*This form is incomplete if fields marked with ◤ are empty. PTO for additional information (and describing all items marked with *) and sketches.*

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Probably a posthole, the cut is V-shaped. The fill is without finds but sampled because we had some big charcoal on the top.
Narrow bottom and steep sides.

Refer to context (260007)

SKETCHES

Upper fill in that small pit – possibly a plant hole because I had found remains of roots.
Deposited after (26047), it's located on the middle of the pit.
We had some medium charcoal inside but no finds.
Then, no direct clue about dating.

Refer to context [26048]

Upper fill in that gully without finds inside, located just on South in that section. ~~Not a recut I think~~.
It's a mix between the fill and the natural, not a recut but maybe a collapsing ~~of~~ something ~~else~~ else.

Refer to context [-260066]

*This form is incomplete if fields marked with ◤ are empty. PTO for additional information (and describing all items marked with *) and sketches.*

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Rare subangular stones (10%, poorly sorted) located on East side in that gully. No finds inside ~~to~~ so direct clue about dating.
Deposited after (260079) I guess.

Cuts (260079).

Refer to context [260080]

*This form is incomplete if fields marked with ◤ are empty. PTO for additional information (and describing all items marked with *) and sketches.*

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Cut of gully, axis North - South with 2 fills without finds. Seems to be used to drain the fields around → maybe medieval.
Working with other gullies axis North - South → same shape and profile, same system of drains.

Refer to context [260080]

ADDITIONAL INFORMATION

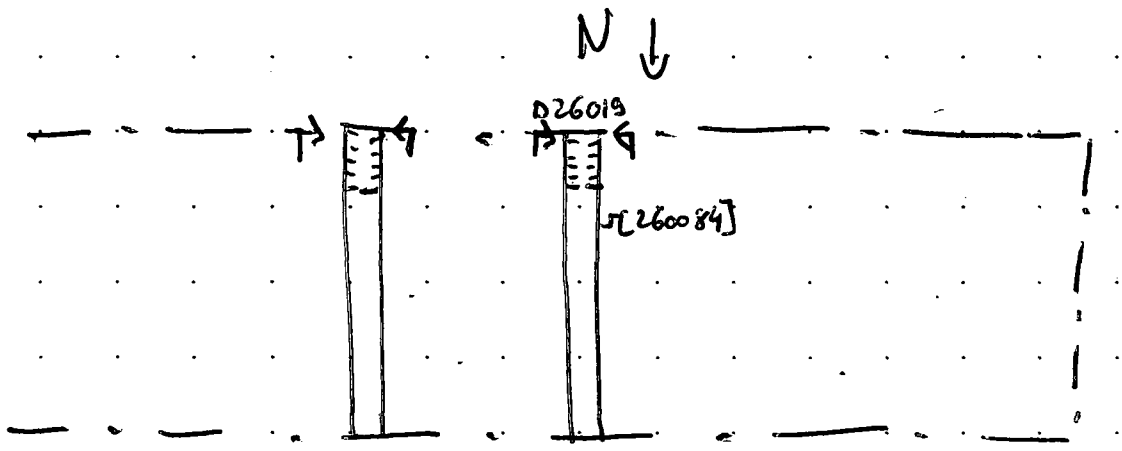

*(any further details that may be important for understanding the context, including items marked * overleaf)*

c/o ditch, running N-S but turning onto E-W alignment ~10m N of slot to form large rectangular enclosure (agricultural)

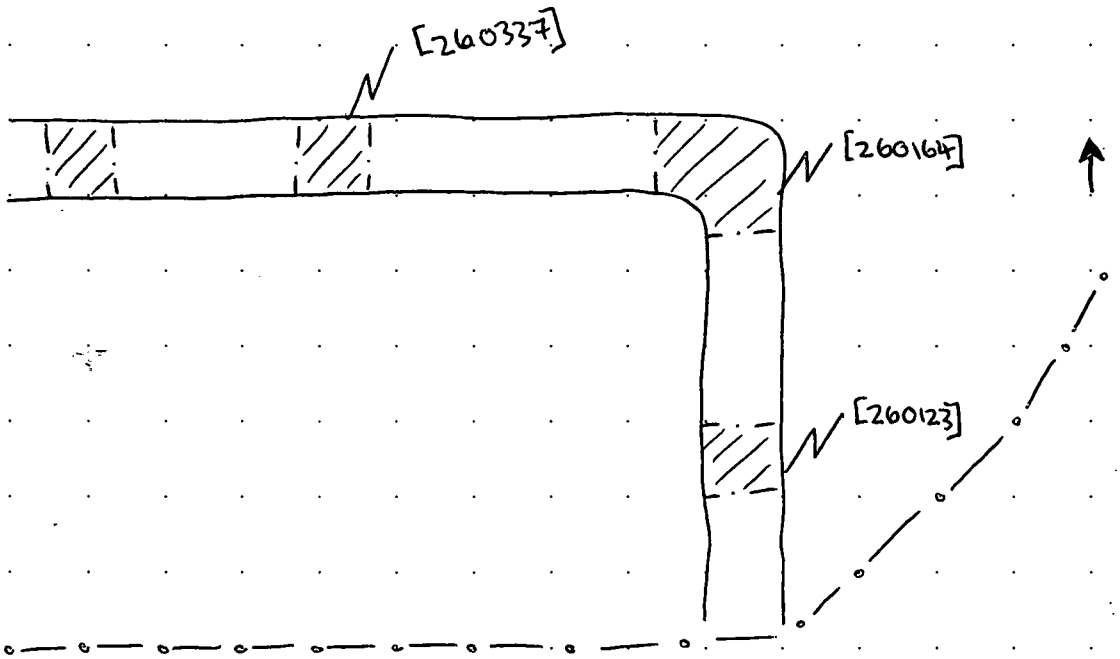

regular profile in plan, but N-S portion of enclosure considerably wider than E-W one - also change in section profile

regular cut with stepped sides - more moderate top slope onto steeper slope into almost vertical drop for water channel forming base

Refer to context

ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

c/o ditch, on N-S alignment, running across E end of excavation area
runs parallel to + roughly 3m E of similar sized ditch [260124] - possibly forming trackway or marking boundary line
no dating evidence or deposits suitable for environmental analysis - no date or proof for [260133] + [260124] being contemporary (though suspected due to similarities in appearance)

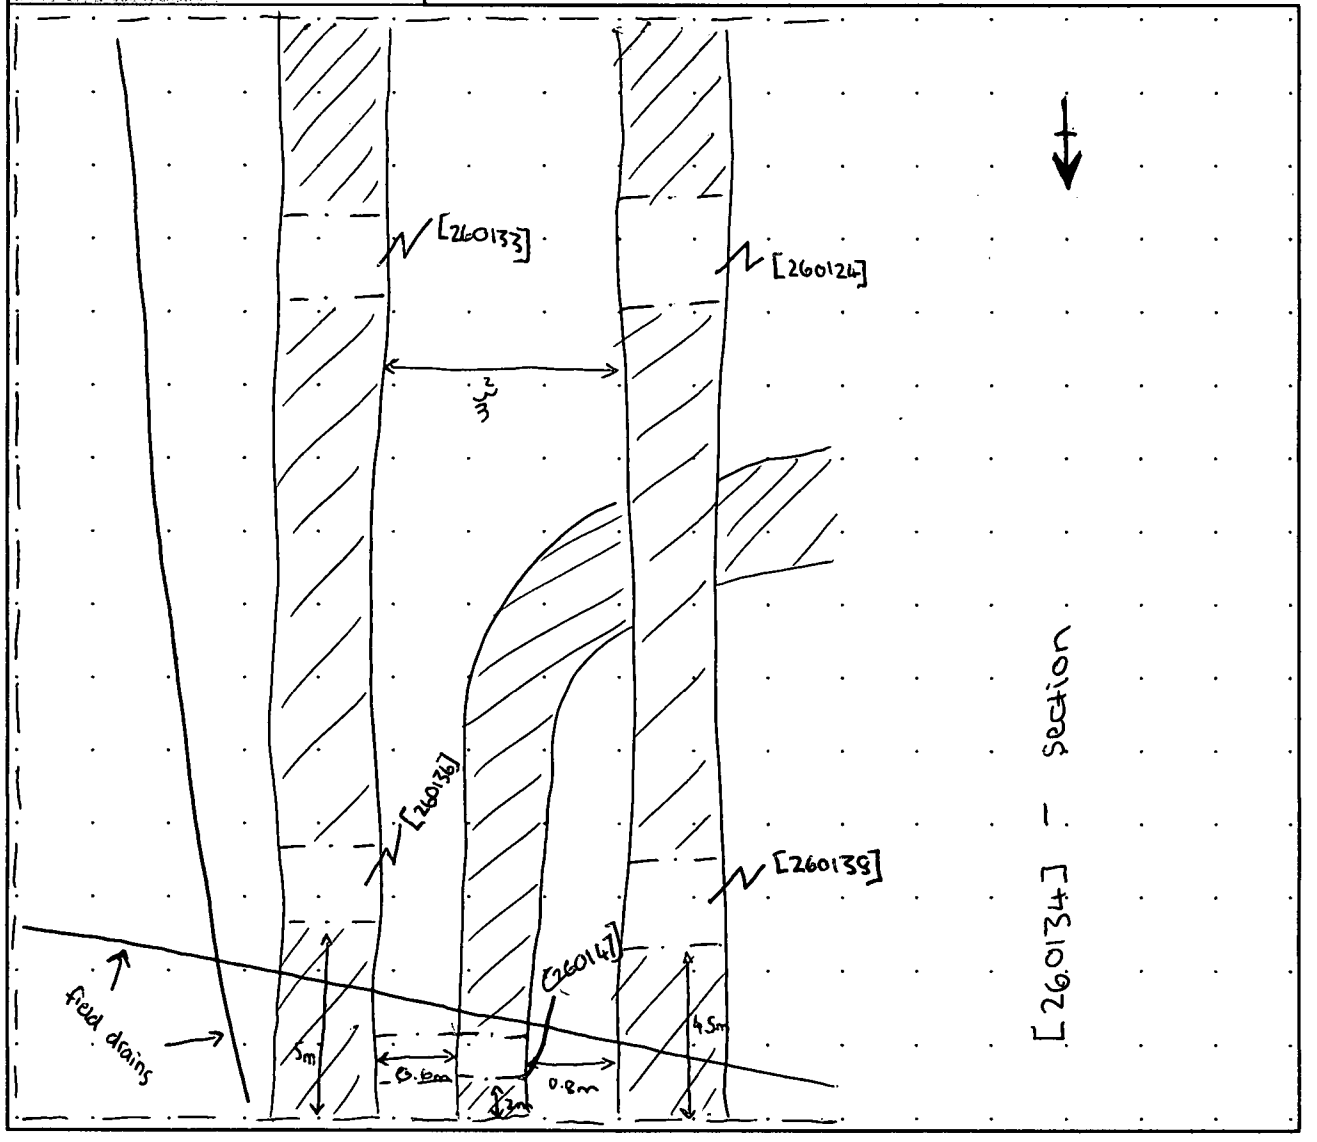

regular cut shape in plan + section, though marked difference in depth + profile between [260133] + [260136] - possibly dug in (subsequently joined up) segments?

[260133] - v-shaped, deep cut with steep sides
[260136] - more flattened u-shape, shallow with less steep sides

Refer to context

ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked * overleaf)

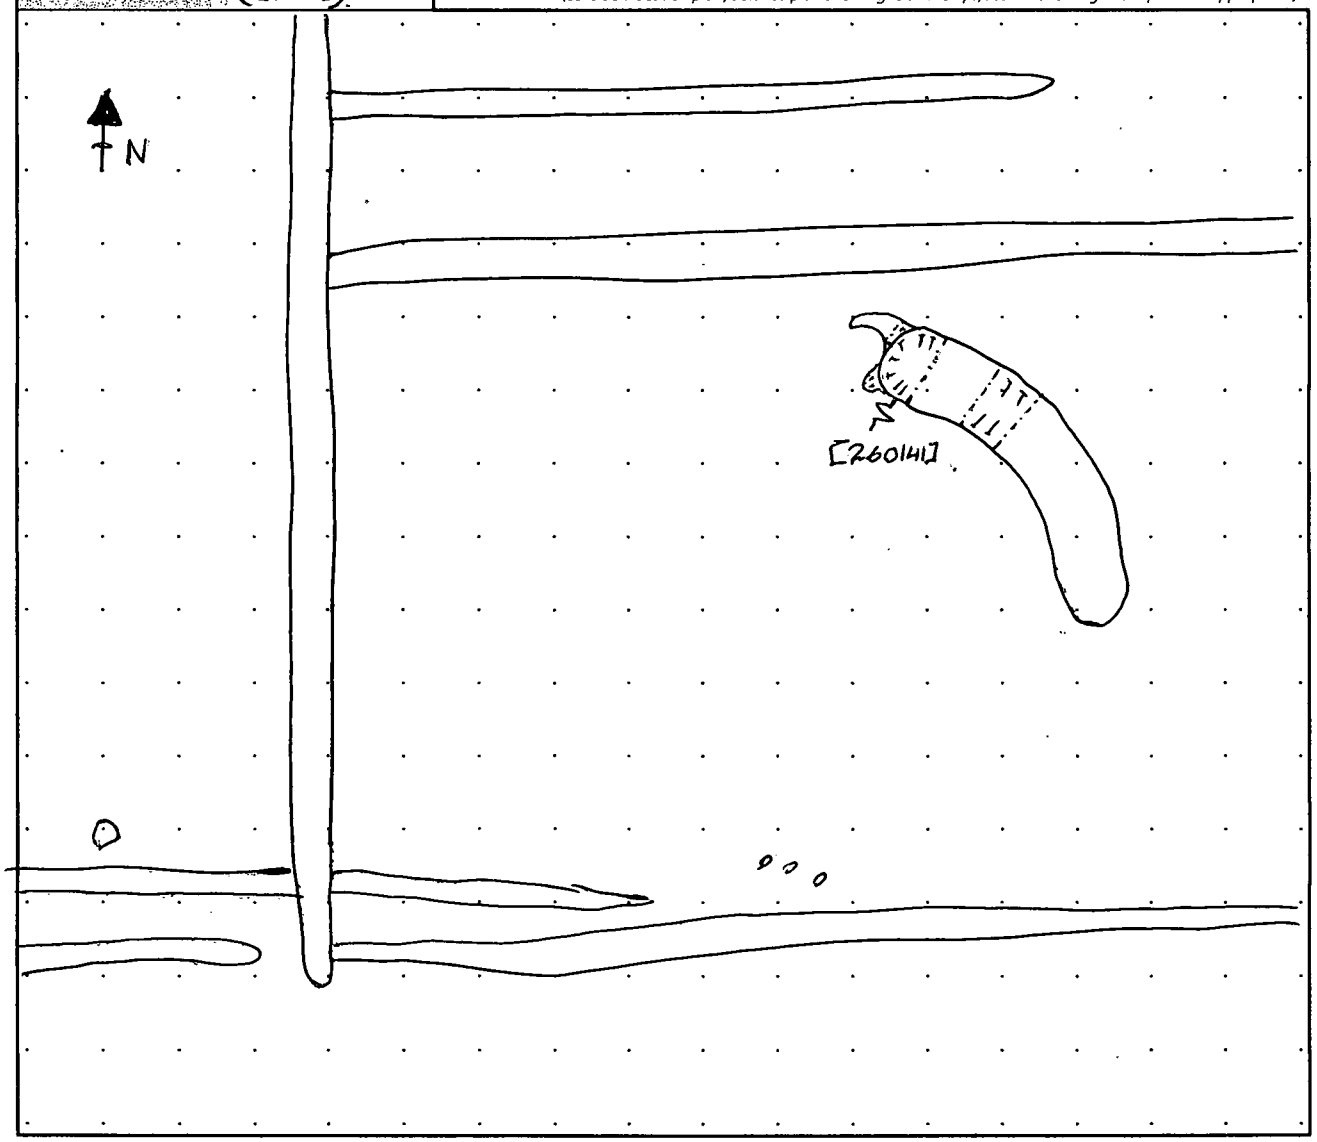

Irregular, Sub-linear, feature located in centre of Strip. Only fossilized bone recovered from fills. Originally thought to be possible water hole but irregular off-shoots suggest it's a natural feature. Possibly Scar of palaeochannel.

N.B. Animal burrow visible in section.

Refer to context (260142)

Cut of ditch.

Ditch extends in N/S direction N-under both.
Ditch has fairly steep sides & a concave base.

Ditch has another ditch running parallel to it

Ditch also appears to have large & possible tree bole truncating it.

Refer to context [260133]

SKETCHES
(consider: location plan, detailed plan showing relationships, section showing fills/deposits as appropriate)

please see context no. [260133] for plan.

f/o ditch cornr, fairly homogenous fill with some gravel inclusions near base of feature

likely formed as disuse fill through natural silting / flooding event

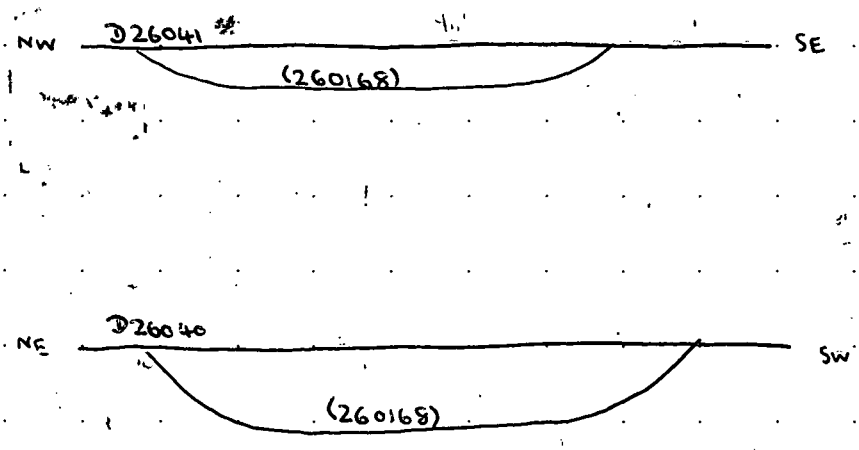

no finds or deposits suitable for sampling

Refer to context

ADDITIONAL INFORMATION
*(any further details that may be important for understanding the context, including items marked * overleaf)*

Cut of E → W aligned ditch. Various similar aligned ditches / gullies in area, though all overlapp at some point so not trackways. Possibly various phases of agricultural ~~&~~ divisions. or possibly used for irrigation. No dating from fills. 1pc residual Flint recovered.

N.B: Slot dug to establish relationship between [260169] + [260171] however ditches are bridged by ~10cm of natural. Possibly contemporary.

Refer to context

(any further details that may be important for understanding the context, including items marked * overleaf)

THIS FEATURE CORRESPONDS TO A DITCH. THIS RUNS FROM NORTH TO SOUTH, AND CUTS TREE THROW [260184]. THIS FEATURE APPEARS TO BE PART OF A FIELD BOUNDARY, GIVEN IT'S LENGTH AND ~~STRAIGHT~~ LINEAR SHAPE.

THERE WAS POSSIBLE TO RETRIEVE ARCHAEOLOGICAL FINDS FROM THIS DITCH: ~~IT~~ BOTH POTTERY AND A POSSIBLE FLINT SCRAPER.

THE POTTERY MAY BE ASSOCIATED TO ROMANO BRITISH OR EARLY MEDIEVAL- HOWEVER THEY LOOK LIKE THEY HAVE BEEN WASHED DOWN. ~~THERE~~ ~~FOR~~ THUS, IT IS NOT POSSIBLE TO SAY THAT THESE HAVE BEEN DEPOSITED WHERE IT WAS FOUND.

Refer to context

THIS CORRESPONDS TO THE FILL OF DITCH [260182]
THIS WAS THE RESULT OF NATURAL SILTING PROCESSES.

IT WAS POSSIBLE TO RETRIEVE ARCHAEOLOGICAL FINDS FROM THIS CONTEXT. THE POTTERY SEEMS TO HAVE BEEN WASHED DOWN (THE EDGES ARE QUITE ROUNDED AND THE SHAPE OF POTTERY VERY ERODED) - IN TERMS OF THE DATING OF THE POTTERY MIGHT BE ROMANO BRITISH OR EARLY MEDIEVAL.
IT WAS ALSO RETRIEVED A POSSIBLE FLINT SCRAPER.

c/o ditch, on' ~ NE-SW alignment, running across entire excavation area

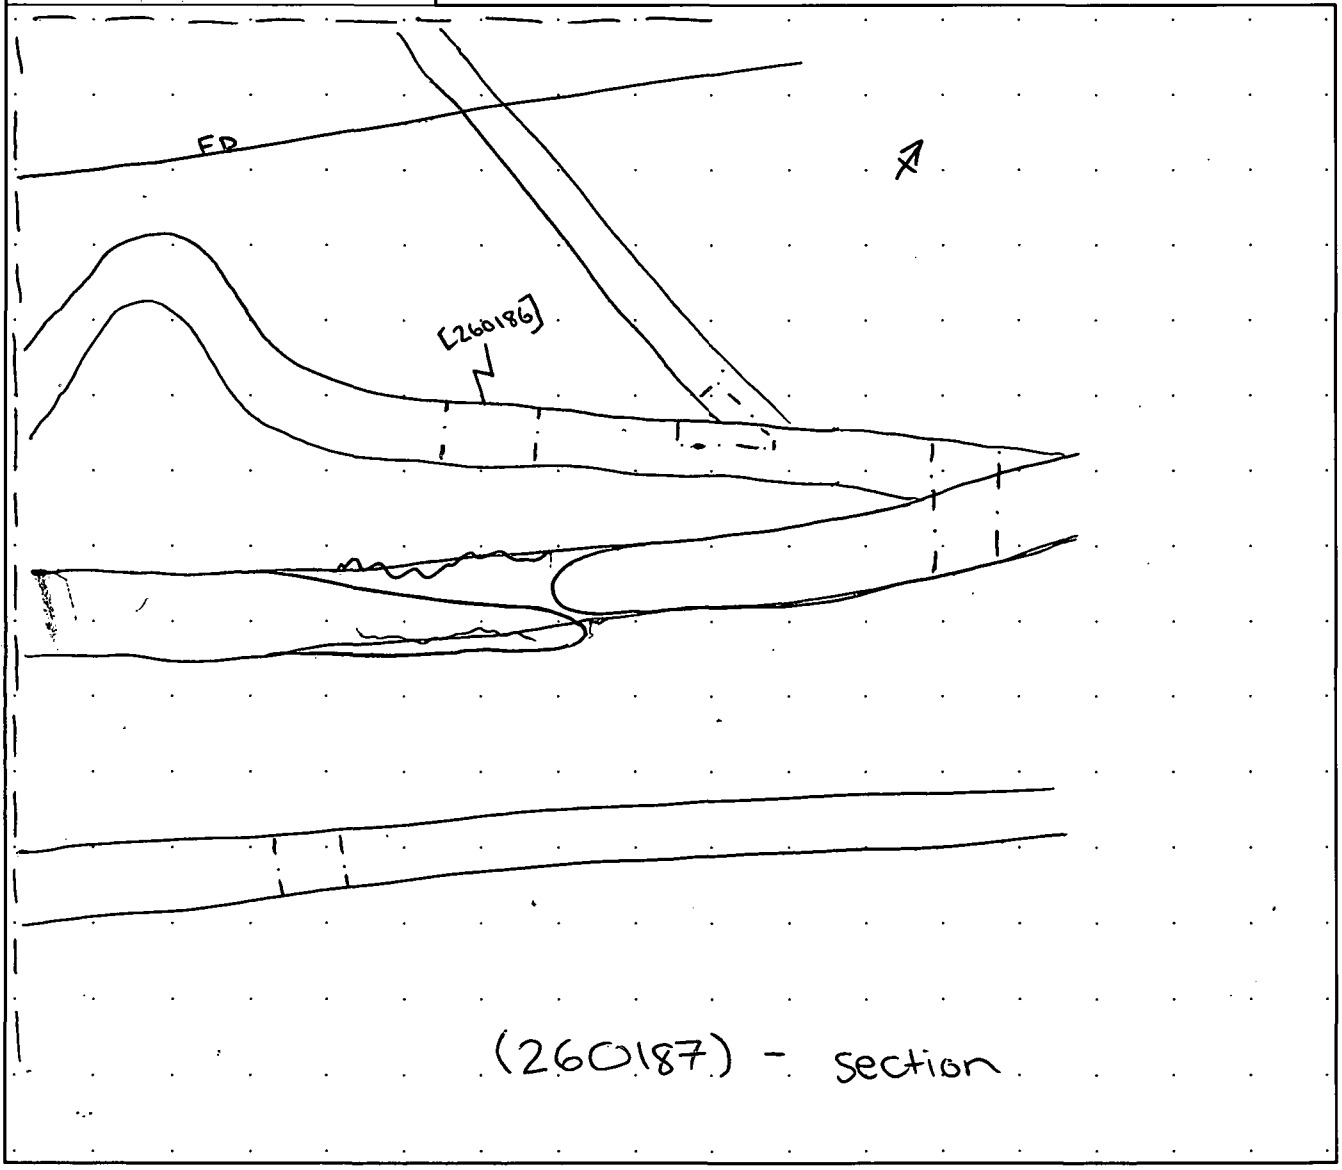

irregular/asymmetrical cut with step near base on N side but straight side on S side

poss large boundary marker and/or drainage channel - very gravelly base with some sand would provide suitable drain

Refer to context

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Cut of ditch. Slot dug to establish relationship between ditch + ditch terminus [260188]. Now believed to be contemporary. Area contains multiple E→W aligned ditches, possibly multiple phasing of agricultural boundary or some form of cattle funneling system. No dating from fills.

Refer to context [260188].

SKETCHES
(consider: location plan, detailed plan showing relationships, section showing fills/deposits as appropriate)

THIS FEATURE CORRESPOND TO A DITCH. THIS RUNS FROM NORTH TO SOUTH. THIS COULD BE PART OF A FIELD BOUNDARY. ~~IN THIS AREA THERE IS A SOME FIELD BOUNDARY. THIS PROBABLY LATER ADDED LATER THAN THE EITHER TWO OF THE EXISTING DITCHES~~

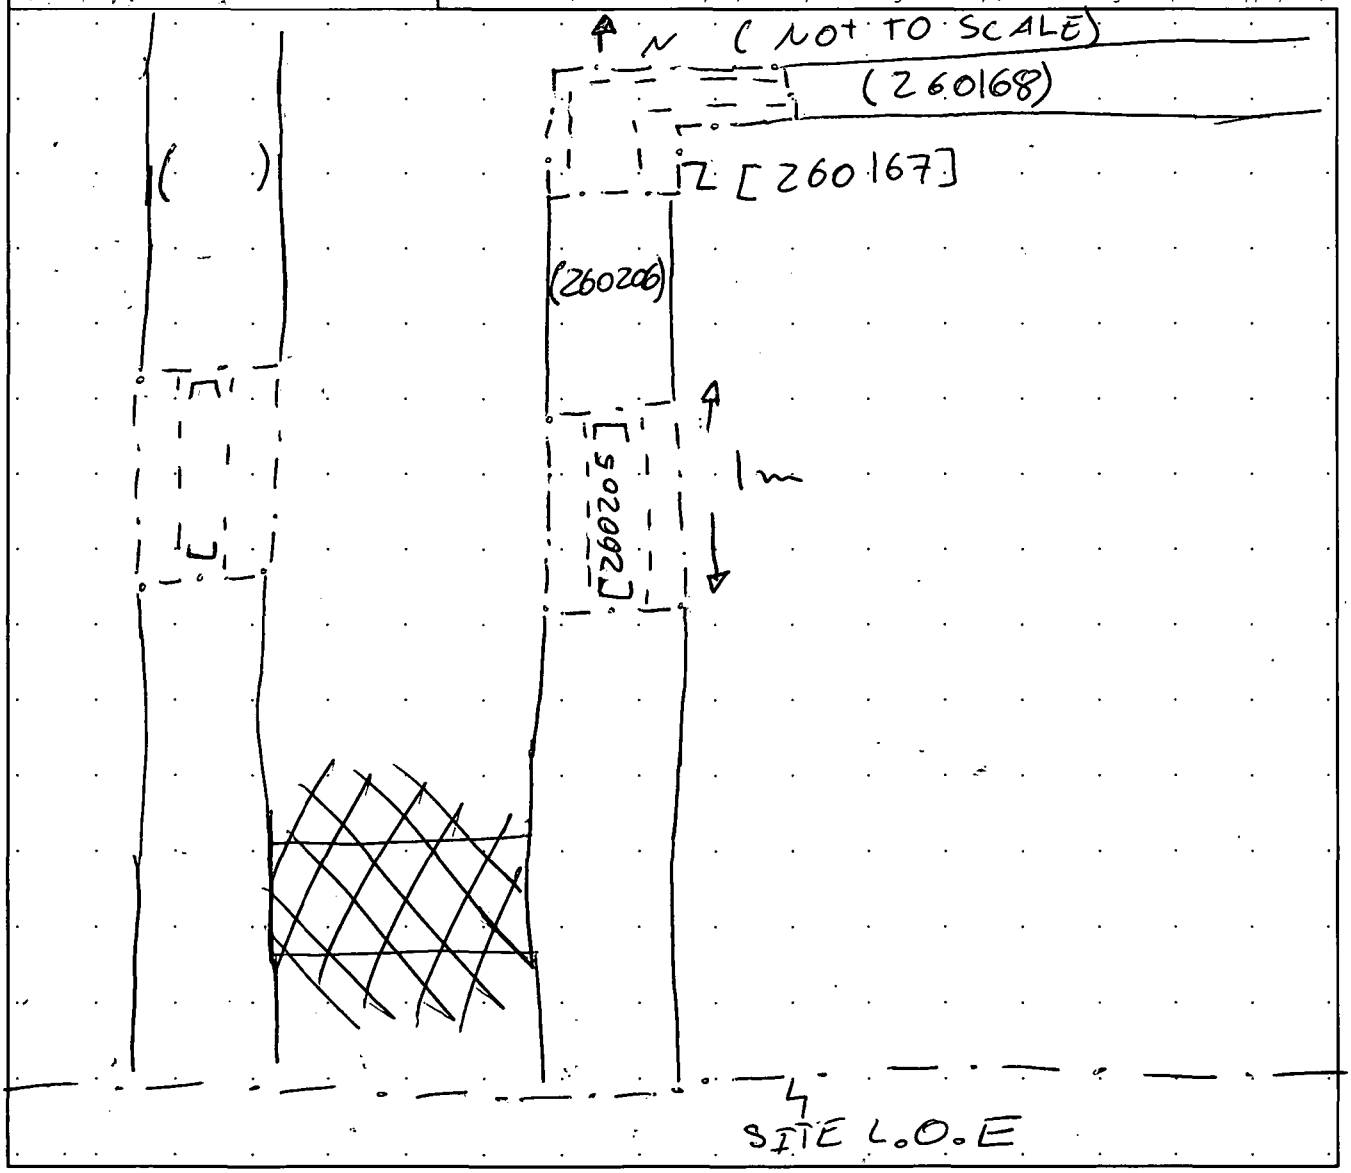

THIS SEEMS TO BE ABANDONED SINCE THE FILL RESULTS IN THE NATURAL SILTING OF THIS FEATURE.

NO ARCHAEOLOGICAL FINDS WERE RETRIEVED.

c/o ditch, forming part of large, rectangular enclosure or boundary ditch

regular, symmetrical shape in plan + section - roughly v-shaped

~~silty clay fill derived from natural accumulation~~

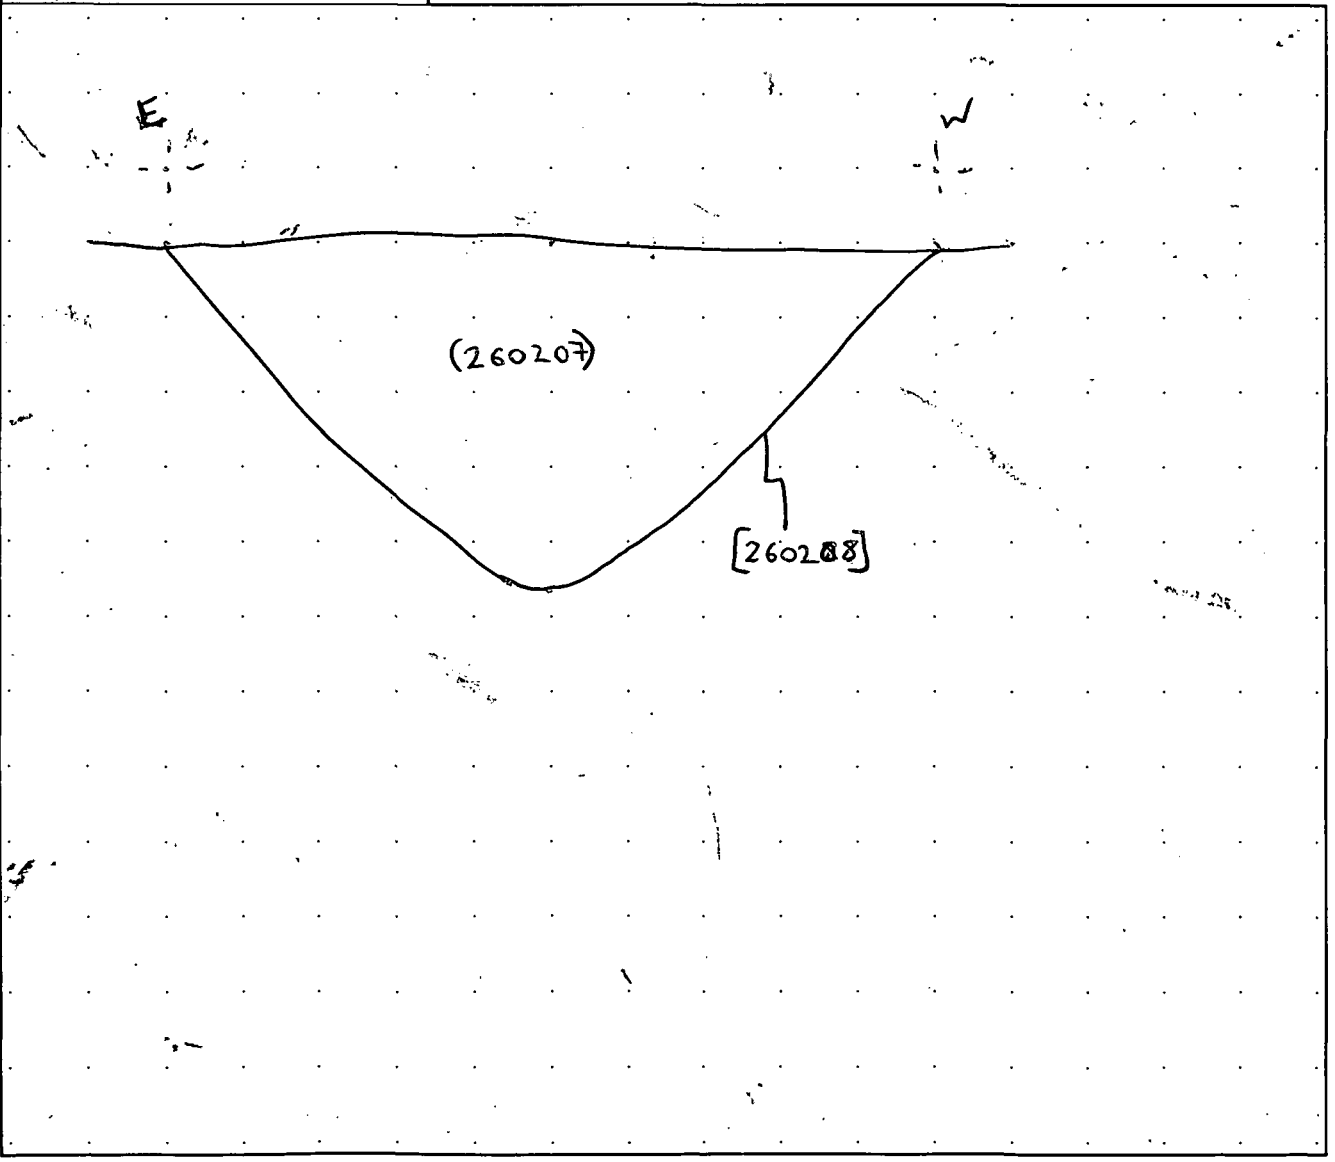

slot seems mostly consistent with results of other interventions along feature

~~some friability evident within the clay.~~

c/o small ditch, on E-W alignment, turning into larger ditch [260226] further E, and continuing all the way across excavation area

Cuts gully [260229], making [260224] the later feature by stratigraphic association; however no direct dating available due to lack of finds

feature overall seems to vary slightly in depth + width, growing bigger further E - poss. dug in segments?

Refer to context

ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

f/o gully; mixed fill with occasional gravel inclusions, similar to natural in colour/texture

likely formed as disuse deposit through natural silting over extended period of time

1x small pottery fragment (undiagnostic) + 1x potential flint scraper recovered

no deposits suitable for sampling

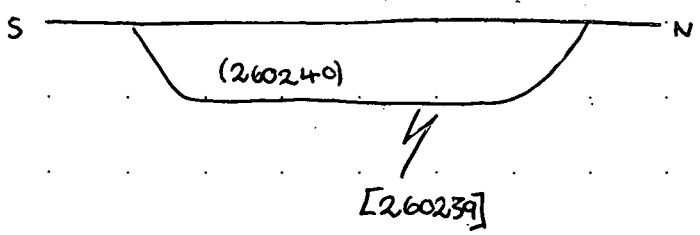

no evidence for active human intervention

Refer to context

[260255]

CUT OF LINEAR DITCH RUNNING APPROXIMATELY N→S ACROSS SITE, HEAVILY TRUNCATED ON WESTERN EDGE BY DITCH [260253], HENCE UNPRECISE WIDTH MEASUREMENT OVERLEAF. I WOULD EXPECT DITCH TO ACTUALLY HAVE BEEN OVER 1m WIDE, BUT CANNOT PROVE THAT ON THIS SECTION. PROBABLE U-SHAPED PROFILE (AGAIN, UNPROVEABLE HERE). POSSIBLE BOUNDARY MARKER? OR DRAINAGE?

ADDITIONAL INFORMATION
*(any further details that may be important for understanding the context, including items marked * overleaf)*

Cut of large irregular Shaped feature. Recovered lots of post-Med pot/tile/brick. (Sample retained). Possible Post-Med pond/extraction Pit. Feature not bottomed on W edge of Slot. Machine dug Slot. On base of E edge of Slot. ~~feature~~ lined with red brick / tile for unknown purpose.

N.B. Feature likely related to pond/Watering hole to West. Either contemporary or possible terminus of [260359] located in N quandrant of pond. See Plan (260360).

Refer to context (260360).

ADDITIONAL INFORMATION
*(any further details that may be important for understanding the context, including items marked * overleaf)*

Cut of large enclosure or boundary ditch. Bronze dagger found in terminus + Pottery from [260447] provide possible Bronze Age date. Ditch runs from SW corner of area towards NE, terminating near center of excavation area. Believed to be enclosure ditch due to size, however no evidence of occupation either side of ditch nor can we say which area it encloses. Evidence of maintenance seen in section with re-cut [260441]. Suggests ditch used over long period of time.

Refer to context [redacted](26043)
