This form is incomplete if fields marked with * are empty. PTO for additional information (and describing all items marked with *) and sketches.

ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked * overleaf)

This is the deliberate backfill of the burial. It was the proper infill which was covered the body. As into the cremations, we found here the rest of the coins probably because then fell down from the place where they were put.

We separated it from the fill we found on the torso and we can see it all around the body.

It has just some small and subangular stones into it ($\leq 0.25m$ diameter). We also found some manganese and some flakes of burn bone (probably from the cremations).

That was deliberate backfill of silty clay with not more of 0.20m of thickness.

Refer to context [285615]

SKETCHES

(consider: location plan, detailed plan showing relationships, section showing fills/deposits as appropriate)
