## CUT

(if you are using this section score out section **FILL/DEPOSIT** below)

### DESCRIPTION

**Shape**

sub- ☐ rectangular ☐ square ☐ circular ☐ linear ☐ curvilinear ☐ irregular ☐ other* ☐

**Orientation**

☐ N-S
☐ E-W
☐ NE-SW
☐ NW-SE

N

**Sides**

☐ vertical
☐ steep
☐ moderate } sloping
☐ gentle
☐ stepped
☐ undercutting
☐ complex*

**Base**

☐ flat
☐ concave
☐ v-shaped
☐ sloping
☐ uneven
☐ complex*

| Dimensions | Length | Width | Depth | Diameter |
|---|---|---|---|---|
| in metres | | | | |

**Shape result of** (tick all that apply)

design ☐ material cut into ☐ natural processes ☐ degree of truncation ☐ uncertain ☐

### INTERPRETATION

- pit ☐
- post-hole ☐
- stake-hole ☐
- ditch ☐
- ring-ditch ☐
- beam slot ☐
- construction cut ☐
- robber cut ☐
- gully ☐
- palaeochannel ☐
- furrow ☐
- field boundary ☐
- burial cut ☐
- other cut (describe below) ☐

## FILL/DEPOSIT

(if you are using this section score out section **CUT** above)

### DESCRIPTION

**Compaction**

☐ compact
☑ moderately compact
☐ loose
☐ friable

**Colour**

light ☐ mid ☑ dark ☐ mottled ☐

| | |
|---|---|
| brownish ☑ | ☐ brown |
| greyish ☐ | ☑ grey |
| orangeish ☐ | ☐ orange |
| yellowish ☐ | ☐ yellow |
| reddish ☐ | ☐ red |
| blueish ☐ | ☐ blue |

black ☐ white ☐ other* ☐

**Composition**

| | |
|---|---|
| clayey ☐ | ☑ clay |
| silty ☐ | ☐ silt |
| sandy ☐ | ☐ sand |
| gravelly ☐ | ☐ gravel |
| peaty ☐ | ☐ peat |

other* ☐

**Thickness**

0-15

**Inclusions**

| use the following: O: occasional M: moderate F: frequent | stones* | chalk | iron pan | manganese | charcoal | plant remains* | wood | marine shell | bone* | pot | fired clay / CBM | CTP | mortar/plaster | leather/textile | glass | metal | industrial waste | lithics | coarse stone | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|

## ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

Top fill of 3 in pit? ditch? with slumping/tipping on side
Quite dense, fatty silty clay, natural infilling.
Some small stones in varying shapes and colours
Contained 2 teeth (frag), probably cattle.

Fill similar to the single fill of a gully (N-S) that this section was taken in (see [285315]), but rest of feature is very different. See [285415] for further details.

Refer to context [285415]

*This form is incomplete if fields marked with ◤ are empty. PTO for additional information (and describing all items marked with *) and sketches.*

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Clayey layer of slumping or tipping on E-side of ditch? pit?

No finds/dating evidence.

Same rusty mottling as in (285409) and (285413) – possibly growth of reeds on sides/in ditch, and varying water levels.

Refer to context [285415]

SKETCHES
(consider: location plan, detailed plan showing relationships, section showing fills/deposits as appropriate)

no more than a few cm.

ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked * overleaf)

Slightly baffling feature. This linear is very shallow elsewhere, but bulges out at the place of the section and is quite deep there. This could be explained by a pit being dug through the linear or the other way around, but the fill of the linear seems to be visible in the S ~~section~~ profile (285408) but not in the N part. Also, the feature is linear at the base and follows the route of the shallow gully. The correct explanation seems that for some reason (perhaps a sump?) this part of the ditch/gully was extended in width and dept, allowing for various filling events. This would also explain the difference between the top fills in both sections ((285408) and (285416)).

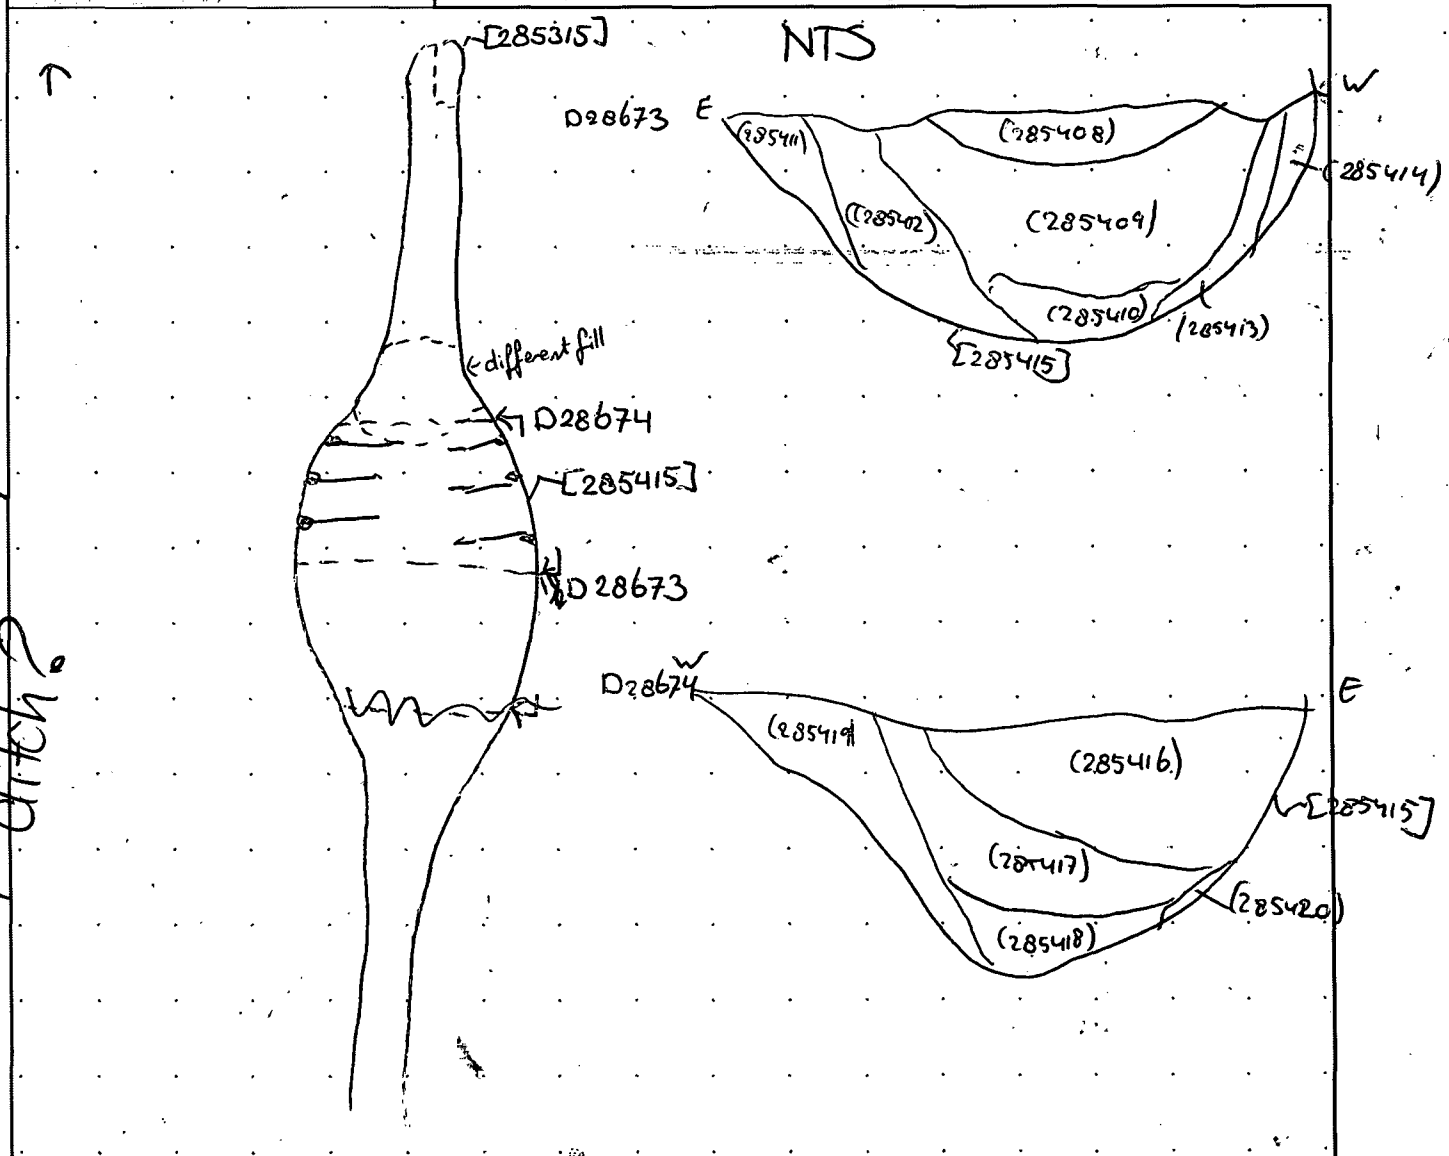

Why this part of the feature is 50 cm deeper and 1.5 m wider than elsewhere is unclear. It seems to have filled up naturally.

(285408) contained 2 fragmented animal teeth. Otherwise no finds or dating evidence.

Refer to context

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Top fill in N profile of section, browner and siltier than the top fill at the opposite side, (285408)

Some charcoal and small stones, no finds or dating evidence.

The difference in colour and composition to the rest of the linear might indicate a backfilling event or later disturbance

Refer to context [285415]

N-S RUNNING GULLY INVESTIGATED IN A 1'80 X 1'07 m SLOT

THIS FEATURE IS CUT BY THE FURROW WHICH RUNS W-E

THE EDGES OF THIS GULLY AREN'T CLEAR AND WERE STRONGLY - DISTURBED BY ROOTS

IN THIS SLOT WE FOUND ANOTHER GULLY WHICH RUNS IN THE SAME DIRECTION AND IS ALSO CUT BY THE FURROW. DUE TO WE CAN'T KNOW

THE PRESENCE OF POTSHERDS (PROBABLY IRON AGE) INSIDE ITS FILL PERMITS TO DATE THE AGE THE DISUSE OF THE FEATURE.

CUT OF TRACKWAY DITCH [285476].

FEATURE RUNS IN A NE-SW DIRECTION, PARALLEL TO THE SECOND TRACKWAY DITCH [285480].

IT CONTINUES OUTSIDE THE LIMIT OF THE EXCAVATION IN THE NE, SO ITS FULL EXTENT CANNOT BE SEEN.

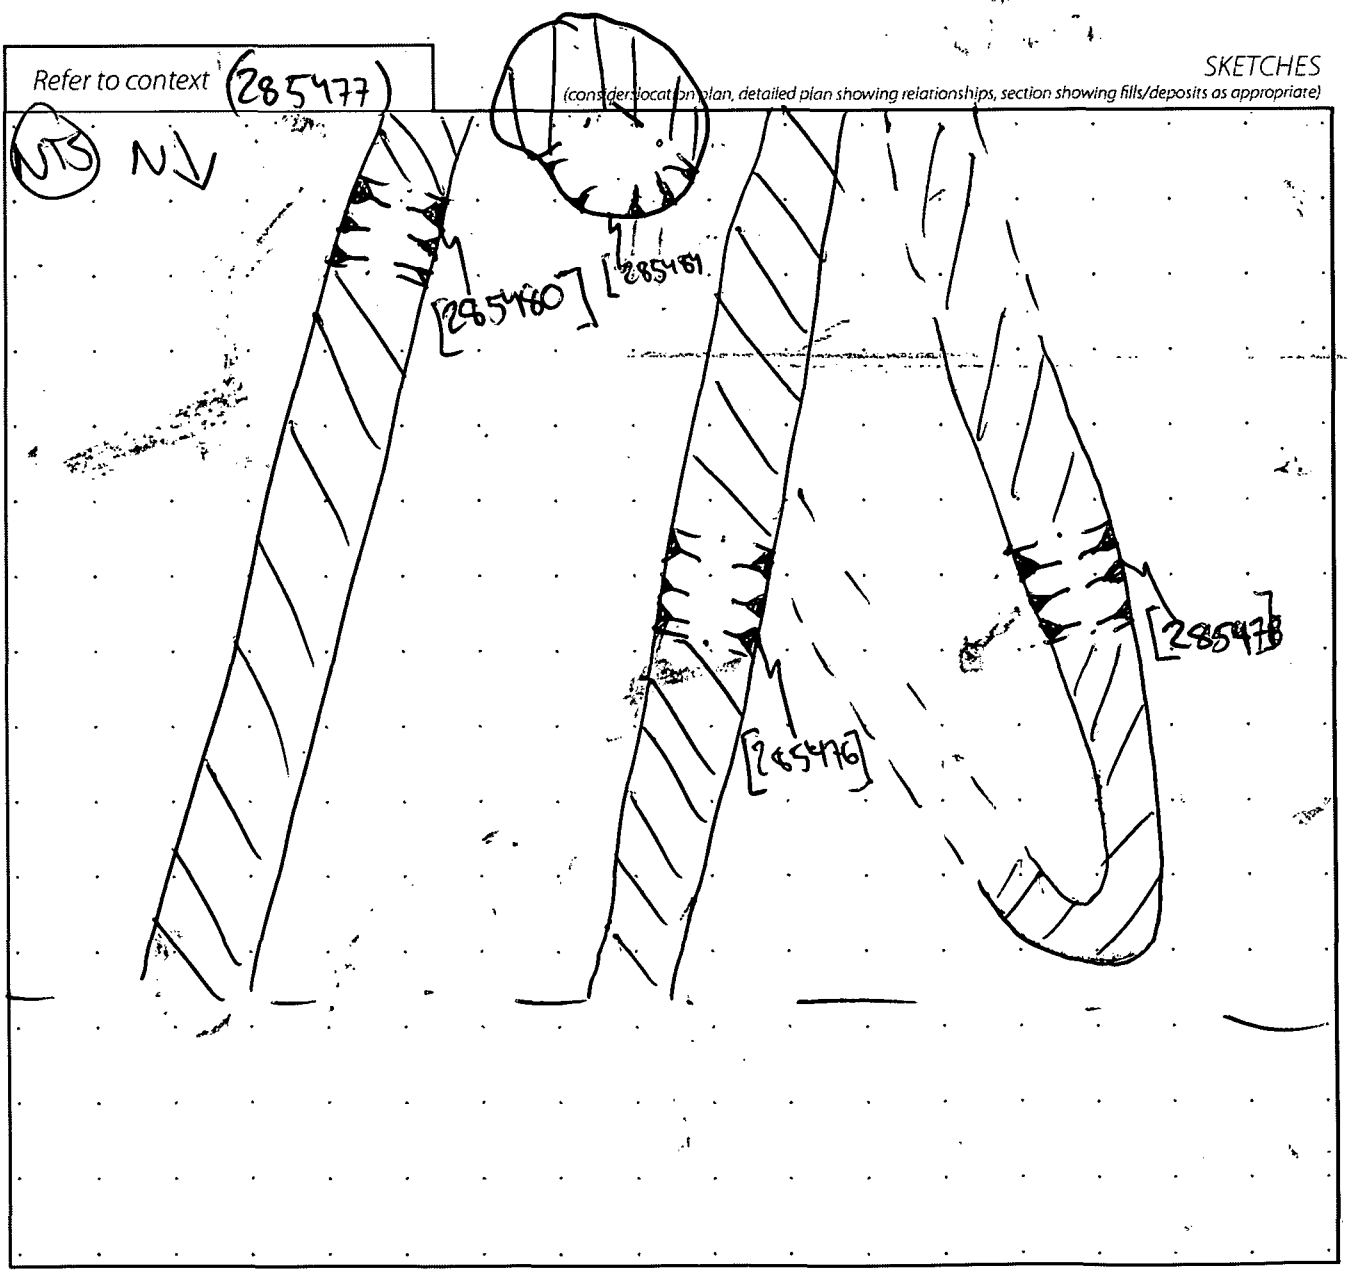

A FEW HUNDRED METRES TO THE EAST IS A SECOND TRACKWAY, RUNNING ROUGHLY IN THE SAME DIRECTION.

JUST TO THE EAST OF THE FEATURE IS A FURROW [285478].

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

FILL OF TRACKWAY [285476].

FILL IS NATURALLY INFILLED, AND CONTAINS LARGE AMOUNTS OF MANGANESE AND IRON PAN. OCCASIONAL ROCKS (N1-4CM Ø). IT IS VERY COMPACT AND CONTAINED NO FINDS.

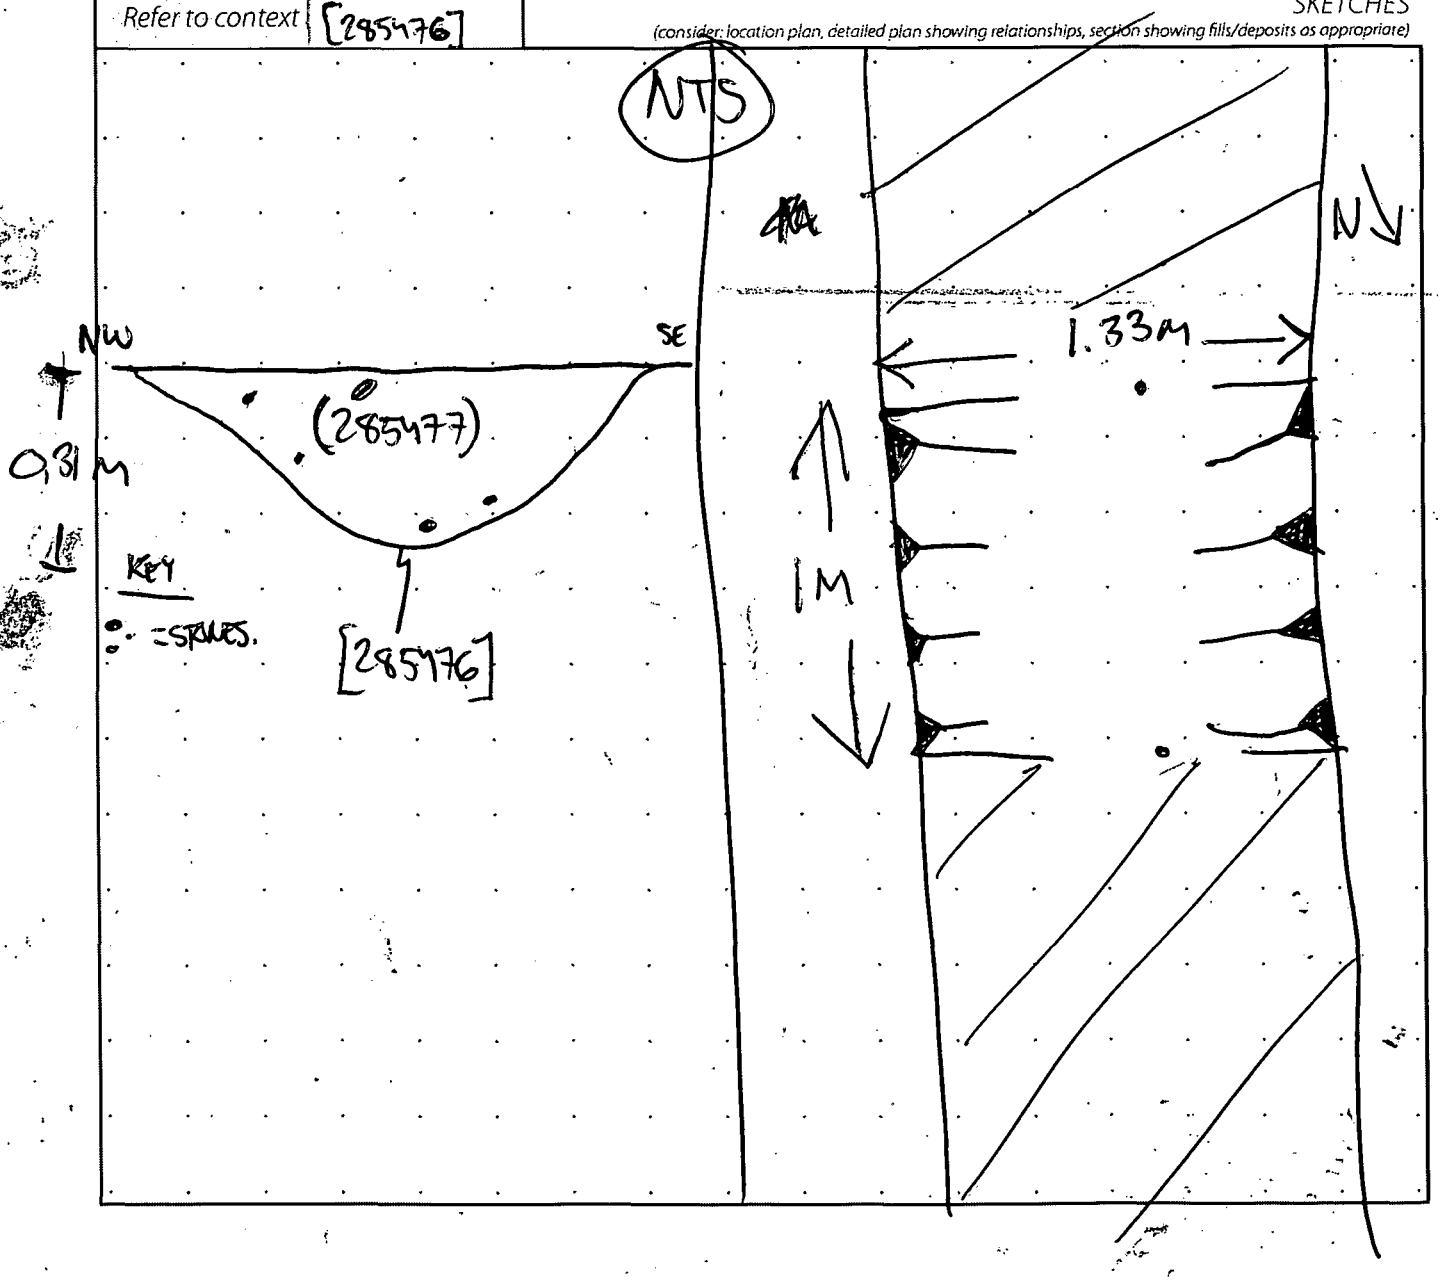

MANGANESE AND IRON PAN SUGGESTS WET CONDITIONS.

CUT OF NATURAL DEPRESSION.

FEATURE LOOKED TOO CIRCULAR IN PLAN TO BE LEFT UNINVESTIGATED. POTENTIALLY A SMALL WATERING HOLE FOR ANIMALS OR SOMETHING SIMILAR.

HOWEVER, UPON EXCAVATION IT WAS CONCLUDED THAT IT IS A NATURAL DEPRESSION, FILLED UP THROUGH NATURAL PROCESSES.

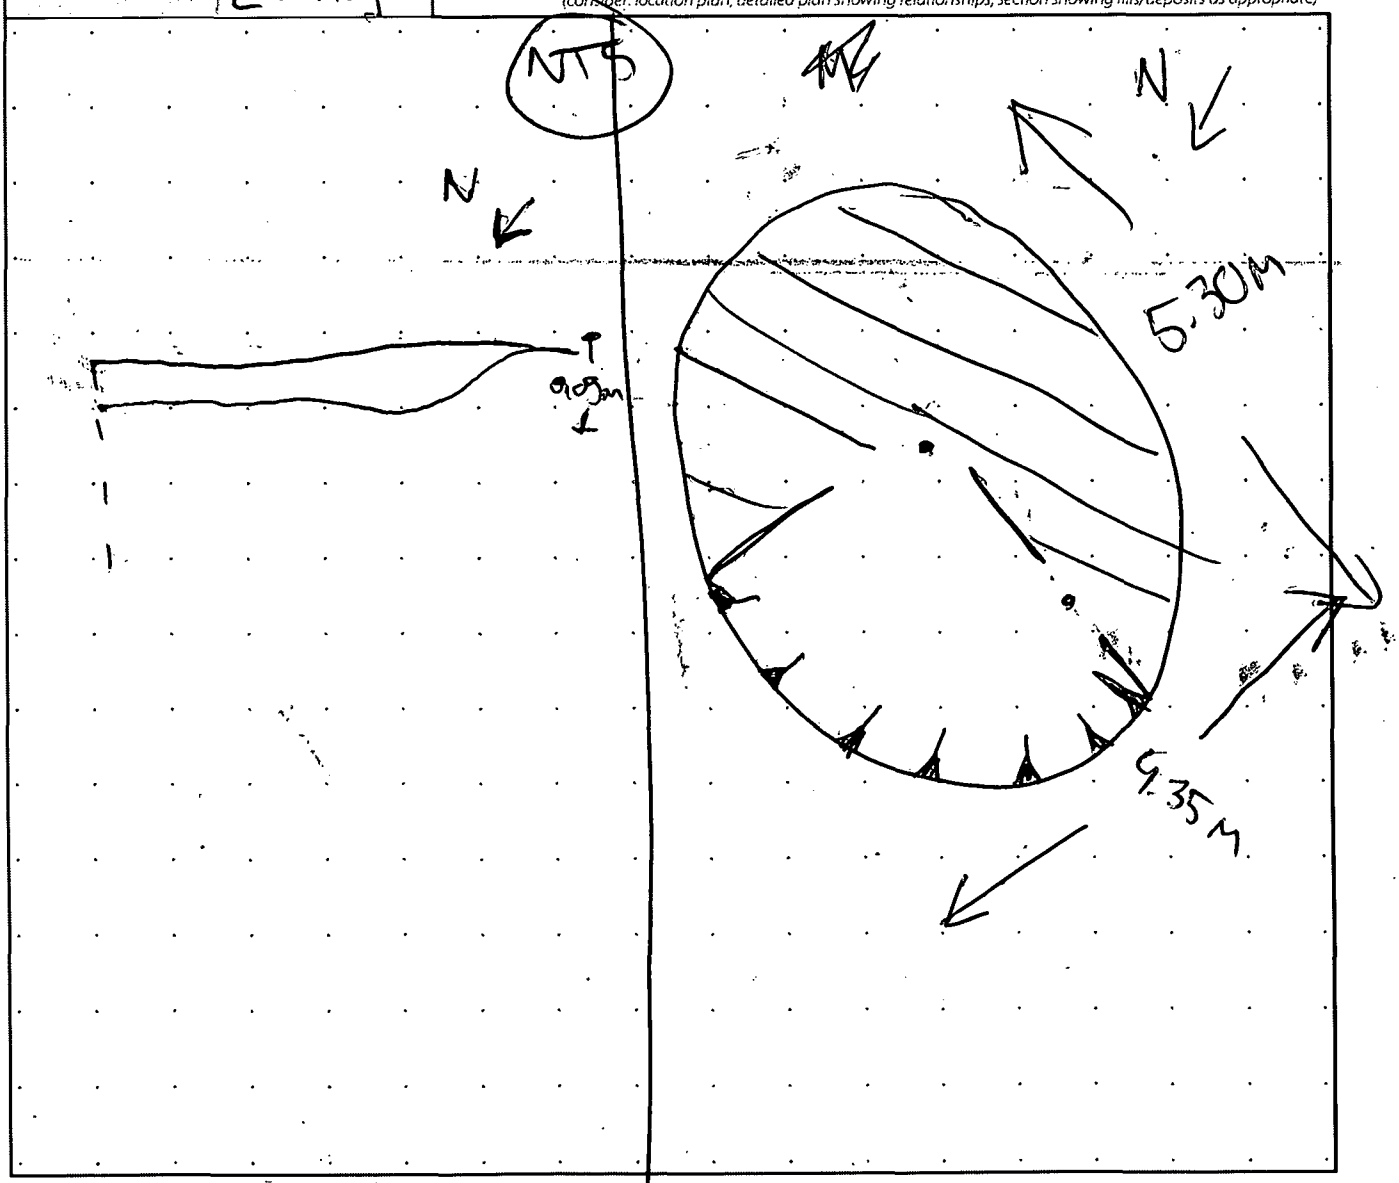

NO FINDS.

→ to the east of trackway [ ] natural hollow.

PHOTO NO: 2806512 - 2806513

CUT OF TRACKWAY DITCH [285491].

FEATURE RUNS IN A NE-SW DIRECTION, PARALLEL TO A SECOND TRACKWAY DITCH [285482].

ITS FULL NE EXTENT IS NOT VISIBLE, AS IT CONTINUES BEYOND THE LIMIT OF EXCAVATION.

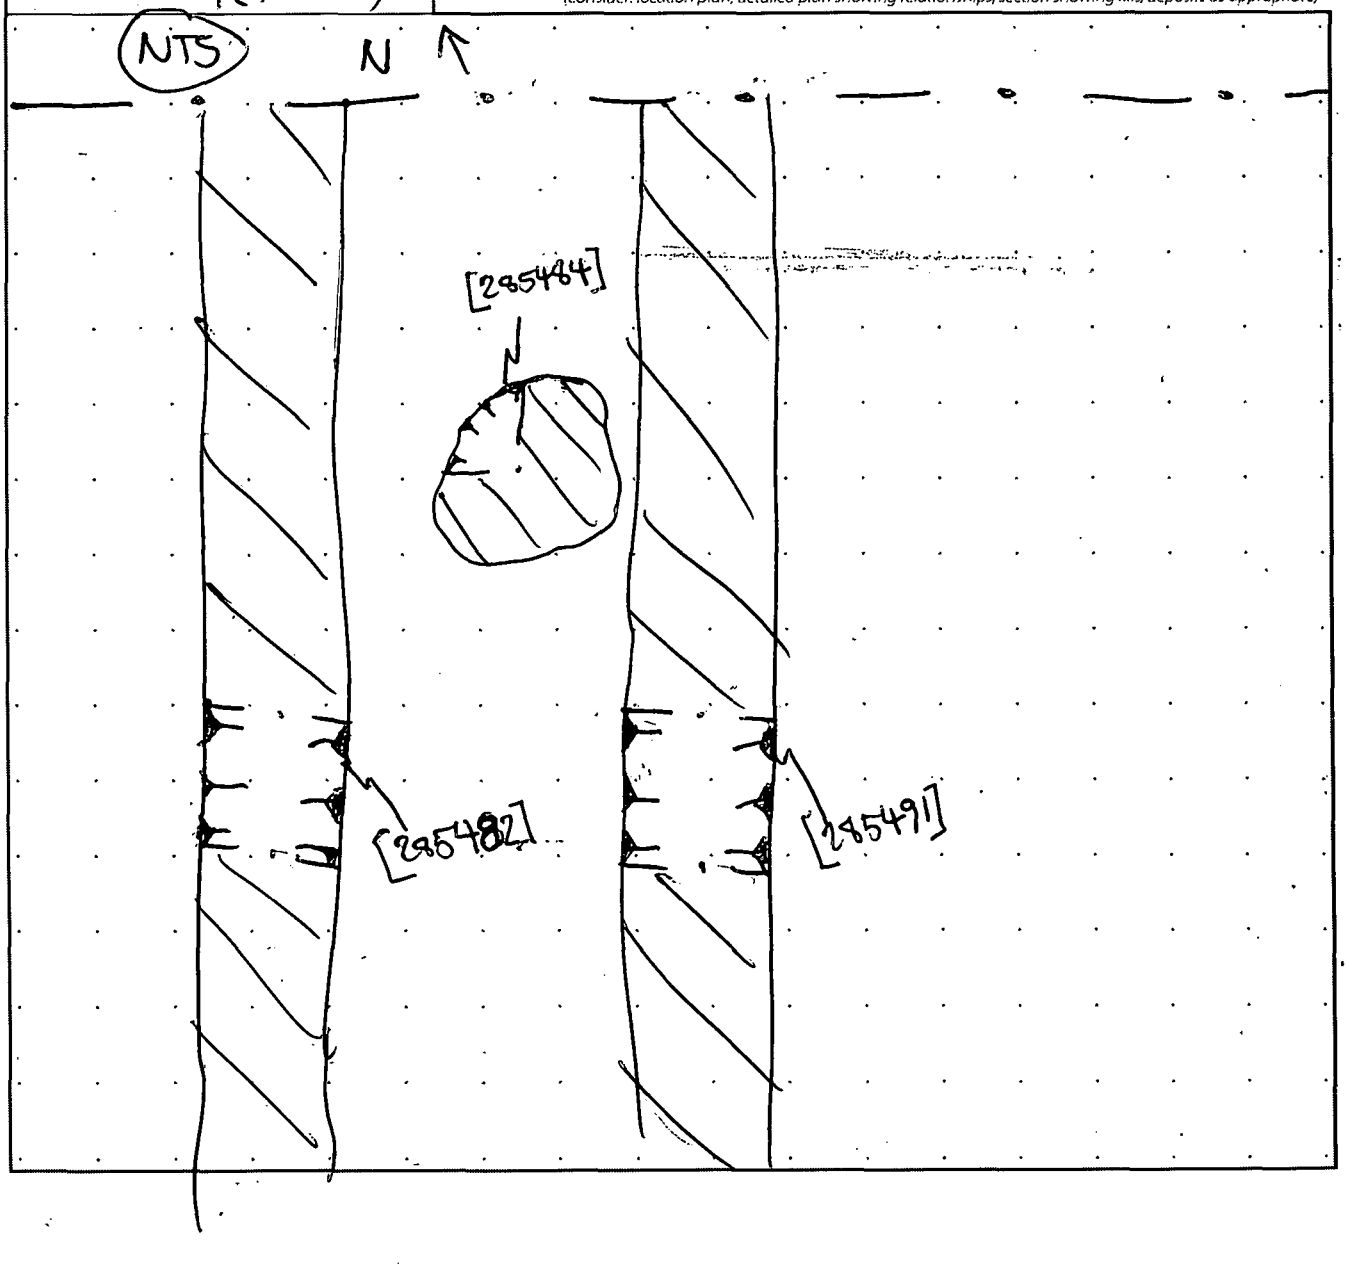

FEATURE IS SURROUNDED BY FURROWS.

NO DATEABLE MATERIAL FOUND.

## ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

cut of shallow NW-SE ditch or gully. The feature has a maximum depth of 0.28m and an average width of 0.50m. The feature was excavated to a length of 2.70m to establish a relationship with a N-S running furrow [2854977]. The feature has gentle sides and a concave base.

The ditch appears to be truncated by a furrow [2854977] indicating that the feature is older than or of similar date to the medieval furrows. No pottery was collected from the feature to help date the cut.

The feature is shallow which might indicate it was somthing related to water management.

## ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

Fill of ditch context [285495]. Maximum thickness of fill 0.28m however the maximum recorded on the section drawing # D28686 the fill has a maximum of 0.13m.

The fill is composed of a compact brownish-grey clay with little to no stone inclusions. The fill contained no dating evidence i.e. pottery however an Iron object was found.

Furrow cut [285497] cuts the context suggesting the ditch is the oldest feature in the relationship. Early medieval or IA in date pending rel dates with Roman trackways.

Natural infilling no sign of deliberate backfilling.

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Cut of a ditch. The cut has moderate slopes and a flat base. Orientated E-W in a linear shape.

Finds of one piece of pottery may be able to provide a date but for now it is uncertain.

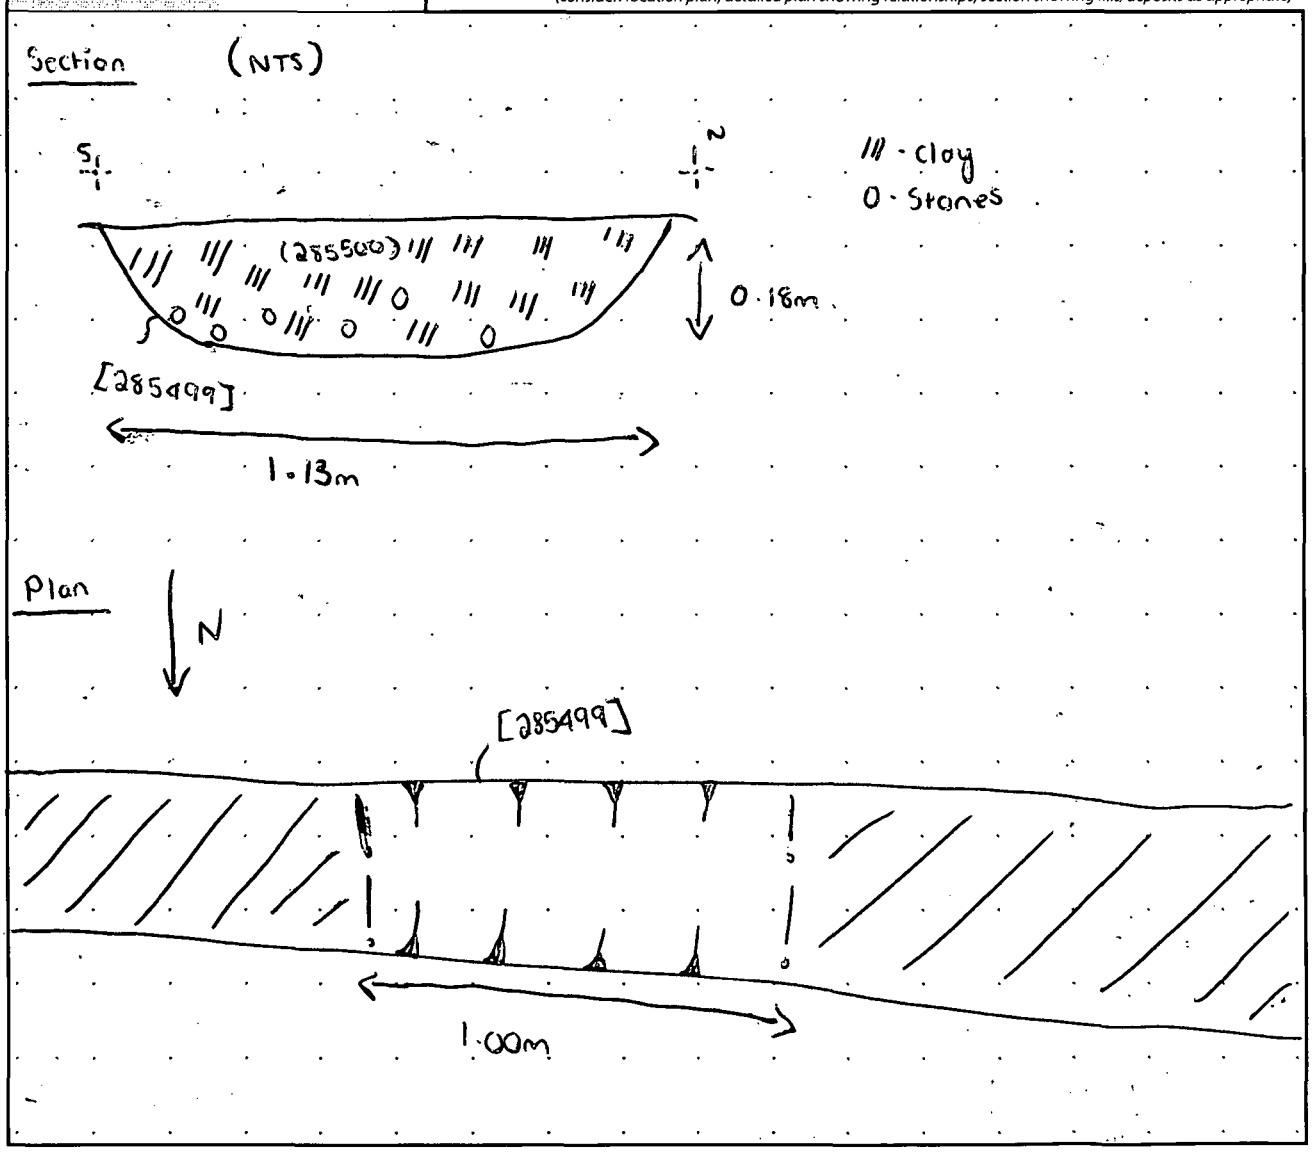

The ditch is quite close to a trackway and a few other ditches suggesting possible human activity such as agricultural.

The top of the cut had been slightly overmachined, so this may have affected the shape and possibly lost some finds

Fill of ditch [285499]. Inclusions of stones and chalk.

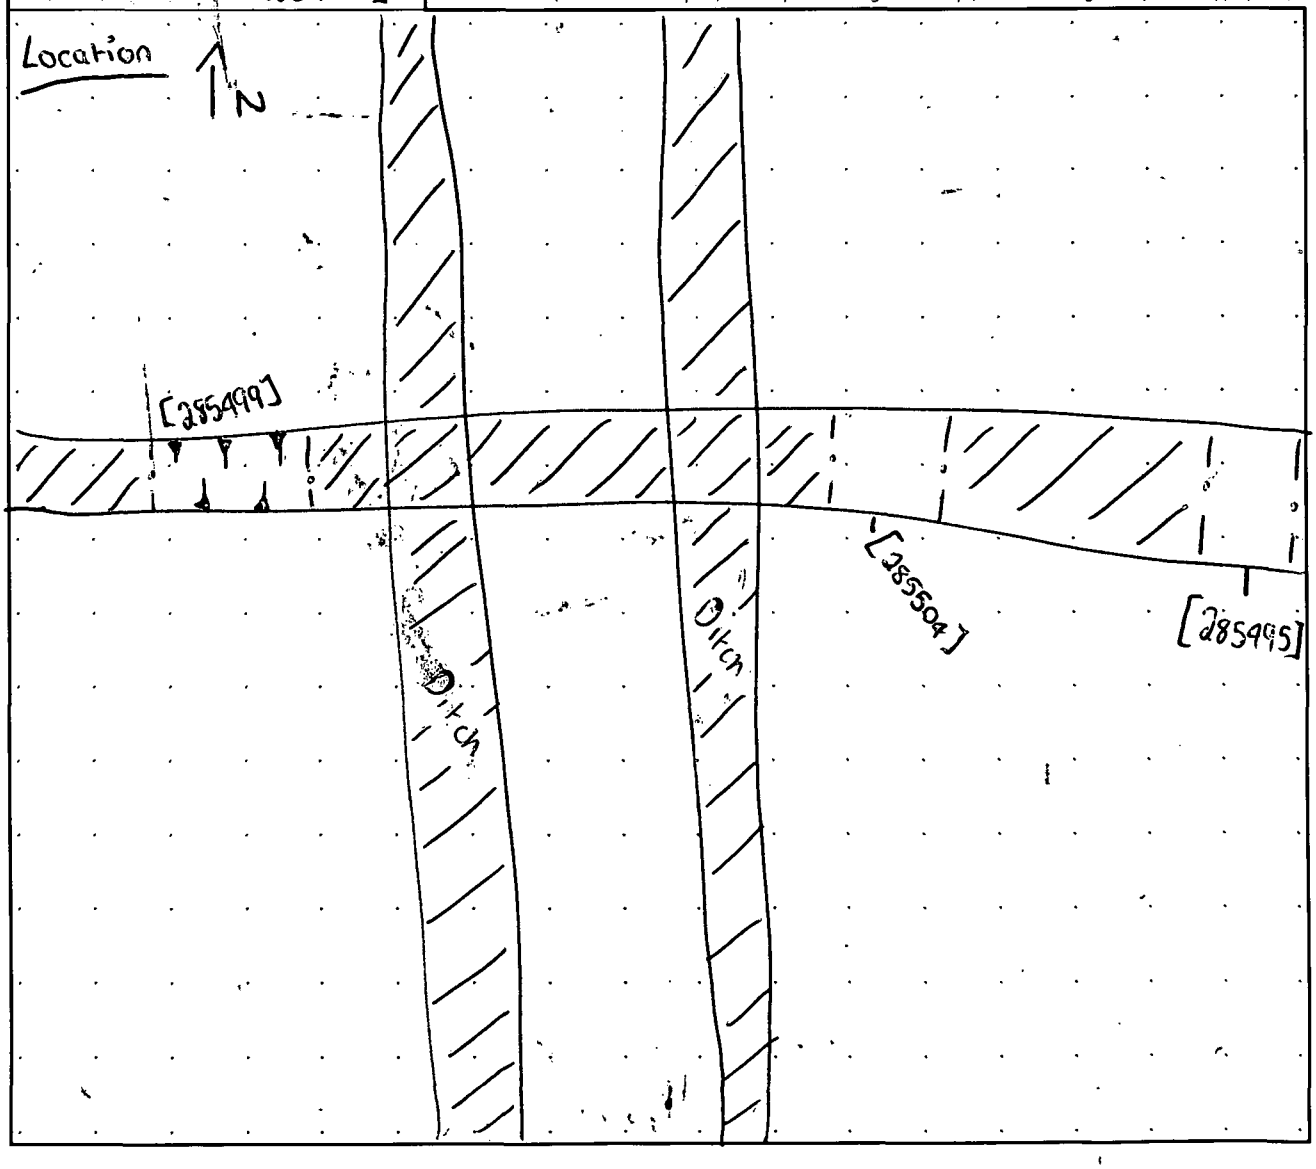

One piece of pottery was recovered which may be able to provide a date but for now the date is uncertain.

Possibly a natural silting episode as lack of base suggests no deliberate backfilling.

The top of the ditch was slightly over-machined so some finds may have been damaged / lost.

Refer to context [285499]

CUT OF TRACKWAY DITCH [285501].

FEATURE IS PART OF A TRACKWAY RUNNING IN A NE-SW DIRECTION. IT IS IN BETWEEN TWO OTHER TRACKWAYS, RUNNING IN A NW-SE DIRECTION.

NO DATEABLE MATERIAL FOUND, NO FINDS AT ALL. THE OTHER TRACKWAYS ARE SUPPOSEDLY ROMAN, PERHAPS THIS ~~ONE~~ TOO?

THIS FEATURE IS THE EASTERN ONE OUT OF THE TWO FORMING THE TRACKWAY.

## ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

LOWERMOST FILL OF TRACKWAY DITCH [285501].
FILL IS THE RESULT OF THE INITIAL NATURAL INFILLING OF THE DITCH, AS WELL AS SILTING OF THE OVERLYING (285502) DOWN INTO THE GRAVELLY NATURAL.

NO FINDS.

ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

CUT [285504] IS OF A LINEAR DITCH RUNNING 10m+ NW/SE. IT MEASURES 1.82m WIDE AND 0.21m DEEP.

NOTHING OF NOTE ABOUT THE FEATURE.

THE FILL PROVED FRUITLESS WITH DATEABLE MATERIAL HOWEVER CUT [285495] OF THE SAME DITCH IS CUT BY A MEDIEVAL FURROW WHICH MAKES THE DITCH EARLIER.

*(any further details that may be important for understanding the context, including items marked * overleaf)*

CUT [85510] IS A DITCH WHICH IS APART OF THE ROMAN TRACKWAY. THE CUT MEASURES 0.31 m DEEP BUT MOST LIKELY LOST PART TO OVERMACHINING. IT ALSO MEASURES 1.85 m WIDE MAKING IT A RATHER WIDE FEATURE WHICH WOULD BE CONSISTENT WITH IT BEING A TRACKWAY.

ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked * overleaf)

Cut of trackway ditch. The cut has a maximum depth of 0.28m, a maximum width of 1.10m. The slot was excavated to 1.30m.

The track way ditch represents the Eastern side of a Roman trackway running roughly North-South. The trackway appears to be leading away from and respecting Roman buildings and enclosures.

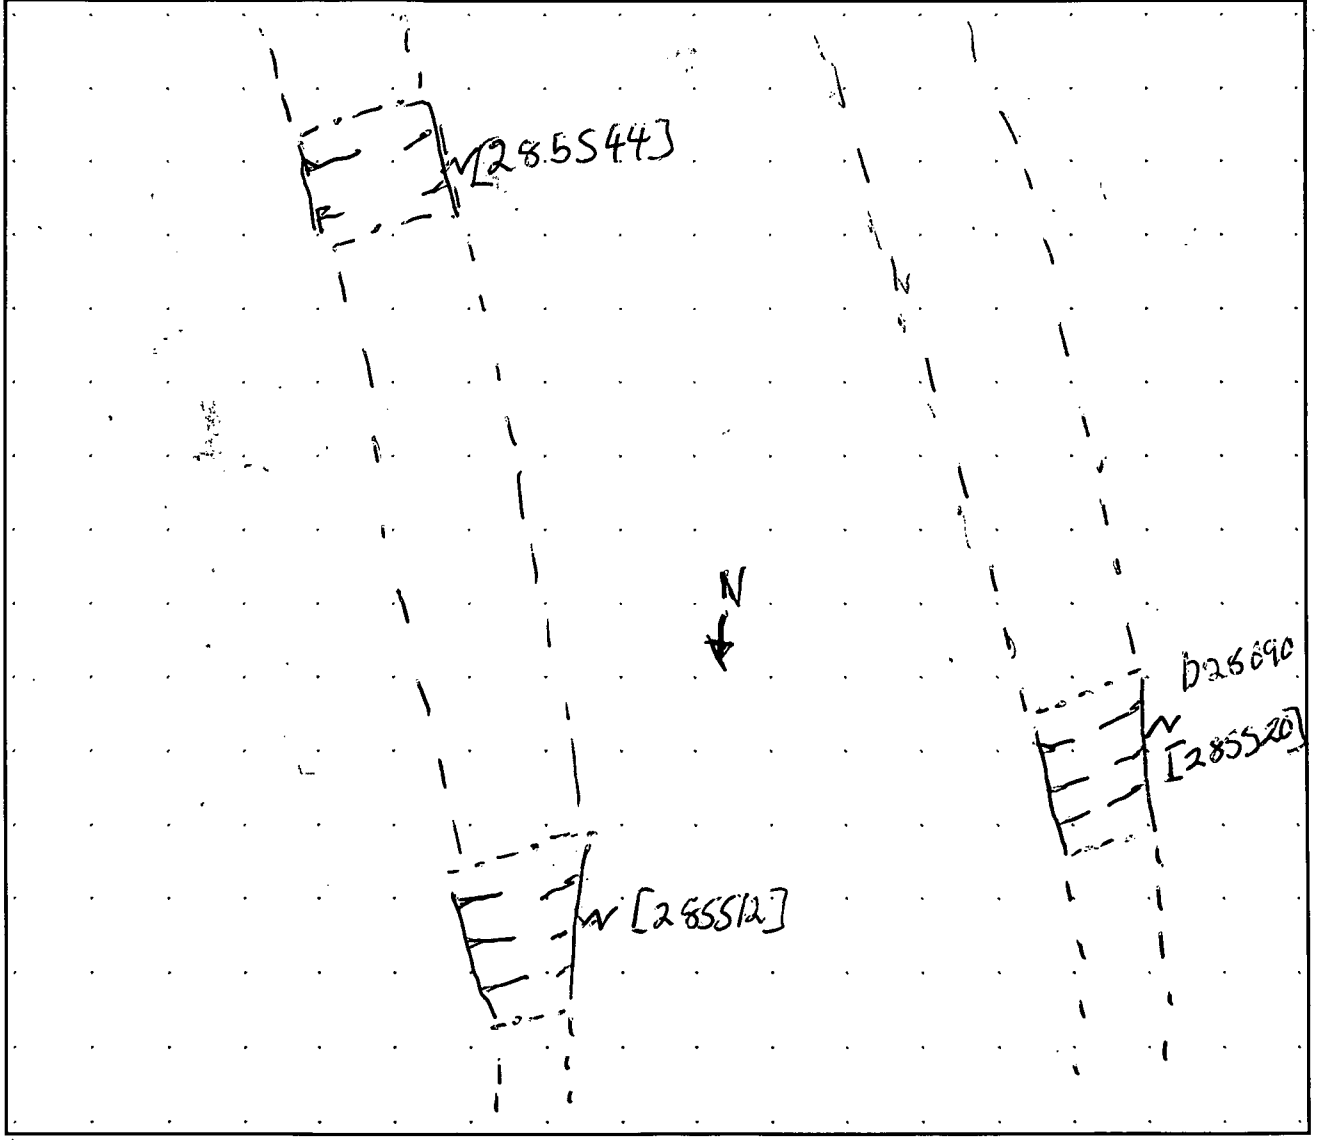

No finds were found within the cut - furrows cut over trackway ditch.

The sides of the cut were moderate and the base was roughly concave.

Refer to context [285513]

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

CONTEXT (285514) IS A DEPOSIT OF GRAVEL/ COBBLED STONES WHICH MAKE UP THE SURFACE OF A TRACKWAY. THIS DEPOSIT IS MADE UP WITH NATURAL STONES MEASURING BETWEEN 4-12 cm WITH THE MAJORITY BEING COARSE STONES.
* THERE IS A HINT OF GRAVEL WITHIN THE COBBLED CONTEXT BUT THE MAJORITY, 95% +, OF TH CONTEXT IS MADE UP OF STONES.
DUE TO THIS BEING A SURFACE OF THE TRACKWAY IT IS VERY DIFFICULT, IF NOT IMPOSSIBLE TO GET THE THICKNESS. ALTHOUGH THE COBBLED AREA DISCOVERED IS AROUND 4M WIDE BY 6.65 M LONG. HOWEVER THE LENGTH MAY EXTEND FURTHER. (OVERMACHINED?)

Refer to context (285514)

## ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

CONTEXT (285515) IS A -FILL/ DEPOSIT OVER THE COBBLED TRACKWAY, (285514). DUE TO NO CUT IT IS BETTER TO CALL IT A DEPOSIT RATHER THAN A FILL. THE CONTEXT IS A NATURAL INFILL DUE TO THE LACK OF OCCUPATION MATERIAL WITHIN THE DEPOSIT, EXCEPT FOR A FRAGMENT OF POTTERY. EVEN THOUGH IT WAS IDENTIFIED AS NATURAL INFILL A SAMPLE IS NEEDED DUE TO ITS LOCATION AND MEANING.

AS CONTEXT (285515) IS A DEPOSIT UPON A COBBLED TRACKWAY IT IS DIFFICULT TO DETERMINE THE DEPTH/EXTENT. PLUS DUE TO THE FEATURE BEING DUG BY SOMEONE ELSE, THE INTERPRETATION CAN ONLY BE DONE ON WHAT REMAINS.

Refer to context (285514)

## ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

Cut of a ditch. The cut has steep slopes and a flat base. Orientated N-S in a linear shape.

No finds were recovered so date is unknown.

The cut is close to a trackway and several other ditches which may suggest human activity and a possible agricultural use.

ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

Cut of ditch. Runs linear from NE-SW.
Purpose/function of ditch unknown - possible gully?

To SE of ditch is a larger ditch running on the same alignment.

Refer to context [285547] (285546)

CUT OF DITCH [285548]

DITCH RUNS IN A NW - SE DIRECTION AND HAS NO FINDS.

SLOT IS LOCATED WITHIN A SMALL STRIP, SO THE FULL EXTENT OF THE DITCH CANNOT BE DETERMINED.

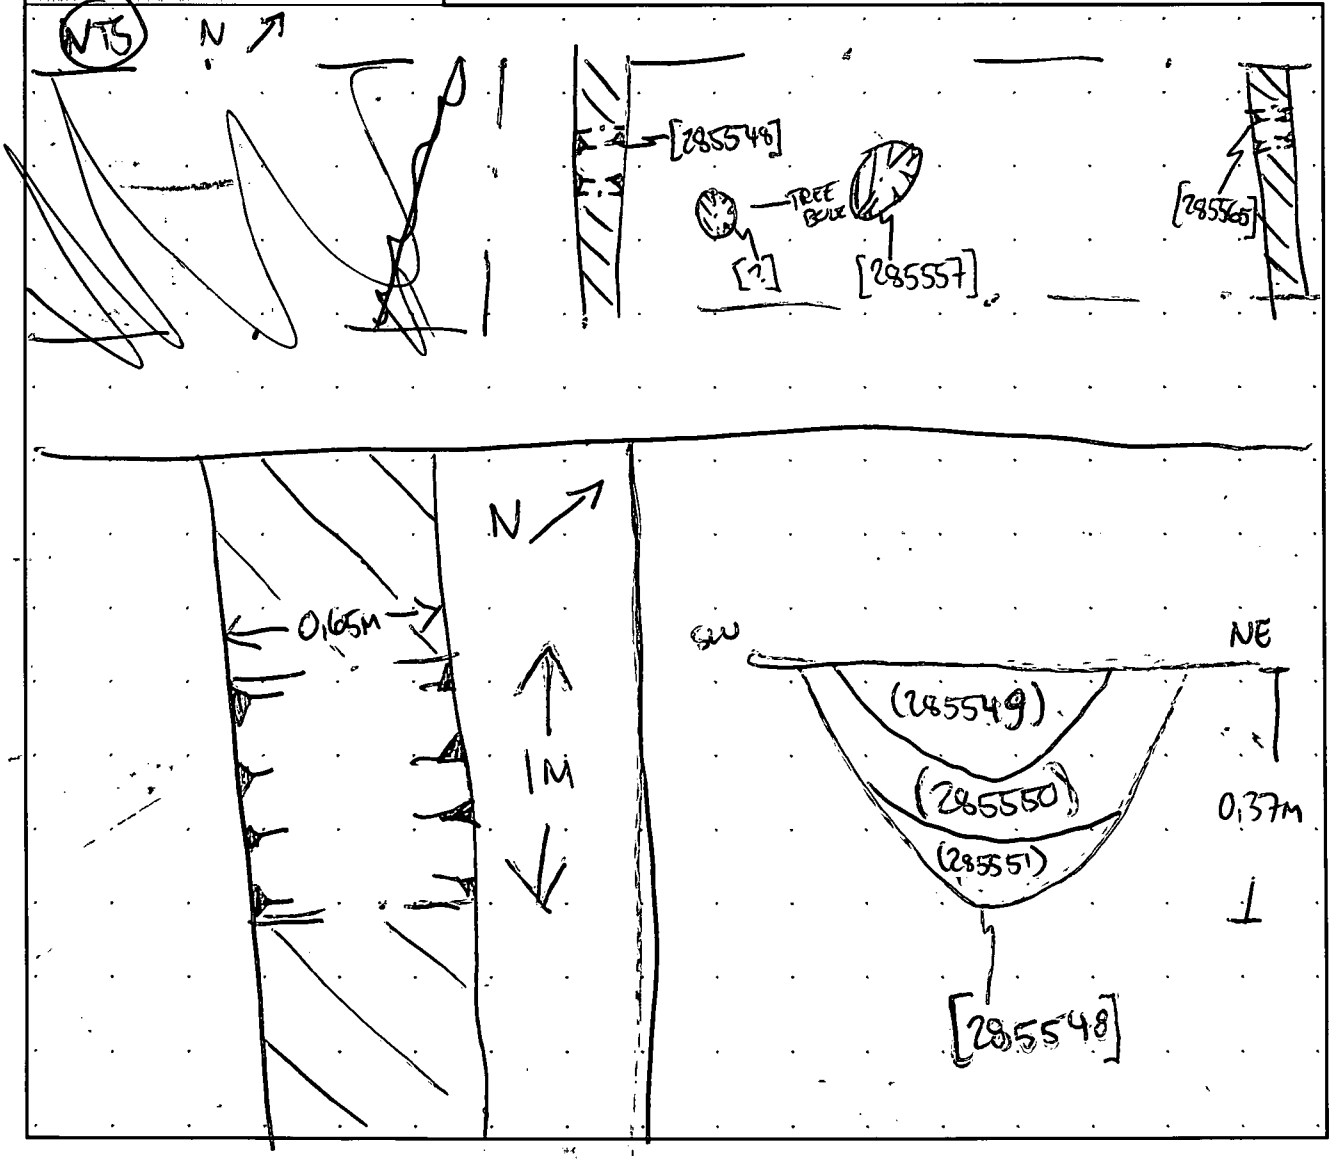

A FEW FURROWS ARE LOCATED WITHIN THE STRIP, BUT APART FROM THAT, NO OTHER ARCHAEOLOGY IS SEEN CLOSE BY.

FUNCTION & UNKNOWN.

PHOTO Nº: 2806584, 2806585

ADDITIONAL INFORMATION
*(any further details that may be important for understanding the context, including items marked * overleaf)*

UPPERMOST FILL OF DITCH [28554 8].

FILL SEEMS TO BE DELIBERATELY BACKFILLED SOME TIME AFTER THE INITIAL NATURAL INFILLING PROCESS.

BOUNDARIES BETWEEN THIS FILL AND THE UNDERLYING (28555 0) ARE QUITE WELL DEFINED.

THE FILL HAS NO FINDS AND ALMOST NO INCLUSIONS, ONLY OCCASIONAL IRON PANNING.

Refer to context [28554 8]

SKETCHES

Fill (285553) of a Ditch [285552]
Natural infilling
Frequent presence of chalk and stones (rounded and angular)
Moderate presence of marine shell

PHOTO No: 2806586, 2806587

Refer to context [285552]

*This form is in portrait format. Fields marked with ◤ are empty. PTO for additional information (and describing all items marked with *) and sketches.*

## ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

Cut of a ditch terminus. The cut has moderate slopes and a flat base. Orientated E-W. Cut is half-sectioned. The ditch runs off in the E but disappears in the W reappearing after a slight gap.

No dateable finds so date is unknown.

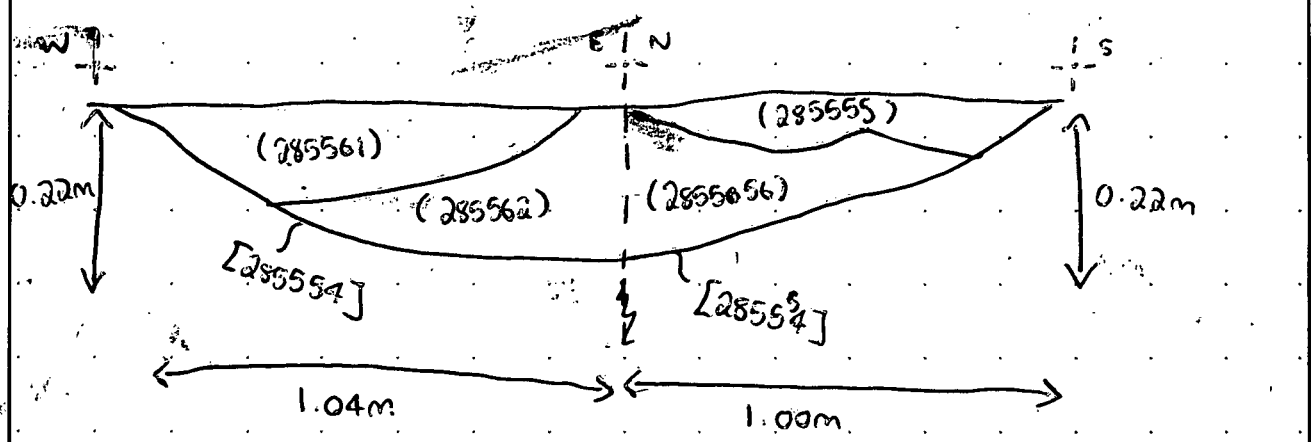

The cut is close to several other ditches and a trackway. Possibly shows signs of human activity and the possible use of the field for agriculture.

Refer to context (285555)

## ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

Fill of ditch terminus [285554] Inclusions eg Stones and chalk.

No dateable finds so date is unknown.

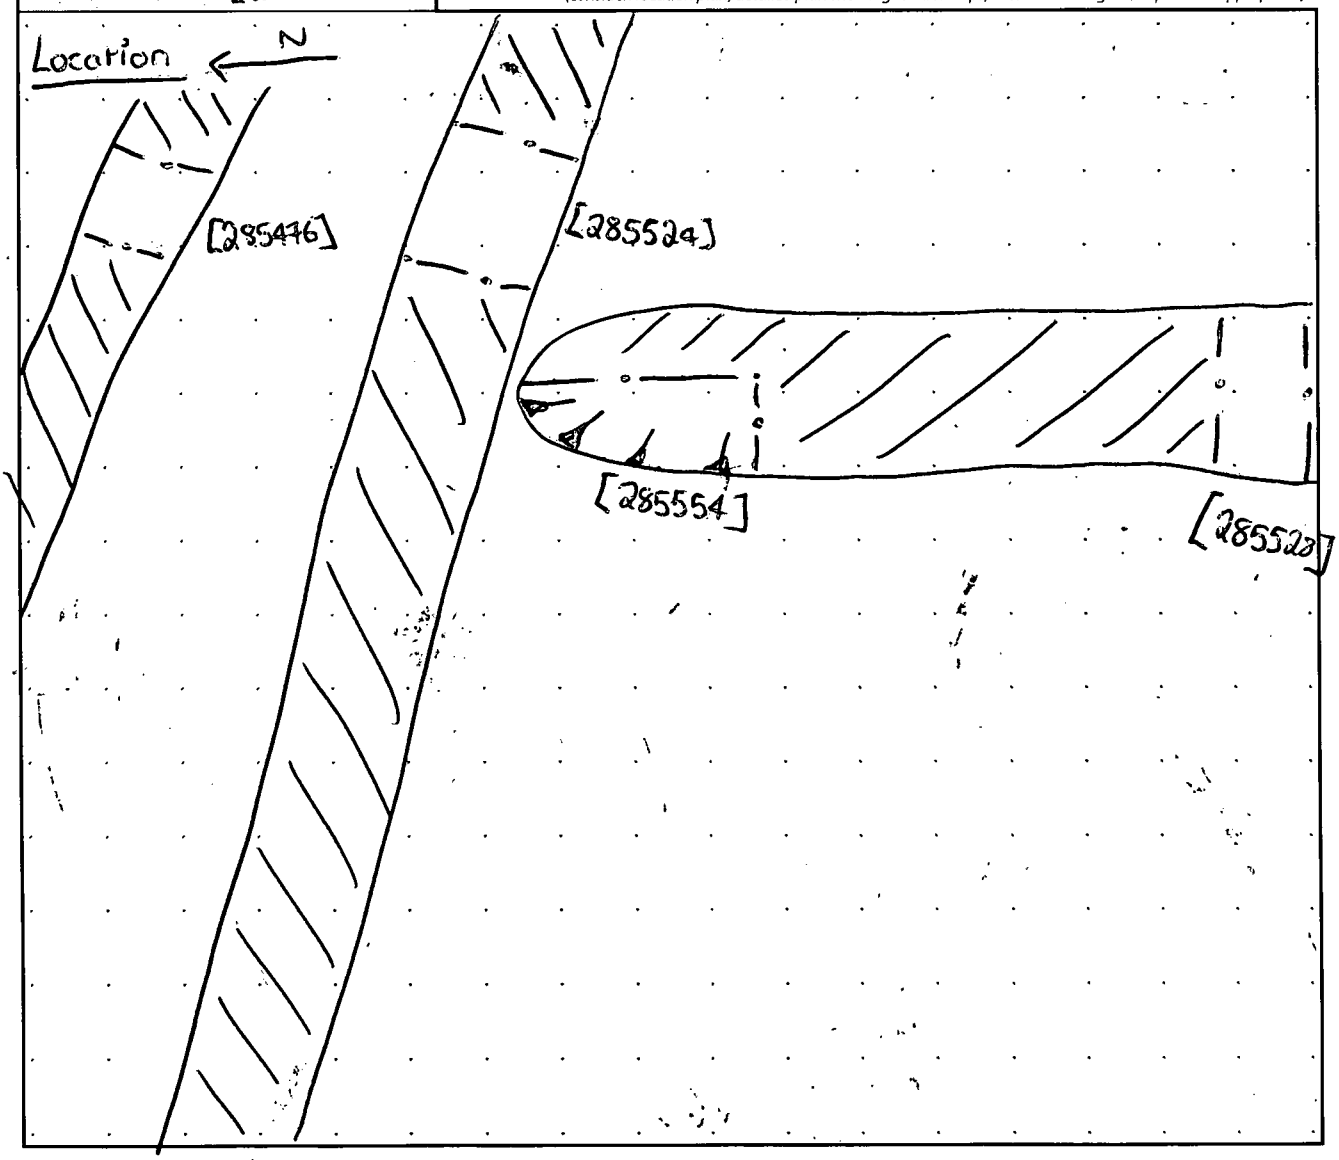

Possibly a natural silting episode as lack of bone suggests no deliberate backfilling.

Very similar fill to (285561).

Refer to context [285554]

## ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

Fill of ditch terminus [285554]. Inclusions of stones and chalk.

No dateable finds so date is unknown.

Possibly a natural silting episode as lack of bone suggests no deliberate backfilling.

Very similar to (285556)

Refer to context [285554], (285555)

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

CONTEXT (285564) IS THE FILL OF CUT [285563] WHICH IS A NATURAL INFILLING EVENT. THE FEATURE WOULD HAVE SILTED UP SLOWLY WHICH CAN BE SUGGESTED DUE TO LACK OF INCLUSIONS WITHIN THE CONTEXT. APART FROM A COUPLE OF SMALL FRAGMENTS OF BONE AND NATURAL STONES, AROUND ≤1% OF CONTEXT, MEASURING 1-4cm THE CONTEXT IS VERY CLEAN.
NOTHING ELSE OF NOTE WITHIN THE FILL (285564)

CUT OF. DITCH [285565].

FEATURE RUNS IN AN E-W DIRECTION AND CONTAINED NO. FINDS.

THE SLOT IS LOCATED WITHIN A SMALL STRIP, SO THE FULL EXTENT OF THE DITCH CANNOT BE DETERMINED IN ANY DIRECTION.

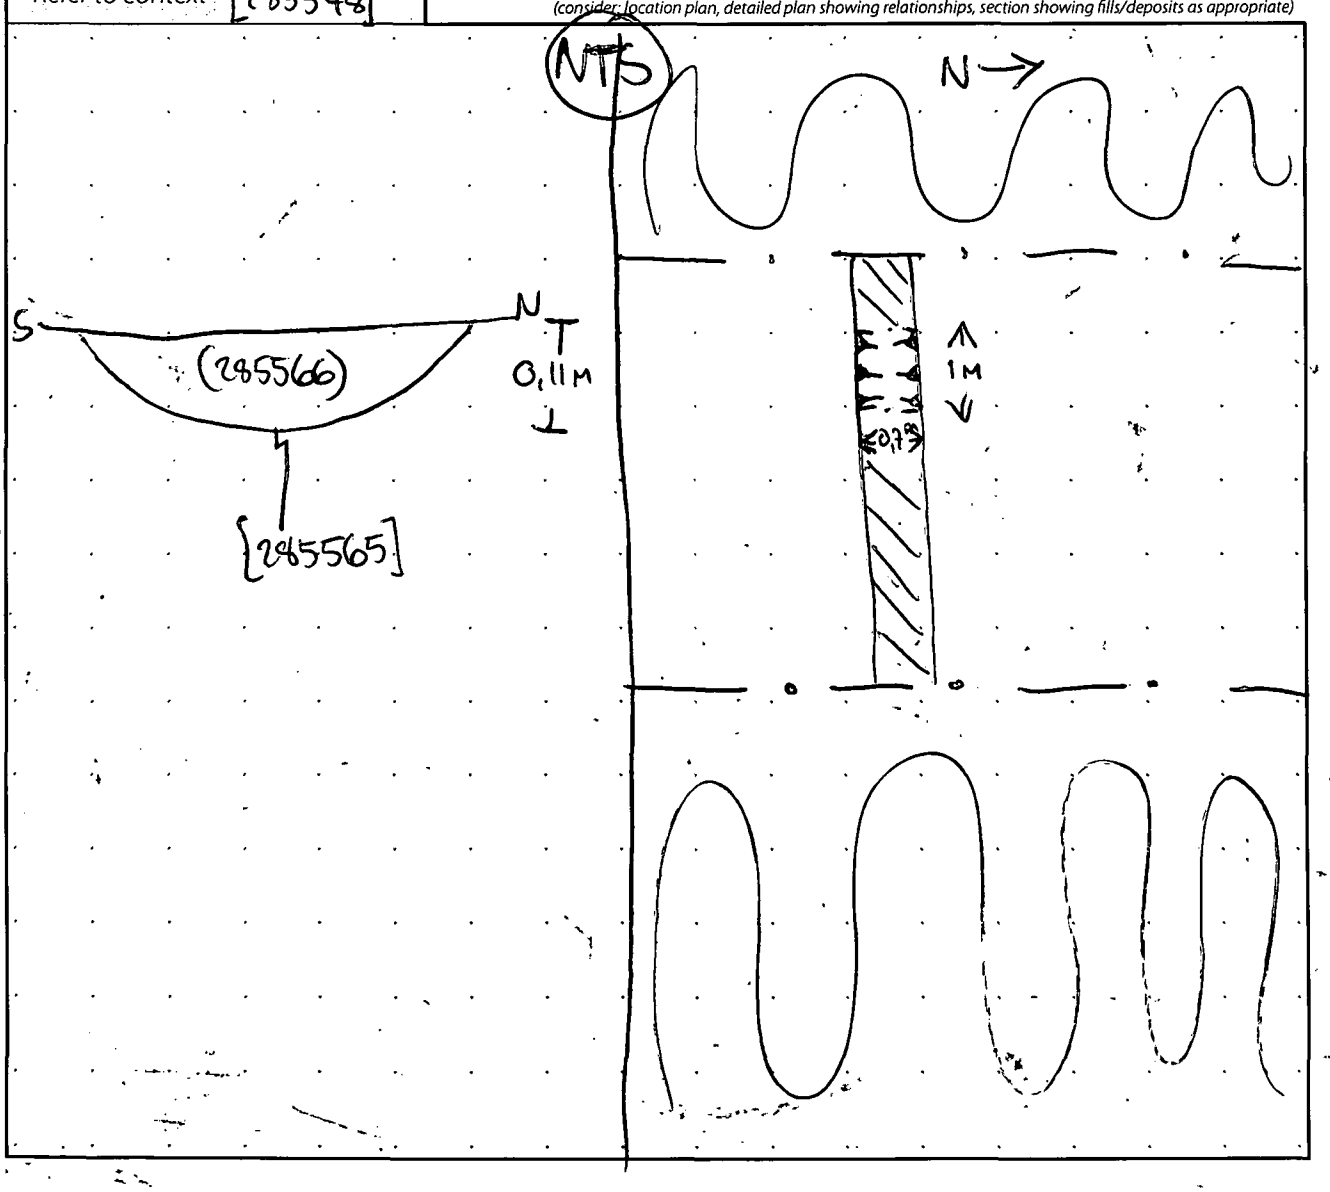

[285557]

A FEW FURLOWS AND POSSIBLE PITS ARE LOCATED WITHIN THE STRIP, BUT APART FROM THAT, NO OTHER ARCHAEOLOGY IS SEEN CLOSE BY.

FUNCTION UNKNOWN.

Refer to context [285548]

FILL OF DITCH [285565].

THE FILL IS THE RESULT OF NATURAL INFILLING AND CONTAINED NO FINDS.

A MODERATE AMOUNT OF ROCKS (N/-10CM ø), AS WELL AS A MODERATE AMOUNT OF IRON PAN AND OCCASIONAL MANGANESE.

Refer to context [285548] + [285565]

ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked * overleaf)

Fill of shallow gully. The fill had a maximum thickness of 0.20m. The fill was composed of a brownish-grey compact clay with few small stone inclusions.

No dating evidence to establish date of the feature

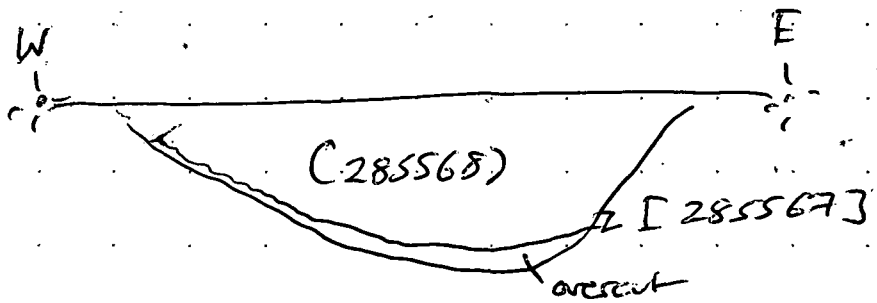

Natural infilling due to lack of evidence to suggest deliberate backfilling of the gully.

## ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

Cut of a ditch. The cut has moderate slopes and a flat base. Orientated E-W running linear.

No datenable finds from the fill (285578) so date is unknown.

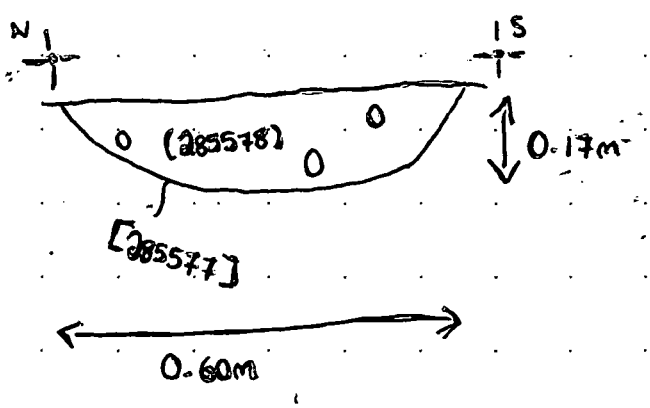

The cut is close to several other ditches which may suggest the possible agricultural use that may have applied from human activity.

Refer to context (285578)

Fill of ditch [285577]. Inclusions of stones and occassional pieces of chalk

No dateable finds so date is unknown.

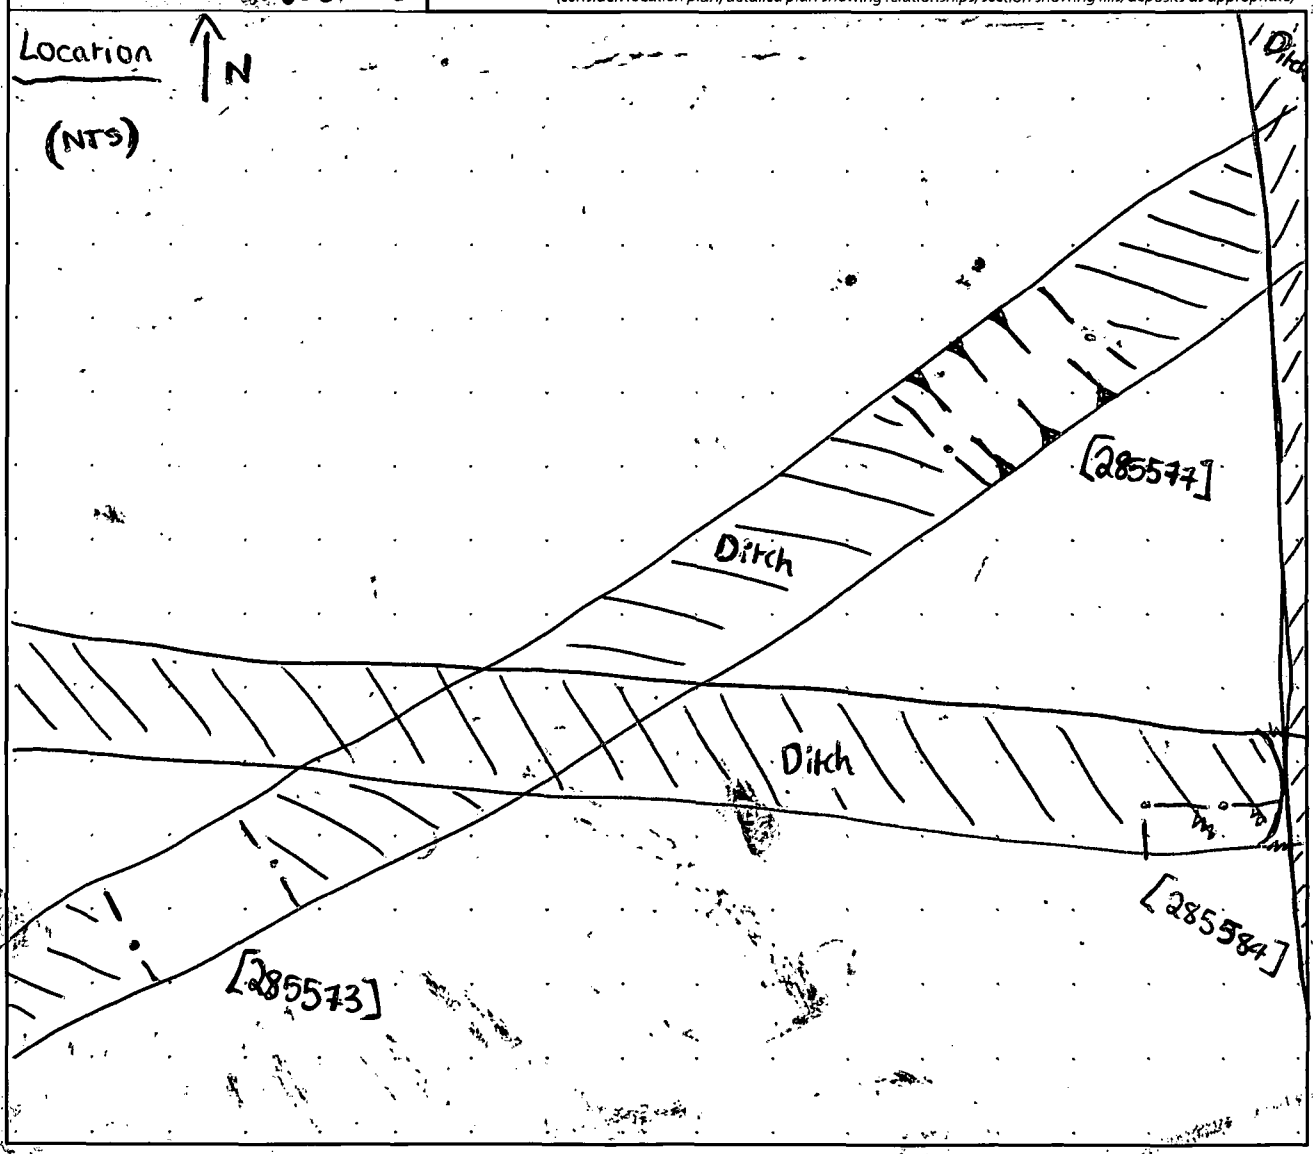

Possibly a natural silting episode as lack of bones suggest no deliberate backfilling.

Fill was very compact and clayey.

Refer to context [285574]

UPPERMOST FILL OF DITCH TERMINUS [285584]

FILL IS NATURALLY INFILLED AND IS DISTURBED BY BIOTURBATION IN ITS UPPERMOST CENTIMETRES. SOME BIOTURBATION IS ALSO VISIBLE IN SECTION.

FILL CONTAINED NO FINDS, AND BASICALLY NO INCLUSIONS.

FILL WAS SAMPLED: TWO BUCKETS S28651.

ADDITIONAL INFORMATION
*(any further details that may be important for understanding the context, including items marked * overleaf)*

CONTEXT (285588) IS A NATURAL INFILL OF CUT [285587]. THIS FILL IS A SANDY CLAY, ALTHOUGH DURING EXCAVATION IT CAME OUT LIKE WATER DUE TO HEAVY FLOODING.

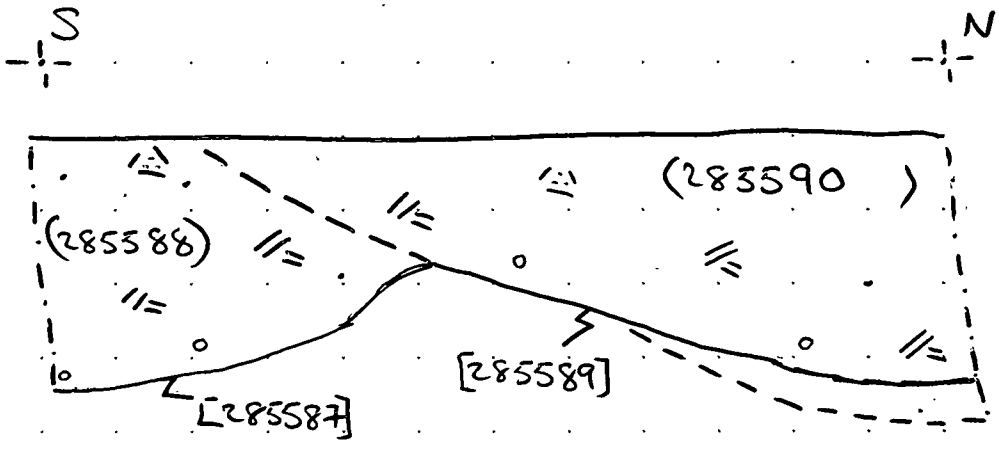

DUE TO THIS FLOODING IT MEANT THE FEATURE AND FILL WAS NOT 100% EXCAVATED AS IT WAS ABANDONED. ACCURATE MEASUREMENT WERE NOT OBTAINED EITHER BUT THE FILL/CUT MEASURED AROUND 0.10M, POSSIBLY SLIGHTLY LESS.

ALTHOUGH NOT 100% EXCAVATED THE CUTS EDGES AND BASE WAS EXPOSED WITHIN 90% OF THE FEATURE.

IN TERMS OF INCLUSIONS, THERE WAS VERY LITTLE WITHIN. OCCASIONAL STONES NO LARGER THAN 2CM AND MANGANESE WHICH HIGHLIGHTS THAN IT WAS A NATURE INFILL.

Refer to context [285587] (285588)

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

CUT [285589] IS OF A DITCH WHICH RUNS NE/SW WHICH CUTS THROUGH ANOTHER EARLIER DITCH [285587]. AS MENTIONED IN SHEET [285587], WEATHER CONDITIONS/GROUND CONDITIONS MEANT THE FEATURE HAD TO BE ABANDONED DUE TO SEVERE FLOODING. AS A RESULT THE FEATURE WAS NOT 100% EXCAVATED NOT FULLY RECORDED. HOWEVER A RELATIONSHIP WAS IDENTIFIED, SEE (285588) SKETCH FOR DETAILS.
IN TERMS OF MEASUREMENTS, AGAIN THESE WERE NOT TAKEN AS THE BASE WAS NOT FULLY EXPOSED. WHAT WAS CLEAR IS THAT [285589] IS DEEPER BUT NARROWER THAN [285587].

*This form is incomplete if fields marked with ◤ are empty. PTO for additional information (and describing all items marked with *) and sketches.*

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

CONTEXT (285590) IS THE NATURAL INFILL OF DITCH [285589]. SIMILAR TO THE FILL WITHIN DITCH [285587], BOTH ARE YELLOWISH BROWN AND BOTH ARE SANDY CLAY HOWEVER (285590) HAS MORE CLAY WITHIN IT THAN (285588) - THE FILL OF [285587]. THE RATIO OF SAND IS HIGHER WITHIN (285588) THAN IT IS WITH (285590). IN TERMS OF INCLUSIONS, ITS THE SAME AS (285588), OCCASIONAL STONES + MANGANESE.

AS EXPLAINED WITHIN [285589] CONDITIONS LED TO THE ABANDONMENT OF THE FEATURE MEANING WE WERE UNABLE TO GET IT FULLY EXCAVATED AND RECORDED. MEASUREMENTS WERE NOT TAKEN DUE TO BASE NOT BEING FULLY EXPOSED HOWEVER AN ESTIMATE WOULD PUT IT AT AROUND 0.12M, DEEPER THAN [285587].

Refer to context (285588) [285587]

## ADDITIONAL INFORMATION

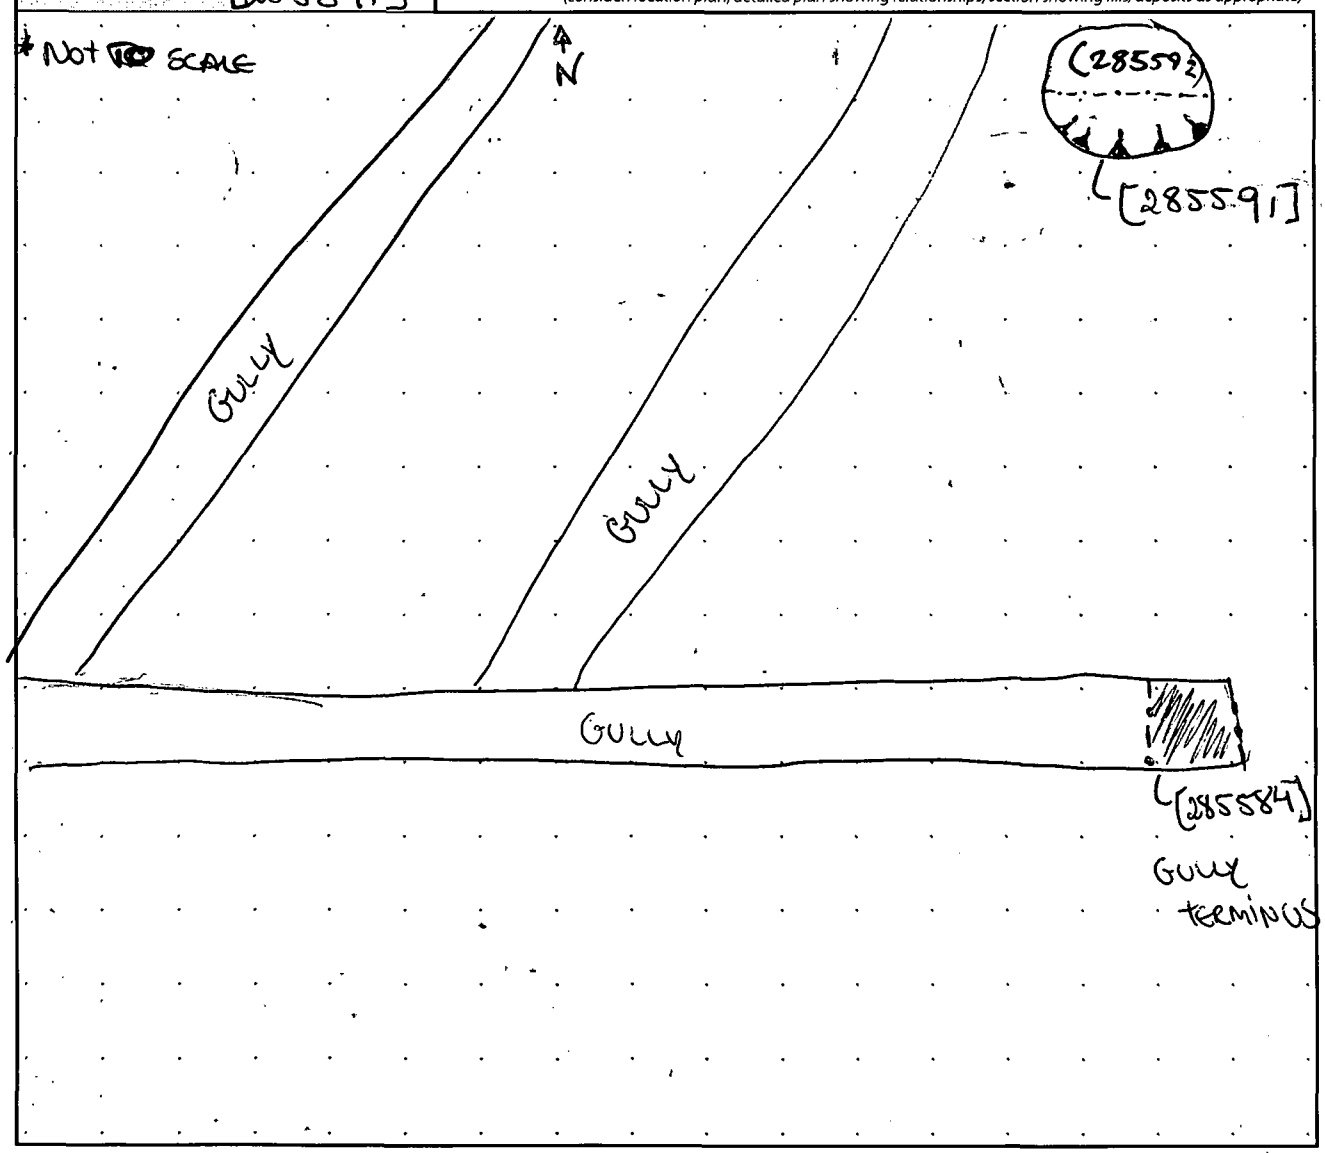

*(any further details that may be important for understanding the context, including items marked * overleaf)*

Cut of a ditch. The cut has moderate slopes and a flat base. Runs linear NE - SW.

No dateable finds from the cut fill (285594) so date is unknown.

The ditch runs parallel to another ditch and is surrounded by several other ditches.

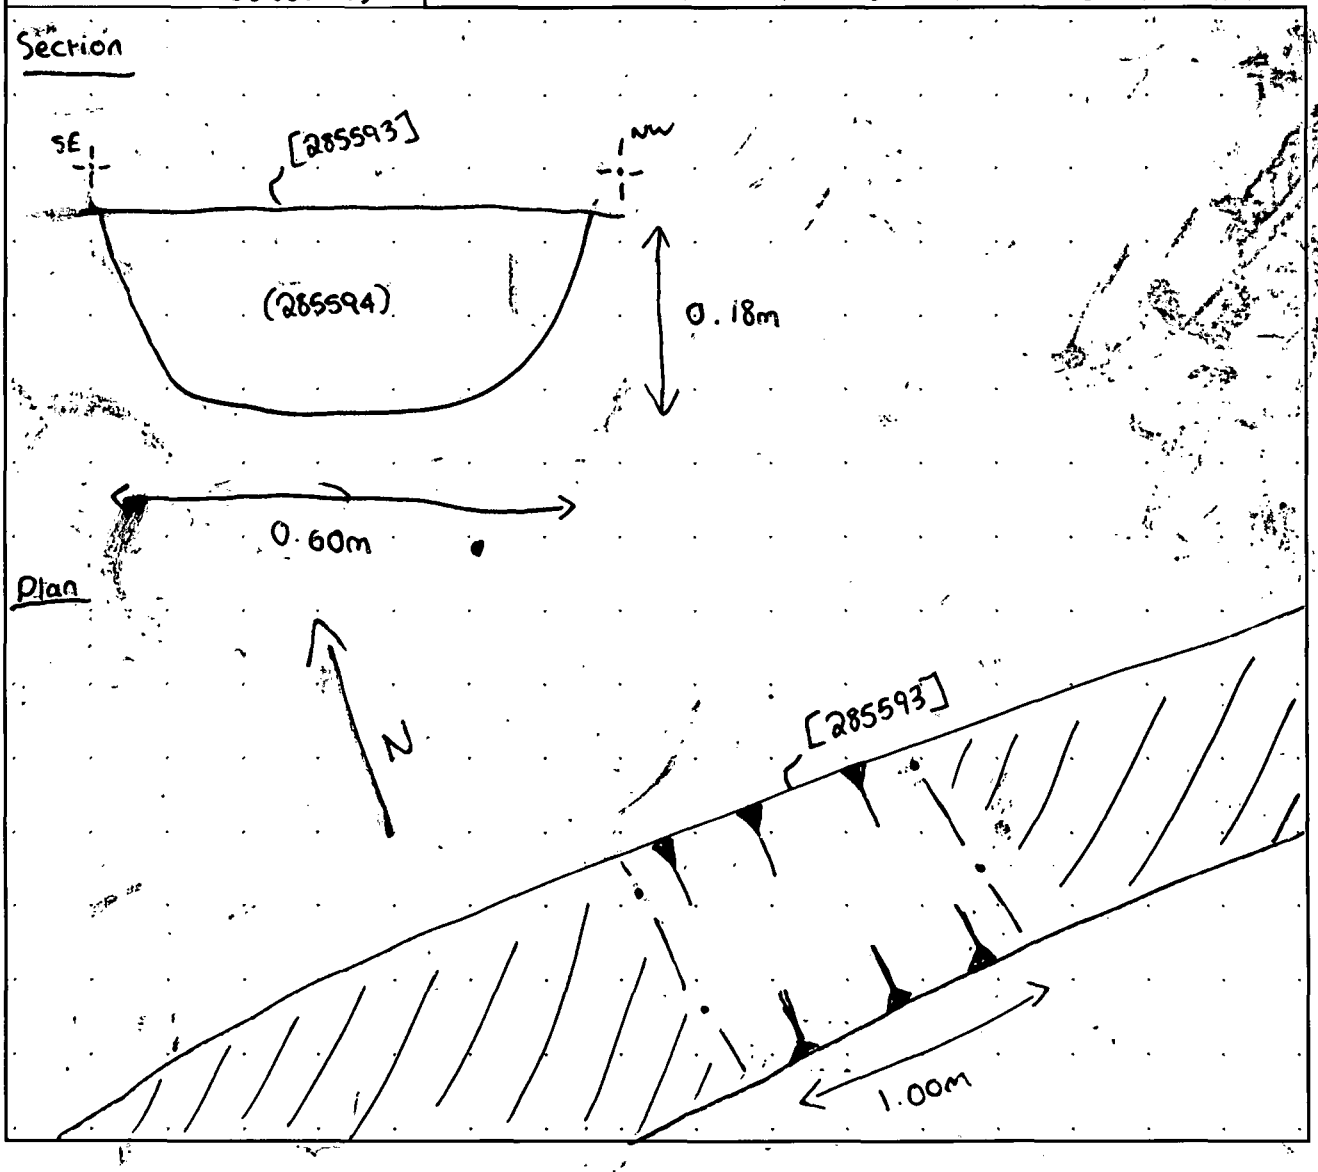

Possibly used for an agricultural purpose.

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Fill of ditch [285593]. Inclusions of stones that were small in size.

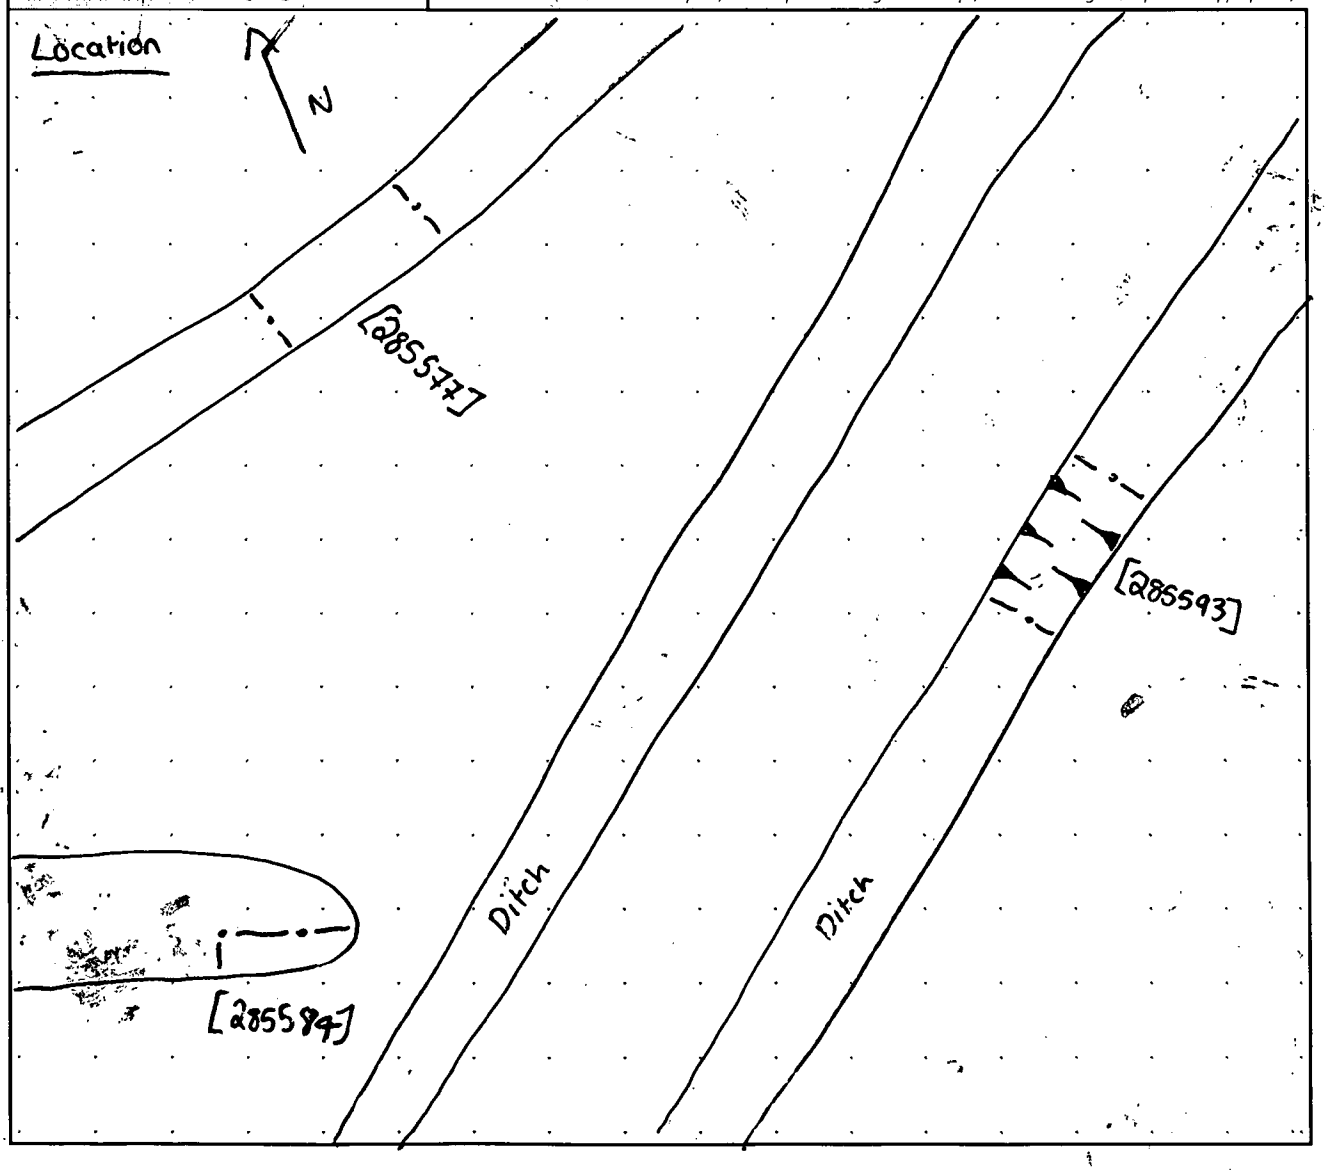

No dateable finds so date is unknown.

Possibly a natural silting episode as lack of bone suggests no deliberate backfilling.

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

cut of western trackway ditch. The feature has a NE-SW orientation. The cut has a maximum depth of 0.33m and a width of 1.33m however this measurment recordes the cut after process of slumping are accounted for, so the width would be only around 1m originaly.

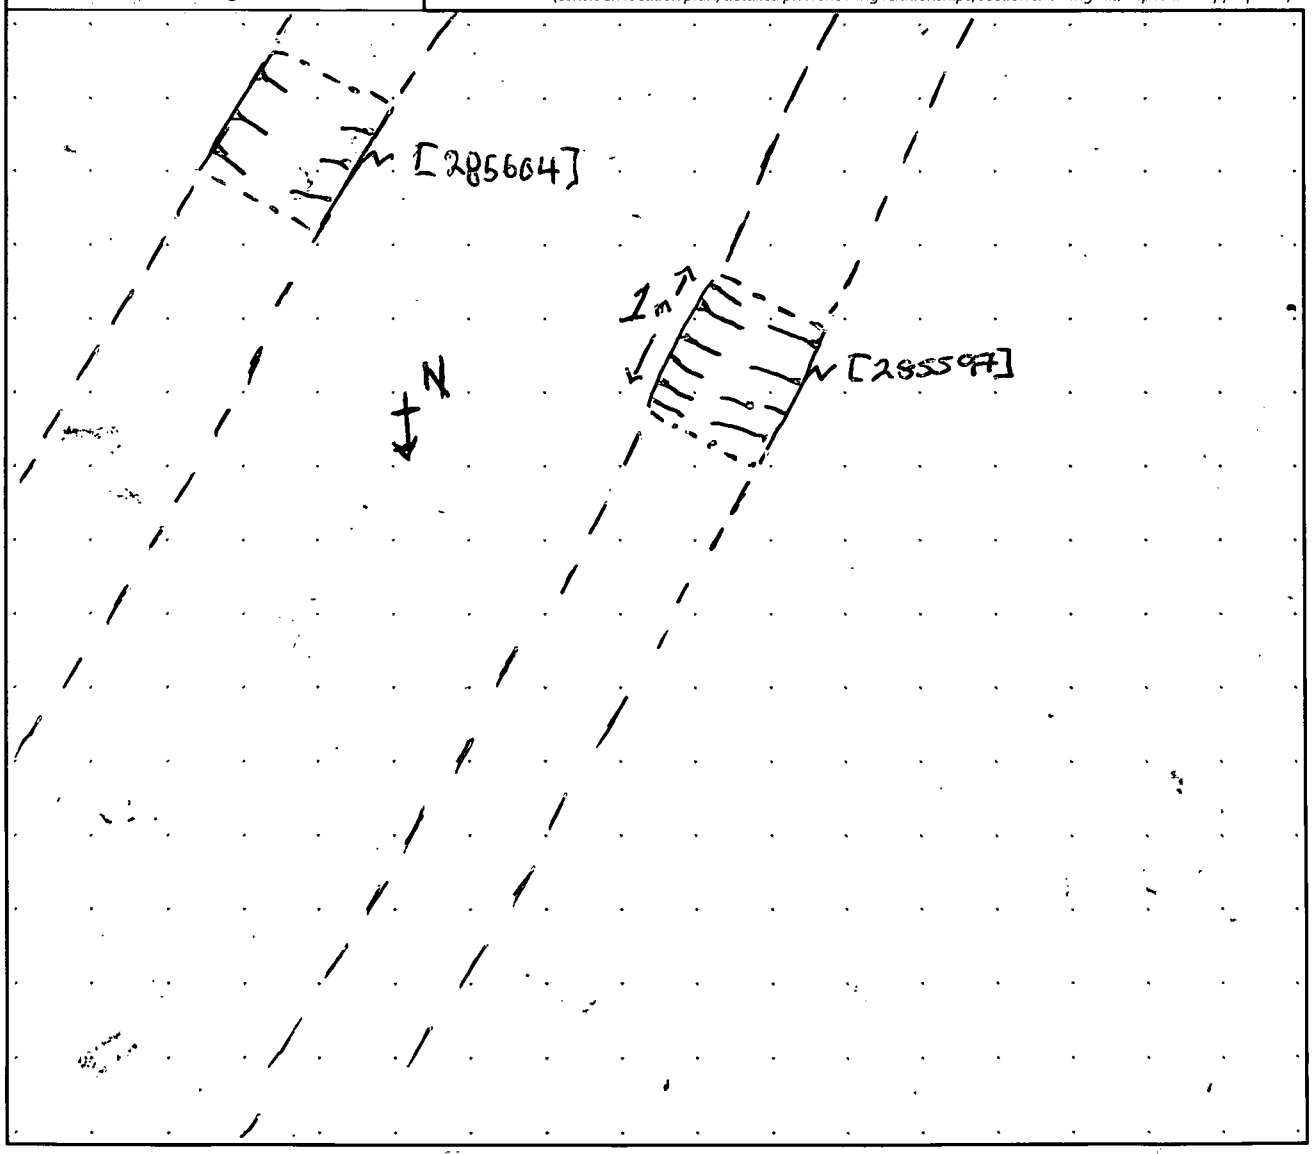

The western side of the cut has be weathed badly and so appears more stepped that the eastern side of the ditch so has a more moderate slope compared to the steep eastern side.

Feature probably of Roman date as in makes up part of a trackway leading to and respecting Roman buildings and enclosures.

ADDITIONAL INFORMATION
*(any further details that may be important for understanding the context, including items marked * overleaf)*

Slumping fill of context [285597]. maximum thickness of fill is 0.19m.

The fill appears to be made up of the slumped western side of the ditch - caused by water action.

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Cut of A Ditch [285603] DESIGNED. The cut has a maximum ~~thickness~~ depth of 0.36m and a maximum width of 1.15m.

The ditch cut represents the eastern ditch of a Roman trackway running NE-SW. The trackway runs to a concentration of Roman linears and buildings.

The cut has only one fill context (285604).

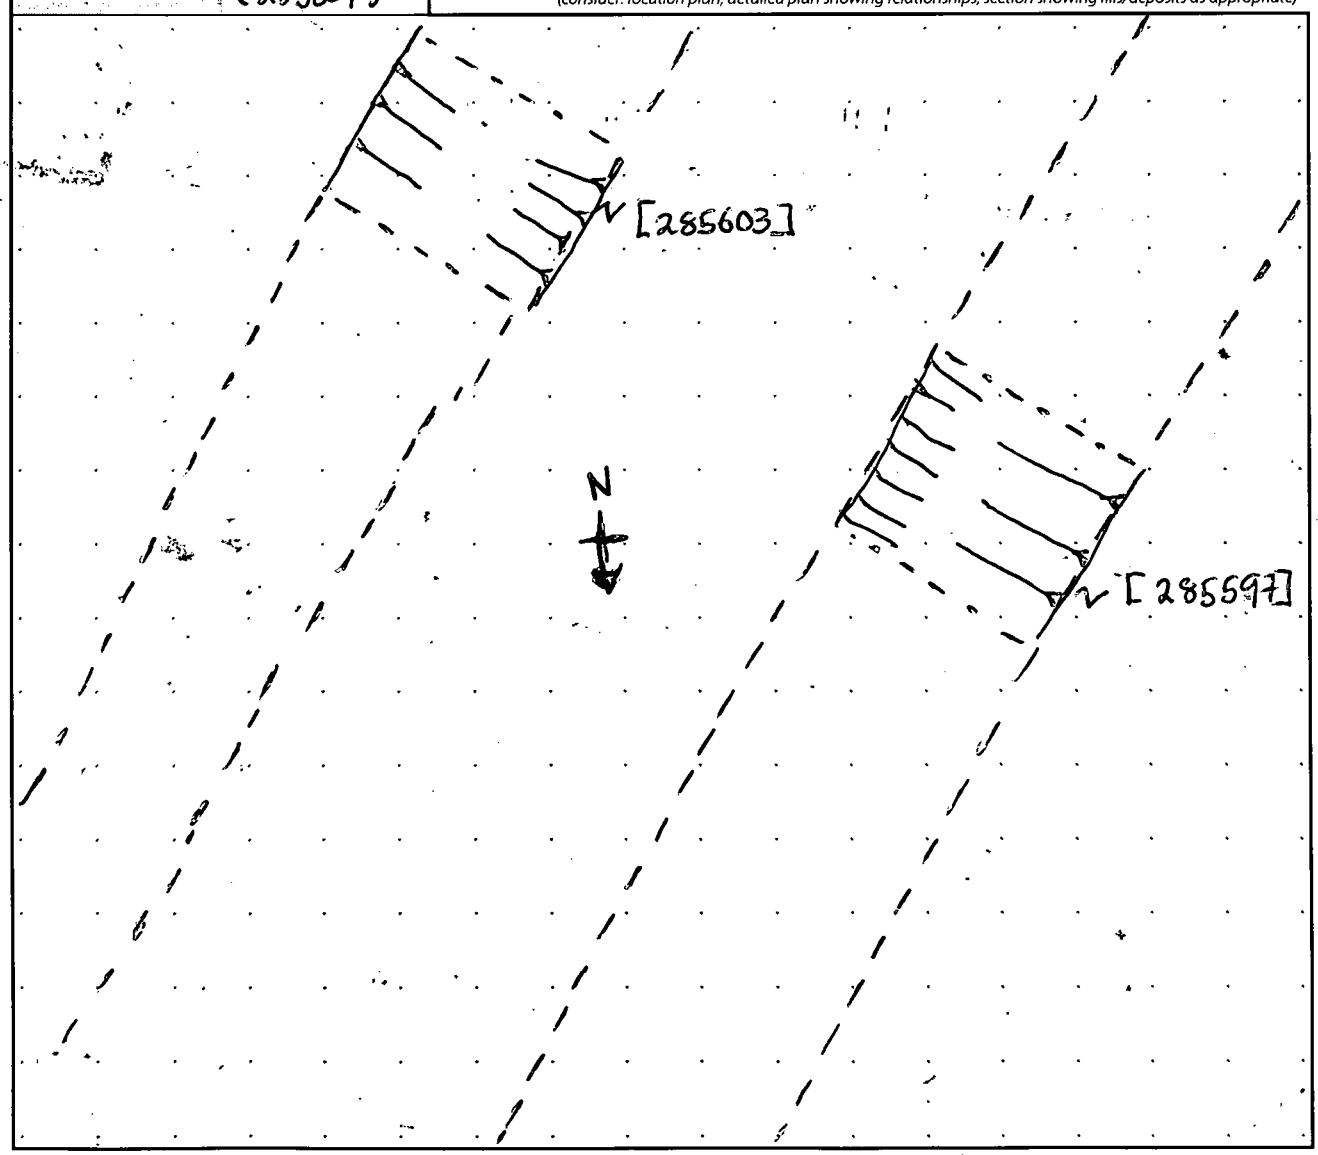

The sides of the cut are steep and therefore show little weathering i.e stepping seen in context [285597]. The cut also has a concave base.

The feature would have helped deliniate a pathway and help to drain/ keep trackway clear and dry

## ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

cut of cremation burial. the cut has a maximum depth of 0.12m and a maximum diameter of 0.22m

The burial cut, cuts into a tree throw / bowl so the cut has been excavated roughly following the fill of the cremation cut (285609). The cut appears smaller to compared with others in the general area of site.

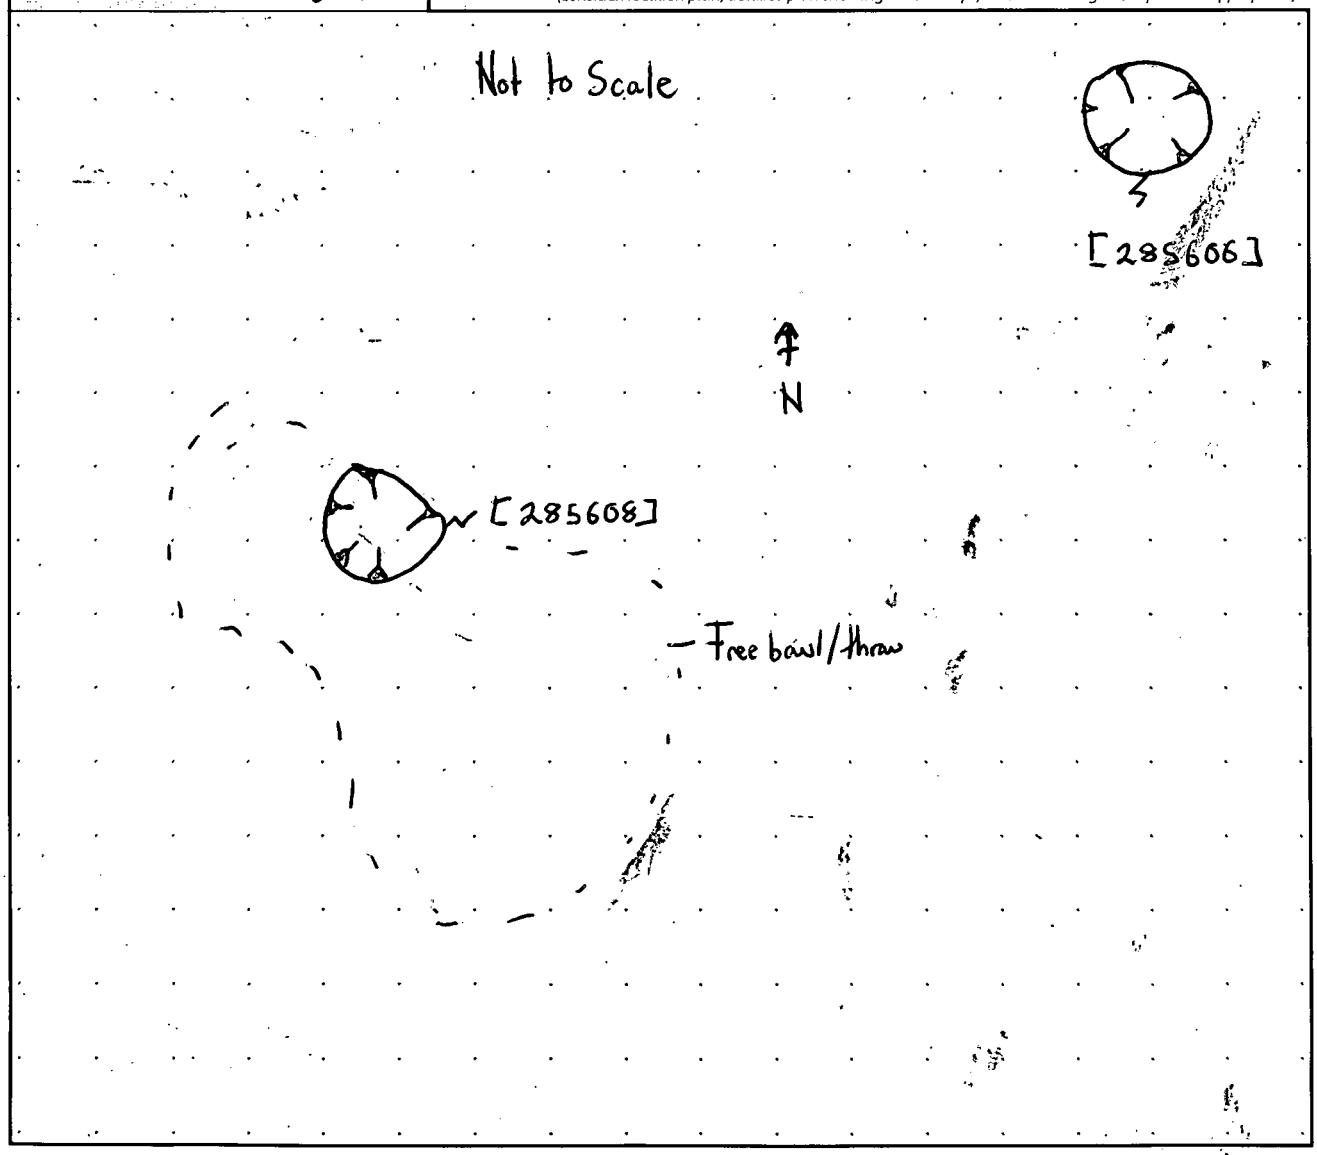

The cut is a cremation burial and so was designed to contain cremated bone possibly human bone - present in fill context (285609).

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Fill of cremation burial [285608] - The fill had a maximum thickness of 0.12m

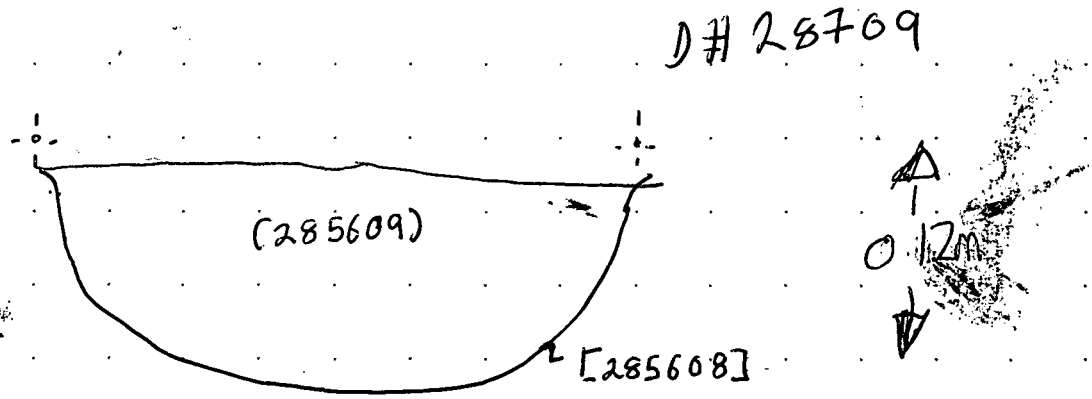

The fill although composed of a brownish-grey-silty-clay containd a moderate amount of cremated bone and charcoal.
The fill therefore represents the burial of human & animal remains.
The fill has been sampled 100% ⟨528655⟩

No datable finds however most likely to be late IA or early RB.

CONTEXT [28561?] IS A CUT OF A CREMATION, MEASURING 0.40M IN DIAMETER & 0.13M DEEP. IT IS A FAIRLY SHALLOW CUT BUT THAT WOULD BE EXPECTED WITH A CREMATION. THERE SEEMS TO BE AT LEAST THREE OTHERS NEARBY, SUGGESTING AN EVENT TOOK PLACE. IT IS UNCLEAR WHAT ~~THERE~~ BURIAL/CREMATION OF THEIR DATE IS. MULTIPLE PEOPLE?

Refer to context [28561?] [28561?]

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

CONTEXT (285614) IS A PRIMARY FILL OF CREMATION [285612]. THIS CONTEXT COULD WAS SIMILAR TO (285613) AND AT FIRST THOUGHTS IT WAS BELIEVED TO BE THE SAME HOWEVER ON CLOSER INSPECTION (CHANGE OF LIGHTING) IT SEEMED DIFFERENT. THE FILL HAD LESS CLAY WITHIN IT PLUS ~~LESS~~ SIGNIFICANTLY LESS BONE AND CHARCOAL. WHETHER OR NOT IT IS A SEPERATE EVENT/ SEPERATE CREMATION IT IS NEAR IMPOSSIBLE TO SAY. WHAT CAN BE SAID IS THE CUT [285612] WAS MADE AND THEN FILLED WITH (285614) AND THEN (285613) WAS ~~LAID~~ INFILLED ONTOP TO COVER THIS CONTEXT.

Refer to context (285613) [285612]

cut of grave for Sk15 (285650). The cut has a width of around 0.50m and a rough length of 1.66m. The cut has a maximum depth of 0.20m. Concave base with gentle sides

The cut of the grave has an East - west orientation

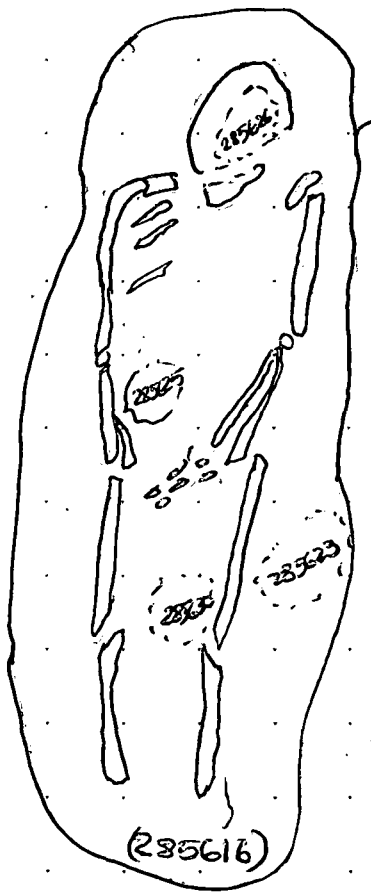

The grave cut is reasonably long at 1.66m allowing the body to be placed in a supine position.

The grave is surrounded by other burials orientated in a North - South orientation and is truncated or is itself truncates other burials at the western end of the cut.

Refer to context

ADDITIONAL INFORMATION

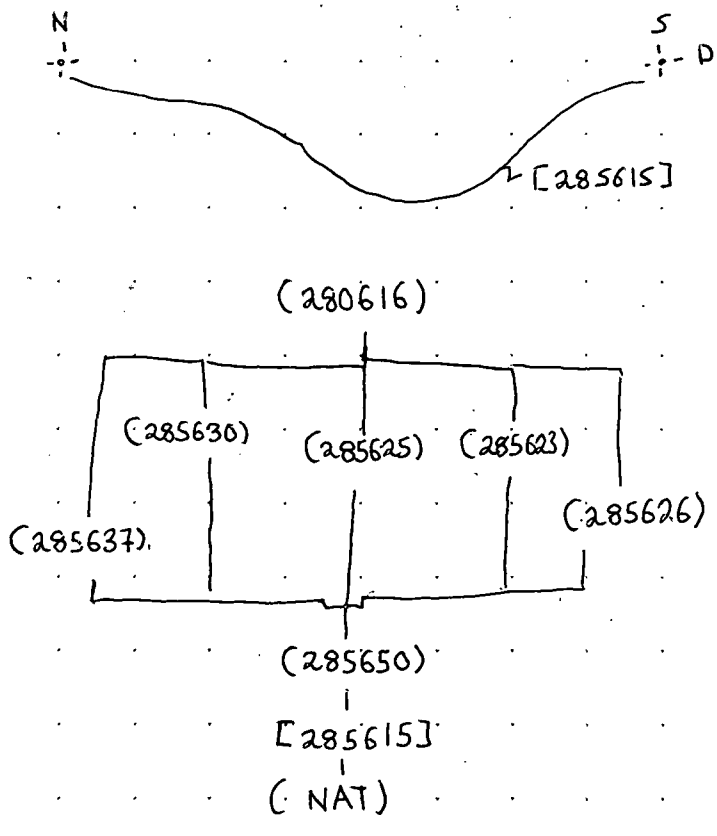

*(any further details that may be important for understanding the context, including items marked * overleaf)*

This is the deliberated backfill of the burial. It was the proper infill which was covered the body. As into the cremations, we found here the rest of the coins probably because them felt down from the place where them where put.
We separated it from the fill we found on the torso B and we can see it all around the body.
It has just some small and subangular stones into it (≤ 0'05m diameter). We also found some manganese and some flakes of burn bone (probably from the cremations).
That was deliberated backfill of silty clay with not more of 0'20m of thikness.

Refer to context [285615]

Cut of tree baul [285619]. The cut has a maximum depth of 0.29m

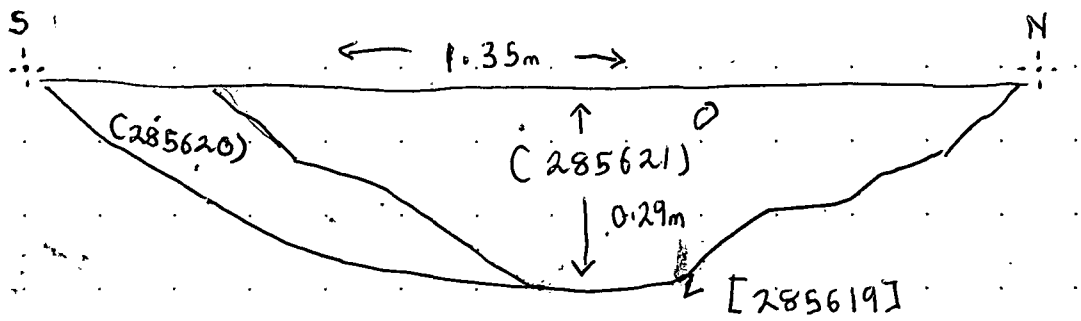

The base and shape of the feature are irregular which suggest that the cut was created by natural processes i.e Bio turbation.

Tree bow cause when a tree has fallen down.

The feature is next to a Roman cremation burial which appears to be cutting fill (285621) of the tree throw dating the feature as Roman or Pre-Roman in date.

Refer to context ~~(285620)~~ [285619] (285621) ~~(285621)~~

(any further details that may be important for understanding the context, including items marked * overleaf)

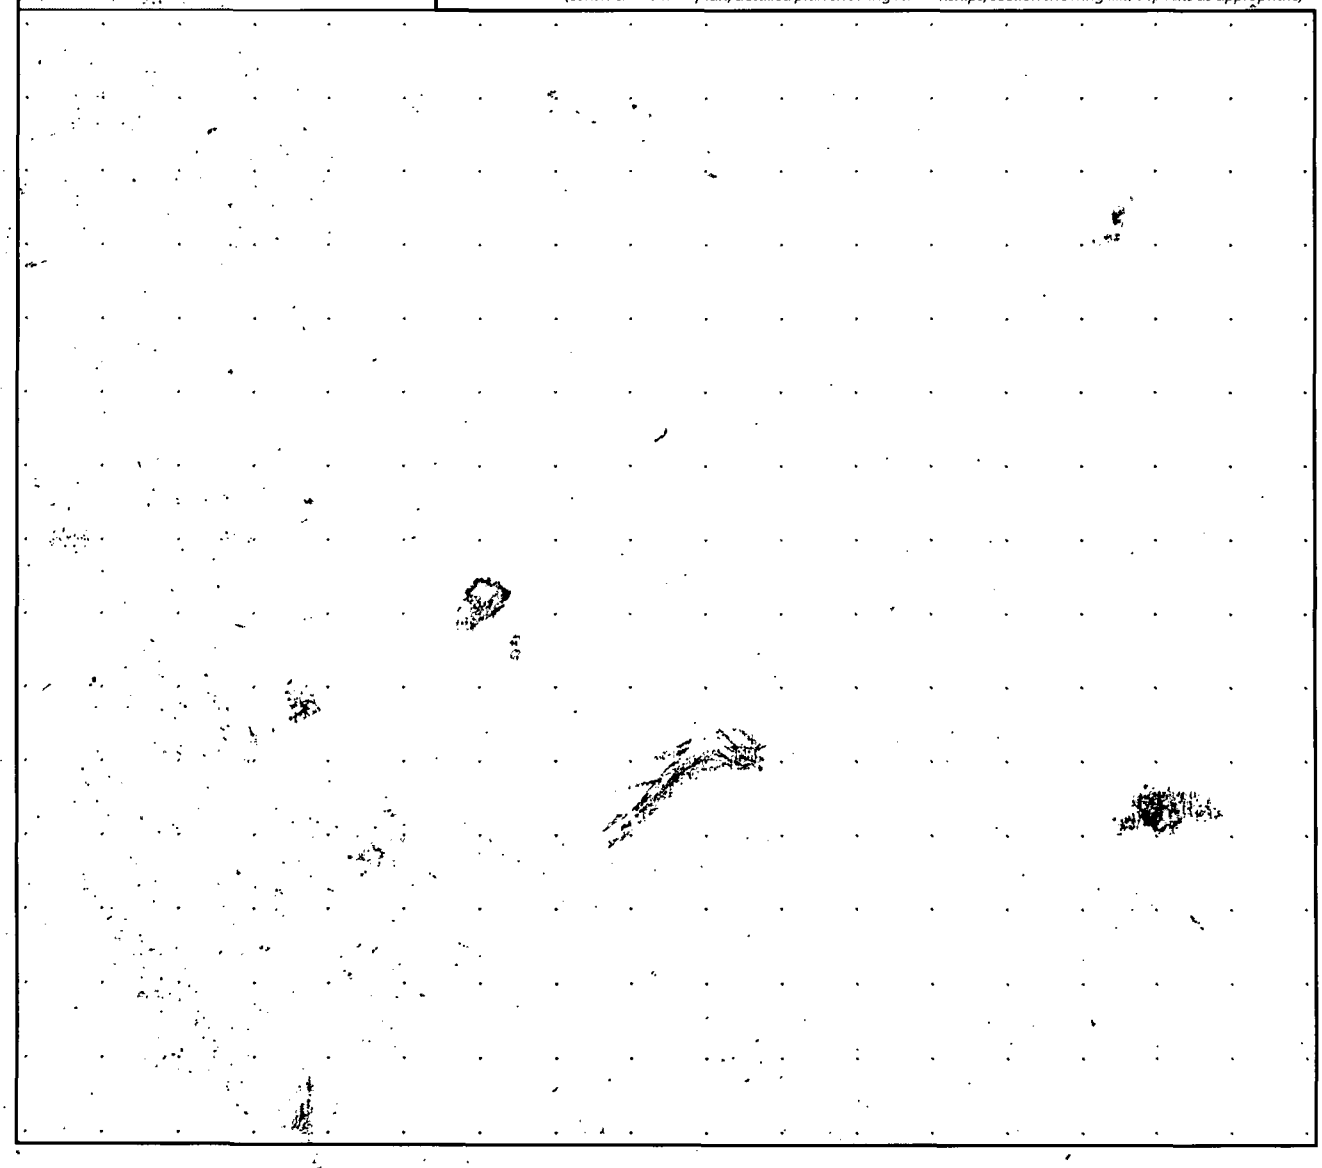

Fill of tree throw [2856197]. The fill has a maximum thickness of 0.21m. The fill is composed of a mid - greyish - brown - silty clay.

No dating evidence found.

The fill most likely was the first lapping event as the tree fell to the North leaving a hole which appears to be filled with disturbed soil and Natural Drift.

Refer to context [2856 19] (28 5621)

## ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

Fill of tree throw [285619]. Maximum thickness 0.29m.
The fill is composed of a mid-grey silty-clay

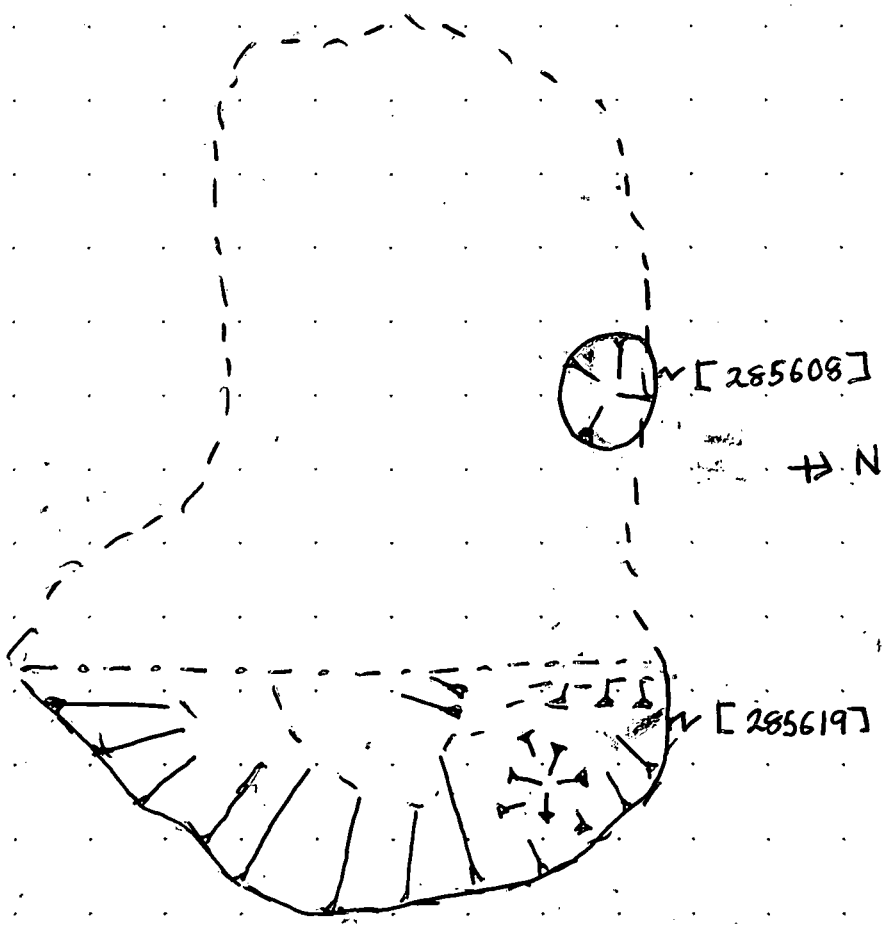

No finds to help establish a date for the context.

Probably a colluvial fill after tree had been removed from the ground

Refer to context [285619]

## ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

cremation deposit found near the outer side of the left leg of SK15 (285650)
No recorded thickness but roughly around 0.10 m.

12 copper coins found within the deposit along with two Fe objects might represent a box or leather pouch used or placed in the grave as grave goods. The deposit also had a few flakes of cremated bone but this might represent food stuff prepared at a feast rather than rather human cremation.

Similar to deposits (285623), (285625), and (285626) might represent different grave opening by seperate individuals.
the number of coins found in this deposit indicate a wealthy or reasonably important individual as othe North-South burials in the area have no grave goods.

Refer to context [28615] (285616)

## ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

cremation / grave good deposit located near the Stomach area. The deposit has not been measured for thickness however it was roughly 0.10m thick. Dark-black-silty-clay with charcoal and burnt bone.
The deposit contained one copper coin and a concentration of cremated bone was found within the context. Might represent votive offering as it could be cremated animal bone - from a funeral feast?

Simular to deposits (285630), (285626) and (285623).

Refer to context [285615] (285616)

## ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

A dark black deposit of silty clay found around the skull of SK15 (285650).

The context contained a total of three copper coins however unlike the cremation fill with the body or cremated bone was found in the deposit. No cut context was given to the deposit.

The deposit most likely represents an offering of gave goods placed near the head of the person in the grave before it was backfilled. The deposit might represent a pouch or other organic material.

Refer to context [285615] (285616)

## ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

This represents the fill of a cremation burial however it might also be described as a deposit related to SK15 / (285650). ~~The deposit was assigned a subnumber of 285627~~ and was located under the left leg see plan drawing D 28715.

The fill was dark black silty-clay with a rough fill thickness of 0.10m. The fill context contained burnt / cremated bone and three copper coins. The coins appear Roman in date. Not a great amount of cremated bone so might indicate animal cremation / offerings to inhumation SK15 as the body was placed in its grave cut.

The fill was sampled S 28665.

The cremation appears to have occured at the same time as cremations: (285622), (285625) and deposit (285626). All cremation fills were found to contain more than one copper coin along with the cremated bone. They might be interpreted as offerings to body or possibly other human cremations buried along with SK15.

Refer to context [285615] (285616)

## ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

NATURAL INFILLING OF DITCH [285632] INVESTIGATED IN A RELATIONSHIP SLOT (1'90 x 1'20 x 0'80m)
THE FILL CONTAINS OCCASIONAL STONES (-3cm ⌀ WITH SUB-ROUNDED SHAPE & 5cm ⌀ WITH SUB-ANGULAR SHAPE) AND OCCASIONAL CHALK (2-4 cm ⌀ WITH SUB-ROUNDED SHAPE).
NO ARTEFACTS WERE RECOVERED. LIKELY DSTM
THIS FILL COULD BE CUT BY A FURROW (REFER TO [285632] TO THE PLAN FOR SEE THE FURROW), BUT IT'S IMPOSSIBLE TO IDENTIFICATE IN THE SECTION DUE TO THE COMPOSITION OF THE FILL, SIMILAR TO THE FURROW

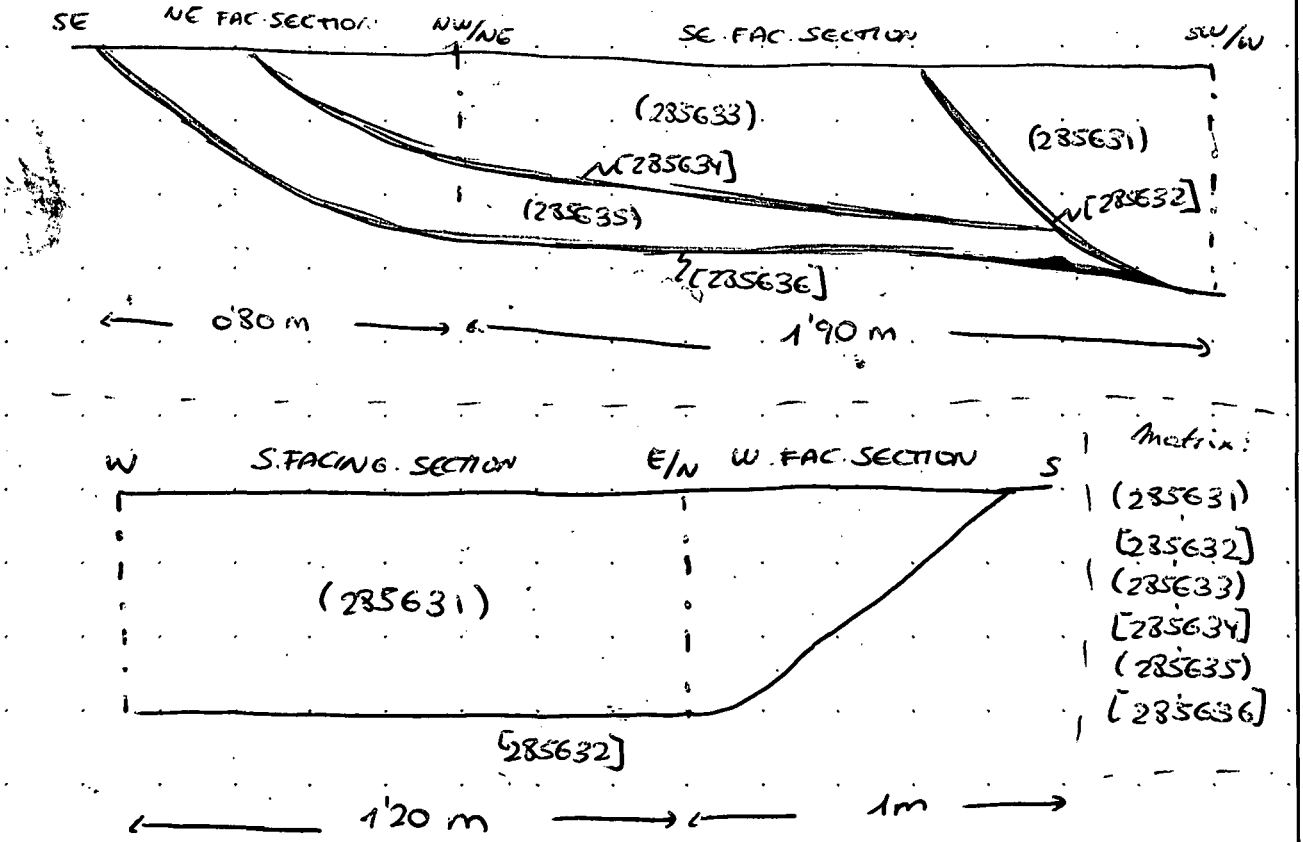

Refer to context (285631) [285632]

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Natural infilling of ditch [285634] investigated in a relationship slot (0.80 x 1.20 - 1.90 m).
The fill contains moderate stones (-3 cm Ø with sub-rounded and sub-angular shape).
No archaeological remains were found.
This fill is cut by the E-W running ditch [285632]

## ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

Dark black area of deposited material which possibly represents a wooden box on the chest of the body SK15 (285650). Roughly 0.05m thick.

Possibly the reason SK15 sinks deeper in the area.

8 copper coins found within the deposit which might suggest that the box (possible) contained more grave goods possibly organic material which hasn't survived.
Small amount of burnt bone and charcoal within the deposit.

Refer to context [285615] (285616)

## SKETCHES

Cut of Gully [285638], orientation N-S.
This Gully cuts a ditch [285657] and has approx. 18m of length, then dissapear where the ditch make a curve to East. Probably is a Roman Gully according with the V shape.

Refer to context [285638]

[285640]

- CUT OF GULLY RUNNING NW ↔ SE (ACTUALLY POSSIBLY NEARER TO WNW ↔ ESE)
- CONTAINS ONE FILL
- SEEMS TO BE CUT BY E ↔ W RUNNING DITCH [285642], ALTHOUGH FILLS ARE SO SIMILAR THAT THIS IS UNCERTAIN. COULD BE CONTEMPORARY.
- MODERATELY SLOPED SIDES, CONCAVE BASE, NEITHER VERY WIDE, NOR VERY DEEP. POSSIBLE DRAINAGE / IRRIGATION CHANNEL?
- GULLY INTERSECTS WITH [285640], BUT DOES NOT APPEAR TO COME OUT OF THE OTHER (NORTHERN) EDGE. DOES THIS IMPLY DIRECT, CONTEMPORANEOUS RELATIONSHIP?
- DOES NOT RUN PARALLEL OR PERPENDICULAR TO ANY OTHER NEARBY LINEAR FEATURES THAT I CAN SEE.
- FILL CONTAINED SHERDS OF POTTERY (POSSIBLY ROMAN?)

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

The human remains SK15 (285650) were found in a supine position lying on its back face up. Damage from the plough has caused the skull to be crushed partially, the feet have also been damaged by the plough. The bones are in poor preservation.
The ribs, spinal column and pelvis have not survived the ground conditions. Sexing the remains are unclear.

The remains after being placed in grave cut [285615] had small deposits of cremated bone and copper coins placed between the legs to the side of the left leg on the stomach and around and on the head. coins also appear to have been arranged on the face of the inhumation. A box might have also been placed on the chest which also contained 8 copper coins.

The burial in total had 30 coins of probable Roman date.
The burial was orientated East-west with head to the East and feet to the west.

Refer to context: [285615] (285616)

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Cut of Ditch [285657] running N–S, and cuted by a Gully V-shape [285638].
The feature has approx. 50m and makes a curve in East direction. The Gully [285638] just cut the Ditch for aprox: 18m and disappear.
No dating evidence

Refer to context [285657]

[285014] [285645]

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf.)

Cut of ditch [285687]. Filled by (285684) + (285685) + (285688). SE-NW running linear. Likely a continuation of ditch [285645]. Appears to ~~cut~~ truncate ditch [285691] and all its fills. Generally not clear in plan.

Likely to be part of a field system. Fill (285688) produce material culture dating to the R-B period, although very little material was present.

Refer to context [285691]

ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked * overleaf)

Silt deposit bridging gap inbetween two ditches, has previously been mapped as a bank in ~~west~~ features to the west of it.

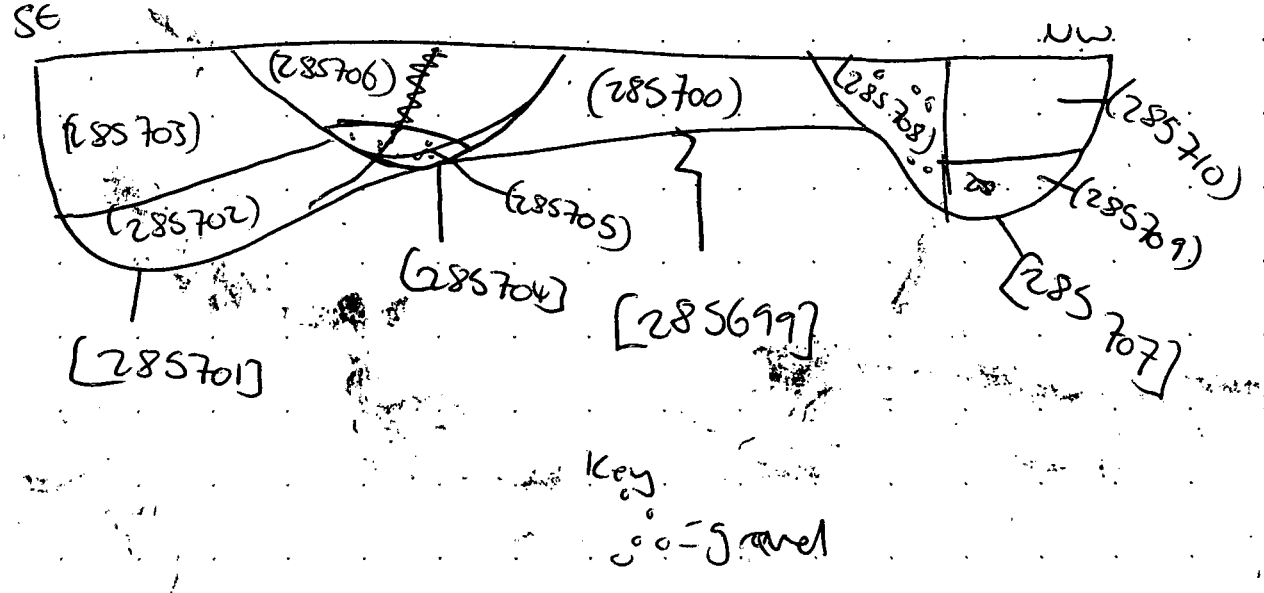

Stone inclusions were large gravel, small irregularly shaped stones.

Has patches of blueish grey clay, ~~not~~ not enough to be an individual fill. Not patches inconsistently throughout.

Refer to context

ADDITIONAL INFORMATION
*(any further details that may be important for understanding the context, including items marked * overleaf)*

[285711] IS A RELATIVELY SHALLOW DITCH WHICH HAS TWO FILLS. THESE FILLS ARE NATURAL INFILLINGS. THE DITCH HAS A VERY REGULAR, RECTANGULAR SHAPE, CURRENT EXCAVATION SLOT WAS INITIALLY TO IDENTIFY THE RELATIONSHIP BETWEEN TWO DIFFERENT FEATURES WHICH EVENTUALLY TURNED OUT TO BE THE SAME. ONLY A SMALL PIECE OF CBM HAD BEEN RECOVERED. THAT IS POSSIBLE TO SAY IT MIGHT BY A DRAINAGE DITCH OR A SHALLOW BOUNDARY DITCH. THERE IS ALSO A SMALL, GULLY KIND OF A CUT JOINS THE E-W ORIENTATED BRUNCH OF THE DITCH FROM SOUTH [285714]. BY ITS SQUARE SHAPE WE CAN ASSUME THAT THIS DITCH IS FROM THE ROMAN PERIOD, HOWEVER NO OTHER EVIDENCE CAN PROVE THIS. THE GULLY IS POSSIBLY CONTEMPORARY TO THE DITCH AS THERE IS NO VISIBLE CUT IDENTIFIED, THEREFOR THE GULLY HERE IS NOT TREATED AS A CUT WHICH CUTS THE DITCH, HOWEVER THERE IS CHANCE FOR THAT TOO.

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

(285712) IS A HEAVILY COMPACT GRAVELY-CLAY FILL WHICH HAS ONLY A SMALL PIECE OF CBM RECOVERED. THE GRAVEL IN THIS FILL IS IN SMALL GROUPS IN IRREGULAR PLACES WHICH INDICATES THAT IT HAD BEEN MORE LIKELY WASHED INTO THE FILL RATHER THAN DELIBERATELY THROWN INTO IT. THE NATURAL HERE AROUND IS VERY GRAVELY WITH THE SAME SMALL SIZED STONES AS THE PATCHY BITS IN THE FILL. THIS IRREGULAR MIX OF CLAY AND GRAVEL INDICATE THAT THIS FILL ACCUMULATED BY NATURAL CAUSES SUCH AS WEATHER WEAR OR THE WORK OF WATER.

ADDITIONAL INFORMATION
*(any further details that may be important for understanding the context, including items marked * overleaf)*

(285713) IS A SMALL PATCH-LIKE FILL OF A ~~SQ~~ RECTANGULAR SHAPE DITCH. THERE IS NO FIND RECOVERED FROM HERE. BASED ON ITS IRREGULARITY AND SMALL DIMENSIONS IT IS POSSIBLY A NATURAL INFILLING. ITS SPREAD IS UNEVEN AND DOES NOT LOOK LIKE A DELIBERATE FILL. POSSIBLY ACCUMULATED BY WEATHER WEAR OR AS A DEPOSITION OF A WATER STREAM WITHIN THE DITCH.

Refer to context: (285712)

ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

[285714] IS A LINEAR SHAPE, RELATIVELY NARROW AND CONSIDERABLY SHALLOW GULLY. IT RUNS INTO A RECTANGULAR SHAPE DITCH FROM „S" DIRECTION. NO FINDS HAVE BEEN DISCOVERED FROM HERE. IT HAS ONLY ONE FILL WHICH IS A COMPACT CLAY. ITS FILL IS PROBABLY CONTEMPORARY WITH THE FILL OF THE DITCH AS THERE IS NO VISIBLE SIGN OF A CUT LINE. IT IS DIFFICULT TO IDENTIFY THE RELATIONSHIP BETWEEN GULLY AND DITCH IN THIS MATTER. THE GULLY HAD PROBABLY A FLOW OF WATER WHICH FOUND ITS WAY INTO THE DITCH, RATHER THAN OPPOSITE WAY – DUG A DITCH ACROSS A LIVE STREAM OF WATER.

Refer to context [285711]

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Cut of linear ditch with NW-SE orientation [285721]. *
It is a relationship slot, so only SW side is visible: steep, V shaped cut.
This ditch has 3 fills: (285722) the lowest; (285723) the middle; (285724) the upper.
This ditch truncates on SW side an earlier feature [285725], a gully or a small ditch, it is not clear yet.
Another slot has been dug in this ditch further NW, with cut n° [285728]
This is an enclosure ditch, dated to the Roman period; it is likely related to another enclosure ditch of the same shape (which represents an inner enclosure).

* it has a linear shape in the area where the slot was dug, but further NW it curves (see general plan of the area).

## ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked * overleaf)

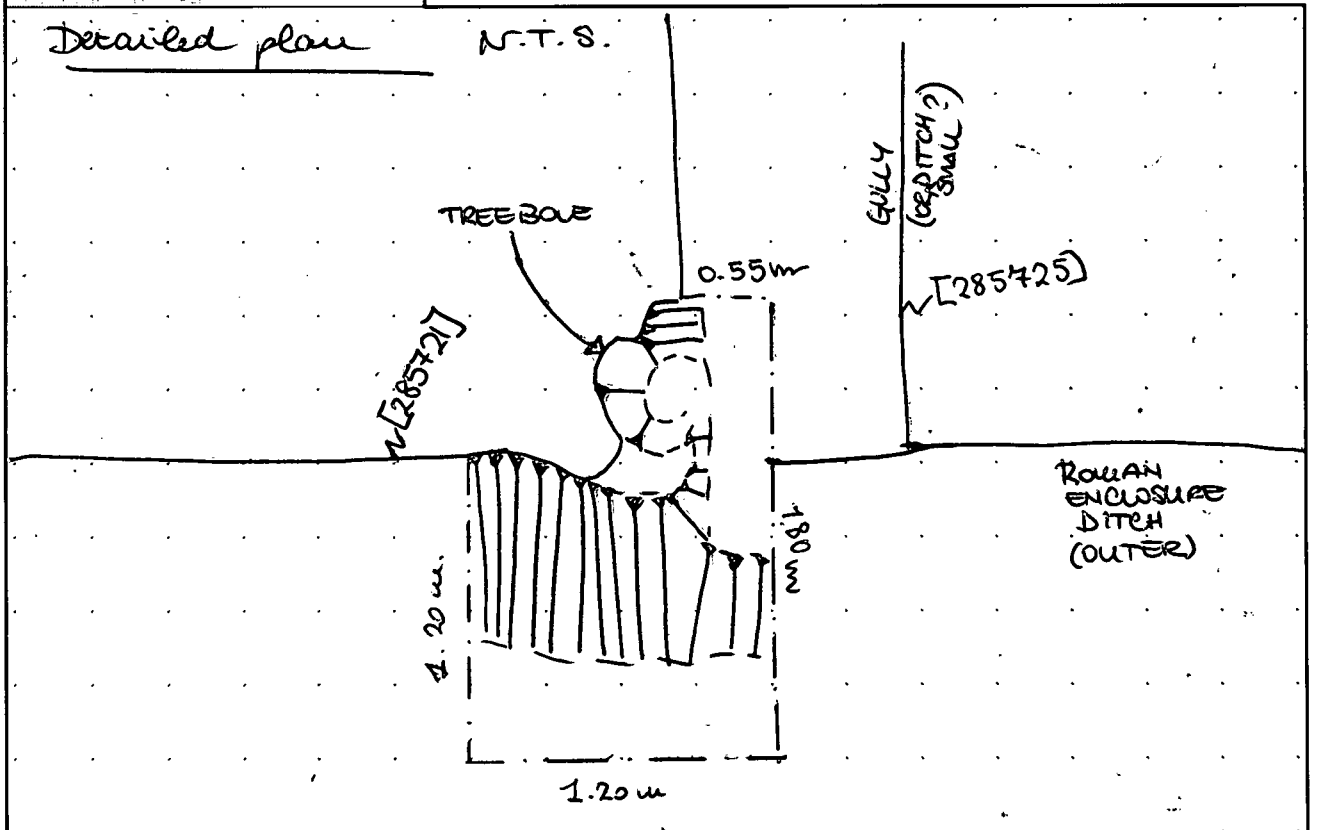

Mid orangish brown slightly gravelly silt lower fill of ditch [285721].
Inclusions: frequent stones and few stones of small (< 10 mm) and medium (< 20 mm) size.
No finds.
This is the result of a natural infilling of the ditch, silting. It is the same lower fill found in the other slot deep in this ditch → (285731)

could be found when the ditch was still in use

## ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked * overleaf)

slightly clayey

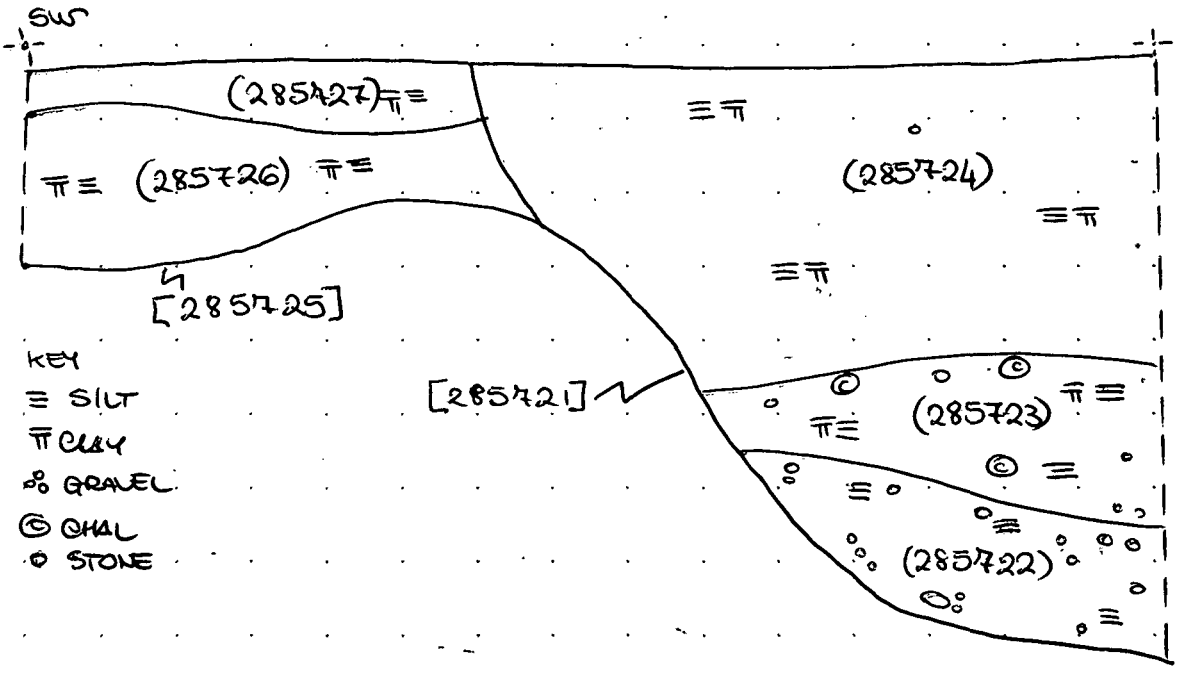

Mid brownish grey silt middle fill of enclosure ditch [285721]
Inclusions: frequent presence of stones and flintstones of small (< 10 mm) and medium (< 30 mm) size; moderate presence of chalk flakes of very small size (< 5 mm).
Finds: occasional small fragments of animal bones, bad preserved because of soil condition; occasional potsherds: few small fragments belonging to the same object, and a part of a rim. The potsherds could be dated to Roman Time, possibly to the 3rd century A.D.
This is a result of a natural infilling process of the ditch, with some organic and waste materials washed in it, and it could refer to the abandonment phase of the enclosure ditch.
