(any further details that may be important for understanding the context, including items marked * overleaf)

Fill (604335) of pit [604336] in "Roman house area"

Fill consists in a moderately compact mid brownish orange gravelly silt with inclusions of occasional medium to big angular stones.

We didn't find any pottery or animal bone, but the color of the fill was darker than the natural (100003) so we are sure is not overcut.

This fill is most likely the result of ^{natural} infilling of the pit in its desuse.

Refer to context (604334) [604336]

SKETCHES

(consider: location plan, detailed plan showing relationships, section showing fills/deposits as appropriate)
