ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked \* overleaf)

Fill of clayey silt soil, of dark brownish grey colour and moderately compact. The maximum thickness is 0.28 m. It has occasional stones, usually 3-5 cm, but there is some one bigger, until 14 cm, and some sandstone. There are moderate inclusions of chalk and very frequent charcoal. It is one of the ~~deliberate~~ <sup>deliberate</sup> backfills of the ditch [603064] and it has a large amount of materials. There are very frequent animal bones, with some jaws of different animals. There are moderate Roman pottery and occasional CBM. One small human jaw found, and 5 fragments of possible human bones.
