ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked * overleaf)

- E-W orientated ditch slot
- steep sides with complex base*
- base is concave but with a dip right at the base.
- the slot is one of many slot being put in a circular feature [600724]
- because of all the finds in this ditch, think it was not used for ritual purposes, but for a practical purpose.

ML 28/6/2017: This context is the same as the following: 600724, 6001027, 601498, 601510, 601608. It is also in D60308 as well as photos 6001959-65.

MP 7-7-17

(any further details that may be important for understanding the context, including items marked * overleaf)

ML 28/6/2017: This context is the same as the following: 600724, 601014, 601498, 601510, 601608. It is ~~also~~ also in D60282, D60309 & D60310 as well as photos 6001903-905, 6001944-947 & 6002127-2132. The earlier interpretation of their being an earlier ring ditch is false & the cuts associated to this made void. The "fills" of this cut are being kept and reinterpreted as a geological deposit on top of more solid soils/bedrock.

ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked * overleaf)

First fill of ditch [601027]. Very grey in colour when initially excavated, prior to soil oxidation, so is a possible gley which suggests standing water being present at the base of the ditch. Either this fill accumulated within the water as sediment, or the ground water level ~~has changed~~ rose and then stayed constant for a certain length of time.

~~This fill is the same as~~ ^{context} M1. 28/6/2017: This context is the same as the following: 600721, 601013, 601497 & 601607. It is also in D60282, D60309 & D60310 as well as photos 6001903-905, 6001944-1947 & 6002127-2132.

Kubiana samples seen in photos 6002190 & 6002191 (30/6/2017)

MP 7-7-17

ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked * overleaf)

Only fill of [601033], same as (601032).

ML 28/6/2017: This context is the same as the following: 601032, 601499, 601513 & 601604. It is also in D60309 as well as photos 6001946 & 47

This context and the others it is equal to are being interpreted as non-archaeological geological deposits. This was confirmed by a slot between [601026] & [601499] across the internal diameter of the ditch. This material elsewhere on site would be treated as the "natural" and represents a ^{type} ~~portion~~ of the natural geology in the immediate area.

Refer to context (601026) for section
[601027] for plan

(consider: location plan, detailed plan showing relationships, section showing fills/deposits as appropriate)

FILL OF LINEAR [601088] TRUNCATED BY [601081]

601078

(consider: location plan, detailed plan showing relationships, section showing fills/deposits as appropriate)

This image shows a full page of dot grid paper. It features a uniform grid of small dots across the entire surface. A solid vertical line runs down the left side, creating a margin. A solid horizontal line runs across the top, creating a header space. The rest of the page is covered by the dot pattern. There are some minor scanning artifacts visible as small dark specks.

ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked * overleaf)

FILL OF SHALLOW LINEAR, LIKELY DITCH OR GULLY.

MATERIAL IS QUITE CLAY LIKE IN COMPOSITION, WITH SOME NATURALLY OCCURRING MANGANESE, ALONG WITH SOME SUB-ANGULAR SMALL PEBBLES, LIKELY TURNED UP FROM THE NATURAL GRAVEL.

NO MATERIAL CULTURE EVIDENT, AND LIKELY THE RESULT OF NATURAL INFILLING.

Refer to context

(601102)

SKETCHES

This is the fill of E6011077, a cut for a field stream, that runs W-ward from a field pond/lake. The fill contained occ. charcoal & ~~was~~ a moderate amount of medium, subangular stones, particularly toward the bottom of the fill. This is likely stone mixed in from surrounding natural, esp. along the S side of the cut. One worked stone was recovered from the fill. Unknown date for fill at this point.

ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked * overleaf)

[601107] is the cut of one of several field streams that emanate from a pond/lake to the East. It runs parallel to other stream cuts [601094] & [601117], with [601107] located in the middle. No dating evidence was found in its fill (601106), although a worked stone was recovered. If put or other datable material is found in (601093) or (601116), ^{none from this one.} [601107] is likely contemporary. These field streams seem to lie in between two large field boundary ditches, found to the N & S of the stream cuts.

*This form is incomplete if fields marked with ▽ are empty. Please turn over for additional information (and describing all items marked with *) and sketches.*

ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked * overleaf)

This is the cut of the N-most field stream of 3 proximate field stream cuts, which include [601107] & [601094]. It's a shallow cut, with a ~~massive~~ gravel concentrated toward the lower part of the fill, particularly in the W half of the slot. No material culture identified in the excavated slot. The origin of the field streams is a pond/lake to the east.

ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked * overleaf)

This is the fill of a curvilinear ditch cut. Moderate snail shells, brownish grey fill color, & a relatively well preserved animal bone suggest the fill accumulated in relatively stagnant water. No datable finds were collected from (601120). See fills for (600419) & (600411) in case any datable finds were excavated.

SKETCHES

Refer to context 601121 for plan sketch. (consider: location plan, detailed plan showing relationships, section showing fills/deposits as appropriate)

ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked *overleaf)

This is the 'cut' of a curvilinear ditch that travels S-N & then curves toward the East. The fill contained a moderate number of snail shells, & combined w/ the color of the fill, indicates a more stagnant water environment. No pot was recovered, with the only find being a fairly well preserved animal bone. Perhaps other slots, ~~have~~ excavated to the N & S of [601121] have produced more diagnostic finds?

Several ditches intersect with [601121], although, at this time, the only relationship slot excavated is [600411].

It's the only fill of a linear ~~gully~~ ^{ditch}; very shallow. Probably it's the ~~last~~ ^{first} fill of a gully which runs N-S.
Not found on indestructible

It's a natural process of formation, probably colluvial in fact the fill is very ~~very~~ ^{very} uniform and homogeneous. The grey colour ~~spreads~~ ^{indicates} that there ~~was~~ ^{may have been} flooding in this area.

Refer to context [601134]

Cut of a linear and shallow ditch; probably it's a gully.
The only fill (601133) is very uniform ~~and~~ it means that probably is colluvial (natural infilling) and the colour gray could be because there was flooding in the area. There are not finds, and we don't know if this feature could be related with another boundary ditches in the area ^{also} related with a roman or saxon settlement that could be at ~~the~~ west (roman) or east (saxon).

Refer to context [601134]

It's a cut of a gully; it's the terminus. It has only one fill (601137) and the feature is truncated at south for a furrow. The cut is very shallow.

It's the end of a gully which runs S-N.

Not finds or ~~not~~ indications

A natural process of infilling and the grey colour of the fill indicates that there may have been flooding in this area.

Refer to context ~~60~~ [601138]

ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked * overleaf)

NATURAL INFILLING OF GULLY, SINGLE FILL. VERY
HOMOGENEOUS AND IS MOST LIKELY AN ANNUAL
LAYER, THIS IS UNDERSTOOD DUE TO THE SILTY/CLAY
SILTY CLAY NATURE OF THE FILL. NORMALLY, SO
GULLY IS NOT EXACTLY DATEABLE BUT COULD BE
PART OF THE NEARBY SAXON FIELD SYSTEMS OVER
THE ROMAN AREA.

PILL CONSISTED OF A MODERATE - SOFTLY COMPACTED VERY DARK BROWN PEATY SILT WITH OCC. WHITE CHALKY STONES. ONE LARGE ANIMAL BONE RETRIEVED FROM SECTION. UNCERTAIN WHY THIS PILL HAS A MORE ORGANIC CONSISTENCY THAN THE UPPER ONE (601147). DOES IT REPRESENT A BUILD UP OF ~~INTERMEDIATE~~ DECAYED VEGETATION WITHIN THE DITCH BEFORE IT FINALLY ~~WENT~~ WENT OUT OF USE? PERHAPS THERE WERE SOME ENVIRONMENTAL CHANGES OCCURRING ON A MARGINAL LEVEL?

N-S DITCH TURNING IN AN NE DIRECTION TOWARDS THE EASTERN EDGE OF SITE. DITCH HAS A STEPPED PROFILE ON BOTH EASTERN AND WESTERN EDGES. SIDES WELL DEFINED INTO UNDERLYING NATURAL LOWER EDGES OF DITCH UNSTABLE DUE TO WATERTABLE. DITCH FILL (601148) MAY INDICATE A TRANSITION IN THE ENVIRONMENTAL CONDITIONS (ON A MARGINAL SCALE) DUE TO ITS PLATY CONSISTANCY. THE GEOLOGY ALSO SEEMS TO BE MORE CLAYEY ON THE EASTERN SIDE OF SITE, WHICH WOULD ALLOW FOR MORE STANDING WATER ON THE SURFACE AND IN ~~UNSTABLE~~ CUT FEATURES I.E DITCHES THIS COULD HAVE BROUGHT ABOUT THE BUILD UP OF (601148).

ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked * overleaf)

It is the only fill of a linear ditch [601156]. It is a natural process of infilling once the ditch was abandoned.
Not found for inclusions.

This fill is cut by a cut [601715] another linear ditch or ~~it is~~ probably a reuse of a ~~then~~ drainage ditch.

Refer to context [601156]

SKETCHES

(consider: location plan, detailed plan showing relationships, section showing fills/deposits as appropriate)

Section facing SW of the ditch.

ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked * overleaf)

It is the linear cut of a ditch with it has only one fill [601155]
 The process of infilling is natural once the ditch was abandoned.
 Not finds or inclusions.
 This ditch is cut by another ditch [601715] or probably is
 a reuse of the same ditch; it is probably a drainage ditch

Refer to context [601156]

CUT OF DITCH WITH ONE FILL (601165).
CUT BY A PIT [601166], THAT COULD MAYBE
BE A LARGE POSTHOLE DUE TO THE SHAPE,
WITH ONE FILL ON ITS OWN (601167).

THIS IS ONE OF MANY DITCHES IN THIS
AREA THAT INTERLOCKS ~~TO DO~~ AND FORMS
A FIELD SYSTEM. ONE ~~NEED~~ LARGE PIECE OF
THE RIM OF A POT WAS FOUND IN
(601165) WHICH LOOKS LIKE IT MIGHT BE
ROMAN OR SAXON. IT IS OLDER THAN
THE PIT [601166].

Refer to context [601164]

ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked * overleaf)

FILL OF CUT [601164]. GETS CUT BY A
PIT/POSTHOLE [601166] BROWN-GREY IN COLOUR
AND A LOT LIGHTER THAN (601167).
CONTAINED A RIM FRAGMENT FROM A
POT THAT LOOKS ROMAN OR SAXON TO ME,
WHICH MOST LIKELY IS THE TIME IN WHICH
THIS DITCH BELONGS.

Refer to context

601164

SKETCHES

(consider: location plan, detailed plan showing relationships, section showing fills/deposits as appropriate)

A large rectangular area filled with a grid of small dots, intended for drawing sketches related to the context.

ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked * overleaf)

CUT OF A RELATIVELY ~~DEEP~~ DEEP PIT (0.5m). THE WIDTH OF IT INDICATE THAT IT IS A PIT OF SOME KIND. BUT THE SHAPE AND VERY REGULAR CIRCULAR FORM IN PLAN AS WELL AS THE VERTICAL EDGES IN SECTION I THINK INDICATE THAT IT COULD BE A LARGE POSTHOLE. A BONE AND A TOOTH WAS FOUND IN ITS ONLY FILL (601167).

Refer to context [601164]

ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked * overleaf)

Single fill of ditch containing no finds. Fill mostly comprises
 firm silty clay which appears to have accumulated as a gradual
 silting but also contains frequent patches of redeposited material
 possibly indicating a manual dump/backfill. Deposit was waterlogged
 at base.

Refer to context

ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked * overleaf)

It is the only fill in a linear ditch which runs N-S.
The fill is capped by a pit [601187]. The limit (line) between the cut of the pit [601187] and this fill [601182] is very ambiguous.
The infilling is as a result of natural process, once the
Not inclusions of finds.

Cut of a linear ditch with only one fill (601182)
 There is a slot in the E side of the ditch.
 It's the same cut which ~~it~~ was registered at N [601187]
 It's a drainage ditch. It is very shallow.
 Not finds or inclusions.

Refer to context [601183]

ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked * overleaf)

Cut of a circular pit with only one fill (601184)
 The pit cuts a linear ditch (601183) which runs N-S.
 Not inclusions or finds in the only fill of the pit. The fill (601184)
 is very homogeneous; it suggests that the process of infilling
 was natural.

Refer to context [601185]

The cut of large curvilinear ditch (towards the S is [601190]. It runs NE-SW

this ditch was cut by N-S running ditch [601189]

the cut of this ditch was hard to clear define due to the very dry nature of the surface and to the complex nature of the natural. However, the cut seems to have been quite gentle and sloping very sharply on the inside

Refer to context 601188 for sket plan

ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked * overleaf)

CUT OF OF E-W RUNNING DITCH [601203] + [600475]
 RUNS PARALLEL TO E-W DITCH [600489] + [600487]
 PROFILE OF DITCH [601203] HAS STEEP EDGES AND
 A FLAT BASE, WHICH IS SIMILAR TO THE SLOT
 TO THE EAST HOWEVER, [600475] IS DEEPER AND
 WIDER, WHICH MIGHT SUGGEST IT HAS BEEN OVER-CUT.
 NO DATING MATERIAL.

LIKELY TO BE PART OF A RIBD-SYSTEM, DUE TO
 ITS LINEAR SHAPE AND THAT IT RUNS PARALLEL
 TO SIMILAR FEATURES.

Refer to context

This image shows a full page of dot grid paper. The background is white, and it is covered with a regular pattern of small black dots. The dots are arranged in a precise grid, with equal spacing between them both horizontally and vertically. This type of paper is commonly used for sketching, journaling, and organizing notes. There are no margins, text, or other markings on the page.

FILL OF PIT [601228] MODERATELY COMPACT. BROWN CLAY
WITH OCCASIONAL SMALL STONES
NO FINDS

(consider: location plan, detailed plan showing relationships, section showing fills/deposits as appropriate)

This image shows a full page of dot grid paper. The background is white, and it is covered with a regular pattern of small black dots. The dots are arranged in a precise square grid, with equal spacing between them both horizontally and vertically. This type of paper is commonly used for sketching, journaling, and organizing ideas. There are no margins, text, or other markings on the page.

ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked * overleaf)

CUT OF SE-NW RUNNING DITCH MEETS WITH N-S DITCH [601249], HOWEVER BY LOOKING AT THE S FACING SECTION, WHERE THEY MEET, NO REASONABLE DIFFERENCE CAN BE MADE SEEN IN THE FILL WHICH COULD SUGGEST THAT THE TWO FEATURES SHARE A FILL AND DATE.

SOME POSSIBLY IRON AGE / ROMAN WAS FOUND IN DITCH [601247].

Refer to context (601248)

SKETCHES

(consider: location plan, detailed plan showing relationships, section showing fills/deposits as appropriate)

CUT OF A DITCH THAT RUNS IN
A CIRCLE TO THEN LATER RETURN INTO
BEING TWO PARALLEL DITCHES SEEMS TO
HAVE AT LEAST TWO DITCHES CUTTING THROUGH IT.
I DONT REALLY KNOW WHAT THIS IS BUT
MAYBE IT SO SIMPLE THAT THIS IS SHAPED LIKE
THIS BECAUSE SOMEBODY TURNED A PLOUGH
TABLET?

CONTAINS ONE FILL: (601258)

Refer to context 601257

CUT OF PIT WITH TWO FILLS (601272) & (601273). THIS PIT IS VERY LARGE, THIS CUT NUMBER AND THE DIMENSIONS ONLY REFER TO ONE QUADRANT THAT WAS EXCAVATED. THE PIT HAS STEEP SIDES AND A CONCAVE BASE. ITS USE IS MOST LIKELY A RUBBISH DUMP DUE TO THE PRESENCE OF DISARTICULATED BONES FROM A VARIETY OF ANIMALS. ADDITIONALLY PART OF A SKULL THAT MAY BE HUMAN WAS FOUND, HOWEVER IT MAY ALSO JUST BE ANIMAL. ONE PIECE OF POT WAS FOUND. THE PIT MAY EITHER DATE TO ROMAN OR EARLY MEDIEVAL AS THERE ARE ~~NO~~ OCCUPATION/RURAL AREAS DATING TO BOTH PERIODS NEARBY. ~~THE~~ LOTS OF CHARCOAL AND REEDS WERE FOUND IN THE BOTTOM SAMPLE, WHICH CAN BE USED FOR ENVIRONMENTAL ANALYSIS OR TO DATE THE PIT/AREA.

Refer to context Sketch (601273)

PRIMARY DELIBERATE BACKFILL OF A PIT (601271) THIS FILL IS A MODERATELY ~~STIFF~~ COMPACT, MID ~~FAIRLY~~ ^{BROWNISH GREY} BROWN SUTY CLAY. IT IS A DELIBERATE BACKFILL DUE TO MODERATE AMOUNT OF CHARCOAL AND REEDS FOUND, AS WELL AS ~~ANIMAL~~ ANIMAL BONES FOUND. THE PIT IS MOST LIKELY A RUBBISH DUMP ON THE EDGE OF A ROMAN SETTLEMENT OR IT ALSO COULD BE PART OF A SAXON RURAL FIELD SYSTEM.

Only fill of furrow [601280].

The fill is very homogeneous and seems to have interacted with the natural towards the bottom as there are quite a lot of little natural depressions in the natural filled with this fill + ~~natural stones~~. These were investigated and no human-made cuts were identified.

A piece of pot was found on the top of this fill. However, it was very superficial (in the dry top part of the layer). Therefore, should be taken into account ~~that it could be~~ during post-exc. Pot seems Roman.

Refer to context

Last fill in a linear ditch which runs SE-NW. The colour is greyish brown but in the middle of the fill there is a patch of gravelly sand which is an orange colour.
 It is a natural process of infilling and probably the sand patch is as a result of a aluvial episode in the area.
 There is one piece of animal bone

ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked "overleaf")

It is the first fill of a linear ditch. It looks like a natural process of formation because it is a very uniform fill without inclusions at the section (SE), but at the NW section the fill ~~is~~^{becomes} more gravelly. Probably this last aspect suggests that there ~~are~~^{were} different episodes of infilling, probably ~~alternates~~^{alternates} alluvial and colluvial in the area. At the section (SE) ~~is~~ there is a bone. (animal bone).

located

Cut of a linear ditch, there are two fills (600281) and (600282). The last fill (601281) is at the side (of) of the ditch and the first fill at the west and at the bottom. The different fills suggest two different moments of ^{accumulation} ~~filling~~ of the ditch; both are as a result of natural process. ~~There~~ There are one fragment of animal bone in the last fill (601281) and another in the first one (601282) that is in the section SE. The section NW is completely different: there is only one fill (601282) but more gravelly than in the section SE which is more "clean" and uniform. It may be it is a drainage ditch and it could be related to agriculture.

Top fill of ditch [601286]

this top layer is extremely compacted and ~~is~~ sticky clay. the bottom of ~~the~~ the layer looses the orangish brown to become a bit more darker which suggests interaction with layer (601285) underneath. However, the characteristics of the layer are too similar (clay) so they were not split in two.

Cut of ditch & the ditch seems to be curving from SW to NE and then slightly SE.

Very steep sides although they become more gentle towards the bottom.

Quite a heterogeneous natural on the area with brown orangish sand and grey patches of natural clay.

ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked * overleaf)

INFLUENCE OF E-W DITCH [601200] PROBABLY OCCURRED DURING A SILTING EVENT IN THE AREA WHICH ~~IS~~ SLUMPED IN FROM THE SOUTH SIDE.

INCLUSIONS CONSISTED OF A FEW WATERLOGGED ~~PLANT~~ REMAINS AND A VARIETY OF STONPS: SOME BROKEN FLINTS, SMALL ROUNDED PEBBLES AND THE OCCASIONAL NOODLE OF CHALK NEAR THE TOP OF THE FILL.

Refer to context

ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked * overleaf)

POSSIBLY A CUT OF TERMINUS THAT
ENDS THE DITCH STARTING FROM [601295].
IT SEEMS TO RUN INTO A PIT OF SOME KIND
ALTHOUGH IT IS VERY DIFFUSE. DUE TO THE
PRESENCE OF TREE-BOLES IN THE AREA IT IS
A LIKELY ~~POSSIBLE~~ CAUSE FOR THE CONFUSION.

(any further details that may be important for understanding the context, including items marked * overleaf)

THE CUT OF ADITCH. IT SEEMS THAT AT FIRST THE EASTERN EDGE WAS VERTICALLY CUT BUT THEN THERE WAS MADE ANOTHER CUT [601314] TO EXPAND IT. THE SHAPE IS IRREGULAR, COMING FROM THE SOUTH AND CONTINUING NORTH. IT GETS THINNER AT SOME SPOTS AND CURVES HERE AND THERE. IT ALSO CONNECTS WITH OTHER DITCHES THAT COME FROM THE EAST OR THE WEST. WATER CAME OUT UPON REACHING THE BASE.

Refer to context [601308] for section and plan

FILL OF PIT. USE OF 717 UNKNOWN BUT THE ~~SANDY~~ SANDY SILT, DIRT BROWNISH GREY LOOSE FILL WAS FULL OF WHAT IS MOST LIKELY DUMPED MATERIAL. FINDS INCLUDE: RANGE OF ANIMAL BONE, INCLUDING A FEW DIFFERENT PARTS OF MANDIBLES, RANGE OF POT FROM DIFFERENT PERIODS, CBM, FIRE CRACKED STONE AND AN FE OBJECT.

SKETCHES

(consider: location plan, detailed plan showing relationships, section showing fills/deposits as appropriate)

This image shows a full page of dot grid paper. The background is white, and it is covered with a regular pattern of small, dark grey or black dots. The dots are arranged in straight horizontal and vertical rows, creating a grid-like appearance. There are no margins, text, or other markings on the page.

CUT OF PIT, WITH ONE FILL (601329). USE OF PIT IS UNKNOWN BUT AS A RESULT OF THE VARIETY OF BURNT / WASTE MATERIAL IN THE FILL, SUCH AS POT FRAGMENTS, ANIMAL BONE AND FIRE CRACKED STONE THE PIT WAS MOST LIKELY USED AS A MEANS FOR RUBBISH. DATE IS NOT CLEAR AS THERE IS A RANGE OF TYPES OF POT. THIS PIT IS NEXT TO ANOTHER PIT WHICH MAY HAVE SIMILAR USE.

FILL OF DITCH [601335]. CONTAINS
A REALLY BURNED POT AND AN ANIMAL JAW.
THESE FINDS SEEMS LIKE TRASH ~~ONE TO TWO~~
AND THIS MAKE IT LIKELY THAT THIS FILL WAS
DUMPED HERE.

Refer to context [601335]

CUT OF A DITCH. THE SHAPE OF THE DITCH IS (IRREGULAR) WITH CURVES. ITS NARROW AND A LITTLE FURTHER FROM THE SLOT IT SEEMS TO BE DIVIDED IN A "Y" SHAPE BUT BECOMES ONE AGAIN. A THOROUGH CLEANING AND POSSIBLY ANOTHER SLOT WILL SHOW MORE.

AFTER A THOROUGH CLEAN OF THE SURROUNDINGS IT BECAME APPARENT THAT ITS TWO DITCHES COMING INTO ONE TOWARDS THE NORTH.

SECTION OF SMALL DITCH CONNECTING TO
DITCH [601355] WHICH IS LARGER. WHILE ONE THAT
LIES ON TOP OF THE OTHER WE WILL NEVER
KNOW DUE TO THE WAY IT WAS EXCAVATED.

THIS ONE ~~HAS~~ A DARKER FILL (601344)
THAN THE OTHER DITCH BUT NO FINDS.

POTTERY AND BONES OF A VERY SIMILAR
CHARACTER AS THE FINDS FOUND IN
(601336) WAS FOUND, BUT SINCE THEY ARE
DEFINITELY FROM THE SAME FILL AS (601336)
THEY WERE PLACED IN ~~THE~~ FIND-BAGS
THOSE.

(any further details that may be important for understanding the context, including items marked * overleaf)

CUT OF A SE-NW RUNNING DITCH. DATING EVIDENCE SUGGEST THAT IT COULD BE PART OF A ROMAN FIELD SYSTEM. PROFILE HAS A GENTLY CONCAVED BASE, WITH MODERATELY SLOPING EDGES.

THE DITCH HAS BEEN RE-CUT BY [601347], WHICH COULD EITHER BE A PIT OR ANOTHER DITCH (it's unclear at this point)

Refer to context (601346)

SKETCHES

ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked "overleaf")

INFILLING OF DITCH [601345] WHICH MOST LIKELY OCCURRED DURING A SILTING EVENT AFTER IT'S DISUSE. IF RE-CUT [601347] IS IN FACT A DITCH, THEN IT COULD BE SEEN AS BEING RE-USED FOR THE SAME PURPOSE.

THE SILTY-SAND IS CLEAN OF ANY FINDS OR SIGNIFICANT INCLUSIONS. BUT DATING EVIDENCE FROM (601348) SUGGESTS THAT IT IS EITHER ROMAN OR EARLIER.

Refer to context [601345]

RE-CUT OF DITCH [601345]. EITHER RE-CUT AS A DITCH FOR RE-USE OR AS A PIT FOR DUMPING. FURTHER EXCAVATION NEEDED.

A GOOD AMOUNT OF ROMAN CERAMICS, BURNT BONE AND CHARCOAL WAS PRODUCED FROM THE FILL. SAMPLES WERE TAKEN.

THE PROFILE OF THE CUT IS ROUGHLY THE SAME AS THE ORIGINAL CUT OF THE DITCH, JUST 10CM HIGHER.

Refer to context [601345]

CUT OF PIT WITH ONE FILL, A DELIBERATE BACKFILL.
THIS PIT IS SITUATED NEXT TO ANOTHER PIT WHICH
IS MUCH LARGER BUT CONTAINS A SIMILAR FILL
AND FINDS. NO DATE IS KNOWN CLEARLY BUT THE
POT SUGGESTS AN ANGLO SAXON. ~~AND~~ THE PIT IS MOST
LIKELY USED AS A RUBBISH DUMP DUE TO THE MATERIAL
FOUND IN IT.

Refer to context

FILL OF PIT [601351]. SOLE FILL. LOOSE, MID
 GREYISH BROWN, SILTY SAND. DATE IS UNKNOWN DUE TO
 MIXTURE OF POT BUT USE OF THE PIT WAS MOST LIKELY
 A DUMP. ~~THE~~ WITHIN THIS DELIBERATE BACKFILL
 FINDS INCLUDED POTS SHARDS AND PONE.
 THIS PIT IS SITUATED NEXT TO A LARGER PIT WITH
 A SIMILAR FILL WITH SIMILAR FINDS. BOTH
 ARE MOST LIKELY JUST A DELIBERATE BACKFILL OF
 RUBBISH

Refer to context [601351]

ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked *overleaf)

THIS CONTEXT IS THE TOP FILL OF A PIT [601358]
 BECAUSE OF ITS COLOR ^(DARK BROWN) AND ITS COMPOSITION IT LOOKS LIKE
 A DELIBERATE BACKFILL LIKE OTHERS IN THE AREA BUT
 BECAUSE ~~THE~~ ~~WERE~~ NO FINDS INSIDE IT COULD
 BE ALSO A NATURAL INFILLING.
 THERE WERE ONLY TWO SMALL STONES (FRAGMENTS OF FLINT) IN
 THE FILL.

Refer to context

ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked * overleaf)

THIS CONTEXT IS ONE OF THE FILL OF A PIT [601358].
IT LOOKS SIMILAR TO THE NATURAL WITH MANY LITTLE STONES
(FRAGMENTS OF FLINT) AND SOME MANGANESE ~~AND SOME~~ BUT IT'S
MORE CLAYEY AND BROWN. ~~IT IS~~ POSSIBLE TO SUPPOSE THAT WHEN
THE PIT WAS MADE AFTER A PERIOD OF EXPOSURE (~~ALONG~~
THIS PERIOD ^{THE FILL} (601357) WAS ~~DEPOSITED~~) PART OF THE EDGE
COLLAPSED INTO THE PIT.

VERY SHALLOW DITCH RUNNING E-W. AT FIRST
 SIGHT IT LOOKS LIKE IT BENDS AND START RUNNING
 PARALLEL TO [601350]. THIS IS HOWEVER NOT LIKELY
~~MADE~~ SINCE THERE IS A HUGE DIFFERENCE IN
 DEPTH CLOSER TO THE BIG DITCH. IT SEEMS
 RATHER THAT THERE, SECOND, DEEPER AND UNRELATED,
 IS A
 DITCH RUNNING PARALLEL TO THE BIG ONE. WHICH
 IS SUPPORTED IN PLAN.

THIS IS THE SAME DITCH AS [601301]

Refer to context [601359]

It's the second fill of a linear ditch: the texture of the fill is very similar of the (601363) which is above but in this case the fill looks like very organic.

There are several fragments of pottery, most of them are concentrated at the S of the slot. Also there are a lot of fragments of charcoal.

The pottery is saxo and it seems that they are two or three different vessels that probably they were broken "in situ".

Natural filling but also deliberate for the use of the domestic waste as a dump.

ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked * overleaf)

Linear ditch rich has three fills. In one of the fills (601364) there was a concentration of ceramics. It looks like two or three broken vessels, probably broken "in situ" in a very organic fill. There are also frequent pieces of charcoal and some pieces of bone that looks burned. In the fill that there is at the bottom (601365) one jet bead was found.

It could be a boundary ditch of a peripheral area of a Saxon settlement (probably at South) and then after that it could be use as domestic waste because there are large quantities of pot.

Natural infilling as a process natural but also deliberate for the use as a waste dump.

CUT OF NW-SE RUNNING DITCH: PROFILE MATCHES THAT OF [601350] STEEP EDGES WITH A CONCAVE BASE.

IT IS LIKELY THAT THE DITCH INTERSECTS WITH A NUMBER OF OTHER FEATURES TO THE NW, BUT THEIR RELATIONSHIP IS UNCLEAR AT PRESENT. WHAT IS KNOWN IS THAT [601378] CUTS THROUGH N-S DITCH [601381].

LIKELY TO BE ROMAN IN DATE.

Refer to context (601378)

It's the second ~~fill~~ and the last one fill of a linear ditch.
 It's very homogeneous.
 Not finds or inclusions
 It's a natural process of formation, probably colluvial.

Refer to context [601396]

ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked * overleaf)

It's the first fill of a ditch [601396], it's very similar to the another fill which is above (601394); but this one (601395) it has a grey colour ~~which~~ that could mean that was under the water.

Not finds or inclusions.

It's a natural process of formation, probably colluvial in fact the fill is very uniform and homogeneous. The grey colour ~~is~~ ~~shows~~ that there was flooding in this area. indicates it may have been

Refer to context [601396]

Out of a linear ditch; it could be a gully, ~~probably~~ at the bottom ~~there~~ is gravelly, it means that it has two fills (601394) and (601395) both are very uniform and they are the result of a natural process (probably colluvial) but the ^{grey} colour of the first fill (601394) ~~it~~ seems that there was flooding in this area ^{makes it}

APPEARS TO BE A NON-WATER BOURNE DEPOSIT AS THERE IS NO GREYING OF THE SOIL.

IT IS LIKELY THAT IT ~~WAS~~ WAS FORMED BY THE BANK ERODING BACK INTO THE CUT.

A SINGLE LAYER OF GRAVEL MARKS THE INTERFACE BETWEEN THIS + (601403) BUT IT IS LIKELY THAT THE WHOLE DEPOSIT WAS GRADUALLY BUILT UP OVER TIME RATHER THAN IT BEING RAPIDLY DEPOSITED.

Refer to context

ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked * overleaf)

This is the fill of a pit, possibly a test pit for locating gravel for quarrying, as per Helen. The fill contained small concentrations of charcoal toward the top, as well as one small to med ^{sub-}angular stones, 2 animal teeth, and a nail was found in the top of the unexcavated portion of the fill. The fill appears to be a more naturally occurring backfilling event, as finds are sparse.

local context

14/6/17

ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked *overleaf)

This is the sub-circular cut of a small pit. The fill (601410) contained moderate charcoal towards the top, 2 animal teeth, and one nail was recovered from the top of the unexcavated fill. There is no obvious function of the pit, but, as per Helen perhaps this was a test pit of sorts, possibly for locating gravel for quarrying.

The cut [601411] & fill (601410) are located ~10cm to N of the pit [601436] & its fills (601433-35). (601434) is a charcoal deposit, & it's possible that (601410) is contaminated by charcoal closer with (601434).

Refer to context 601438 sketch

ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked * overleaf)

This is a slumped fill of the pit once - it was abandoned.
There were a small stone (pebbles) and it's very gravelly on the top; probably because the pit [601418] cuts a gully.

Refer to context [601418]

14/6/17

It's a cut of a circular pit. It has three fills; the last one in time (601415) and two slumped fill, one at W (601417) and another at E (601416).

It's probably the bottom of the pit. There are some fragments of pottery in one fill (601415) probably roman.

This pit is cutting a gully which is at E [601420].

There are another features close to this pit like boundary ditches that could be related with a roman settlement to the site at the W.

That could be the "periphery" area of the main site more related with agricultural.

ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked * overleaf)

It's a slumped fill of a ditch [601424] once it was a sand-
red. It's very similar to (601422) but this one is more clayish
but it has a pocket of gravel; it's probably because this ditch
[601424] is cutting a gully [601420].

Refer to context [601424]

SKETCHES

(consider: location plan, detailed plan showing relationships, section showing fills/deposits as appropriate)

See (601421) and [601424]

24/6/17

Cut of a linear ditch; it's very shallow. It has three fills, two of them (601422) and (601423) slump fills and the last one (601421) natural infilling and very organic.
Not finds or inclusions

It could be the bottom of a boundary ditch like another in the area related with the main settlement at the west. This area could be ~~per~~ "periphery" to the main area related with ~~linear agriculture~~ agriculture.

Refer to context [601424]

SKETCHES

ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked * overleaf)

This is the backfill of a pit [601430] which contains, in general, Roman pottery, animal bone, a moderate to frequent amount of charcoal. In this particular layer of fill, Roman pot fragments + bone fragments were identified, a only pot was collected (bone frags were non-diagnostic). The fill contains an ~~area~~ ^{area} where charcoal is more frequently concentrated. This is likely to be due to "contamination" from the charcoal deposit below (601434), & it's possible that the pit + bone originate from this earlier deposit. ^{most} finds were collected in the region just above the charcoal deposit - suggesting that the rest of the pit fill may have accumulated via more natural processes, with ^{subsequent} bioturbation & erosion occurring ~~near~~ around the area of the charcoal deposit.

Pit [601436] is situated within a tree hole, with another small pit [601411] found m to the NW. Later burrows are also found to the N & S of these features.

Refer to context 601438 for sketch

ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked * overleaf)

This is a charcoal deposit that may represent one or a limited number of ~~event~~ burning events. The ~~fastest~~ charcoal is within a ~~clay~~-clayey-silty matrix & extends ~0.68m wide & extend Sward, out of the section, up to 0.27m. On top of the deposit, toward the S end of the deposit, is a large animal scapula, although it doesn't appear burned. Small fragments of pot were found within the deposit, and a larger, very delicate fragment, was found toward the North. It appears this deposit was disturbed via bioturbation, with a moderate amount of charcoal being found mixed into (601435), ~~also~~ in the region directly above (601434). Additionally, the fill (601410) in nearby pit cut [601411], also contained a moderate amount of charcoal, particularly toward the top of the fill. Could the charcoal in (601410) be related to (601434)?

This is the 1st fill of pit [601346], which produced 2 fragments of Roman post-samian. Overall, the fill was relatively sterile, although one charcoal fragments were present. The fill was slightly sandy, which may be due to some mixing with the sandy natural at the base of the cut. The fill could be related to ~~the~~ a period of pit disuse or it may have formed a base for the fire that ~~was~~ ~~the~~ resulted in charcoal deposit (601434).

Refer to context 601436

ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked * overleaf)

This is one of two smallish pits, ~~located~~^{immediate} in the area, both of which cut the natural (600037) & a tree hole (6000601437) & [601438].

This is the larger of the two pits, & it contains the most cultural material, producing animal bone, as well as Roman pottery in all 3 fills (601433-601435). Additionally (601434) is a charcoal deposit related to an in-situ fire. It is possible that the charcoal from this pit contaminated the fill (600410) of pit [601411]. It is possible that these two pits may have served as test pits for gravel (as per Helen, relative to other small pits on site). Just to the N of these two pits is a series of intersecting pits, as yet unexcavated, so it will be interesting to see if these reach gravel, which would ^{also} support to a gravel test pit theory.

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

THE ~~TOP~~^V IS THE TOP FILL OF A PIT [601442].
IT APPEARS TO BE A NATURAL INFILLING DUE TO ITS SILTY NATURE.
IN THIS FILL THERE WERE ~~ONE~~ FRAGMENTS OF FIRED FLINT AND
ONE ~~FRAGMENT~~ OF A MILLSTONE.

ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked *overleaf)

THE CONTEXT IS THE BOTTOM FILL OF THE PIT [601442].
IT SEEMS TO BE FORCED BY THE PRESENCE OF WATER BECAUSE
OF THE CLAYEY NATURE OF THE FILL. THE WATER ALSO SHAPED
THE EDGE, THAT IS WHY THEY'RE UNDERCUT AT THE SAME
LEVEL OF THE FILL.

Refer to context [601442] FOR PLAN AND SECTION (consider: location plan, detailed plan showing relationships, section showing fills/deposits as appropriate)

(any further details that may be important for understanding the context, including items marked * overleaf)

THE CUT IS CIRCULAR AND THE EDGE ~~IS~~ UNDERCUT BY EROSION ^{OF WATER} ON THE SAME ~~LOW~~ LEVEL AS THE FILL (601441).

~~THE CUT IS~~

IT SHOULD BE A PIT EXPOSED FOR LONG TIME (WHY? MAYBE THE SOIL WAS TAKEN FOR BUILDING PURPOSE), ERODED BY WATER AND NATURAL FILLED WITH DIFFERENT LAYERS.

Cut of a linear ditch; it has only one fill (601458) which looks like very mineral.

It's natural infilling. ~~The~~ once the ditch was abandoned. We don't know the function of the ditch but it could be related with others in the area; it could be part of a group of boundary ditch of a settlement close to here (main settlement at the west (probably roman) or at the south (it could be saxo))

Refer to context [601459]

PRIMARY INFILLING OF A DITCH FORMED BY THE ACTION OF THE WATER ON THE EDGE OF THE DITCH.

(consider: location plan, detailed plan showing relationships, section showing fills/deposits as appropriate)

This image shows a full page of dot grid paper. It features a uniform grid of small dots across the entire surface. A solid vertical line runs down the left side, creating a margin. A solid horizontal line runs across the top, creating a header space. The rest of the page is covered by the dot pattern. There are some minor dark specks or artifacts visible on the page, particularly near the center and bottom left.

THE CUT SEEMS TO BE THE BOTTOM OF A PIT.
IT'S DEEP ONLY 0,08m BUT ~~IT~~ IT HAS REGULAR EDGE,
EVEN IF IT WAS CUT IN A NATURAL INFILLING, MAY BE THE REST
OF A TREEHOLE.
THIS IS THE REASON WHY IT ~~SEEMS~~ ^{WAS} OVERTURNED IN THE PICTURE.
THE REDDISH FILL IS THE REMAINING OF THIS NATURAL INFILLING
(NOT NUMBERED).

Refer to context  NTS

(any further details that may be important for understanding the context, including items marked * overleaf)

LOWER PRIMARY FILL OF DITCH. CLT [60/484]. COMPOSITION
 LIKELY THE RESULT OF A MIXTURE OF MATERIAL
 MOTTLED TOGETHER - LOOKS QUITE LIKE A REDEPOSITED NATURAL
 WITH SOME GRAVEL INCLUSIONS, ALONG WITH SOME
 COLLUVIAL MATERIAL.
 SOME LENSES OF A BLUEISH LIKE MATERIAL, POSSIBLY
 INDICATIVE OF WATERLOGGED CONDITIONS.
 HUGE AMOUNT OF RISING WATER PRESENT.

SKETCHES

Refer to context (60/482)

(consider: location plan, detailed plan showing relationships, section showing fills/deposits as appropriate)

This is the cut of a furrow, running E-W across site. It is shallow, & at the west end (dot [601485]) terminates on sand & gravel. The midsection is currently being excavated, & the E end may be represented by [600037]. The immediate area around the furrow is dominated by sand & gravels, with ditches (parallel-ish) running E-W, > 5 m to the N & S, as well as shallow pits to the south.

Refer to context

ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked * overleaf)

- Fill [601494]
- cut (601495)

ML 28/6/2017: This context is the same as 601509. It is seen in D60232 & D60233 as well as photos 6001470-1475, & 6002001-2007. This furrow, and the one running across the southern half of the ring ditch are likely Post-Medieval in date which suggests that the majority, if not the total, of the material associated with the barrow superstructure was no longer present. This could either have been an active deliberate removal, or a more passive removal through ploughing.

ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked * overleaf)

- Fill [601493]
- mod compact mid orangish grey fill
- clay
- lithic tool [6005]
- result from natural infilling

ML 28/6/2017: This context is the same as the following: 600721, 601013, 601028, & 601607. It is seen in D60232 & D60281 as well as photos 6001876-1878, 6002041-45, & 6002059-2064. Though a lithic tool was found in this fill there is no evidence to conclusively say it is contemporary to the construction of the ditch, or the accumulation of this fill.

ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked * overleaf)

- N-S orientated ditch slot
- * - complex sides - ditch didn't have definite sides, so stopped excavating at 6m long
- also cut is unclear in the section because of a natural deposit (601499)
- slot is part of multiple slots in a circular feature
- still have not located the entrance so unclear if it is a round house
- base is concave at the very bottom, but gentle and flat in other areas

ML 28/6/2017: This context is the same as the following: 600724, 601014, 601027, 601540, 601608. It is seen in DB0232 & DB0281, as well as photos 6001876-78, 6002041-45 & 6002054-54.

SKETCHES
(consider: location plan, detailed plan showing relationships, section showing fills/deposits as appropriate)

SKETCHES

A hand-drawn site plan on a grid background showing a farm area. The plan includes several rectangular plots and furrows, with various labels and dimensions:

- Top Left Plot:** A tilted rectangular plot labeled **[601510]** at its top right corner. It has a dimension of **3.8m** along its left side and **3.05m** along its bottom side. A dashed line labeled **[601508]** runs along its right edge.
- Top Center Plot:** A vertical rectangular plot with a dashed line labeled **FURROW [601494]** running along its right side. A dimension of **1.5m** is indicated between its bottom right corner and the bottom left corner of the plot below it.
- Bottom Left Plot:** A horizontal rectangular plot labeled **[601014]** at its bottom right corner. A dashed line labeled **FURROW** runs along its bottom edge.
- Bottom Center Plot:** A vertical rectangular plot labeled **[601027]** at its bottom center. A dashed line labeled **[601494] x [601498]** runs along its top edge.
- Bottom Right Plot:** A horizontal rectangular plot labeled **[60724]** at its bottom right corner.
- Other Labels:** A dashed line labeled **[601508]** runs along the right side of the top left plot. A dashed line labeled **[601494]** runs along the right side of the top center plot. A dashed line labeled **[601494] x [601498]** runs along the top edge of the bottom center plot.

ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked * overleaf)

Natural infilling of ring ditch during disuse. The occasional bone or stone inclusion probably represent things being washed in & settling in the fill on one off events.

ML 28/6/2017: This ^{context} fill is the as the following: 600719, 601011, 601030, 601495, 601605. It is seen in D60281, D60306, & D60307, as well as in photos 6001876-1878, 6001970-1975, & 6002001 - 6002007.

It is from the base of this context where it fills pit [601930] that the bone which may be useful in regards to C¹⁴ data was excavated.

30/6/2017 Kubianni samples seen in photos 6002177 & 6002178

ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked *overleaf)

This is the terminus of an E-W ditch, which truncates [600458] to the East.
One coarse stone (guern?) ^{*DOPE!} was recovered from the slot. To the south of [601515] are additional E-W ditches (e.g. [600601], [600492], [600781]). To the north (75m) is a pit.

FILL OF DITCH SLOT. THOUGHT TO BE THE TERMINUS
FOR A NE/SW DITCH, THUS EXCAVATED FOR THIS
REASON.

FILL IS QUITE MOTTLED, WITH SOME HEAVY GREY PATCHES
OF CLAY THROUGHOUT.

SOME SMALL SUB-ANGULAR STONES NOTED, ALONG WITH
SOME MANGANESE SPOTTING.

FILL HAS LIKELY BEEN DISTURBED BY MODERN AGRICULTURAL
ACTIVITIES.

LIKELY THE RESULT OF A NATURAL INFILL.

Refer to context: (601526)

SKETCHES

(consider: location plan, detailed plan showing relationships, section showing fills/deposits as appropriate)

CUT FOR DITCH RUNNING APPROX. NE/SW. THOUGHT
TO BE THE TERMINUS FOR DITCH SO EXCAVATED.

DITCH DOES APPEAR TO END HERE AS DITCH CEASES TO CONTINUE
TO THE N.E. VERY IRREGULAR SLOPED SIDES WITH UNEVEN BASE.

INTERESTING TO NOTE THAT DITCH SEEMS TO ARC SHARPLY
EAST NEAR THE TERMINUS. IN PLAN, DITCH SEEMS TO RUN PRIMARILY
N/S IN SOUTHERN PORTION OF 108/NORTH.

LIKELY THE BEGINNING/END OF A DRAINAGE SLOT.

Refer to context '[601527]

ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked * overleaf)

Shallow ditch [6015SS] running NE-SW

The edges of the ditch are a bit disturbed (by natural elements and concentration of manganese and chalk especially in the north-east part of the ditch edge) on the North side and a bit more clean on the south-west part of the ditch.

The bottom is concave and clean linear shape.

Possible movement of water in the ditch as the sandy clean bottom and mixed with gravel seems to indicate.

#6000983

CUT OF PIT [601558] WERE PROBABLY MADE TO REACH SOURCES OF SAND. PIT IS RATHER CIRCULAR IN ITS SHAPE AND WERE YOUNGEST FROM PITS IN SECTION FACING N (AS IT CUTS ONE OF PIT [601584] FILLS. SHAPE OF CUT WAS INTERRUPTED BY TREE ROOTS, WHAT IS INTERESTING TREE ROOT (OR ANIMAL LIVING UNDER THOSE) DRAGGED FEW ANIMAL BONES AWAY FROM ORIGINAL CONTEXT. I FOUND THOSE BONES FOLLOWING PRISM OF CLAY, 1.5 FROM PIT.*

DUE EXCAVATING HERE VISIBLE THAT PITS [601558] AND [601547] CUTTING EACH OTHER (SEE PLAN) BUT IT IS NOT VISIBLE ON SECTION WHICH ONE IS OLDER, SO SPECULATIONS ARE UNSURE.

* SOUTHERN PART OF PIT HEAVILY AFFECTED BY BIOZOOBATION, WHICH CAUSED A COMINGLING OF FINDS AND SCATTERING OF THE SAME IN CLAY VEINS INSIDE THE NATURAL SAND SURROUNDING THE PIT

Refer to context [601547]

(any further details that may be important for understanding the context, including items marked * overleaf)

THIS FILL OF [601558] WAS THE LAST ONE AND COULD BE DELIBERATELY THROWN IN TO NOT COMPLETELY INFILLED BEFORE (BY NATURAL PROCESSES UNTIL THIS POINT) PIT. THE PIECES OF CBH/ UNFIRED CLAY WAS TOO SMALL TO COLLECT (HARDLY VISIBLE). THERE WAS MANY CRUSHED FIRED STONES BIGGER (~8CM) AND SMALLER (~2-3CM) PIECES, BUT MATERIAL WAS NOT SORTED. FEW PIECES OF BLACK POT^{MOORE} IN POOR CONDITION (HARD TO SAY^{FIRED OR} DUE TO POOR FIRED OR WATER RESISTANCE IN PIT) ANYWAY THIS LAYER WAS INTERRUPTED BY TREE ROOTS THAT DRAGGED PIECE OF IT IN TO THE TREEBOLE ^{THAT} IS VISIBLE AT NE FAC SECTION.

ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked "overleaf")

THE ~~THE~~ CONTEXT IS THE FILL OF PIT [601569].
 THE FILL IS AFFECTED BY THE AQUIFER AND THIS IS ALSO THE
 REASON WHY IT IS ONLY PARTIALLY EXCAVATED. THE CONTEXT IS
 MIXED IN COMPOSITION BUT QUITE CLEAR.
 IT IS ~~MADE~~ ^{STILL} MADE BY ALTERNATE LAYERS OF GREY BLUEISH
 CLAY ~~AND~~ ~~AND~~ BROWN REDDISH ~~AND~~ SANDY SILT.
 IT IS POSSIBLE TO SUPPOSE, BECAUSE THE LAYER IS PARTIALLY COVERED
 BY THE AQUIFER, THAT THE ~~WATER~~ WATER WAS ~~RISE~~ ~~AND~~ ~~DROPPING~~
~~RISE~~ RISING AND DROPPING QUICKLY IN A SHORT PERIOD.

THE CONTEXT IS THE FILL OF THE PIT [601590].
IT LOOKS LIKE THE NATURAL ~~AND~~ ~~OR~~ ~~AND~~ BUT LESS GRAVELLY.
IT IS SUPPOSED TO BE A NATURAL INFILLING, THE FILL WAS
PARTIALLY EXCAVATED BECAUSE OF THE AQUIFER.

Refer to context

ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked * overleaf)

THIS IS THE TOP FILL OF THE PIT. IN THIS FILL APPEAR SOME SILEX
STONE AND BONES OF ANIMALS.

SKETCHES

Refer to context [601575] (601576)

(consider: location plan, detailed plan showing relationships, section showing fills/deposits as appropriate)

A large rectangular area filled with a grid of small dots, intended for drawing sketches. The grid is approximately 20 units wide by 30 units high.

THE CONTEXT IS THE FILL OF THE CUT [601590].
 THE FILL IS PARTIALLY EXCAVATED BECAUSE OF WATER.
 THE CONTEXT IS MIXED IN COMPOSITION BUT QUITE CLEAR.
 IT IS MADE BY ALTERNATE SMALL LAYERS OF GREY BLUEISH
 CLAY AND BROWN REDDISH SANDY SILT.
 IT IS POSSIBLE TO SUPPOSE, BECAUSE THE LAYER IS PARTIALLY
 COVERED BY THE AQUIFER, THAT THE WATER WAS RISING AND
 DROPPING QUICKLY IN A SHORT PERIOD.
 THIS FILL IS SIMILAR TO (601568) AND IT HAS SMALL LAYERS
 OF SLUMPED NATURAL INSIDE.

THIS CONTEXT IS THE CUT FOR A P.T. IT IS POSSIBLE TO SUPPOSE THAT IT WAS MADE TO TAKE OUT THE NATURAL PURE SAND OF THE BOTTOM. ~~IT~~ IT WAS IMPOSSIBLE TO REACH THE BOTTOM BECAUSE OF AQUIFER BUT ACCORDING TO THE SITUATION OF THE OPPOSITE SLOT IT IS REASONABLE TO ~~THINK~~ THINK ABOUT THIS KIND OF EXPLANATION. THE FILLS OF THE PIT WERE CUT BY OTHER TWO SMALL PITS. THE OLDEST IS THE ~~PIT~~ [601569] AND THE MOST RECENT IS THE ~~PIT~~ [601565].

SOMEONE DUG A CIRCULAR PIT PROBABLY TO GET SOME SAND.
THIS PIT [601517] WAS HALF FILLED (601548), (601523) WHEN GOT DEEPEMED
(TO REACH SAND AGAIN?) [601550] AND THAN ABBANDONED AND INFILLED COMPLETELY
(601551), (601552), (601553). WHEN THIS PIT WAS COMPLETELY INFILLED BECAUSE
IT WAS DUG OUT ANOTHER PIT [601547] INTERRELATED WHEN INFILLED BY FREE
OTHER REMAINS (FREE BOLE) CAN BE OBSERVED ON AN FAC. SECTION OF PIT [601547] PROBABLY
PIT [601547] IS CUTTING INELL OF [601548] BUT SEQUENCE BETWEEN
[601547] AND [601548] IS UNKNOWN, THEY ARE ONLY KNOWN TO BE
BOTH OLDER THAN PIT [601548] AND FREE BOLE [601523].
THE SHAPE OF CUT IS RESULT OF ITS DESIGN AND NATURAL PROCESS OR
EROSION (ON THE [601547] SIDE OF PIT).
SHAPE OF CUT IS RESULT OF DESIGN AND NATURAL PROCESS
(EROSION CAVE ON E SIDE OF PIT SECTION)

ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked * overleaf)

Half slot & ditch [601443] to establish relationship of ~~circular~~ a semi-circular add-on seen in plan to the ditch. Upon excavation it seems likely that this add-on is due to natural processes having truncated this part of the edge (plant growth / large stone removal / etc) as there are no other cuts present to suggest the presence of other features. Due to this change in the side, the point where the semicircular shape is seen is much more moderate in slope than the undisturbed portion.

ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked *overleaf)

Single fill of ditch, ~~containing~~ present due to natural accumulation of sediment after the ditch was no longer in use. A small pottery fragment was found, and occasional ~~for~~ rocks were present in the fill, likely due to being washed in during periods of heavy wet weather. Slight lightening of soil by the bedrock, likely due to bioturbation processes mixing the soil.

ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked * overleaf)

Shallow ditch (or gully) running NE-SW [601625]

Bottom and edges of the ditch are very clean and sandy.

The ditch is disturbed by a big tree hole at the SW part of this slot

Possible drain ditch: sandy bottom and ~~big~~ stores sloping NE to SW might indicate a movement of water on it.

ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked * overleaf)

Fill of big treebole [601627] cutting [601625]
and disturbing deposits (601628) (601629).

The fill is ~~dark~~ mid-dark grey, pretty
similar to deposits (601628) and easy to
confound with it.

A little amount of animal bones was in it,
not really good preserved.

Continuation of ditch [601142] at a point where it intersects with the later furrow [601634]. These features do not meet on the perpendicular, but are instead at an angle to each other. The depth of the slot here was reduced compared to the original ditch slot and now silt/gravel layers from when the ditch was in use were present. Slot did not include entire cut of ditch due to nature of placement

Refer to context (601643) section

Single fill of ditch ~~is~~ with a darker colour to it than the fill of the furrow to top. This is ~~likely~~^{possibly} due to there being increased organic content within the fill of the ditch, in comparison to the fill of the furrow.

Refer to context ~~[601642]~~

THIS PIT [601646] IS OLDER THAN [601643] THAT CUTS FILL (601648)
 SHAPE OF CUT IS THAN HARD TO DESCRIBE, BECAUSE IT HAVE BEEN INTER-
 RUPTED. ON E FACING SECTION IS VISIBLE THAT SIDE WAS ORIGINALLY STEPPED
 AND RATHER GENTLE. BOTTOM IS UNDER WATER BUT AS FAR AS I CAN OBSERVE
~~IT IS NOT DESCRIBED AS RATHER CONCAVEISH.~~

BASE OF CUT NOT EXCAVATED BECAUSE REACHED WATER TABLE

Refer to context [601648]

ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked * overleaf)

Cut of small pit used for cremation. It is suggested that the pit itself was used for some if not all of the burning as the calcined bone that was present was within the upper portion of fill (601682) rather than mixed throughout. ~~This lower portion was therefore comprise~~ Also the soil of the pit edge was slightly discoloured to with a greyish hue suggesting burning in situ.

Refer to context (601672)(section)

ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked * overleaf)

Fill of a cremation including quite a few small fragments of calcined bone. However, not much bone was present, relative to the amount in a body, suggesting a degree of truncation which has removed the rest of the fill. This could have been from historic ploughing or simply stripping the top & subsoil prior to excavation.

14/06/17

ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked * overleaf)

Shallow cut of ditch, with some ~~probable~~^{possible} degree of truncation because this depth seen in the slot dug is reduced compared to [601345] by 10 cm. Though this does not discount the possibility for ~~lower~~ variation occurring in the shape of the ditch during construction.

Additional comments 14/06/17: Ditch originally undercut. Now excavated to the actual base. Considerably deeper and slightly wider than originally thought. The ditch cuts into an unidentified fm in the northeastern end of the slot (601871).

D. G.

Lower fill of [601679], likely an area of disturbed soil from the period in which the ditch was in active use. This is because no finds were present in the material, whilst stones & spots of manganese were found in the layer above (601680) which did not feature these characteristics. Also may be down to some degree of slumping during the use of the ditch

EDIT 14/06/17: Ditch re-excavated. This fill was considerably thicker than originally thought. A few pieces of pottery were found during the re-ex.

D. 6.

PIT CUT DIRECTLY IN THE NATURAL SOIL WITH AN IRREGULAR PROFILE. THE USE OF THE PIT IS NOT CLEAR: THE FIRSTS FILLS OF THE PIT WERE AN ALMOST PURE CLAY AND A SANDY SILT (MORE SANDY ON TOP) CONTAINING ANIMAL BONES AND POTTERY. (601684)-(601683) THE WESTERN SIDE OF THE PIT, MUCH IRREGULAR IN SHAPE, IS STEPPED AND THE LAST STEP IS ALMOST VERTICAL. IT WAS NOT POSSIBLE TO HAVE A LOOK AT THE BASE OF THE PIT CAUSE OF THE WATER TABLE.

DARK GREY CLAY AT THE BOTTOM OF THE PIT [601682], IT'S A NATURAL INFILLING BUT HAS 1 ANIMAL BONE. THE FILL IS ALMOST FLAT BUT IT WAS NOT POSSIBLE TO DIG IT ENTIRELY 'CAUSE OF THE WATER TABLE.

THE PIT HAS BEEN LEFT OPEN AND HAS BEEN FILLED BY WATER WHICH DEPOSITED THE CLAY; DUE TO THE NATURE OF THE FILL, IT'S POSSIBLE TO GUESS A LONG TIME OF "OPEN LIFE". THE "PASSAGE" TO THE OVERLAYING FILL HAS TO BE SLOW AS WELL (601683), CREATING A THICK INTERFACE MORE GRAY AND SILTY.

THIS IS THE CUT OF A DITCH. IT IS POSSIBLE THAT THIS CUT IS DIVIDED IN TWO DITCHES IN THE SOUTHEAST CORNER OF THE SLOT. IN THIS CASE, THE DITCH NORTH CUTS THE GULLY [601700]. THIS CUT IS IN ~~CLAY~~ NATURAL CLAY AND GRAVEL, AT THE TOP, AND SAND AT THE BOTTOM. THIS DITCH APPEARS IN THE WESTERN SECTION OR SOUTHWEST CORNER OF THE SLOT. IT IS POSSIBLE THAT THE DITCH WILL TURN EAST OUTSIDE THE SLOT TWO METERS SOUTHWEST OF IT. IN THIS CUT WE DIFFERENTIATE TWO FILLS, THE NUMBERS (601698), VERY CLEAN LEVEL ALMOST WITHOUT INCLUSIONS AND SOME ISOLATED STAIN OF MANGANESE, AND (601698), WITH USUAL SMALL STONES OF SILIX AND SOME STAIN OF CHALK. IN THE LOWER PART OF THE DITCH AND CUT IN THE SOUTH SECTION THERE ARE TWO SMALL HOLES OR DEPRESSIONS, WITH NO DEFINITE FUNCTION THAT CAN BE DUE TO EROSION BECAUSE THE NATURAL SAND IS VERY SOFT.

Refer to context (601698)(601699)

(consider: location plan, detailed plan showing relationships, section showing fills/deposits as appropriate)

TERMINUS OF A DITCH THAT RUNS E-W.
IT IS NOT DIRECTLY CONNECTED TO THE NEARBY [61295]
BUT ARE EXTREMELY SIMILAR IN GENERAL THEY ARE
BOTH SHORT AND SHALLOW DITCHES WITH NO FINDS. I DO
NOT ~~KNOW~~ KNOW HOW TO ~~INTERPRET~~ INTERPRET
THEM.

THIS DITCH IN PARTICULAR HAS SIGNS
OF DISTURBANCE, LIKELY DUE TO THE ROOTS OF
A NEARBY TREE.

Refer to context

ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked "overleaf")

The ditch runs along very close to the terminus of ditch [601713].

Ditch [601711] runs E-W but ~~the shallow~~ it is so shallow due to truncation ~~pass~~ that it is hard to establish if the shape is the one described as this is only the bottom of the ditch.

Further excavation allowed to find the terminus of the ditch based on the depth of the slot in regards with [601725].

Refer to context

ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked * overleaf)

Only fill of ditch [601713].

the fill shows very little intrusion although some large stones were present. and a very occasional presence of charcoal.

the fill becomes thinner as it gets closer to the terminus due to the shape of the cut.

Refer to context

Cut of ditch running N-S.

The slot was done to find the terminus of the ditch which shows sloping base producing a very gentle sloping also in the south end of the ditch.
~~therefore~~

No dating evidences found.

ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked * overleaf)

It is the only fill of a linear ditch very shallow. It is
probably the reverse of a old ditch [601156]
The ~~the~~ brown colour of the fill suggests that it could
be an infilling quite recent.
Not finds or inclusions.

Refer to context [601156]

ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked * overleaf)

FILL OF DITCH RUNNING NW-SE. THIS IS THE FIRST NATURAL FILLING OF THE DITCH [601736].

THIS CONTEXT IS CUT BY AN YOUNGER CUT OF DITCH [601718].

OCCASIONAL FREQUENCY OF BONE OF MIDDLE AND SMALL SIZE.

OCCASIONAL WOOD AS WELL.

Refer to context

[601718]

ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked * overleaf)

CUT OF N-S RUNNING DITCH [601720] WHICH HAS BEEN RE-CUT BY [601722] AND IS THEN IN-TURN CUT BY A F-W FURROW [601292]. THE

THE W SIDE OF THE DITCH HAS AN ALMOST VERTICAL EDGE TO IT AND A FLAT BASE.

THE DITCH IS LIKELY TO CONTINUE INTO THE MIDDLE OF THE E FACING SECTION OF THE SLOT D 60188.

POSSIBLY SOME KIND OF DRAINAGE SYSTEM, BUT NO DATING OR FINDS WERE PRODUCED.

Refer to context (601721)

It is the

The only fill of a linear ditch [601731]. The colour brown and loose texture suggests that it could be a recent fill. There is one fragment of pottery in the fill; it looks like medieval ware but it is ascribed. The fill is a result of a natural process of infilling.

Refer to context [601731]

ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked * overleaf)

cut of a linear ditch who runs S-N; there is only one fill (601730).

The process of infilling is natural and it looks like it is quite recent. There is one fragment of pottery in the fill that it could be medieval age but it is ascribed. It could be a drainage ditch.

It is the "terminus" of the ditch

Refer to context [601731]

Last fill of a linear ditch [601751] The brown colour and loose texture suggests it could be a recent fill.
There is one fragment of pottery, probably post-medieval. Also there is a fragment of animal bone.
The fill is a result of a natural process of infilling.

Refer to context [601751]

ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked * overleaf)

~~It is~~ It is the first fill of a linear ditch (there is another at the top (601750)). It is very uniform and the texture is very sandy. It is a result as a natural process of infilling and that fill looks like very mineral (grey colour). Not finds or inclusions.

Refer to context [601751]

ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked * overleaf)

Cut of a linear ditch. it has two fills; the last one (601749) looks like it is quite recent and the first one that is at the bottom looks like it is very mineral. Both are as a result of a natural process of infilling.
There is a fragment of pottery on the last fill (601749) it is probably post-medieval.
~~The~~ The evidence suggests that probably is a drainage ditch related ~~with~~ to agriculture.

CUT OF DITCH RUNNING NW-SE WITH ONE FILL
(601760). DISTURBED BY A LATER AND THEREFORE
MORE MODERN "DITCH-ISH" LINEAR FEATURE. IT IS
ONE OF MANY DARKER FEATURES HERE THAT RUNS
MAINLY SW-NE. THEY SEEM MODERN AND ONE OF
THEM CUTS IN TO THE SIDE OF THIS DITCH.

~~THE~~ THE BOTTOM OF THE DITCH CONSISTS
OF A VERY COMPACT CLAY LAYER, MAYBE CAUSED
BY WATER. MAYBE THIS DITCH IS SOMEHOW
RELATED TO AN OLD POND THAT SUPPOSEDLY
WERE LOCATED SE OF THIS FEATURE.

Refer to context [601759]

8/6/17

It is a very dark fill; the fill is clay mixed with wood; a lot of pieces of wood, some of them are burned.
 It is the fill of a tree hole
 Not pieces of inclusions.
 Natural infilling.

Refer to context [601764]

J. 16.17

CUT OF DITCH OR MAYBE A FURROW
DUE TO ITS SHALLOW NATURE, IT CLEARLY
CONTINUES IN THE NE BUT NOT AS CLEARLY IN
THE SW. THE SURROUNDINGS ARE FILLED WITH
PATCHES OF DARKER DIRT AND THE GROUND IS
VERY UNEVEN WHICH MAKES THIS AREA SLIGHTLY
HARD TO READ. IT ALSO LIKELY DISTURBS THE
MORE SHALLOW FEATURES SUCH AS THIS ONE.

ONE FILL (601771)

Refer to context [601770]

ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked * overleaf)

THE CUT OF WHAT SEEMS TO BE A TREE BOLE. IT'S ROUND AND DEEP ENOUGH, IT'S FILL (601793) DIDNT SEEM TO HAVE ANY ORGANIC DISTURBANCES AND THERE WERE NO FINDS INSIDE. AS SOON AS THE BOTTOM WAS REACHED WATER STARTED COMING OUT ^{RELATIVELY} FAST. IT IS CONNECTED TO DITCH [601790] POSSIBLY FOR IRRIGATION AND JUDGING BY THE LOCATION OF THE OTHE TWO TREE BOLES [] AND [] SOUTH AND NORTH, RESPECTIVELY, IT COULD HAVE BEEN A TREELINE ALIGNED WITH THE DITCHES, MAKING IT EASY FOR THE IRRIGATION.

FILL OF THE CUT [601815] OF A DITCH. AT THE BEGINNING IT LOOKS LIKE THERE WERE TWO FILLS, BUT FURTHER EXCAVATION HAS CLEARIFIED THAT IS ONLY ONE WITH VERY GRAVELLOUS NOTES BUT STILL MASS OF DARK BLUE CLAY. TWO NATURAL SLOPES LOOK TO BE UNDER: ONE SANDY ON THE WEST SIDE, MAYBE BECAUSE OF DRAINING, AND THE REST IS GRAVELLOUS SANDS. LOT OF MOSS STONES HAD BEEN FOUND ON THE NORTH PART OF THE SECTION, SOME OF THEM WITH TRACES OF MAYBE BURNING OR WORKING

Refer to context [601815]

12/6/17

It is the only fill in a pit [601818]. The fill is red clay mixed with the natural because it is the deepest part of the bottom.

The red colour of the fill indicates that it could be a feature related to fire.

Refer to context [601818]

72/6/17

It is the only fill of a linear ditch which runs SW-N. It is silty clay but it becomes a little bit ~~grain~~ sandy at the bottom and there is a number of stone inclusions on the base and sides. The limit between the fill and the cut [601825] is very ambiguous. The fill look like very mineral. Not birds. The fill is a result is as a result of a natural process once the ditch was abandoned.

Refer to context [601825]

ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked * overleaf)

It is the cut of a linear ditch - it has only one fill (601824). It is a narrow ditch ditch runs SW-N. The fill looks like very mineral and it is as a result of a natural process of infilling. Not finds.

It is probably a drainage ditch related to agriculture or related with another boundary ditches in the area related with a Saxo site or a Saxo boundary ditch.

At south this ditch is cut by a furrow and at 26m there is the terminus of the ditch (601838).

Refer to context: [601825]

7216/17

CUT OF AN E-W RUNNING DITCH WHICH EVENS AND CHANGES TO AN N-S DIRECTION. THIS ALSO COINCIDES WITH A SLIGHT CHANGE IN ITS WIDTH AS IT WIDENS IN THE E-W DIRECTION. ALTHOUGH THE DEPTH AND FILLS ARE THE SAME, THIS SUGGESTS THAT IT WAS MOST LIKELY DUG AT THE SAME TIME.

DATING SUGGESTS THAT IT IS MOST LIKELY PART OF A SAXON FIELD-SYSTEM.

THE S-W BANK SHOWS A DEGREE OF EROSION.

Refer to context (60182F)

It is the only fill of a linear ditch which runs SW-N.
 Not including on fields
 The fill is a result of a natural process.
~~It~~ It is probably the fill of a drainage ditch which is very narrow.

Refer to context [601838]

ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked * overleaf)

cut of a ditch with only one fill inside (601837).
 It is the "terminus" of a very narrow ditch. At north (1.60m)
 the ditch is cut by a furrow which runs SW-NE.
 It is probably a drainage ditch related to agriculture or
 a boundary ditch related with a Saxo site.
 It is the bottom of the ditch.

Refer to context [601838]

76/6/17

Fill of ditch [601844]. This cut represents the poss. terminus of the ditch towards the N.

The terminus was identified by digging an area that suggested a turning towards the W that could relate [601844] with [601758]. However, while digging it was not possible to determine a relationship as the turning point looks more like a uneven natural than a proper cut. So no clear relationship could be established between [601844] and [601758].

16/6/77

Primary fill of ditch [601862]

The fill contain a great amount of charcoal. It was darker towards the centre/top, while the bottom and sides towards the natural showed a slight amount of mixture with natural. This resulted in small amount of manganese alongside with charcoal flecks and CBM flecks. The chalk is mostly located on the top & centre of the fill.

The pottery suggests roman pottery but really basic so further analysis recommended.

Refer to context

F/O DITCH. THE FILL LOOKS LIKE A NATURAL INFILLING WITH SOME MANGANESE, SOME FRAGMENTS OF BONES AND TEETH. IN THE FILL, ON THE TOP, THERE WAS A STONE BALL, MAYBE A ROMAN SLINGSHOT BULLET (0.05m diameter). ~~0.05m diameter~~

→ T60062

IN THE SAME SITE THERE WERE FOUND OTHER STONE BALLS, PROBABLY NATURAL, AND THERE IS NO CERTAIN EVIDENCE THAT THIS ONE IS A BULLET BUT IT LOOKS LIKE CARVED AND HAS A PECULIAR SHAPE.

ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked * overleaf)

This fill was encountered during the re-excavation of ditch [G01679].
No inclusions or apparent cut, it is possibly a natural depression that
was deliberately filled in.

Refer to context

SKETCHES

ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked * overleaf)

At the top it is a surface of red clay (CBM) at the bottom it is a very compact grey clay. It looks like the result of an interglacial backfill.

The evidences indicate that once the use of the ditch was abandoned (probably boundary ditch) the ditch may have been used as a dump. There are several fragments of pottery and also animal bones. The pottery looks like roman

ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked * overleaf)

NOT REALLY

Cut of a ditch; it looks like that it is the "terminus" of the ditch (0.30 m at NW). There are four fills inside into the ditch; (601872), (601873), (601874) and (601875). The two last (601872) & (601873) and the first one (601875) are as a result of a natural process of infilling; however the other fill (601874) look like that is a deliberate sack fill; it is a red clay (EBM) and gray clay at the bottom.

There are several fragments of pottery, probably roman.

The ditch

The evidences indicate that it could be a boundary ditch. Once abandoned the function of the ditch may have been that of a dump.

It could be also a ditch of a peripheral are of a roman settlement that is at the W.

16/6/17

Upper fill of ditch [601881]

this fill contains large amount of mangrove and its colour suggests some mixture with natural giving it also a slight orange tone, specially when dry.

Occasional flecks of red clay were found on this fill, but not possible to date them as too friable.

SEE 602068/602069/602072

RA 23/6/17

Refer to context: 601881

161617

lower fill of ditch [601881]

this fill is extremely gravelly, similar to the orangish brown gravel natural underneath.

however, the presence of charcoal and pottery flecks discarded the poss. of it being completely natural. But could be some redeposited natural if dark gray natural has been present in the area. the lower it goes the fill becomes more clay as towards the top, closer to fill (601879) is more silty with slight presence of manganese - suggesting interface between both fills.

16/6/17

Cut of ditch [601881].

the cut is slightly deeper on the SE side
 poss. due to the sloping of natural on the
 NW side (clay rather than sandy gravel),
 which makes it hard to dig.

Refer to context 601881

ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked * overleaf)

CUT OF PIT. IT HAS A MODERATE SLOPING SIDES IN THE ~~WEST~~ EAST EDGE AND GENTLE SIDE IN THE WEST EDGE. THE BOTTOM HAS NOT BEEN COMPLETELY ~~REACHED~~ REACHED BECAUSE THE SLOT IS TOO BIG AND WATER WOULD ~~HAVE~~ COME FROM THE BOTTOM FILLING THE ENTIRE SLOT CAUSING TOO MUCH WORK AND TIME TO TAKE OUT THE WATER. SO WE STOPPED DIGGING WHEN WE REACHED APPROXIMATELY 0.10 m FROM THE BOTTOM, WHICH WAS FOUND IN NORTH EAST CORNER OF THE SLOT.

THIS CUT HAS 4 FILLS → (601882), (602077), (602078) AND (602079)

MACHINE EXCAVATED 29.06.17, 5.2 m LONG - 1.1 m DEEP.

-----------------	----------------	---

Upper fill of ditch [601892]

The fill is mottled due to the high amount of manganese and ~~charcoal~~ chalk, creating a more orangish greyish brown.

ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked * overleaf)

Lower fill of ditch [601892]

the fill is more clay than upper fill (601890)
It is characterise by large quantity
of gravel while the silt present ~~could~~ is similar
~~also be part of the~~ to the natural on
the area.

Refer to context

Cut of ditch

this ditch was cutting poss. pit [601894] and [602015]. ~~However the base of the ditch was not clear in the sections to~~

It has not been established if this cut relates to the ditch running towards the NE or the SE. Further digging would clarify this.

Refer to context

ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked * overleaf)

Cut of posthole. Part of a series of postholes set in a circular pattern - i.e. a structure. This posthole is considerably deeper than any of the other ones that have so far been excavated, so it was likely load-bearing.

* Refer to context [601896]

SKETCHES

(consider: location plan, detailed plan showing relationships, section showing fills/deposits as appropriate)

CUT OF LARGE PIT, THIS FEATURE IS
ROUGHLY A SIXTH OF IT. IT SEEMS TO BE
A SAXON DUMP PIT BASED ON THE FINDS IN
(601863). THIS FEATURE SHOWED THAT I WAS INCORRECT
IN ASSUMING THAT IT WAS ONLY ONE FILL IN (601863),
IN FACT IT SEEMS TO BE TWO. ONE (601898) HAS
A SLIGHTLY DIFFERENT TINT AND A LOT LESS GRAVEL
THAN (602045). THE BOTTOM FILL IS HOWEVER
^{THIS OTHER} ~~THE~~ ONE WITH ALMOST ALL THE FINDS AND
THE ONLY THAT IS SAMPLED.

UPDATE: WAS MACHINE EXCAVATED IN 29.06.17, ABOUT
A METER DEEP IN REALITY AND WITH FOUR MORE FILLS →
SEE: (602308)-(602311). / JN

Dark greyish deposit (601901) sloping down to the NW, possible alluvial deposit (same as (601628)).

The deposit is characterise by small-medium size stones, occasionally animal bones and pottery. ~~From~~ the pottery seems to be roman (?) but there are couple of fragment that might also be medieval (?)

FROM NEARBY SLOTS

~~THE~~ MOST IF NOT ALL POTTERY SEEMS TO BE EARLY ROMAN (2nd century AD) BY THE RECKONING OF POTTERY SPECIALIST; THIS COULD BE OF THE SAME AGE

Ditch [601904] running NE - SW same as [601631]
 The edges of the ditch are sloping down gently
 up to the middle where there ~~are~~ is a vertical
 slope. This shape might suggest an earlier presence
 of a gully that might be being extended later. (?)
 The very south of the ditch is more concave at
 the bottom and seems to be in line with
 [601697]

OR WATER DIGGING THROUGH THE SANDY
 BOTTOM OF THE DITCH CUT

- MP

Because fu (601910) was present just at the very bottom of the ditch and because of the shape of the ditch bottom might suggest that there was a little gully that it is being extended in a larger ditch. later. (?)

ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked * overleaf)

THIS FILL IS EXTREMELY INTERESTING AS IT HAS POTS (HOLE BLACK WITH I THINK ADDED GRAFITE → ROMAN?) MANY KINDS, LOTS OF ANIMAL BONES AND TEETH, 2 PIECES OF IRON (ONE OF THEM IS FIBULA!) AND GRIND STONE WITH NOT ONE BUT 2 WORKED SURFACES! FIRST 3 BUCKETS OF SAMPLE # 60066 WAS TOOK FROM IT. LAST ONE WAS TOOK FROM OTHER, NE CORNER. WHAT MAKE IT SAMPLE FROM (601952). DISTINGUISHION BETWEEN (601952) AND (601923) HAS NOT EASY AS THERE WERE LOTS OF WATER IN SLOT SOAKING IN BOTH, BUT AS EXCAVATION WAS OVER ~~THAT~~ ^{IT BECAME} MISIBLE ^{THAT} (601923) IS MORE SANDY (ORANGE SAND) AND BIT MORE GRAVELLY. POTTERY AND ANIMAL BONES WERE RATHER SAME/SIMILAR AND THEY ARE ALL IN (601923) FINDS BAG (SORRY) BUT IT IS WORTH MENTIONING ALL SPECIAL FINDS COME FROM SE CORNER OF SLOT (SO FILL 601923) ON THE WS CORNER OF PIT [601919] THIS FILL CONTAINS BEAUTIFUL PIECE OF UNFIRED OR POORLY FIRED POT (NOW DESTROYED) WITH COMB ORNAMENT.

ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked *overleaf)

Pit cutting through partially filled ringditch. Possibly Roman in date. As fill above contains Roman pottery. One piece of bone found at the base of the cut that could be a potential source of C¹⁴ data.

ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked * overleaf)

THIS IS THE FIRST FILL OF THE DITCH, I DIFFERENTIATE THIS FILL BECAUSE IT HAS NO INCLUSIONS, IT IS A FILL VERY CLEAN OF BROWN CLAY. THE FILL (601698) IS SIMILAR, BUT WITH INCLUSIONS OF SILEX STONES, ANIMALS BONES AND CHALK. THIS FILL IS DEPOSITED IN THE LOWER PART OF THIS DITCH, ON THE SAME NATURAL LEVEL, ADAPTING TO THE CONCAVE SHAPE OF THE CUT IN THE NATURAL. THE FILL ALSO HAS THAT CONCAVE SHAPE IN ITS UPPER PART. BUT THIS DESCRIPTION OF ITS SHAPE IS NOT CERTAIN. THIS FILL IS VERY CLEAN, WITH ONLY SOME STAIN OF MANGANESE

FILL OF A CHANNEL. IT IS VERY DUSTY, AND CLEAN,

Refer to context: 601411
601442

(consider: location plan, detailed plan showing relationships, section showing fills/deposits as appropriate)

This image shows a full page of blank graph paper. The grid consists of small squares formed by thin black lines. There are approximately 20 columns and 20 rows of squares. A thicker vertical line runs down the left side of the page, creating a margin. There are some minor dark spots or smudges scattered across the surface of the paper.

Cut of a PALEO CHANNEL. IT IS NOT CLEAR WHERE IT ENDS
BECAUSE AT ABOUT 2,50 m THERE IS A BIG PIT. MAYBE IT
REACHES A FURTHER W.

Refer to context : 601911
601942

DARK GREY WITH YELLOW SANDY SPOTS MIDDEN DEPOSIT SPARSE ON A QUITE BIG AREA WITH NOT DEFINED LIMITS. IT FILLS A CONCAVITY DUE TO THE ~~UNREGULAR~~ SHAPE OF THE UNDER-LAYING DEPOSIT (602000). THE PRESENCE OF ABUNDANT REMAINS LIKE POTTERY, BONES, FIRED CLAY, CHARCOAL AND PARTICULARLY ~~TO~~ THE POSITION (VERTICAL, NOT FLAT) OF THE POT SHERDS SUGGEST A NATURE OF DUMPEN DEPOSIT. THE DEPOSIT HAS BEEN SEEN IN 4 DIFFERENT SLOTS.

DARK GREY CLAY FILL OF POST HOLE (VERY STICKY) WITH ABUNDANT LARGE GRAVEL (FLINT STONES) AND 1 HILLSTONE (F60018) INTERPRETED AS PACKING STONES IN THE FILL HAS BEEN FOUND. AN IRON NAIL (F60019)

THE NATURE OF THE FILL AS WELL AS THE UNDERCUTTING ON THE NORTH EDGE SUGGEST THAT THE POST HAS BEEN POSSIBLY PULLED OUT

GIVEN THE ASPECT OF THE SURROUNDING ^{SIMILAR} FEATURES AND THE GROUND CONDITION AROUND IT (WET GROUND) IT WOULD APPEAR UNLIKELY FOR THIS TO BE AN ACTUAL POST-HOLE. HOWEVER NO BETTER EXPLANATION COULD BE DEDUCED FROM CONTEXT. SEE [601956]

(any further details that may be important for understanding the context, including items marked * overleaf)

CUT OF POSSIBLE POST-HOLE (IT COULD BE A TREE-BOLE AS WELL, DUE TO THE NATURE OF THE FILL WHICH IS SIMILAR TO THE TREE BOLE [601968] - (601969); THE PRESENCE IN THE FILL OF A MILLSTONE (F60018) AND OF ABUNDANT GRAVEL OF BIG SIZE (> 5 cm) SUGGEST THE INTERPRETATION AS POST-HOLE)

THE CUT IS UNDERCUTTING ON THE NORTH EDGE.
ON THE BOTTOM OF THE CUT, THERE IS SMALL HOLE (SAME CUT) REMINING A SORT OF PEAK OF THE POST.

Refer to context

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked "overleaf")

Excavation of the apparent investigation pits [601965] & pit [601967] revealed what is probably another pit [601962] in the south east corner shown by sections 060297 & 060298. This feature relates to both pits and is indicated by [601965]. No material culture was recovered from its fills (601960) & (601961). The shape & full extent at present is unknown.

ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked * overleaf)

Mid to dark gray deposit (601966) sloping down to the south west. The deposit was characterised by a large amount of small, medium and big size stones, occasionally shells, animal bones and a large amount of roman pottery related to the first fase of roman (?) 1st century AD. This deposit seems to be a midololen deposit probably related to a close settlement.

The deposit seems to be same as deposit (601628), (601801),

After 0.07m deeper on the ground level this deposit become more organic and more dark with an encrease of material (pot, bones ...) and charcoal. More deeper we go, ~~more~~ "bigger" is the concentration of organic material and finds.

Refer to context

ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked * overleaf)

Sloping down to the north west deposit (601974) similar to deposit above (601966) but much more clayish and organic.
The deposit is characterised by the presence of shells, small and medium size stones and frequent charcoal (maybe something related to fire?!)
Pottery seems to suggest Roman date.
There are also frequent animal bone and a big worked stone.

Refer to context

FILL OF DITCH. IT SEEMS DIFFERENT THAN THE FILL OF DITCH TO
AT NORTH. MAYBE IT'S A ~~DIFFERENT~~ ORIGINAL FILL OR THE LAST
FILL BEFORE THE "DESTRUCTION" OF THE DITCH SYSTEM.

MAYBE ~~OVER~~ HERE THERE IS ALSO THE TERMINUS IN FACT
THERE ISN'T ANY ~~TRAIL~~ OF THE DITCH IN THE SOUTH SECTION.
SIGN CONTINUING
