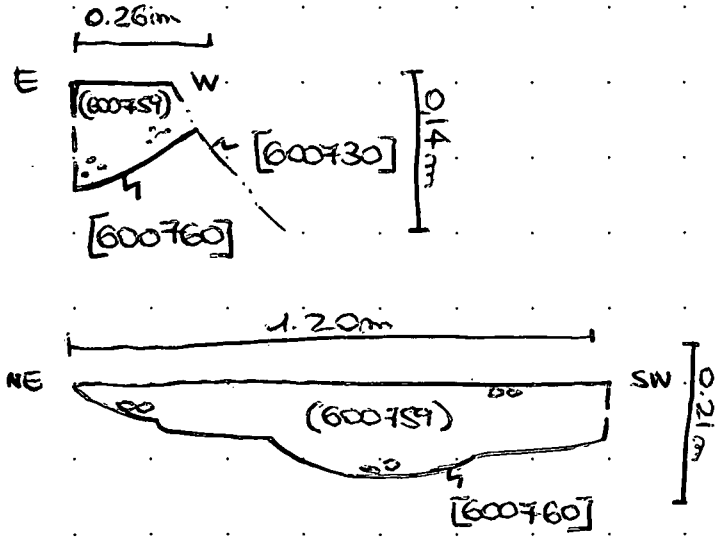

*(any further details that may be important for understanding the context, including items marked * overleaf)*

BASE OF FURROW - CUT, SHALLOW DUE TO TRUNCATION (POSSIBLY) BY MODERN FIELD ACTIVITY (PLOUGHING).
THE BASE IS VERY UNEVEN AND PITTED, POSSIBLY DUE TO WATER ACTIVITY (THE VERY SANDY PORTION OF THE BOTTOM OF THE FILL MIGHT RELATE TO THIS AS WELL AS THE CONCENTRATION OF STONES AT THE BOTTOM), OR PLANT ACTIVITY

Refer to context [600765]

SKETCHES

(consider: location plan, detailed plan showing relationships, section showing fills/deposits as appropriate)

ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

SANDY CLAY FILL, GETTING SANDYER AND MORE YELLOWISH-BROWN TOWARDS THE BOTTOM, ~~AS WERE~~ AS ALTHOUGH SMALL FLINT PEBBLES (2-3 cm) WERE FOUND SPARSELY DISTRIBUTED THROUGHOUT THE FILL, BIG ROUNDED PEBBLES (6-7cm) WERE CONCENTRATED (IN A SIGNIFICANT AMOUNT) AT THE BOTTOM OF THE FILL. THIS MIGHT BE RELATED TO WATER ACTIVITY.

CUT OF TREE BOLE OF SUB-CIRCULAR SHAPE WITH SIDE SLOPING QUITE GENTLY BUT A LITTLE BIT IRREGULARLY, PROBABILY FOR GROWTH AND ALTERATION BY TREE ROOTS_
EAST SIDE IS REALLY GENTLY SLOPING WHILE WEST SIDE IS STEEPER AND SUCH AS STEPPED

Refer to context [redacted]

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Cut of a linear ditch which has only one fill (600700). The ditch is linear SE NW; it's very shallow, the depth is only 0.12 m and the width is between 0.00m and 0.45m; The length is 1.35m (slot). The cut cuts the natural that is very gravely.
There are ~~son~~ fragments of pottery in the fill and a entire vessel likely iron age.
The ditch is cut by a furrow who was SW~~W~~ NE.
It could be a gully because it's very narrow and shallow.

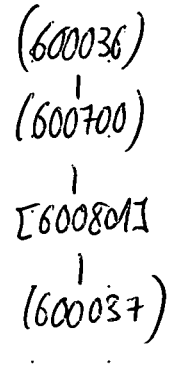

ETA: ALTHOUGH THE DITCH APPEARS TO CONTINUE ON THE OTHER SIDE OF THE FURROW IT DISAPPEARS AT SOME POINT BELOW IT. [600804] HAS NO INDICATION OF THIS DITCH EVEN THOUGH IT IS ON A SIMILAR ALIGNMENT

[600804]

THE REMAINING

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

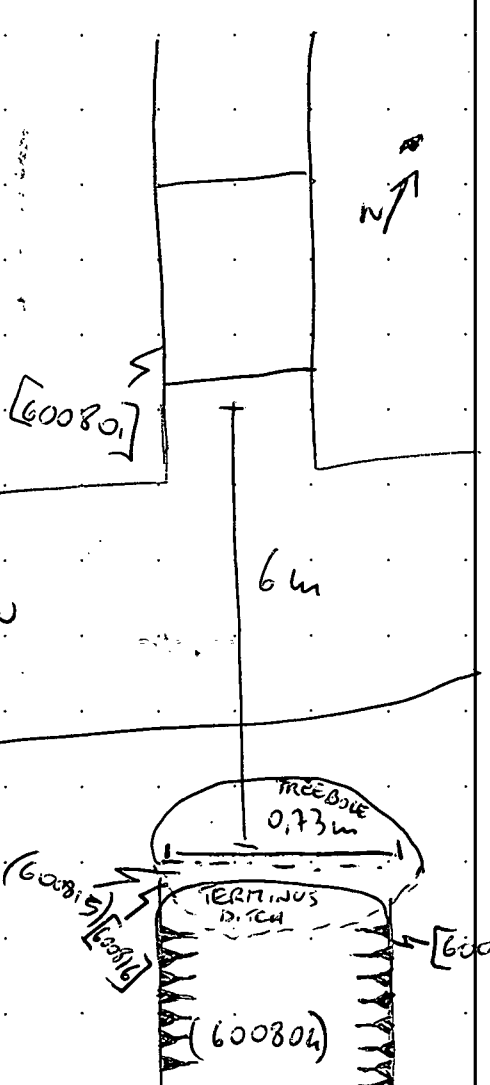

THE CUT APPEARS TO BE PART OF A TREE BOLE, BECAUSE OF THE CIRCULAR SHAPE AND BECAUSE THE BOTTOM IS UNEVEN. ALSO FOR THE KIND OF FILL, SILTY AND WITH ~~CROP~~ SMALL STONES IN IT.
~~THE CUT~~ CUTS THE FILL OF THE DITCH [600806], WHERE THE DITCH ENDS.

Refer to context

SKETCHES

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

SE-NW
Only fill of a lineal ditch wich runs ~~E-S~~ across the site more than 100m.
The fill is sandy silt, the colour is orangeish brown and is moderately compact at the ~~bottom~~ top and it's getting loose at the bottom.
It's the backfill of the ditch wich it has at the bottom a drain pipe.
There are two fragments of pottery

Refer to context [600822]

ADDITIONAL INFORMATION
*(any further details that may be important for understanding the context, including items marked * overleaf)*

THE CONTEXT IS THE FILL OF A TREBOLE BECAUSE OF THE CUT'S SHAPE AND BECAUSE OF THE COMPOSITION. BECAUSE OF THE TREBOL THE CONTEXT WAS CONSIDERED LIKE ONE FILL EVEN IF THERE WERE TWO FILLS (A BLUEISH GREY ONE AND A REDDISH BROWN ONE - SEE PICTURE).

Refer to context [600826] FOR PLAN AND SECTION

SKETCHES

ADDITIONAL INFORMATION
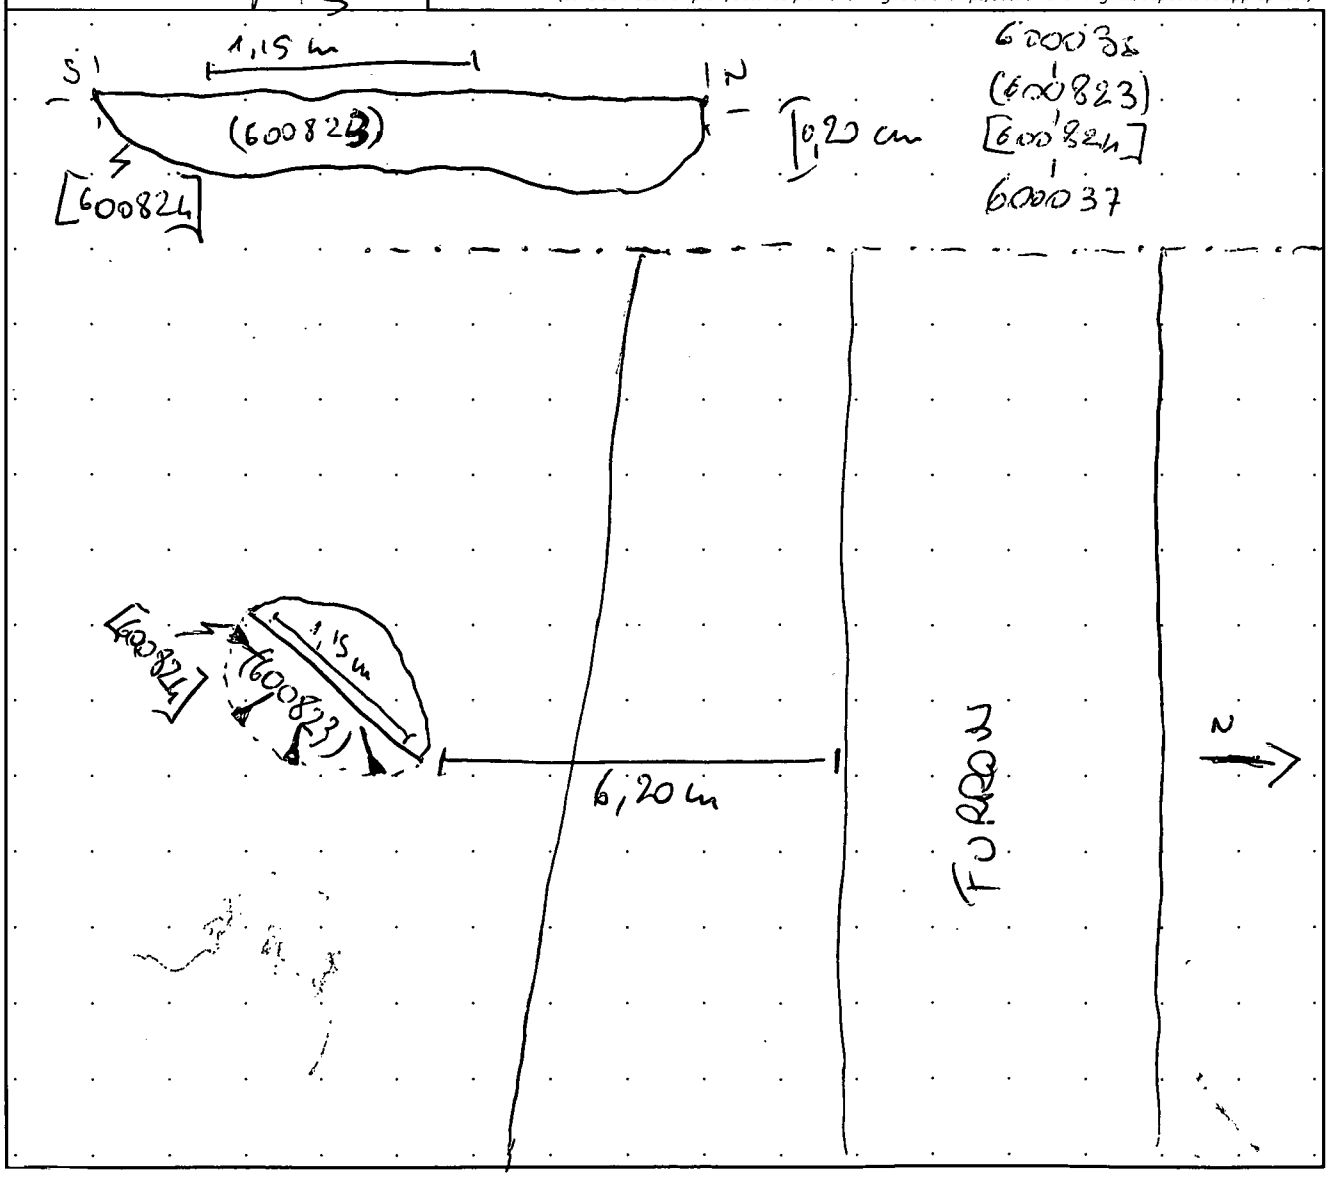

*(any further details that may be important for understanding the context, including items marked * overleaf)*

Third & final fill of ditch (600836).

Some animal bone recovered. Possible deliberate backfilling as evidence of activity.

No datable material.

ETA:- ANIMAL HAD SEVERAL LOWER LEG BONES, BROKEN IN A SIMILAR PLACE. ~~THIS COULD BE SLUMPING~~ THIS APPEARS TO BE A STEADY ACCUMULATION OF MATERIAL AFTER THE DITCH WENT FROM USE HH 9-5-17

Refer to context: 600830 ✓ SKETCH SECT.

Earlier ditch cut by [832]. [832] re-uses edge of [836] to the north.

Three fills, none with datable material but some animal bone recovered from (833) & (835).

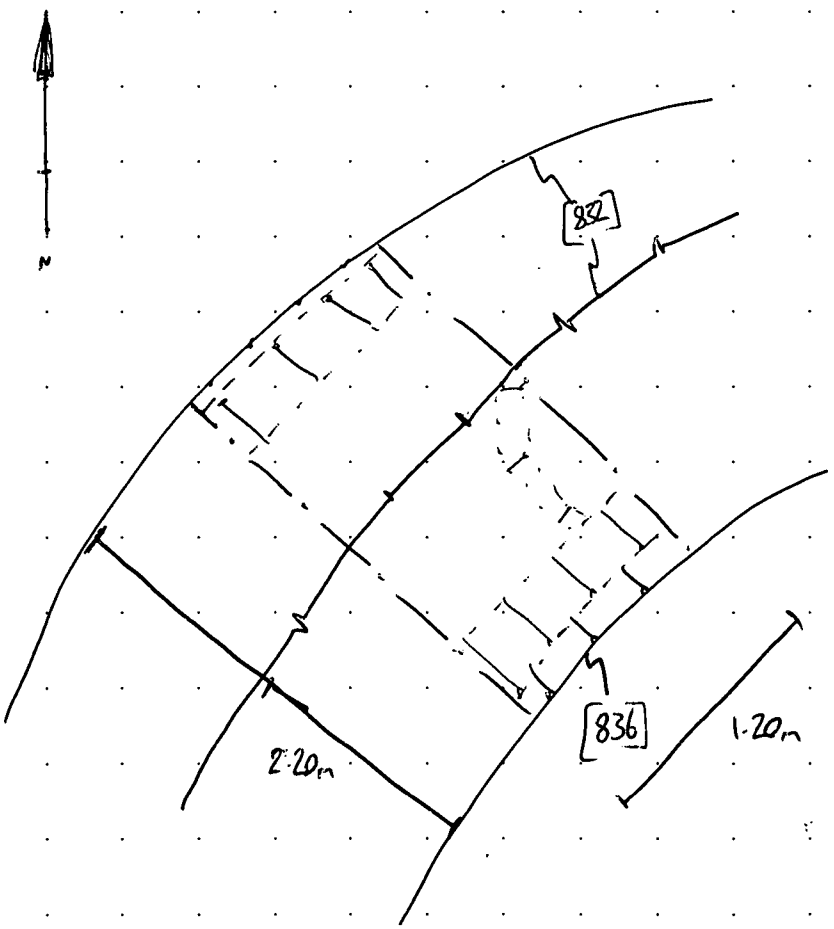

The ditch is long and curving, suggesting an enclosure ditch.

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Cut of natural hollow, the shape in plan is circular; it's very shallow and it has only one fill (600837) & which looks like very natural. The infilling was natural.

Refer to context [600838]

SKETCHES
(consider: location plan, detailed plan showing relationships, section showing fills/deposits as appropriate)

BASE FILL OF PIT [600829] – CLAY & SLUMPING LAYER

Larger amount in the base of the northern quadrant. As it was within the water table it is possible this was originally the same material as the layer above but the water possibly leached a lot of the contents from it.

Refer to context '

THIS DITCH CHANGES SHAPE ALONG ITS LENGTH. TO THE NW ~~EE~~ IT IS V SHAPED ~~BUT AT THIS POINT IT~~ AND TO THE SE IT IS CONCAVE BUT HERE IT SEEMS TO BE TRANSITIONING

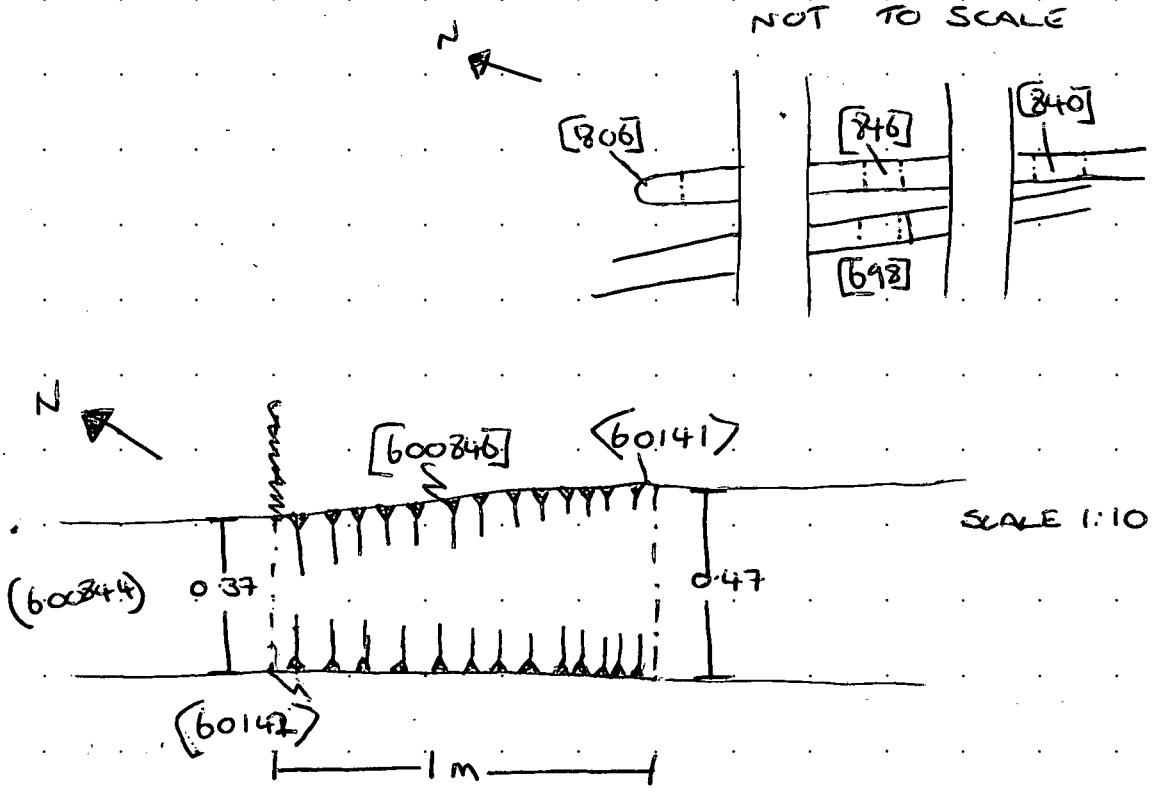

BOTH SECTIONS WERE DRAWN TO SHOW THE CHANE

SINCE THE DEPOSITS ARE NOT WATERBOURNE I THINK THIS MIGHT HAVE BEEN USED MORE AS A FIELD BOUNDARY.

*(any further details that may be important for understanding the context, including items marked * overleaf)*

Primary backfill of E/W ditch [853].

Quite gravelly. appears to be more natural filling over time than deliberate filling.

Refer to context: 600851 / SECT.

600853 – PLAN.

ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

E/W running ditch. Possibly same as [832] or [836] further investigation needed. Fill similar to [836] so first thoughts are that they are the same.

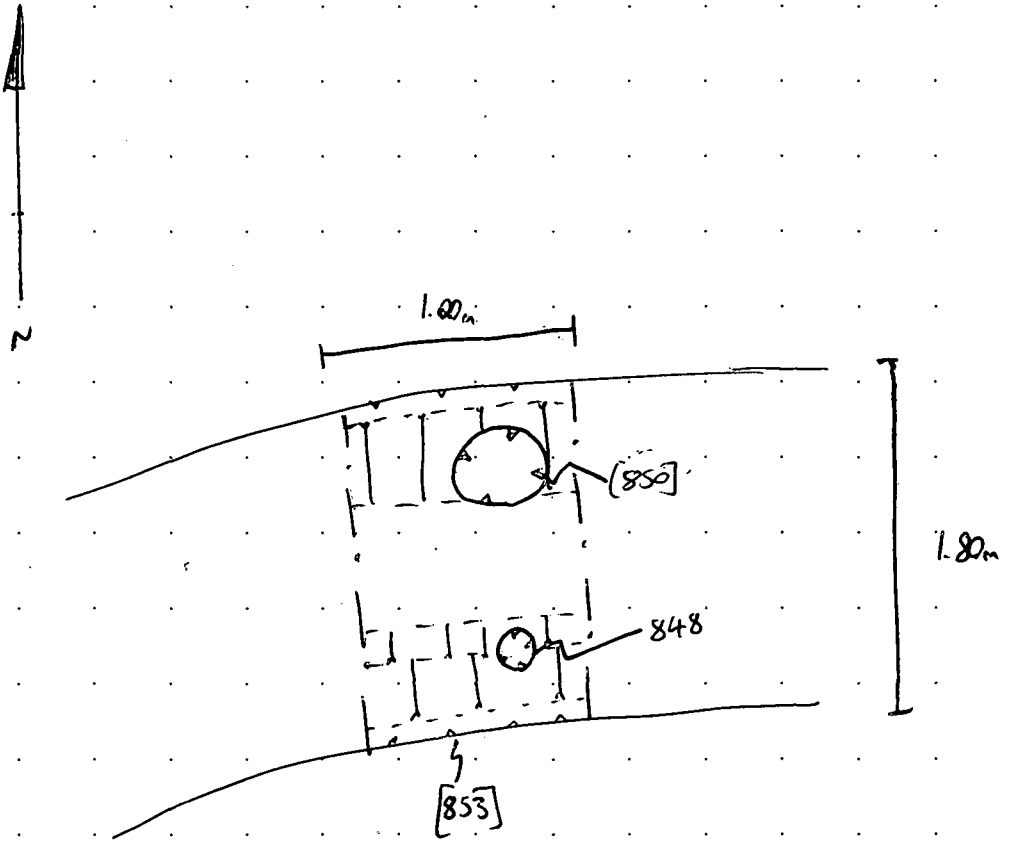

Ditch seems to be for water management.

No evidence of nearby domestic occupation. Few animal bones suggest possible animal enclosure (?)

Refer to context 600 851 SECT.

14/6/17

ADDITIONAL INFORMATION

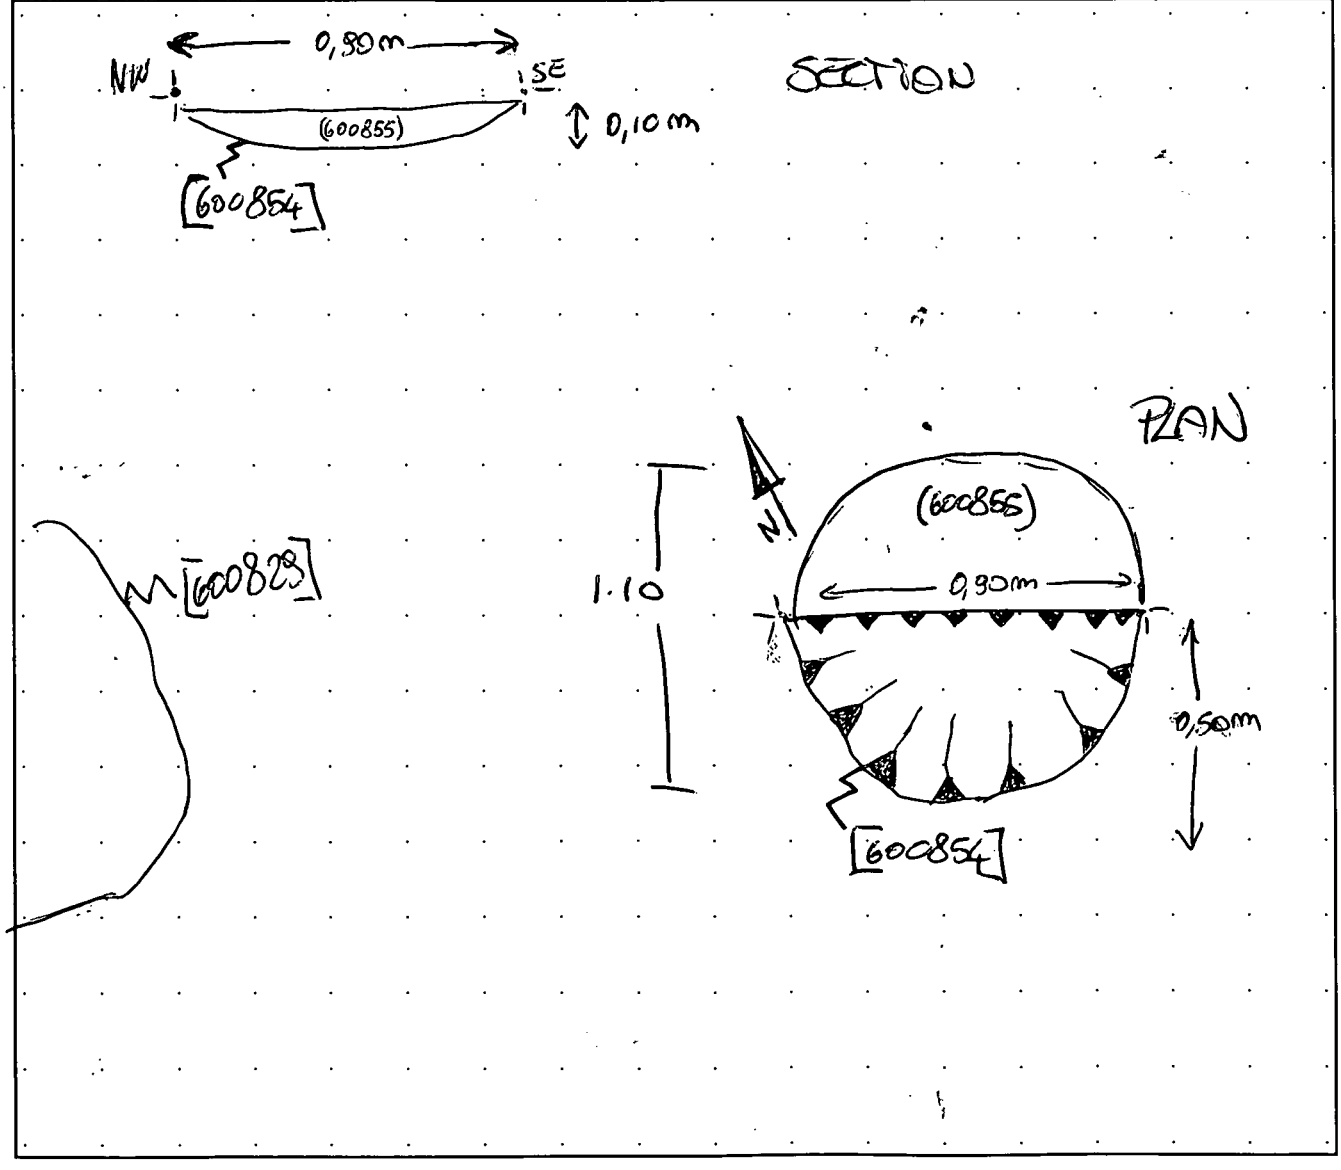

*(any further details that may be important for understanding the context, including items marked * overleaf)*

N/S ditch. Irregular liner, curving at some points.

Fairly straight at point of excavation.

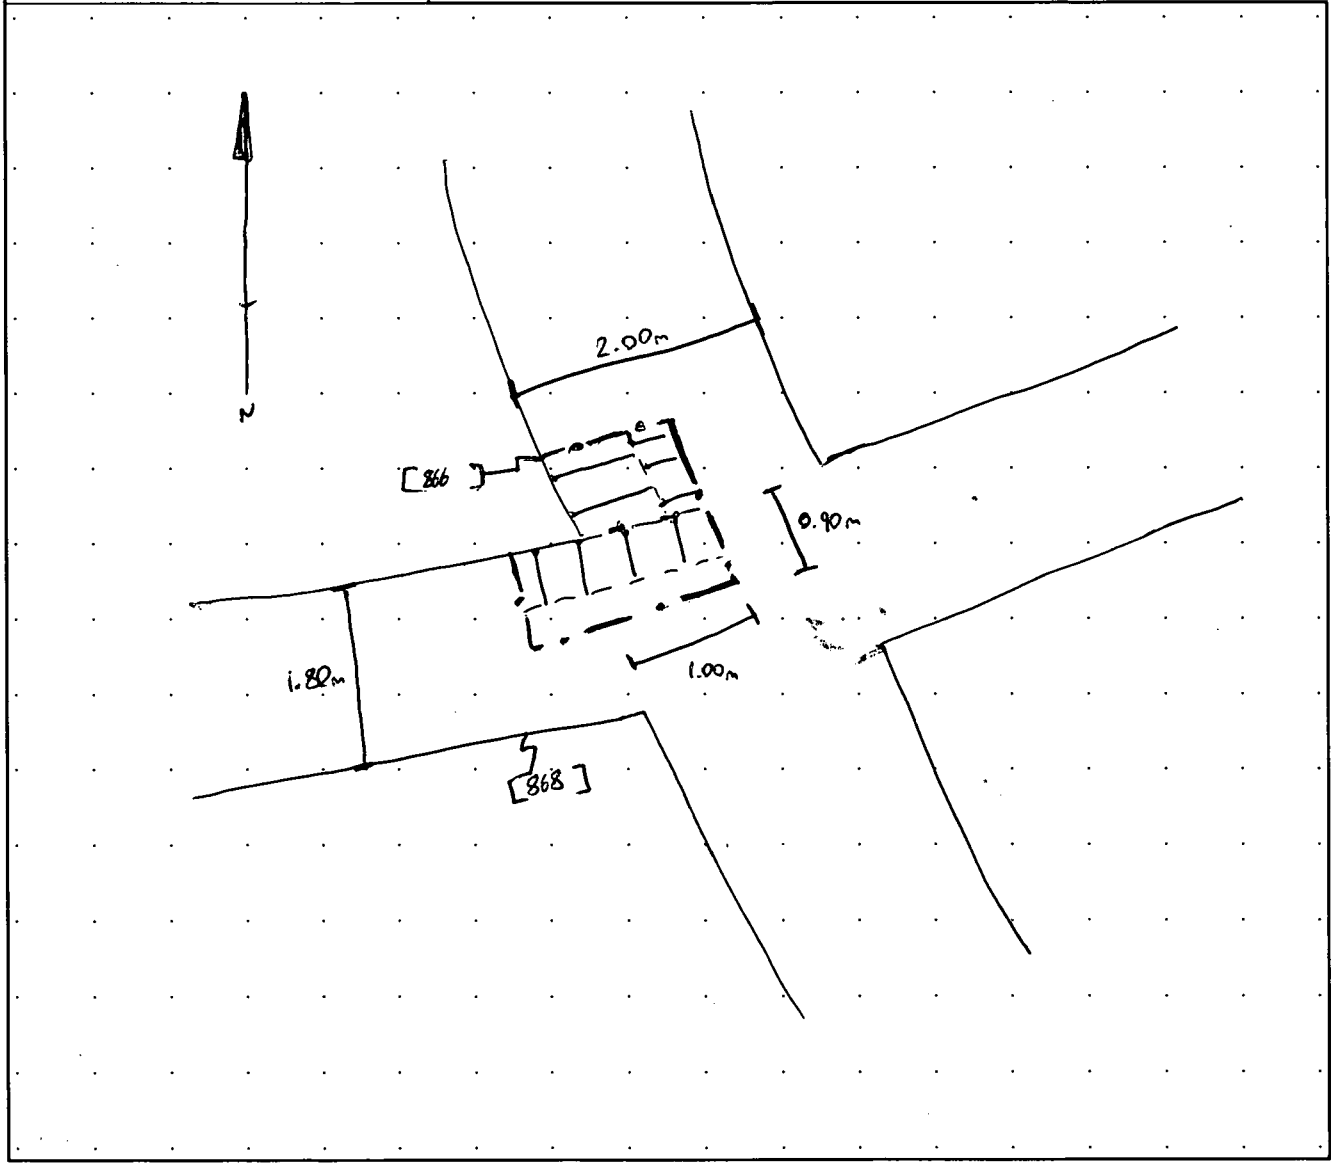

Excavated by intersect slot revealed that this ditch [866] cuts through earlier ditch [868].

No datable material recovered.

Refer to context 60086S / Sect.

ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

Secondary fill of E/W water management ditch.

Same as (600851).

No datable material. Cut by later N/S ditch [600866]

Not fully excavated. Excavated to 0.27m to get relationship between [868] & [866] which was established at 0.27m.

Refer to context 600865 / Sect.

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

E/W ditch. Same as [600836](PC) & [600853]

Not fully excavated. Excavated to just 0.27m to establish relationship with [866]

[866] cuts N/S through E/W ditch, it appears.

Possibly contemporary but unlikely due to [866] being far shallower than [868]

Refer to context 600865 Sect.

ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

Cut of circular pit. Possibly used originally as an extraction pit. If so the product was likely sand due to the base of the pit being composed of a very high sand content soil. Due to silting water some undercutting occured on the southern edge of the pit. A small hollow was cut into the eastern corner of the pit, this wasn't visible in plan ~~exact if its due to the on~~, only in section.

ADDITIONAL INFORMATION

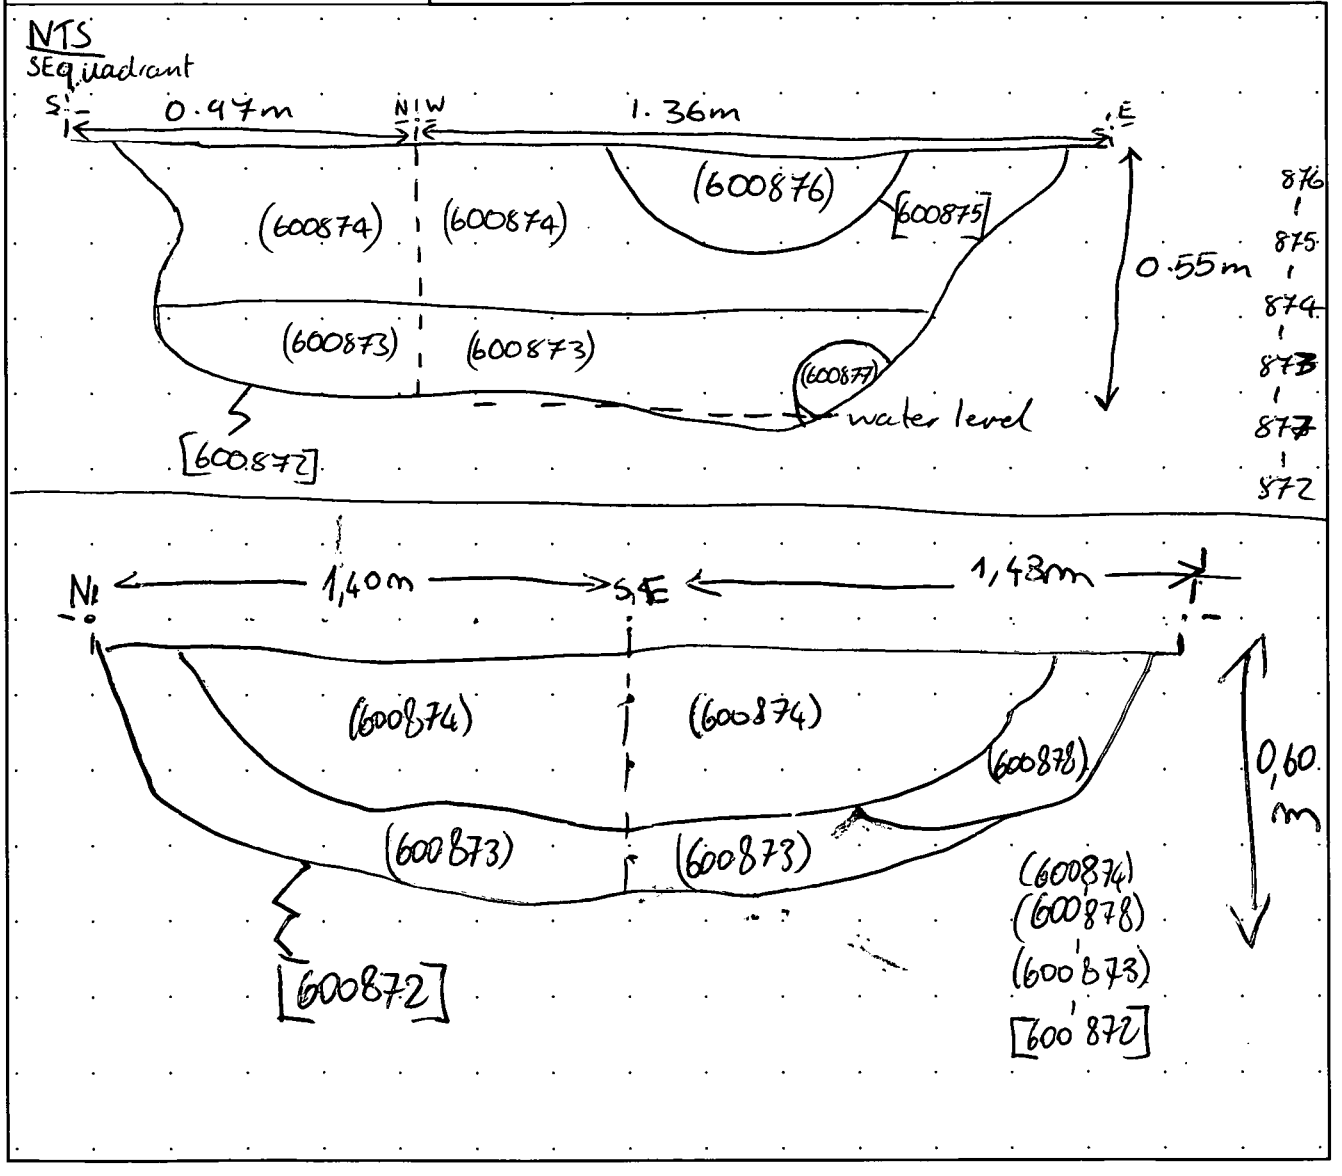

*(any further details that may be important for understanding the context, including items marked * overleaf)*

Lowest fill within a pit. Due to horizontal nature of fill and standing water being present in the base, this probably represents a past ground water level which has made any soils within it into a homogenous clay through leaching. Sample of this section from NW quadrant, bone also found in this quadrant

ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

Slot within a shallow curvilinear ditch. May have been some kind of enclosure border, but as it is so shallow it is likely there has been truncation by machine (farming or soil stripping prior to excavation).

ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

Single fill of shallow ditch. Contained some stones & also pockets of gravel similar in composition to the natural soil. These were likely washed in during a storm event or due to some other natural phenomenom.

Refer to context

*(any further details that may be important for understanding the context, including items marked * overleaf)*

THE CUT IS LINEAR AND IT IS SUPPOSED TO BE A DITCH. THE TWO SECTIONS ARE VERY DIFFERENT. THE BOTTOM OF THE CUT HAS A "V" SHAPE, WELL CLEAR IN THE "NW" FACING SECTION BUT THE OTHER SECTION ("SE" FACING) SHOWS A DIFFERENT PROFILE WITH THE "SW" EDGE CONCAVE AND THE NATURAL IRREGULAR. IT IS VERY DIFFICULT TO SAY WHY THE TWO SECTIONS ARE SO DIFFERENT.

ADDITIONAL INFORMATION

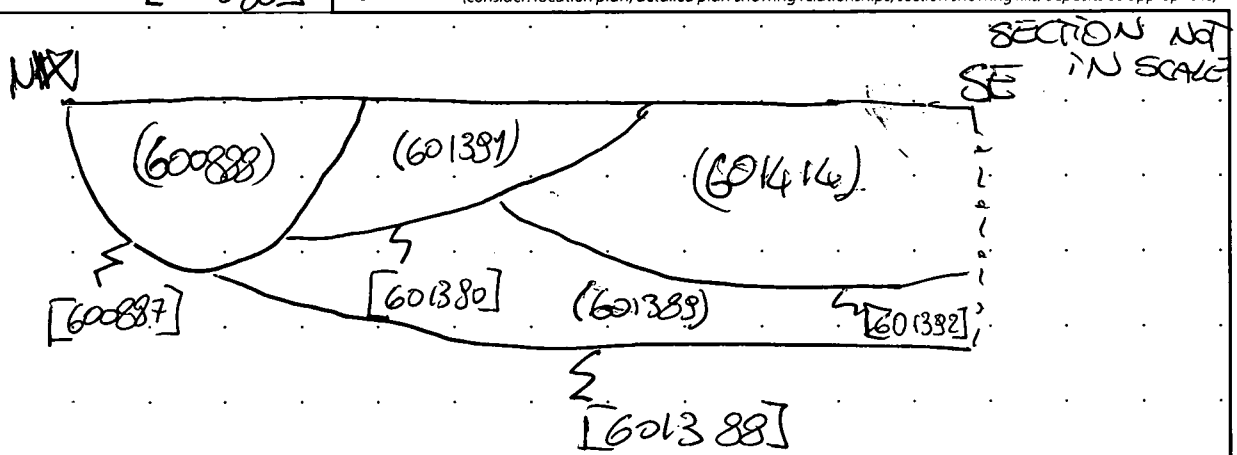

*(any further details that may be important for understanding the context, including items marked * overleaf)*

Cut of ditch with moderately sloping sides and a concave base. The northern end was slightly wider, deeper and had a flatter base than the southern end. This is suggestive of some degree of truncation likely through machining.

* Originally slightly undercut so ~~new~~ dimensions have been amended

12.05.17

ADDITIONAL INFORMATION

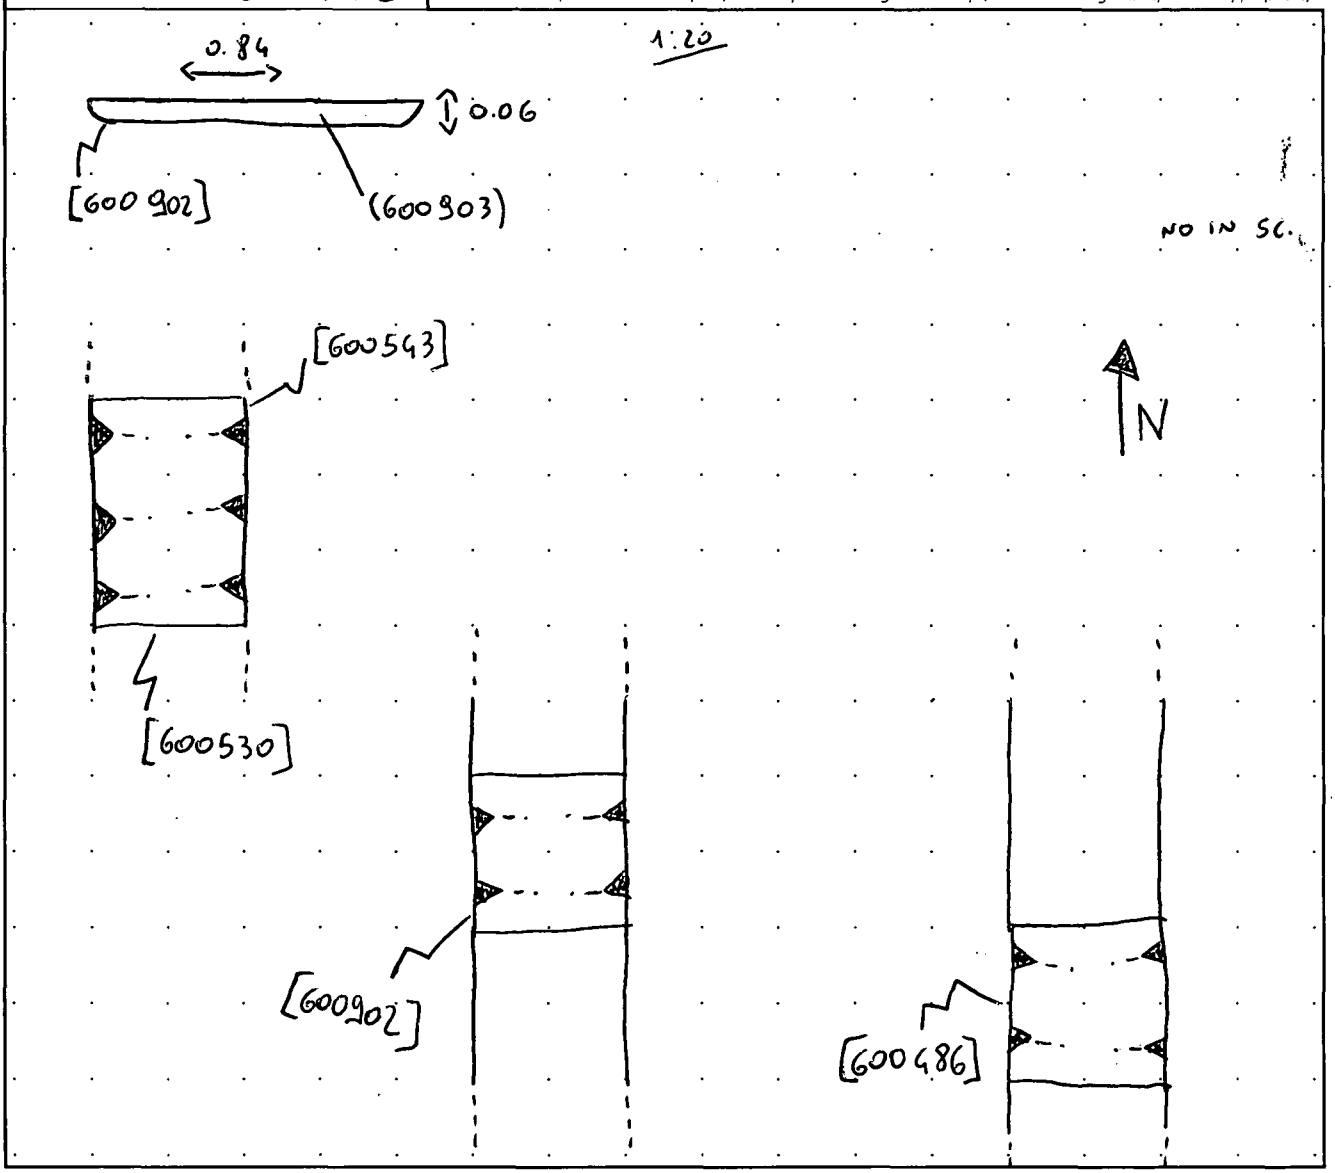

*(any further details that may be important for understanding the context, including items marked * overleaf)*

CUT OF PIT [600912] MOST LIKELY FIRE-PIT AS THERE IS A DEPOSIT OF HEAT EFFECTED CLAY.
PROFILE HAS STEEP EDGES WITH A FLAT BASE AT POINTS UNEVEN.
EXTENSION TO THE SOUTH MIGHT BE OVER-CUT. BUT LIKELY TO BE SLUMPED IN SUB-SOIL.

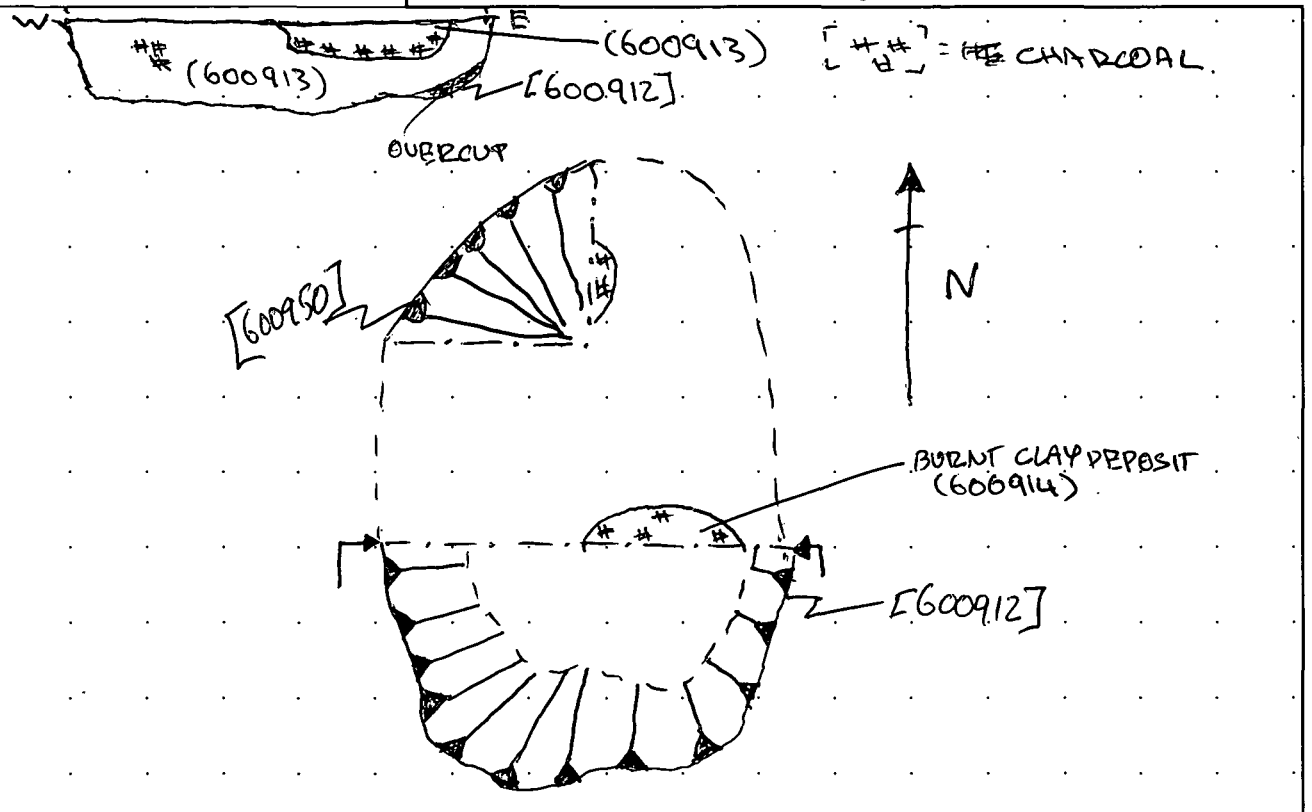

THE 600914 IS SAME AS 600913 AS COMPOSITION A FIRE BURNED ON TOP OF IT AND THUS CHANGED IT'S ASPECT
RA 12.05.17

MOST LIKELY BECAUSE
THIS WAS THE PLACE OF A "BONE FIRE KILN" THAT WAS DUG INTO THE GROUND AND USED FOR A SHORT TIME SPAN.
IT'S UPPER PART WAS MACHINE TRUNCATED

ADDITIONAL INFORMATION
*(any further details that may be important for understanding the context, including items marked * overleaf)*

CUT OF ONE OF THE LARGE AMOUNT OF SMALL PITS THAT CAN BE FOUND IN THE NORTHERN PARTS OF BOTH TRENCH-N AND TRENCH-NE. MOST OF THESE ARE LIKELY CAUSED BY VEGETATION SUCH AS TREES. THIS ONE IS NOT AS MOTTLED AS FOR EXAMPLE [600926]. SO IT COULD JUST BE A PIT OR HAVE BEEN CAUSED BY A LESS "ROOTY" PLANT.

Refer to context [600926]

SKETCHES

THE CUT OF THE FURROW THAT COMES FROM THE EAST AND CONNECTS TO THE DITCH THAT COMES FROM THE SOUTH. IT WOULD SEEM THAT THEY WERE MADE AT THE SAME TIME SINCE THERE ARE NO OTHER CUTS TO SHOW SOMETHING LIKE THAT. BOTH ARE FILLED WITH THE SAME FILL C600943) SHOWING THAT THEY WERE FILLED AT THE SAME TIME AS WELL.

Refer to context

ADDITIONAL INFORMATION

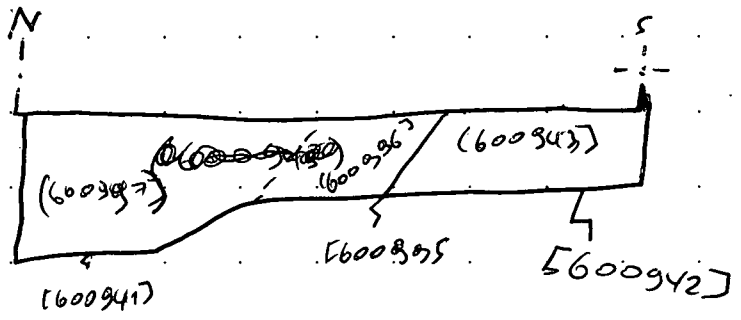

*(any further details that may be important for understanding the context, including items marked * overleaf)*

Cut of very shallow p.h. Single fill. The shape appears to regular for a plant/foliage hole, leading on the interpretation to a p.f (post hole. Possibly appearing shallower due to over machining. Steeper edge on E side compared to W.

Refer to context

CUT OF PIT [600948]. IRREGULARLY SHAPED. SHALLOW CUT, WITH GENTLY SLOPING BANKS AND A FLAT BASE.

MOST LIKELY MODERN AS THERE IS SOME MODERN GLASS AND CBM.

THESE ARE SAME TYPE OF FEATURES

SKETCHES

(consider: location plan, detailed plan showing relationships, section showing fills/deposits as appropriate)

FS 50

CUT OF PIT. [600950] + [600912]. PROFILE REMAINS SIMILAR TO THE SOUTHERN SLOT. STEEP EDGES WITH A ~~CONCAVE~~ FLAT/UNEVEN BASE. NO DATING EVIDENCE.

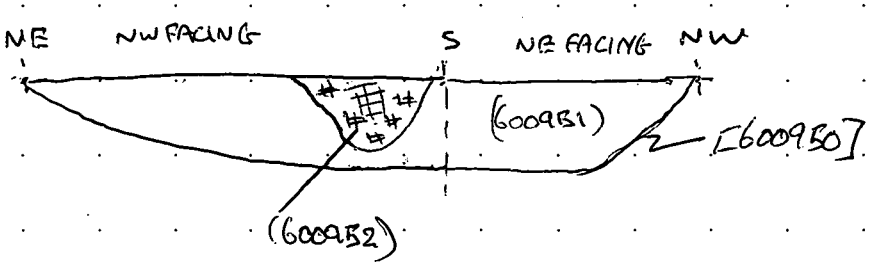

SECTION SHOWS YET ANOTHER HEAT AFFECTED DEPOSIT OF CLAY & IDENTICAL TO THE ONE IN [600912].

ONE EXPLANATION IS THAT IT COULD BE IN SITU BURNING OF A TREE. FOR CLEARENCE DURING AGRICULTURE EVENTS.

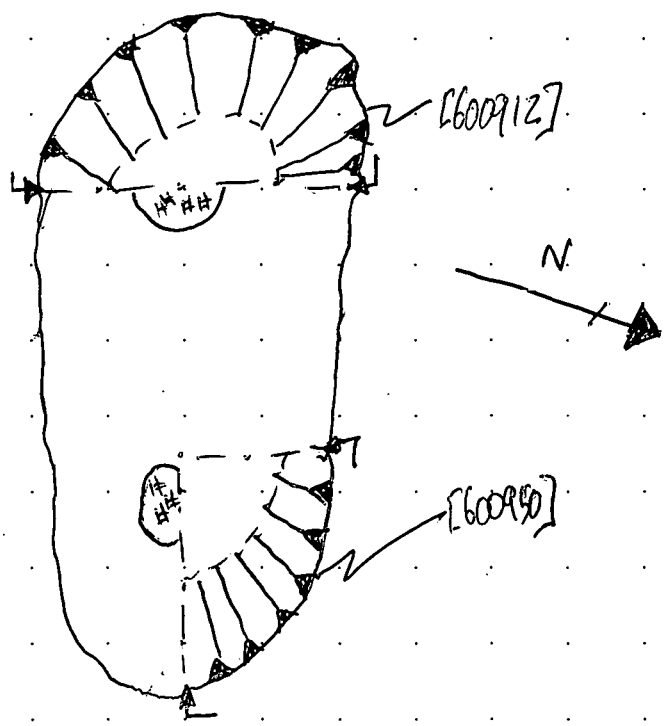

ON THE 7/8TH of JUNE [601777] WAS RECORDED AS A FEATURE SIMILAR TO [600912]/[600950] TYPE SO SEE THAT TOO PLEASE

Refer to context

CUT OF WIDE E-W RUNNING FURROW. PROFILE HAS GENTLE BANKS AND A FLAT BASE, ALTHOUGH THE SOUTH EDGE IS INTERRUPTED BY MODERN ROOTING (SEE BELLOW ↓), AND IN PLAN THE CENTRE OF THE SLOT HAS ALSO BEEN AFFECTED BY BIO-TURBATION.

THE FEATURE IS MOST CERTAINLY POST-MED DUE TO AN ARRAY OF PROBABLY VICTORIAN, OR LATER, FINDS.

Refer to context (600960)

SKETCHES
(consider: location plan, detailed plan showing relationships, section showing fills/deposits as appropriate)

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

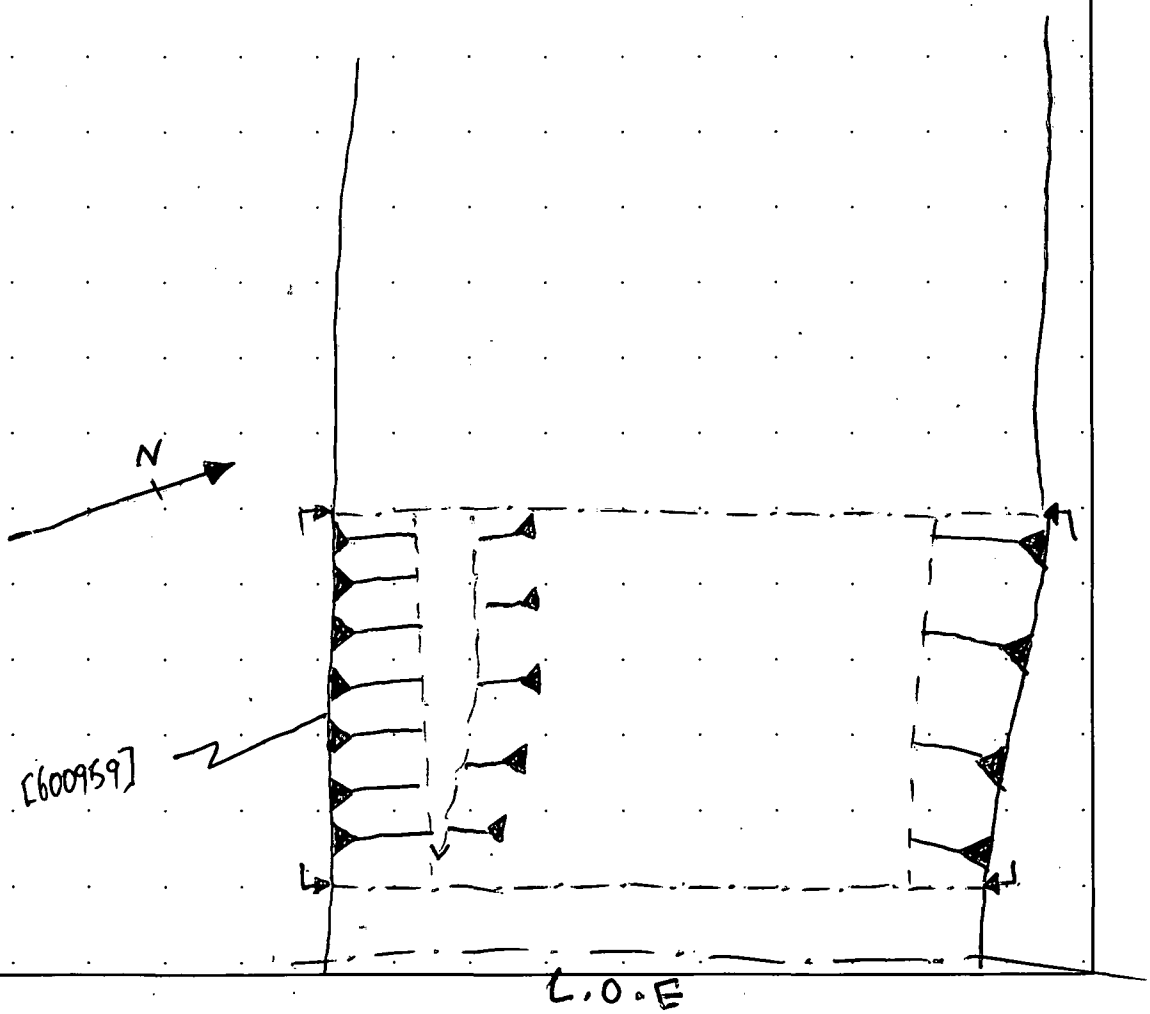

INFILLING OF E-W RUNNING FURROW. MOST LIKELY TO HAVE OCCURED DURING A SILTING EVENT, IN COMBINATION WITH ROOTING WHICH IN TURN MAY HAVE CAUSED SOME DEGREE OF SLUMPING.

VERY GOOD DATING EVIDENCE.

F 60032 IS CUFFLINGS. FOUND BY METALDETECTOR. A GOOD AMOUNT OF DECORATED CHINA & MODERN CERAMICS ALONG SIDE, GLASS, COAL AND IRON SCRAPS WERE RETRIEVED. ADDITIONALLY A FRAGMENT OF A CLAY PIPE.

Refer to context [60059].

SKETCHES
(consider: location plan, detailed plan showing relationships, section showing fills/deposits as appropriate)

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Single fill of ditch. Fill very loose and wet - the bottom of the feature is below the water table. Few inclusions - occasional small, smooth stones. A single piece of pottery also included, as well as very occasional small pieces of charcoal.

* Update: Slot extended to find relation with pit [600915] - results were that ditch terminates before reaching pit. Section shown below.

CUT OF MODERN, SW-NE RUNNING LINEAR. POSSIBLY A DITCH, HOWEVER QUITE SHALLOW AND WIDE. POSSIBLY RUTTING.
WHOLE FEATURE IS ON AN INCLINE, RISING IN THE SW.
CERTAINLY MODERN AS PLASTICS, COKE AND GLASS WERE PRESENT

Refer to context
