ADDITIONAL INFORMATION
*(any further details that may be important for understanding the context, including items marked * overleaf)*

This is a fill of a pit. This is a final fill which was thought to be natural, but discover later that it was part of a feature. This fill had a lot of chalk, but also a few charcoal remains which helped to understand that it was not natural.

Refer to context [311211]

SKETCHES
*(consider: location plan, detailed plan showing relationships, section showing fills/deposits as appropriate)*

See [311211] for plan sketch.

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

This is either a third fill of a pit [3112]. This is the thickest fill of this pit.
Within this fill, some pottery sherds in a very bad condition were found together with some animal bones. There were also found a few charcoal remains, chalk and a few stones.

*(any further details that may be important for understanding the context, including items marked * overleaf)*

This is the last fill of the pit [311211]. This fill seemed as if it had been redeposited. Its compostion was the same as the previous one. Water started to come up, once the bottom was reached. Charcoal remains appeared, but really rarely. Chalk also in quantity was reduced in comparison with the previous fills.

Refer to context

## ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

This is a cut of a pit, which includes fills (311206), (311207), (311208), (311209), and (311210).
This pit is truncated by the ditch [311214] towards its SW side.
The pit, with boy dimensions, is also cut by the furrow on its NW side, running NE-SW.

This is a pit, although it might be a terminus of a feature because of its shape, but it was difficult to see this feature and was said to be a pit.
This feature became a box due to the fact that the sides of this pit were difficult to see and trace, and therefore I was told to make it as a box.

Refer to context (311206)

## SKETCHES

ADDITIONAL INFORMATION
*(any further details that may be important for understanding the context, including items marked * overleaf)*

This is a fill of a ditch. This fill is same in context as (311238).
Within this fill a few animal bones and pottery sherds were found. Also some charcoal remains, chalk and stones came up, but in small quantity in proportion with its ~~[illegible]~~ length.

Refer to context

## ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

Context is the cut of a linear ditch running on NE-SW orientation with quite steep sides and concave base.
It appears it has two natural infilling - (311218); (311219) throug the erosion of the sides and sorrounding material.

No dating objects have been found.

Refer to context

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

[311216] - WAS HEAVILY TRUNCATED THUS ANY OBSERVATION CAN ONLY BE SCANT.
(311217) - [311216]'S FILL CONTAINED SMALL-SIZED FRAGMENTS OF ~~BURNT~~ BONES, THUS INDICATING THE PRESENCE OF A POSSIBLE CREMATION.

ON PLAN NO OUTLINE OF [311216] COULD BE DISTINGUISH, WHICH IN TURN, BY ABSENCE IT IMPLIES THAT THE PIT WAS DUG "ONLY" THROUGH THE TOP-SUBSOILS AND IT STOPPED ON THE SOIL ("NATURAL") OF THE SITE.

UNFORTUNATELY I OMMITED TO PHOTOGRAPH THE "WHOLE THING" IN PLAN - BECAUSE IT WAS SO SPARCE/ UNCERTAIN & INDISTINGUISHABLE FROM THE REST OF THE PLAN.

Refer to context 311216

## ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

(311217) - WAS FORMED BY SOIL & POSSIBLE FIRE. THOUGH CONSIDERING ITS SHALLOWNESS THE ASPECT OF THE FILL MIGHT AS EASILY BEEN OTHER BY THE PROLONGNESS EXPOSURE TO THE SUN, WHICH FOR THE PAST FEW WEEKS WAS REALY STRONG.

BY THIS I MEAN THAT I RECOGNISE THE CALCINATE BONES THOUGH IN THE SAME TIME THE FILL THAT I REMOVED & RECORD AS (311217) COULD HAVE BEEN PRODUCE BY ROOTS OF PLANTS (BUSH?) THAT GREW THROUGH THE INITIAL CREMATION AND PUSHED DOWN OR DRAGGED THE FILL FURTHER DOWN INTO THE SOIL.

Refer to context

ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

Context is the botton fill of [311215] ditch, which is mid. orangeish silty sand material - the result of the erosion of the sides

No dating objects have been found.

Context appears to have high ferric-oxide content.

Refer to context [311215] Section

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Contact (311222) is a natural infilling with an occasional amount of stones or inclusions. These stones were mainly small and angular fragments of flint.

Regarding archaeological remains, we found an occasional quantity of pottery, animal bones and CBM. The former was composed by different kinds of qualities and productions. We highlight a piece of Nene Valley Pottery

In respect of chronology, probably this fill is Roman due to the pottery found in it.

Speaking about the stratigraphic matrix, this

Refer to context

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Context (311223) is a natural infilling with an occasional amount of stones, chalk and charcoal as inclusions. The stones were basically angular and small flint and some rounded pebbles.

Regarding archaeological remains, we found a moderate quantity of animal bones, considering how poor is the site in the meaning of finds.

Sadly, we didn't find any piece of pottery which could help us with the chronology, but considering that this fill is part of a Roman feature which cuts an Iron Age ditch, this fill must be Roman as well.

Refer to context (311220)

SKETCHES
(consider: location plan, detailed plan showing relationships, section showing fills/deposits as appropriate)

It is the same context as (311230) and it has been cut by a furrow [311221].

*This form is incomplete if fields marked with ◤ are empty. PTO for additional information (and describing all items marked with *) and sketches.*

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Context (311224) is the cut of a ditch, which has a curvilinear shape in our slot, because it is turning to the ~~southeast~~ southeast.

This ditch is composed by two fills, (311222) and (311223), both are Roman, thanks to some pieces of pottery found in the first fill.

Regarding stratigraphic matrix, this cut is the same as [311231], it has been truncated by a furrow [311221], it cuts the following contexts: (311225), (311226) and (311227), and finally, it truncates [311245] and [311228].

Refer to context [311221].

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Context (311227) is a natural infilling with an occasional amount of stones (angular and small flint), chalk and charcoal as inclusions.

Regarding archaeological finds, we unearthed some pieces of animal bones.

Unfortunately we didn't find any fragment of pottery which could have helped us with the chronology. However, thanks to the information got from other slots, we can say that this fill is Iron Age.

This context has been cut by [311224].

Refer to context (311220).

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Context [311228] is the cut of a ditch, which form a terminus in our slot. It has a curvilinear shape and it is filled up by two fills (311226) and (311227).

Chronologically we consider this ditch as an Iron Age feature, thanks to the stratigraphic matrix but also for the information collecting from this same ditch throughout the site.

This cut has been truncated by a recent, Roman, [311224], and it is the same cut as [311245].

Refer to context [311221]

ADDITIONAL INFORMATION
*(any further details that may be important for understanding the context, including items marked * overleaf)*

Context (311229) is a natural infilling ~~whit~~ with an occasional amount of stones, which were basically angular and small flint.

Chronologically we know that this fill is Roman thanks to the pottery found in (311227), which is the same context as this fill, and where we highlight a couple of Nene Valley fragments.

Refer to context

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Context (311230) is a natural infilling with an occasional amount of stones and chalk as inclusions. The stones were mainly angular and small - medium flint.

Chronologically this context is Roman thanks to the stratigraphy and the information yielded of this same ditch throughout the site.

It is the same fill as (311223).

Refer to context (311229)

SKETCHES
(consider: location plan, detailed plan showing relationships, section showing fills/deposits as appropriate)

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Cut of posthole [311232].
Sides are steep, base is concave.
It has one fill (311233).
It was found within the roundhouse inner ringditch [310381], during the 100% excavation. For this reason it has not been sampled or drawn.
It is located just W next to [310385], another posthole: the two postholes seem connected, however it is not clear the chronological relationship between the two.
Just S next to it there is another small and shallower posthole [311234].
[311232] [311234] and [310385] seem all ~~connected~~ related to each other.

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Cut of shallow posthole [311234]
Sides are moderate sloping and base is concave.
As [311232], also [311234] was found during the machine excavation of the roundhouse ringditch, so no samples have been taken neither drawings have been made.
It seems connected to the other two postholes in the N side of it, although the relationship among them cannot be certain. Stratigraphical.
It has one single fill (311235).
It is the shallowest of the group of 3 features.

Refer to context

CUT OF PIT WHICH CUT PITCH TERMINUS [311195] AND UNFORTUNATELY WAS INSUFFICIENTLY RECORDED BUT THERE WERE PHOTOS TAKEN BEFORE THE SECTION WAS CHANGED.

IT SEEMS CLEAR NOW THAT WHEN I FIRST LAYED MY SECTION STRING, I WAS CORRECT AND HAD SECTIONED A PIT WITH DARK FILL WHICH CUT THE TERMINUS, BUT WHEN I CLEANED THE SURFACE FOR THE PHOTO, WHAT I INITIALLY SAW AS A PIT, SEEMED EVEN LARGER, SO I MOVED THE STRING (AFTER HAVING TAKEN A PHOTO) AND RE-DUG THE FEATURE, BUT THAT REMOVED ALL THE DARK FILL WHICH CONTAINED SOME FINDS.

I OVERCUT THE PIT'S EDGES SUBSTANTIALLY, BUT THEY WERE ALWAYS VERY ROUND WHICH DOESN'T FIT WITH THE TERMINUS. THE PIT FILL WAS ALSO MUCH SILTIER WHILE THE TERMINUS CONTAINED DENSE CLAY.

Refer to context: [311195] (311196)

CUT OF DITCH [311244]

MASSIVE DITCH RUNS ON THE NW~SE AXIS AND CONTAINS THREE FILLS WITH LARGE NUMBER OF SNAIL SHELLS. TOP FILL INCLUDED DATING FINDS LIKE BRONZE ROMAN BROOCH AND ONE SMALL FRAGMENT OF SAMIAN POTTERY, [redacted] SO THIS LAYER (TOP FILL) IS ASSOCIATED WITH I/I-II [redacted] CENTURY A.D. POSSIBLY THE DITCH WAS FORMED IN LATE IRON AGE/EARLY ROMAN PERIOD. AND WAS PART OF BIGGER DRAINAGE SYSTEM. THIS CONTEXT IS CUT BY LATER SHALLOW DITCH [311240]

*This form is incomplete if fields marked with ◤ are empty. PTO for additional information (and describing all items marked with *) and sketches.*

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Context [311245] is a cut of a ditch, which runs NE-SW direction and has a curvilinear shape.

Originally, [311245] and [311228] were the same cut (only one), but a newer Roman ditch [311224] split them up. This truncation is the responsable of the sloping base, the inclination of the side and the dimensions of this cut.

Chronologically we can consider this cut as Iron Age thanks to the information got from other slots of this ditch.

Context [311245] and [311228] ~~form~~ form the terminus of this Iron Age ditch.

Refer to context [311221]

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Context (311261) is the bottom fill of a ditch [311260]. The fill is moderately compact blaxnish grey sandy silt mixed with clay with a 0,35 m thickness. There were some bone and pottery fragment inside. The fill also had moderate inclusions of charcoal.

Refer to context (311259)

SKETCHES
(consider: location plan, detailed plan showing relationships, section showing fills/deposits as appropriate)

## ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

Pit [311263]. More likely to be a small pit rather than a post-hole as there is no evidence of any post-holes contempary with this feature in the immediate vicinity. This is the most recent feature in date along with ≠ longditudinal pit [311265]. This feature cuts the older ditch ~~311270~~ [311269]. Limited evidence for the use of the feature. No finds or dating evidence.

Refer to context

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Pit [311267] earlier in date than pit [311265] which cuts this feature. The base did not have to be fully exposed in order to understand the relationship with pit [311265]. Deposit likely formed as a result of deliberate backfill. No finds or dating evidence. The ~~not~~ earliest feature in the group along with ditch [311271], refer to plan [311263].

Refer to context [311263]

SKETCHES
(consider: location plan, detailed plan showing relationships, section showing fills/deposits as appropriate)

## ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

[311282] IS A CURVILINEAR SHAPE CUT OF A LONG DITCH. IT HAS NOT GOT A REALLY SIGNIFICANT DEPTH. THERE IS ONLY ONE FILL OBSERVED HERE WITH A SMALL PIECE OF POTTERY WHICH SEEMS TO BE ROMAN. THIS IS PROBABLY A LONGER DRAINAGE DITCH AROUND AN AREA OR A SMALLER SIZE ENCLOSURE DITCH. IN FORMER CASE IT MIGHT SURROUNDED A CROP FIELD. IT IS IN CLOSE PROXIMETY TO A DEEP PIT WHICH IS LOCATED SW FROM IT, AND NEAR TO TWO DRAINAGE OR GULLY SIZE FEATURES SW AS WELL.

[311287] CUT OF FURROW

THE S-E PART OF THE AREA REPRESENTS A COMPLEX PORTION WITH MANY FEATURES SUCH AS FURROWS POST-HOLES AND DITCHES'. THE MAIN FEATURE IS REPRESENTED BY A RING-DITCH. THIS RING-DITCH WAS DETECTED IN THE N-W PORTION BY AN INTERSECTION SLOT FOR INDIVIDUATING THE RELATION BETWEEN THE RING-DITCH AND A N-S ORIENTED FURROW. ON THE N AND E FACING SECTIONS WE CAN OBSERVE THE RELATION BETWEEN THE FURROW, RING-DITCH AND POST-HOLE. THE FURROW CUTS THE RING-DITCH AND POST-HOLE. THE POST-HOLE WAS NOT VISIBLE ON THE SURFACE IT WAS INDIVIDUATED UNDER THE CUT OF FURROW.

Refer to context (311286) FOR SECTION

[31129]

CUT OF RING-DITCH.

IN GENERAL THE RING-DITCH IS RELATED TO THE TYPICAL DOMESTIC ORGANIZATION OF THE LANDSCAPE DURING THE IRON AGE. THE ROUND HOUSES REPRESENT THE MOST IMPORTANT ELEMENT.
BESIDE THIS RING-DITCH [31129] TWO MAIN ROUND HOUSES HAVE BEEN IDIVIDUATED. THE FIRST AT N-W AND THE SECOND AT S-E FROM THE PRESENT RING-DITCH. THEY REPRESENT THE MOST IMPORTANT CHRONOLOGICAL PHASE IN THIS AREA. FINALLY, AT LEAST TWO OTHER PHASES HAVE BEEN RECOGNISED IN THE AREA OF THE RING-DITCH. ONE PHASE WITH POST-HOLES AND DITCHES THAT CUTS THE RING-DITCH [31129]. ONE PHASE WITH FURROWS, THAT*

Refer to context

ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked * overleaf)

This is a ditch that is going from South to North. It is truncating a gully [311297].

In this ditch there was finds of bone pottery and a flint flake. The pot indicates that this ditch is ironage

311318 is a structure number for a roundhouse ringditch.
It is located in the SE part of the site, where there is an high density of structures (six ringditches).
It has a SW facing entrance. Regarding the terminii, the southern one [310342] was visible on the surface; as for the northern one, it was not possible to identify its precise location as the area where it was meant to be was truncated by a later ditch [310337] and its recut [310340].
It has a maximum diameter of 11.60 m. The depth generally varies between 0.08 m and 0.14 m, which it goes up to 0.33 m on the N side and 0.29 m on the SE.
This roundhouse ringditch has been affected by the presence of few features located in the same area.
Starting from its southern terminus and then moving to the E, N and W:
- A trampled surface (310393) of irregular shape has been

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

identified in the SE area within the ringditch and seemed to be connected to the domestic use of the roundhouse.
- On the SW part, near the terminus [310342], this ring ditch lies above an earlier pit [310706] and it is truncated on its S side by a posthole [310659].
- On its SE side this ringditch truncates an earlier gully [310619] which runs NW-SE.
- Running NW-SE there is a group of parallel ditches marking a trackway that goes across the whole site, and at least two of these ditches [310307]=[310373] + [310313]=[362] (dated to the Roman period) cut the roundhouse almost in half.
- On its N side it is truncated by a furrow [310316], which runs slightly NE-SW and is the most recent feature in the area. It is very shallow and it does not appear to continue across the roundhouse probably because it was machined away during the stripping.

Refer to context

SKETCHES
(consider: location plan, detailed plan showing relationships, section showing fills/deposits as appropriate)

- On the NW side 311318 cuts a section of an earlier roundhouse ringditch [310446], located on the NW.
- On the SW side, part of another ringditch [310333] (it's narrower and was maybe made as an enclosure) is visible. Although both [310333] and 311318 are truncated by the terminus of a ditch [310337] and its recut [310340], [310333] can be assigned to a later phase than 311318 as its terminus [310378] is cut through the trampled surface (310393).

Finds from the ringditch include Iron Age pottery and animal bones, plus a quern stone (SF 31035) found on top of (310393) within the ringditch.

CUTS OF THE ROUNDHOUSE: 311318 [310309] [310358] [310311] [310364] [310318] [310368] [310335] [310371] [310342] [310661] [310347] [310355]

CUT OF A DITCH. IT IS POSSIBLE THAT MORE THAN THE CUT OF THE DITCH [310830] THIS IS A RECUT OF (311330) IT IS ALSO POSSIBLE THAT THIS RECUT WAS DONE IN THE SAME MOMENT OF [310830] AND FOR THIS REASON IT IS QUITE IMPOSSIBLE TO DISTINGUE THE TWO ON PLAN.
THE OTHER POSSIBILITY IS THAT [311326] IS A PIT AND THE FILL OF THIS PIT ARE THE SAME AS THE FILLS OF ~~THE DITCH~~ BOTH THE DITCH MIXED TO EACH OTHER AND FOR THIS REASON DIFFICULT TO SEPARATE DUE ALSO TO THE EXTREMELY BAD CONDITION OF THE SOIL AND THE LIGHT.

Refer to context 311326 311333 311332

CUT OF PIT.
IT HAD A CURVILINEAR SHAPE, NORD-SOUTH ORIENTATION, STEEP SIDE AND CONCAVE BASE.
PART OF IT WAS TRUNCATED BY A MACHINE SO IS NOT POSSIBLE UNDERSTAND IF ORIGINALLY WAS A GULLY.

Refer to context 311335

SKETCHES
*(consider: location plan, detailed plan showing relationships, section showing fills/deposits as appropriate)*

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

[311338] — cut of pit on SW. tip of terminus [31161] of 'Sectioned' (?) ditch on the E side of LOE of TEA 3. The pit is concave with steep sides!
It seems that the pit and the ditch where open at the same time based on the fills and the material recovered.

The role of the pit is unclear. Maybe a pothole (?)

Refer to context 311161 - 2

(103-0251) → PHOTOS OF POST-HOLE IN GULLY

ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

CUT OF A POSSIBLE GULLY THIS FEATURE RUNS FROM THE TERMINUS IN THE NORTH FOR AROUND 1.5M SOUTH TH WHERE IT THEN TURNS AT ABOUT A 90° ANGLE TO RUN EAST FOR 20CM UNTIL IT GETS TRUNCATED BY A LATER POSSIBLE PIT [311343]. THIS GULLY IS INSIDE A RING-DITCH OF A POSSIBLE ROUNDHOUSE, THOUGH THE ENTRANCE IS TO THE WEST. OR IT IS AN ANIMAL ENCLOSURE. IT IS ALSO SUGGESTED THIS GULLY COULD ACTUALLY BE A FURNACE FOR SMELTING AS THE ENTRANCE FOR A ROUND-HOUSE USED FOR SMELTING IS DIFFERENT TO TYPICAL ROUND-HOUSE ORIENTATION AS IT NEEDS TO BE DARK INSIDE FOR SMELTING. ADDITIONALLY THERE WAS A DENSE AMOUNT OF CHARCOAL + BURNT CLAY IN THIS FEATURE AND WHERE THIS FEATURE TURNS THERE IS A LARGE DIP WHICH WAS FULL OF CHARCOAL. THESE BURNT REMAINS SEEM LIKE IN-SITU BURNING, HOWEVER, NO OTHER SMELTING RELATED FINDS WERE FOUND. FURTHER MORE THIS FEATURE HAS LARGE CIRCULAR SHAPES AT THE ENDS (SEE PLAN) WHICH HAVE BEEN INTERPRETED AS A PIT AND THE GULLEY TERMINUS, HOWEVER, THESE COULD BE AREAS FOR BELLOWS AND SCRAPING OUT MATERIAL OUT OF A FURNACE. ADDITIONALLY, THE SHAPE OF THIS FEATURE SUGGESTS IT IS UNLIKELY IT IS A FURNACE BUT MAY BE A CORN DRYER, HOWEVER, NO OTHER EVIDENCE OF THIS HAS BEEN FOUND. WAITING FOR SAMPLE RESPONSE TO HELP DETERMINE USE OF FEATURE. CURRENTLY DESCRIBED AS A GULLEY AS IT IS MORE LIKELY THIS FEATURE IS A GULLY OF AN INTERNAL STRUCTURE, POSSIBLY A WITH A PIT BEHIND

*LOOK AT SHEET [311374] FOR NEW INTERPRETATION

## ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

FIRST FILL OF A POSSIBLE PIT [311343]. OTHER INTERPRETATIONS OF THIS FEATURE INCLUDING AREA FOR BELLOWS ARE ON SHEET [311340]
THIS FILL CONTAINED A LOT OF IRON PAN AND WAS BROWN MOTTLED WITH ORANGE PATCHES. DUE TO THIS, THIS FILL MAY BE FROM NATURAL INFILLING. NO FINDS WERE IN THIS FILL AND LITTLE CHARCOAL. THIS FILL CONTAINED FEW SMALL SIZED STONES AND A SMALL PIECE OF FLINT, THOUGH IT SHOWED NO EVIDENCE OF WORKING.

Refer to context

## ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

~~East~~ ~~of~~ pit [311357] relationship with gulley [311090] is uncertain. It looks like the relationship was missed in the original excavation a few weeks before pit [311357] was excavated. This feature contained fragments of Roman pottery sherds dating it to the period. There is limited evidence for the use of the feature

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

[311369] IS A CIRCULAR SHAPE CUT OF A PIT. IT HAS TWO FILLS ALTOGETHER. ONLY ONE OF THESE HAD FINDS. THESE ARE ANIMAL BONE FRAGMENTS AND A SMALL FRAGMENT OF A POTTERY. THERE ARE OTHER, MUCH SMALLER PITS IN THE CLOSE PROXIMITY. THIS IS PROBABLY A WASTE PIT. IT HAS A MAXIMUM DEPTH OF 0.36 METER, WHICH IS DEEPER THAN THE OTHER PITS NEARBY, ONLY THIS CURRENT ONE IS MUCH WIDER THAN THE REST.

Refer to context

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Cut of pit [311376]. Filled by (311377). truncated by ditch [311378]. This ironage pit is not clearly related to any features nearby. It has been heavily truncated by the cut of later ditch [311378] as it turns towards the South from the East.

It is likely that this pit filled trough natural ~~Erosion~~ infilling due to the colour & consistency of its fills. The original use of the feature is not clear.

Refer to context [311378] (311380)

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Fill of pit [311376]. Cut by ditch [311378]. Contained occasional stones & flecks of charcoal & pot.

It is likely that this fill formed through natural infilling due to its colour & consistency & the lack of finds present.

Refer to context (311378) (311380)

SKETCHES
(consider: location plan, detailed plan showing relationships, section showing fills/deposits as appropriate)

## ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

cut of ditch [311379]. Filled by (311379) & (311380). Cuts earlier pit fill (311377) & truncates the pit [311376]. This ditch begins to turn towards the south in this area, just the inside of this turn was caught by this slot.

It is likely that this ditch filled slowly through natural infilling.

Refer to context (311380)

ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

This is a fill of a pit. This fill was not fully dug out, therefore, bottom was not reached.

Within this fill, a few chalk and stones were found together with a few charcoal remains.

Refer to context

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Fill of roundhouse ringditch [31]. Stratified above [31] & below [31], cut of a later ditch. Contained occasional stones & charcoal flecks. Also contained occasional pottery sherds & lithics.

It is likely that this fill formed through deliberate backfilling of the ringditch perhaps following abandonment of the roundhouse or in the form of paling as part of construction.

Finds from this fill were of mixed date & lithics are believed to have been intrusive.

[3114 05] → Cut of ditch running NW SE. The ditch seems to be truncated by a pit. The ditch is middle iron aged based on the finds and is part of an iron age complex. ← (3114 06)

Refer to context [3114 05]

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Fill (311613) of pits [311414] + [311415]
Fill appears the same and is contemporary. It is not possible to tell which pit is earlier or later.

Fill is a moderately compact, mid brownish grey with orange clay flecks and charcoal throughout. Occasional Gravel + chalk inclusions >2.00cm
Signs of moderate bioturbation
NO finds or datable Materials.

Fill appears to be a low energy deposit due to weathering material eroding.

Refer to context [311415]

SKETCHES
(consider: location plan, detailed plan showing relationships, section showing fills/deposits as appropriate)

ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

Cut of pit [311417], This pit was Sub-Circular with a N-W—S-E trend. The pit had a length of 1.8m, a width of 1.5m, and a depth of 0.30m.

This pit had moderate Sloping Sides, and a concave base.

This pit was dug in quarters.

This pit is 0.40m West of Pit [311419]

For Sections + Matrix.

DEPOSIT (311422)

THIS IS A DEPOSIT WITH INDETERMINATE SHAPE BECAUSE IT HAS SOME ANIMAL AND ROOTS INTRUSIONS. ON PLAN WE CANNOT SEE THE SHAPE AND IN THE SECTIONS OF OUR SLOT WE CAN SEE HOW THE DEPOSIT IS CUT BY THE GULLY [311423].

NO FINDS AND ONLY FEW STONES (SMALL AND MEDIUM SIZE) AS INTRUSIONS.

Refer to context (311423) PLAN

SKETCHES
*(consider: location plan, detailed plan showing relationships, section showing fills/deposits as appropriate)*

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Fill [311425] of pit [311629]
A moderately compact, mottled light blue grey slightly silty clay with a brownish orange slightly silty band.
With frequent chalk+gravel >2.00cm and frequent iron pan >4.00cm throughout with small occasional charcol enclusions.
NO finds or datable material, moderate amount of bioturbation
Fill appears to be a low energy event due to eventering natural silting.

Very bright + Hot with breeze
Excavated by Mattock, Shovel + trowel

Refer to context [311431]

ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

Cut of ditch [31 ]. Filled by (31 ). Stratified above (31 ) & below (31 ). Cuts (31 ). This feature is not apparent on the surface & at first appeared as a widening of roundhouse ditch [31 ]. Likely terminating here, to the East its continuation becomes lost amongst the noise of agricultural disturbance & features present within the roundhouse's enclosure.

It is likely that this feature filled slowly through natural infilling. Charcoal suggests human activity nearby during this process.

Refer to context

## CUT

(if you are using this section score out section **FILL/DEPOSIT** below)

DESCRIPTION

**Shape**

sub- ☐ rectangular ☐ square ☐ circular ☒ linear ☐ curvilinear ☐ irregular ☐ other* ☐

**Orientation**

I ☐ N-S
H ☐ E-W
↗ ☐ NE-SW
↘ ☐ NW-SE

N

**Sides**

☐ vertical
☒ steep
☐ moderate } sloping
☐ gentle }
☐ stepped
☐ undercutting
☐ complex*

**Base**

☒ flat
☐ concave
☐ v-shaped
☐ sloping
☐ uneven
☐ complex*

| Dimensions | Length | Width | Depth | Diameter |
|---|---|---|---|---|
| in metres | — | — | 0.50 | 0.72 approx. |

**Shape result of** *(tick all that apply)*

design ☒ material cut into ☐ natural processes ☐ degree of truncation ☐ uncertain ☐

INTERPRETATION

pit ☒
post-hole ☐
stake-hole ☐
ditch ☐
ring-ditch ☐
beam slot ☐
construction cut ☐
robber cut ☐
gully ☐
palaeochannel ☐
furrow ☐
field boundary ☐
burial cut ☐
other cut (describe below) ☐

## FILL/DEPOSIT

(if you are using this section score out section **CUT** above)

DESCRIPTION

**Compaction**

☐ compact
☐ moderately compact
☐ loose
☐ friable

**Colour**

light ☐ mid ☐ dark ☐ mottled ☐

| | |
|---|---|
| brownish ☐ | ☐ brown |
