This form is incomplete if fields marked with * are empty. PTO for additional information (and describing all items marked with *) and sketches.

Cut of posthole - contains 2 fills: one to help bed the wood in and the other a result of ~~re-cutting~~ ^{deliberate} infilling after use.

Used as a support ^{structure} ~~structure~~ - cannot see on the surface any other contemporary postholes to help suggest its function.

Some wood from the posthole remains in situ.

- After further excavation to reveal the wood, it is now possible that the wood is part of a tree - the wood is large and curves out at the bottom. However there are no visible roots. Preserved through waterlogging.

NOT POST HOLE, CIRCULAR FEATURE PROBABLY CREATED AS BRUNNEN LEVEL ROSE AROUND TREE STUMP.
