ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

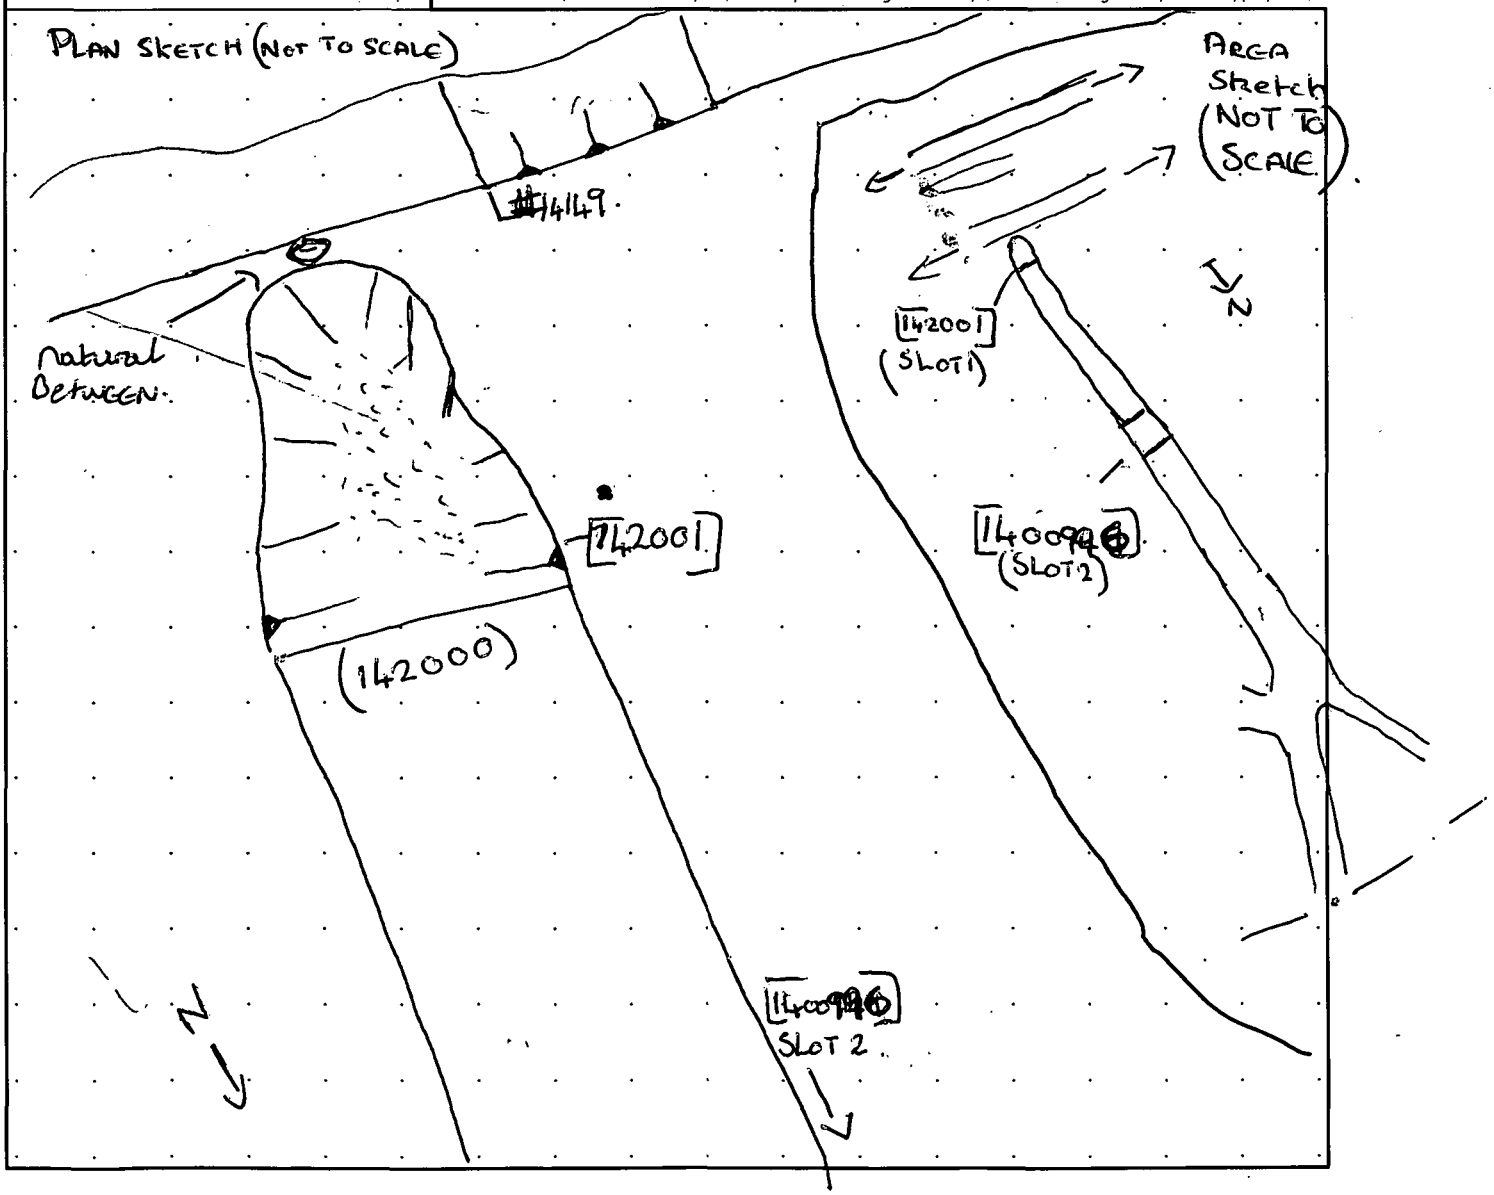

[142001] Cut Number Given to feature relates to Slot 1 in an NE-SW running linear. Terminus clear bulk natural between this and E-W Droveway ditches.

- Slot 2 10ms away [140996] (140995)
- Shallow Linear not a ditch. Possible furrow but at NE extent most see below sketch seems to branch off so likely gully or field system.

. Phase uncertain.

Refer to context

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

This context refers to the south side section of the pit that has already been excavated. It was in this pit that the ~~s~~ decorated samian ware was found. There appears to have been some natural slumping since the east side of the pit section is much shallower than the west side.

Refer to context | 14 2015

*This form is incomplete if fields marked with ◤ are empty. PTO for additional information (and describing all items marked with *) and sketches.*

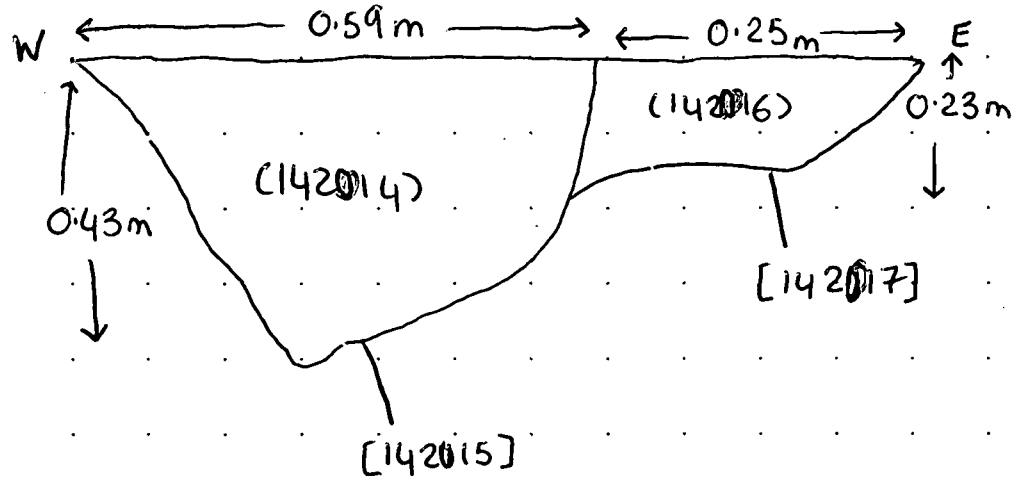

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

This context refers to the cut of the pit section that was excavated. It cuts into an earlier ditch on the western side of this ditch. The pit is currently a curving rectangular shape which may be the result of slumping because the cut is shallower on the eastern side. It is possible the pit was a more circular shape originally.

Refer to context 142017

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

This context refers to the cut of the ditch section that was excavated. The ditch does not appear to be fully cut as there is no indication of the ditch edge on the west side of the section. This ditch section is an unusual ~~sh~~ shape because a pit has been dug into the ditch making the north face of the ditch 0.25m, but the south face 0.59m. The east of the ditch is 0.58m, while the west side is 0.23m (see plan below)

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

(14205[1]) Primary fill of linear [14205[2]].

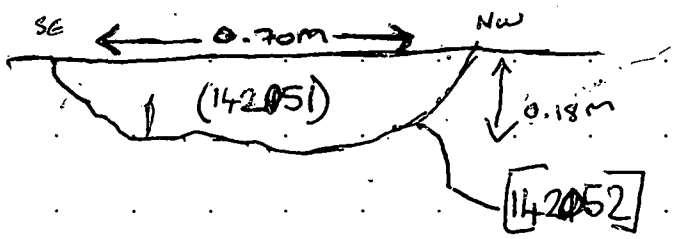

[redacted] It is fairly solid fill apart from some mottling from disturbance from rooting, making edges difficult to define. also small hollow suggesting animal activity

Due SW there an area slightly over machined See Sheet [14203[4]].

Refer to context

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

In the beginning, we started to dig the feature because we ~~th~~were thinking it was a ditch and it might ~~be~~ be same context as F 14 . In the end, we ended up with a cut of a tree throw. There is a modern drain passing very close to this point and there is a thought that ~~We~~ we might ~~be~~ ~~a~~ have residual deposit. That explains the pot found in the second fill.
The area is disturbed by the modern activity. and there is no certainty ~~in~~ ~~the~~ about the explanation of of the feature we ~~dig~~ excavated.

ADDITIONAL INFORMATION

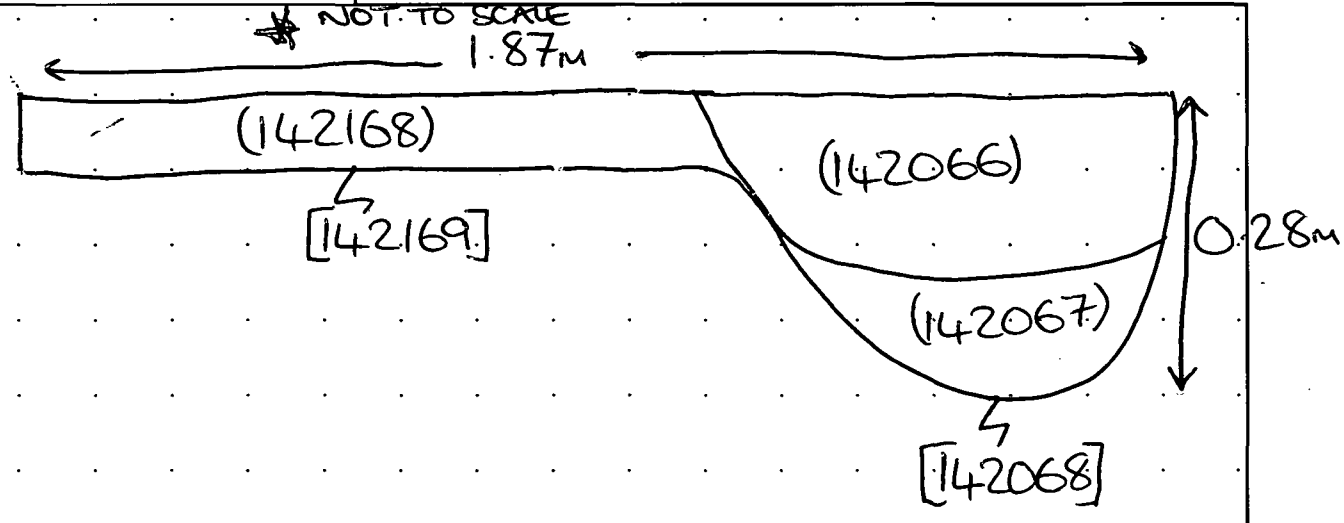

*(any further details that may be important for understanding the context, including items marked * overleaf)*

A MID GREY FILL WITH MODERATE ANIMAL BONE ~~[illegible]~~ INCLUSIONS AND OCCASIONAL POTSHERD INCLUSIONS. POTSHERDS ARE LIKELY ROMAN GREY WARE. FAUNAL REMAINS ARE YET TO BE IDENTIFIED. SAMPLES (2 BUCKETS, 20L, SAMPLE # 14102) WERE TAKEN OF THIS FILL.

THE FILL IS LIKELY A RESULT OF A COMBINATION OF NATURAL INFILLING AND DELIBERATE BACKFILL AS POTTERY AND FAUNAL REMAINS WERE FAIRLY FREQUENT.

140996 - PREEX

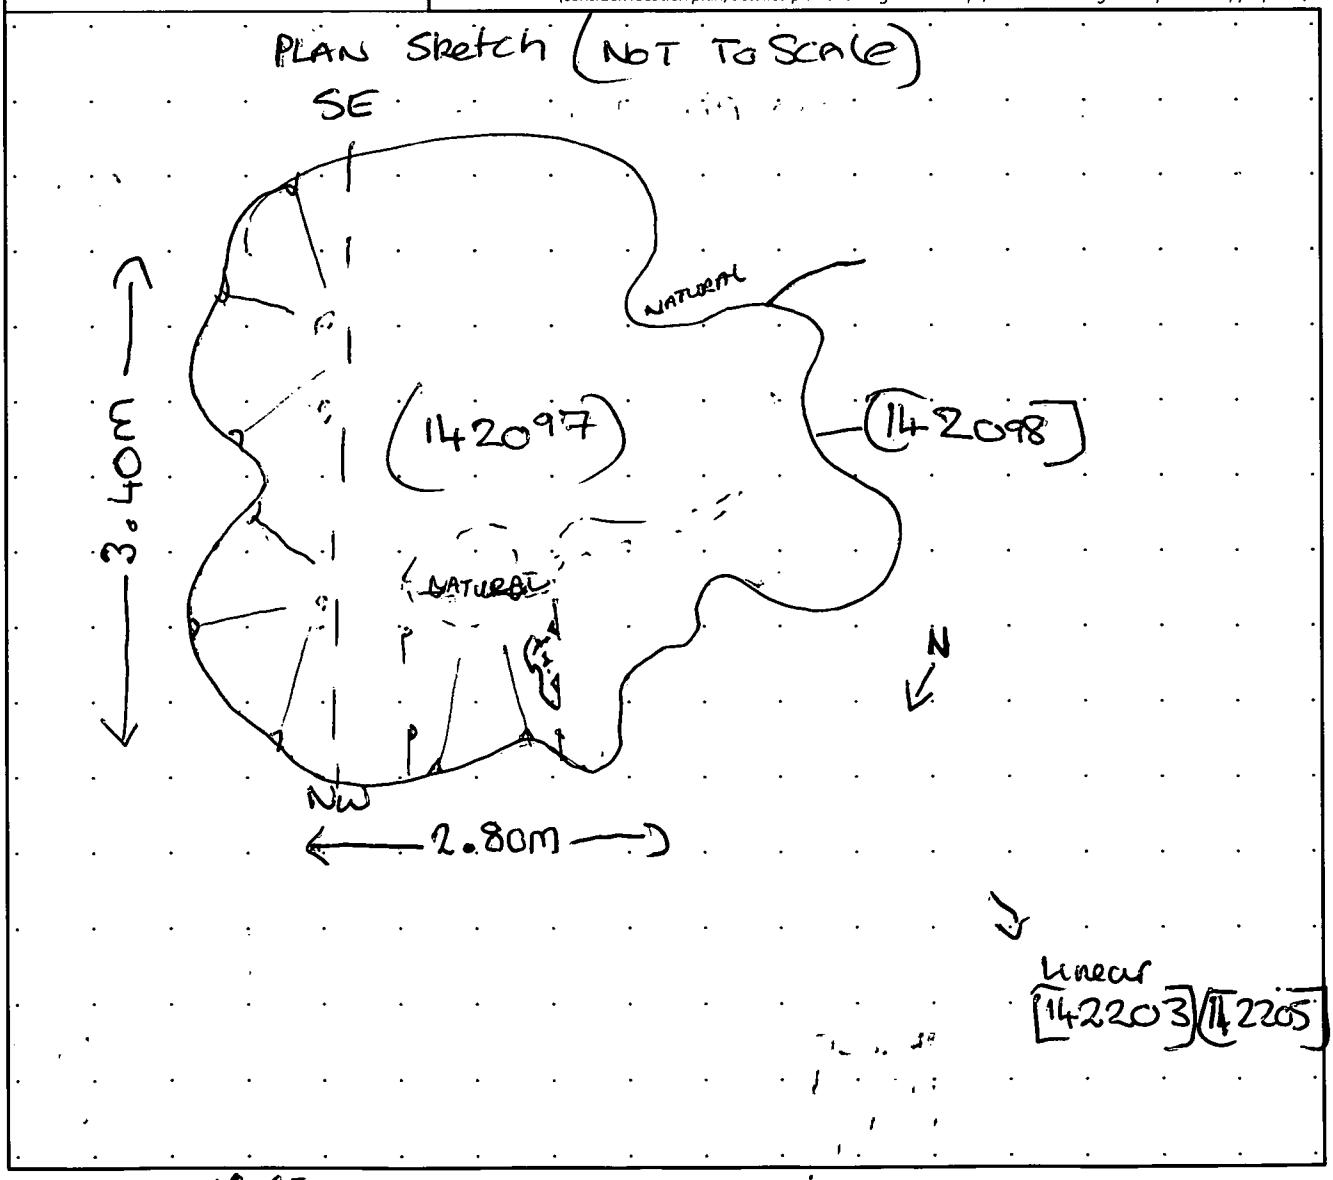

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

[142098] is likely natural feature no distinct man made cut. It's irregular in plan, no redeposited natural disguising true pit as both NW-SE section and box section excavated demonstrated. There are clear signs of rooting, shallow feature. edges fade and disappear during excavating.

- Could be said to be NE-SW orientated.
- Due NW of Linear associated with slot [142052].
- No signs of utilisation.
- No finds, no flints, no animal bones shame as an earlier hypothesis was that bugs Bunny lived here!
- Slight chance tree was purposly knocked/cut down cleared?

Refer to context 142097

ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

Slump fill located on north slope of ditch [14210]. The fill is situated on top of the lowermost fill (14200) suggesting that after gradual infilling of the initial cut by waterlogging at least one slumping episode occured. Fill similar in character to natural with frequent flint and gravel.

Refer to context (14209?)

ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

Shallow gully running E-W roughly parallel to [142101]. The cut of gully [142103] is not visible in the west facing section wall suggesting that the gully is truncated by [142101] as it expands laterally along its N-S axis as it approaches the west facing section.

Refer to context | (142097)

ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

Shallow ditch running E-W across area of excavation. The ditch is truncated by ditch [42130] which follows a roughly perpendicular course. Ditch may continue west as ditch

Refer to context: (42127)

SKETCHES

ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

Lower fill of pit [142154] - likely formed by gradual silting and anthropogenic packing (given the frequency of large stones concentrated at the base of the fill). Animal bone fragments recovered (possible scapula with unfused epiphysis).

Refer to context

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Pit, which given the quantity of gravel and large stones in the fill, ~~suggest that the feature~~ may have served as a post-hole / stake-hole with gravel and stone inclusions to stabilize the post. Within the area of excavation, the feature is not associated with any other pits with a similarly gravel / stone rich fill. However, a pit with a dark / brown fill is located immediately to the South east.

Refer to context: (142152)

SKETCHES

## CUT

(if you are using this section score out section **FILL/DEPOSIT** below)

### DESCRIPTION

**Shape**

sub- ☐ rectangular ☐ square ☐ circular ☐ linear ☐ curvilinear ☐ irregular ☐ other* ☐

**Orientation**

I ☐ N-S

H ☐ E-W

/ ☑ NE-SW

\ ☐ NW-SE

N

**Sides**

⌋ ☐ vertical

⌋ ☐ steep

⌋ ☑ moderate — sloping

~ ☐ gentle

~ ☐ stepped

⌊ ☐ undercutting

☐ complex*

**Base**

— ☐ flat

◡ ☐ concave

∨ ☐ v-shaped

— ☐ sloping

~ ☑ uneven

☐ complex*

| Dimensions in metres | Length | Width | Depth | Diameter |
|---|---|---|---|---|
| | — | c. 1,67 | 0,67 | — |

**Shape result of** *(tick all that apply)*

design ☑ material cut into ☐ natural processes ☐ degree of truncation ☐ uncertain ☐

### INTERPRETATION

pit ☐
post-hole ☐
stake-hole ☐
ditch ☑
ring-ditch ☐
beam slot ☐
construction cut ☐
robber cut ☐
gully ☐
palaeochannel ☐
furrow ☐
field boundary ☐
burial cut ☐
other cut (describe below) ☐

## FILL/DEPOSIT

(if you are using this section score out section **CUT** above)

### DESCRIPTION

**Compaction**

☐ compact
☐ moderately compact
☐ loose
☐ friable

**Colour**

light ☐ mid ☐ dark ☐ mottled ☐

| | |
|---|---|
| brownish ☐ | ☐ brown |
| greyish ☐ | ☐ grey |
| orangeish ☐ | ☐ orange |
| yellowish ☐ | ☐ yellow |
| reddish ☐ | ☐ red |
| blueish ☐ | ☐ blue |

black ☐ white ☐ other* ☐

**Composition**

| | |
|---|---|
| clayey ☐ | ☐ clay |
| silty ☐ | ☐ silt |
| sandy ☐ | ☐ sand |
| gravelly ☐ | ☐ gravel |
| peaty ☐ | ☐ peat |

other* ☐

**Thickness**

**Inclusions**

| use the following: O: occasional M: moderate F: frequent | stones* | chalk | iron pan | manganese | charcoal | plant remains* | wood | marine shell | bone* | pot | fired clay / CBM | CTP | mortar/plaster | leather/textile | glass | metal | industrial waste | lithics | coarse stone |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| frequency | | | | | | | | | | | | | | | | | | | |
| bulk find | ☐ | ☐ | ☐ | ☐ | ☐ | ☐ | ☐ | ☐ | ☐ | ☐ | ☐ | ☐ | ☐ | ☐ | ☐ | ☐ | ☐ | ☐ | ☐ |

### INTERPRETATION

topsoil ☐
subsoil ☐
geological subsoil ☐
remnant topsoil ☐
surface ☐
occupation layer ☐
dumped layer ☐
deliberate backfill ☐
destruction debris ☐
bedding layer ☐
natural infilling ☐
colluvial layer ☐
in situ burning ☐
post-pipe ☐
packing ☐
cremation ☐
other fill/deposit (describe below) ☐

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

light-grey-brown silty clay with inclusions of small pebbles (20%)

clearly distinguishable from natural

This spread looks like a layer without any clear cutting, a ditch is cutting through it in the West, it does not have an even base, thus it might just be some dumped soil that got spread out → NOT A CLEAR FEATURE

Refer to context [142167]

*This form is incomplete if fields marked with ◤ are empty. PTO for additional information (and describing all items marked with *) and sketches.*

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Cut of ditch. Very shallow, but excavated slots to the south show it to much deeper (eg. [142190]). Further North ([142092]) it becomes & shallower still - possibly ~~[illegible]~~ as it reaches its terminus. Ditch excavated alongside [142181] and [142183] but does not interact directly - runs parallel.

Refer to context

## ADDITIONAL INFORMATION

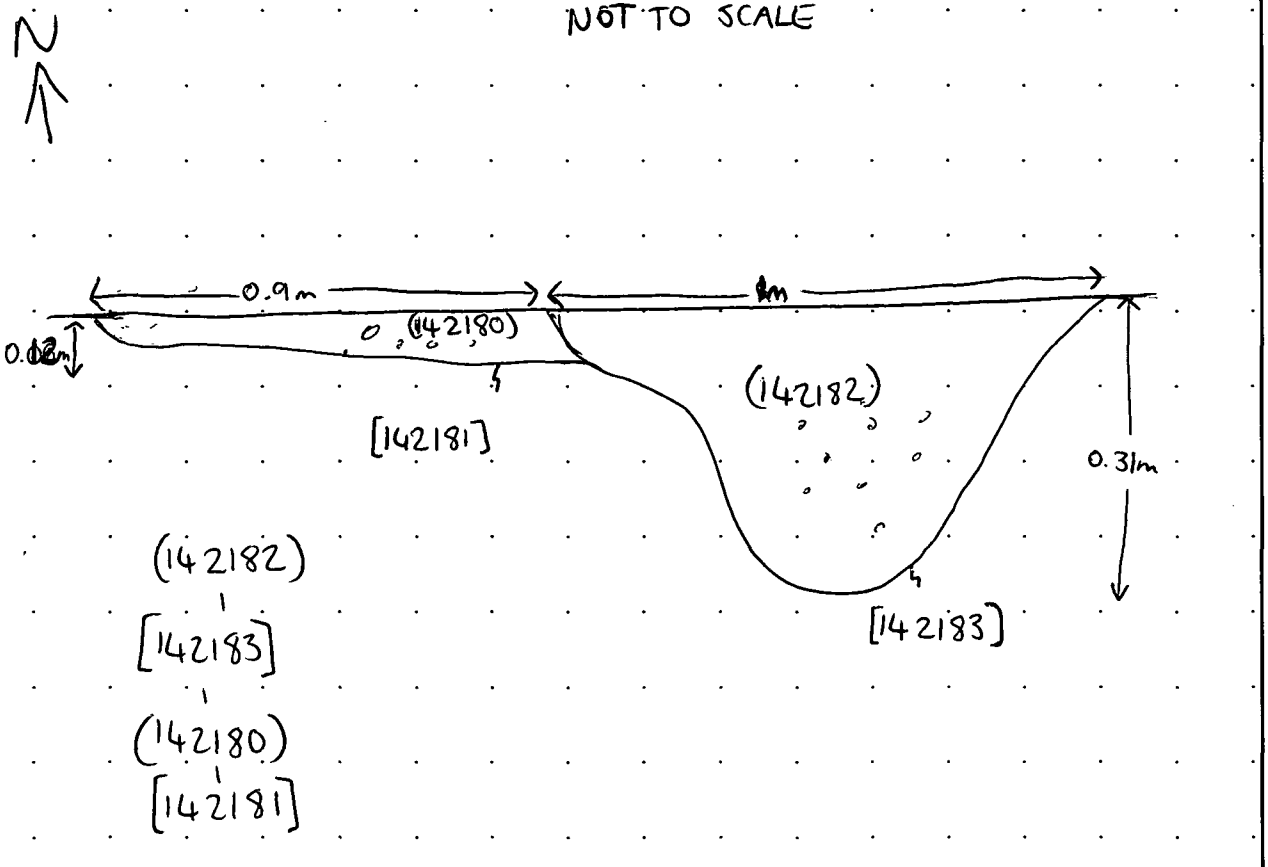

*(any further details that may be important for understanding the context, including items marked * overleaf)*

Cut of ditch. Could be reaching ditch terminus as shallow compared to slots to the south, and on surface disappears within 2m North of [142181] slot. First appeared to be natural feature but follows line of [142081] which lead to interpretation of it being a ditch.

NOTE: [142179] and [142183] do not run parallel, Further South, [142181] / [142181] ends and [142183] / [142083] moves closer to [142179] / [142079] but stays in a straight line.

ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked * overleaf)

Cut of ditch. Comparing to slots further south (142083) and slots not yet numbered), it appears the feature has been cut into a certain depth of the gravel into a V-shape - suggesting it could have been a means of channeling water.

Refer to context 142181

THICKER IN THE NE 0.35 ONLY 0.26 IN SE

NATURAL SILTY CLAY ~~LENS~~ WASHED IN: POSSIBLY FROM A BANK ~~TO THE~~ RUNNING ALONG THE NW OF THE DITCH. THE NATURAL IS DIRTY. THERE ARE FEW STONES ~~LITTLE~~ MOST ~~ARE~~ SMALL + ANGULAR BUT THERE WAS TWO LARGE FLINTS IN TOO - POSSIBLY THROWN IN DURING FIELD CLEANCE.

NO STONE LINES OR SIGNS OF HOW LONG IT TOOK FOR THE DITCH TO FILL BUT THE DEPOSIT SEEMS RATHER LOW ENGERGY

Refer to context 142193

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Primary fill of [14205]

Fairly solid composition, moderately disturbed by rooting, roots still usable in section.
Not very silty more sandy and likely deliberate backfill rather than natural infilling as no lenses.

Few gravel rarely dotted around rooting.

Refer to context

SKETCHES

DITCH CUT ~~WITH~~
THE UPCAST MAYHAVE BEEN THROWN TO THE NW OF THE CT WHICH LATER TRICKLED BACK IN TO FILL THE DITCH.

THE BASE OF THE DITCH IS CUT INTO THE GRAVEL BY APPROX 0·20m SUGGESTING THE ORIGINAL EXCAVATORS WERE USING THE NATURAL GRAVEL AS DRAINAGE AS ALONG THE LENGTH OF THE DITCH, NO MATTER HOW DEEP THE CUT, WHEN THE GRAVEL HITS 0·20 DEEP THEY STOP DIGGING.

Refer to context

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

This fill is only subtlely more orange than fill [142213]. This may be the result of natural infilling resulting from the abandonment of the feature. Since the natural soil is the same for fill (142213) there may be only a slight difference in colour possibly because of the different cuts. Please see context sheet for fill (142213)

Refer to context 142212

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

From the regular curve of this ditch it is likely that this ditch was created later than the cut [142214]. Only a section of this ditch was dug though darker shades on the subsoil suggest that the ditch runs ~~S~~ E ~~N~~ W along the site There also appears to be a ditch running parallel to it as suggested by another darker shade of top soil. These ditches are probably related to the farming system on the site. They are, however, too deep to be furrows but may be, instead, marking boundaries.

Refer to context 142214

(any further details that may be important for understanding the context, including items marked * overleaf)

This fill is only a subtler There is only a subtler ~~colour~~ difference in colour shade to differentiate the fill (142213) from fill (142211). This may be the result abandoning the ditch and later creating cut [142214] after cut [142212] had infilled naturally. The process of creating the new ditch have resulted in a mixing of the two fills after [142214] was abandoned or natural slumping when [142214] was cut making the ~~shape~~ current shape of fill (142213).

Refer to context 142212

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

From the irregular shape of the ditch it seems that this ditch is cut by cut [142212] meaning that this ditch is earlier than [142212]. As with [142212] only a section of this ditch was dug but darker shades on the subsoil suggest that the ditch runs NE-SW across the site. As mentioned for [142212] the regular ~~pattern~~ pattern of these ditches suggest some form of boundary marker.

Refer to context 142212

ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked * overleaf)

Cut of ditch. Majority of the cut and its fill (142262) was removed during the stripping of the site. Intersects w. [142264] just north of the slot. Possibly the same context as [142274]

Refer to context

SKETCHES

*This form is incomplete if fields marked with ◤ are empty. PTO for additional information (and describing all items marked with *) and sketches.*

## ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

Fill of ditch [142269] cut by shallow ditch [142271]. Likely formed by combination of natural silting and anthropogenic dumping given frequency of animal bone recovered.

Refer to context

## SKETCHES

*(consider: location plan, detailed plan showing relationships, section showing fills/deposits as appropriate)*

ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

Post-hole located to the east of the 'roundhouse'. Excavated as per a 'cremation' as in close proximity to nearby suspected cremations. Possibly associated with nearby post-hole [142279] due to similarities in the profiles of the two features and in the composition of their fills.

Refer to context (142278)

SKETCHES

## ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

GRAVE MAY POSSIBLY BE ON A HORIZON BECAUSE EAST END OF FILL WAS MORE GRAVELLY THEN THE WEST END OF FILL WHICH WAS MORE CLAYEY.
COMPOSITION OF FILL MAY EXPLAIN POOR PRESERVATION OF BODY
PIECES OF CHARCOAL AT TOP LAYER OF FILL SUGGEST DELIBERATE INFILLING
WORMHOLES DISCOVERED IN FILL SUGGESTING SOME MIXING OF THE SOIL PROBABLY DISTURBING PARTS OF SKELETON + CONTAMINATING SAMPLES TAKEN FROM HEAD, PELVIS + FEET.
NATURAL INFILLING LIKELY DUE TO PROBABLE AGE OF BURIAL + NATURAL PROCESSES THAT WOULD HAVE GONE ON UNTIL EXCAVATION.
NO GRAVE GOODS DISCOVERED IN FILL - WAS THIS DUE TO A HASTY BURIAL OR LOWLY STATUS OF PERSON?
NATURAL ORANGEY SOIL CLEARLY DEFINED GRAVE CUT COMPARED TO THE DARKER MORE CLAYEY SOIL SURROUNDING THE SKELETON

Refer to context SK142250 + [142288]

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

CONTAINED CROUCHED BURIAL - SEE SK142250
PROBABLY PRE-DATES ROMAN OCCUPATION OF SITE
SLANTING DEPTH - EAST END = 0.29M, WEST END = 0.18M
SLIGHTLY WIDER AT HEAD END (EAST END) = UNEXPECTED AS IT WOULD BE PREDICTED THAT THE HEAD WOULD BE PLACED AT NARROWER END.
CUT PARTICULARLY SMALL FOR BODY - THE BODY SEEMED TO BE SQUISHED INTO THE GRAVE AS KNEES + HANDS WERE VERY CLOSE TO THE TOP OF THE GRAVE CUT.
POSSIBLY BURIED HASTILY BECAUSE OF NARROWNESS OF CUT THOUGH SOME CARE WAS GIVEN AS BODY WAS PLACED IN A NEAT POSITION SUGGESTING SOMEONE MOVED THE BODY INTO THIS POSITION
GRAVE ADJACENT TO DROVEWAY - WAS BODY QUICKLY BURIED AS SOMEONE MOVED ALONG DROVEWAY?
UNCERTAIN AS TO WHY BURIAL IS HERE AS NO OTHER BURIALS HAVE YET BEEN FOUND

SHAPE OF CUT IS ROUNDED RECTANGLE AND WIDER AT EASTEND OF CUT CLEARLY DEFINED GRAVE CUT

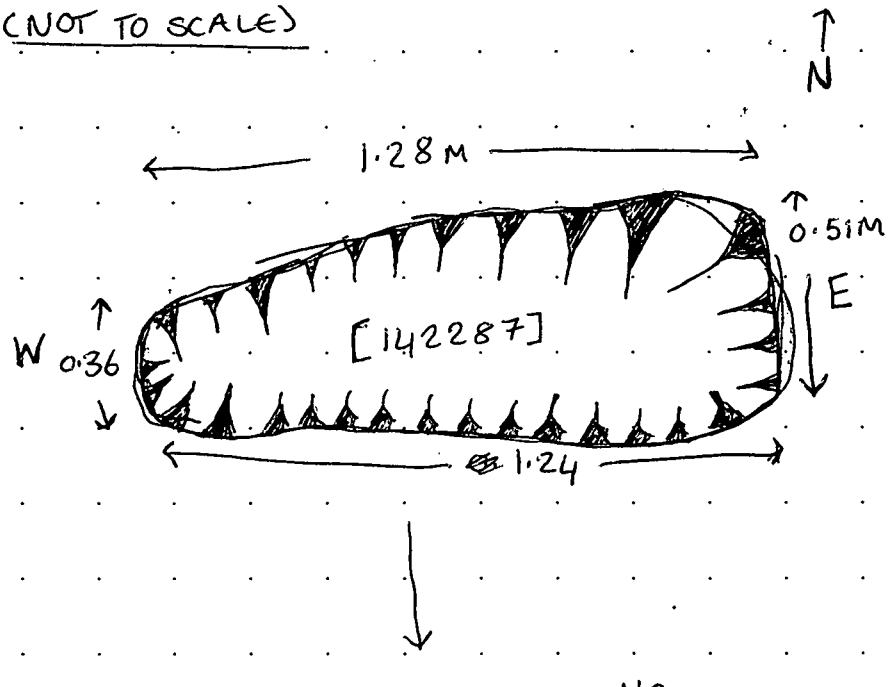

Refer to context: SK142250

NOT A CHRISTIAN BURIAL = WRONG ORIENTATION OF GRAVE + POSITION OF BODY

SKETCHES

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

SLOT EXCAVATED TO EXAMINE RELATIONSHIPS BETWEEN DITCHES.

1.08 EXCAVATED LENGTH EXTENDS TO BOTH N + S.

NOT BOTTOMED

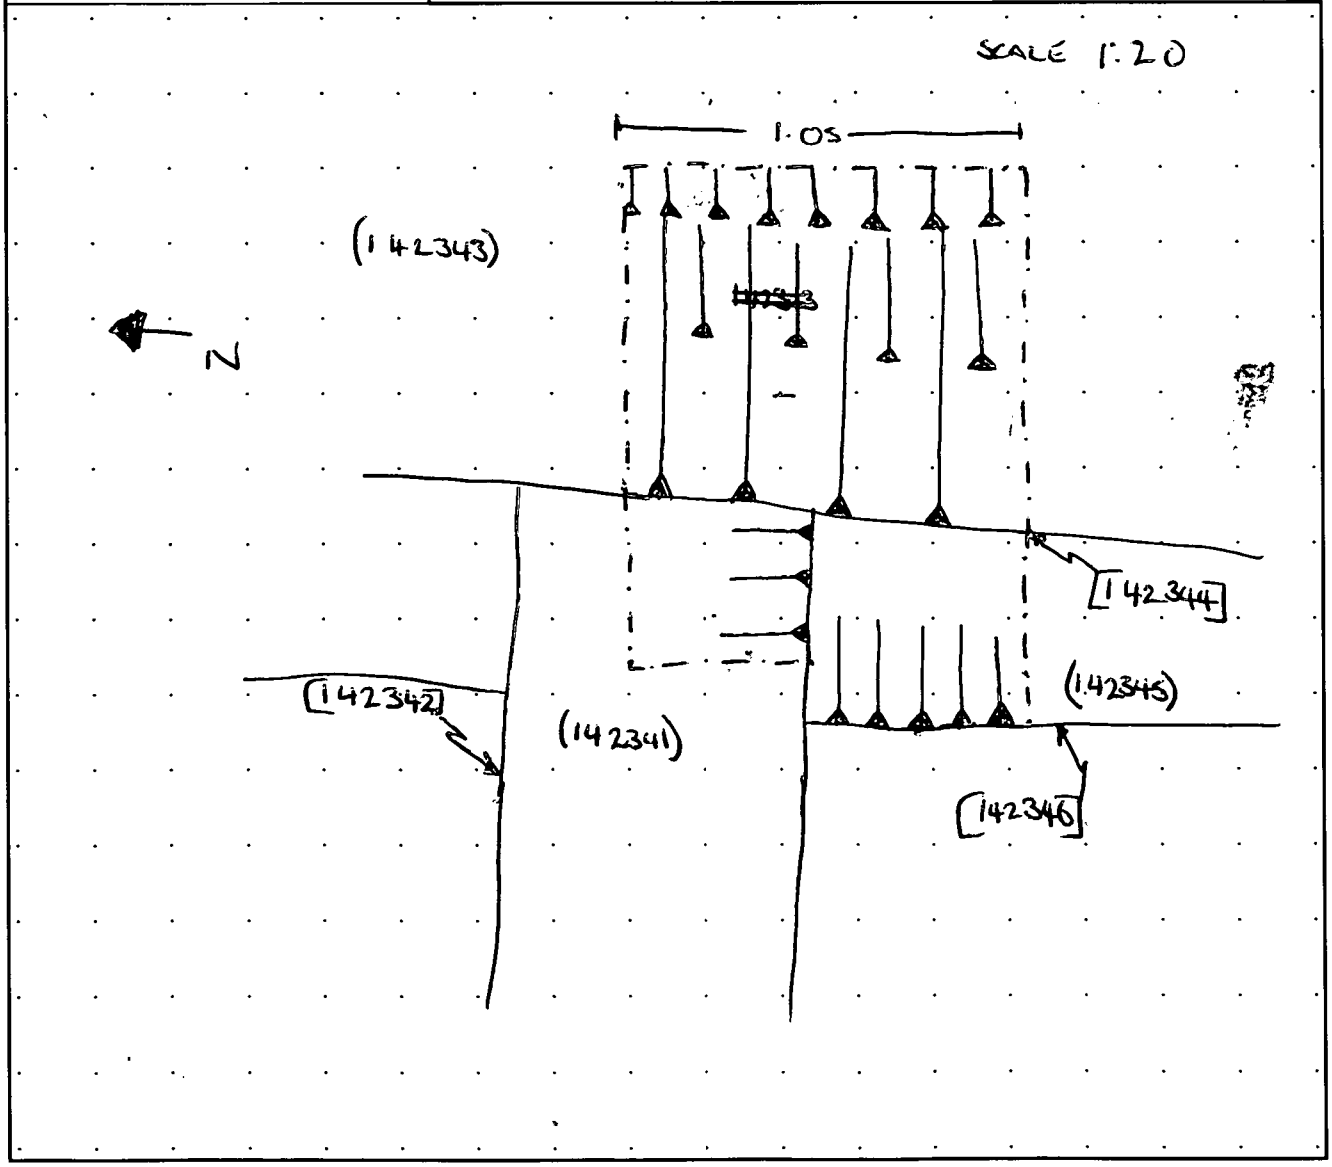

THE SHAPE IN THIS SLOT HAS CHANGED SLIGHTLY FROM THOSE TO THE NORTH + SOUTH. THE WEST EDGE IS LESS STEEP BUT FOLLOWS A BROADLY SIMILAR PATTERN.

AGAIN CUT INTO THE GRAVEL SUGGESTING THIS WAS CUT TO DRAIN WATER RATHER THAN TO CHANNEL IT.

NO SIGN OF THE DIRTY NATURAL TO THE WEST SEEN TO THE S THAT SUGGESTS A BANK BUT (142345)/[142346] MIGHT HAVE ABSORBED IT

Refer to context

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

*The soil was black with ~~addition~~ charcoal additions. (Some pieces were pretty ~~big~~.) Even if the main colour was black ~~there~~ were it was mixed with brown soil (likely natural) and ~~the~~ during the excavation were spotted some ~~fr~~ reddish ~~part~~ parts.
~~Where the black soil started to clear out~~
When ~~the~~ the black soil was almost completely removed, there ~~were~~ found some small stones.

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

[14237] is cut of linear running NE-SW direction it corresponds with at least two more linears barely evident in relationship slot these are [14237] [14237] See plan Sketch [14237]

Note intercuting relationship between [14237] [14237] [14237] has been largely truncated away by [14272] when it turns. only as note above hint in SW NE & SW facing sections. was difficult to differate so need to cross reference with & assocated slots which at time have not got the numbers so need to check plan in post Ex.

Refer to context 14237 14272

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

The fill was probably the result of natural infilling after the ditch was abandoned. This is suggested by the lack of inclusions and finds.
A small amount of manganese was found in the natural infilling.
The fill was very different to the natural soil so it was easy to identify the feature. The orange/red colour of the natural soil and the clayey texture of the fill made the cut very obvious. The dark colour of the fill may also suggest that there was organic matter in the ditch at one point though there is no evidence of this now. Wormholes were found within the fill which shows that worms have mixed the soils up. This could have encouraged the growth of organic matter but has also affected the archaeology meaning interpretation could be skewed

ADDITIONAL INFORMATION
*(any further details that may be important for understanding the context, including items marked * overleaf)*

THIS DITCH IS PROBABLY A BOUNDARY MARKER WHICH RUNS THE LENGTH OF THE TRENCH. SEVERAL SECTIONS HAVE EXCAVATED ALONG THE DITCH WHICH HAS REVEALED THAT THE DITCH IS INTERSECTED BY OTHER DITCHS RUNNING IN THE OPPOSITE DIRECTION. THIS MAY SUGGEST THAT THE DITCH IS A FIELD BOUNDARY RATHER THAN A PROPERTY MARKER ALTHOUGH IT COULD ALSO DESIGNATE THE OWNERSHIP OF ONE FIELD IN CONTRAST TO A FIELD BELONGING TO A DIFFERENT OWNER THUS THE DITCH MAY ACT AS FIELD AND PROPERTY BOUNDARY THE SECTION EXCAVATED HERE SHOWS THAT THE DITCH IS SHALLOWER ON THE WEST SIDE AND THAT THE DITCH EDGE HAS A GENTLER SLOPE ON THE NORTH SIDE - WHETHER THIS IS DUE TO SLIGHT SLUMPING FOLLOWING THE ABANDONMENT OF THE DITCH OR IS THE RESULT OF THE NATURAL SLOPE OF THE LAND CANNOT YET BE ASCERTAINED.

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Cut of ditch orientated E-W which likely forms part of 'droveway' running across the area of excavation. The ditch is paralleled by [142368] to the north. ~~The southern side of the ditch~~ The profile of the ditch extends to the south at a considerably shallower depth. This may form part of a larger silt spread that covers the area.

Refer to context (142390)

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

The ~~pit~~ feature (pit) was mainly black. reddish
~~Pieces~~ Parts of ~~bones~~ have ~~been found~~ and a ~~piece~~ of ~~clay~~
~~Pieces~~ Faunal bones have been revealed.
since there was a chance for having a cremation
we decided to remove the other half of the pit.
Rich in charcoal : 3 sample buckets were filled

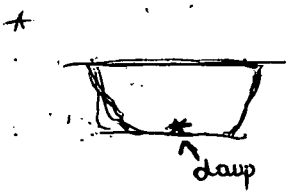

Possibly the pit was ~~dumped~~ dug in order to ~~fill it~~ with dump their rubbish, in this case burnt material
It is not considered as in situ burning.

Interesting is the ~~fact~~ gravely bottom of the pit, which is flat. *see sketch.

close to the bottom was revealed piece of clay*

## ADDITIONAL INFORMATION

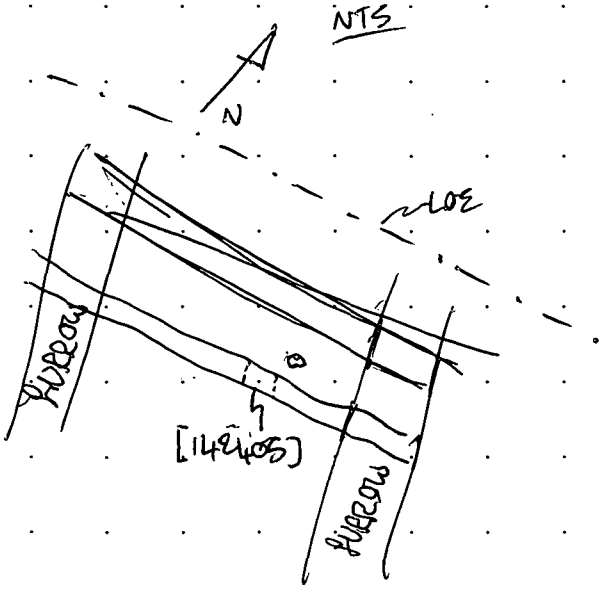

*(any further details that may be important for understanding the context, including items marked * overleaf)*

DITCH EXCAVATED FOR DRAINAGE OR/AND LAND BOUNDARY PURPOSES. THE DITCH IS SET PERPENDICULAR TO OTHER TWO DITCHES THAT RUN ALONG A N TO S AXIS. AFTER ITS ABANDONMENT, THIS DITCH WAS TRUNCATED BY THE CONSTRUCTION OF ANOTHER DITCH, WHICH WAS EXCAVATED THROUGH THE ~~WESTERN~~ NORTHERN EDGE OF DITCH [14242 4]. THESE DITCHES WERE SUBSEQUENTLY DISTURBED BY FARMING AND PLOUGHING ACTIVITIES OCCURRED IN THE AREA.

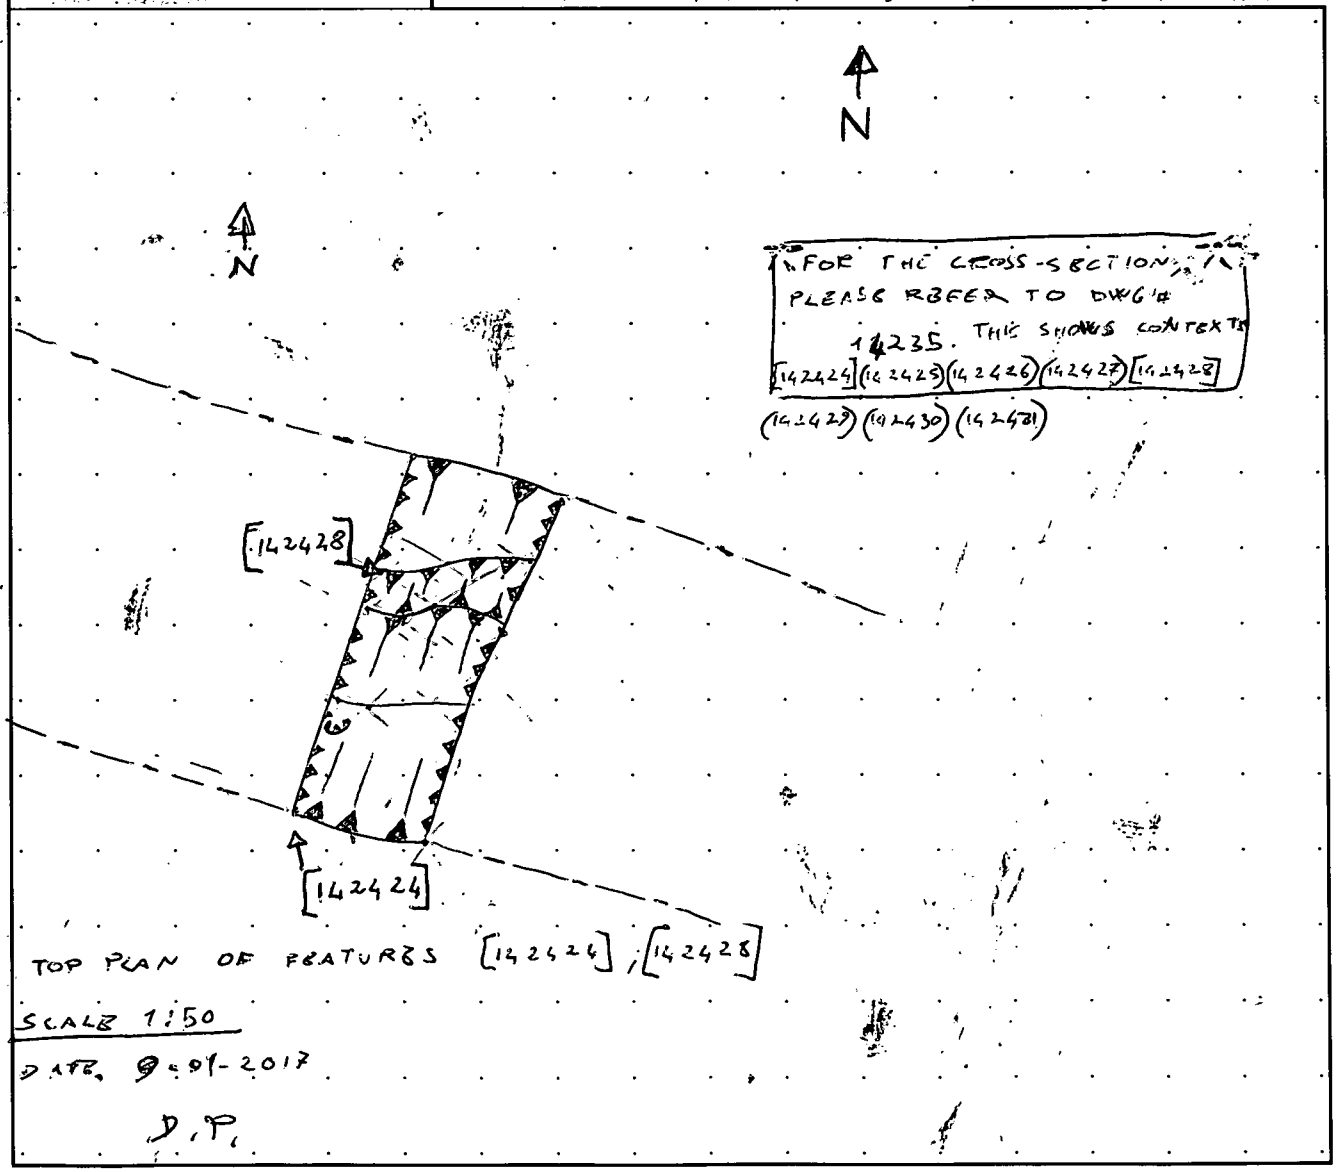

[14242 8]

ALTHOUGH WE ONLY EXCAVATED A SLOT OF DITCH [14242 4], WE CAN MAKE EDUCATED GUESSES ABOUT ITS FULL EXTENT. AS OBSERVED, THIS DITCH JOINS TWO ~~BET~~ OTHER DITCHES SET PERPENDICULARLY TO IT. THESE DITCHES ARE SPACED ABOUT 6.80 m FROM EACH OTHER. THEREFORE, THE DITCH JOINING THEM WAS PROBABLY ABOUT 7 m LONG. THE WHOLE AREA IS CRISSCROSSED BY SIMILAR FEATURES, WHICH BEARS WITNESS TO THE INTENSIVE FARMING ACTIVITIES OCCURRED IN THESE FIELDS. UNFORTUNATELLY, WE DID NOT RECOVER EVIDENCE AS TO THE PRECISE CHRONOLOGY OF THE AFOREMENTIONED ACTIVITIES.

Refer to context

## ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

FILL NATURALLY DEPOSITED AT THE BOTTOM OF THE DITCH SOON AFTER ITS CONSTRUCTION. IN FACT, THIS FILL IS A MIXTURE OF MEDIUM BROWN SAND AND BROWNISH-ORANGE CLAYEY SAND, THIS LATTER BEING THE NATURAL FILL THROUGH WHICH THE DITCH WAS EXCAVATED. THEREFORE, WE HYPOTHESISE THAT THIS FILL WAS FORMED WHILE DITCH [14424] WAS STILL BEING USED. NO EVIDENCE POINTS TO THE ABSOLUTE CHRONOLOGY OF THIS FILL

Refer to context [14424]

*(any further details that may be important for understanding the context, including items marked * overleaf)*

NATURAL DEPOSIT, PROBABLY RESULTING FROM SEDIMENTATION OF SAND BROUGHT BY FLOWING FLOOD WATER *. AS WITH THE FILL BELOW - (142425) - THIS FILL WAS GRADUALLY FORMED WHILE DITCH [142426] WAS STILL BEING USED. HOWEVER THE FORMATION OF THIS FILL MUST HAVE REDUCED THE WATER FLOW RATE OF THE DITCH. THE FILL WAS PROBABLY CUT BY DITCH [142428], THIS LATTER BEING DUG WHEN DITCH [142424] WENT OUT OF USE.

*OR MORE LIKELY ~~FROM~~ BY THE REGULAR WATER FLOW IN THE DITCH

Refer to context [142424]

## ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

NATURAL INFILL RESULTING FROM SEDIMENTATION OF SILT AND CLAY PARTICLES BROUGHT BY FLOWING FLOODWATER OR MORE PROBABLY BY THE REGULAR WATER FLOW IN THE DITCH. THE FORMATION OF THIS FILL MOST PROBABLY CAUSED DITCH [142424] TO CLOG UP. AS WITH THE CASE OF CONTEXT (142426), THIS FILL WAS CUT WITH THE CONSTRUCTION OF DITCH [142428]. HOWEVER, THE EDGE OF THIS CUT THROUGH CONTEXTS (142426) AND (142427) CAN HARDLY BE IDENTIFIED

Refer to context [142424]

## ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

DITCH FOR DRAINAGE AND/OR LAND BOUNDARY PURPOSES. THIS DITCH WAS EXCAVATED AGAINST THE NORTHERN EDGE OF A PRE-EXISTING DITCH. ITS NORTHERN EDGE WAS WELL PRESERVED, WHEREAS THE SOUTHERN EDGE WAS PROBABLY TRUNCATED BY PLOUGHING AND OTHER FARMING ACTIVITIES OCCURRED IN THE AREA. AS WITH DITCH [142424] THIS DITCH MAY HAVE EXTENDED FOR A LENGTH OF AROUND 7m. (PLEASE REFER TO COMMENTS IN CONTEXT SHEET [142424]. WE FOUND NO EVIDENCE ABOUT THE ABSOLUTE CHRONOLOGY OF THIS FEATURE, WHICH WAS CERTAINLY BUILT WHEN DITCH [142424] HAS ALREADY GONE OUT OF USE.

Refer to context [142424]

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Cut of shallow ditch/gully - 1m slots inserted every 10m. Running NE-SW, truncated at intervals by modern furrows and a service(?) trench.
Has a concave profile in slot [142406] to the southeast, but is V-shaped here at the NW end.
(No finds.)

Refer to context [142441]

## ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

- biggest fill in the pit so far, ~~not~~ & haven't reached the botton of the feature, were told to stop excavating because it was getting unsafe and a machine is going to be brought in to finish the pit, so Fill (142448) maybe bigger
- huge + easy notice the colar change, grey in colar compared to fills ~~and~~ above which are orange/brown.
- A lot of faunal remains, horse and cow bones, mandibles, vertebrae
- 4 10L samples were taken
- colar of sediment is slightly bluey grey near the botton of the fill.
- This fill is a result of deliberate backfill

Refer to context 142443

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

EXCAVATION STOPPED AS [redacted] THE FEATURE BECAME TOO DEEP IT WILL BE MACHINED DOWN TO THE NATURAL. THUS, THIS FILL MAY INCREASE IN SIZE AT A LATER DATE. FURTHER, IT IS UNKNOWN WHETHER THERE ARE [redacted] OTHER FILLS BELOW IT.
THIS FILL IS A RESULT OF DELIBERATE BACKFILL AS FAUNAL REMAIN AND POTTERY INCLUSIONS WERE FREQUENT.
THE FILL IS PART OF A LARGE RUBBISH PIT, THE EXTENT OF WHICH IS UNKNOWN AS EXCAVATION BY HAND HAD TO BE STOPPED.
FAUNAL REMAINS WERE FREQUENT (BONES OF HORSE AND COW, AMONG OTHERS), AND POTTERY INCLUSIONS WERE MODERATE
* THE THICKNESS OF THE FILL IS NOT CERTAIN AS THE FEATURE WAS NOT COMPLETED. INDICATED THICKNESS IS AT THE TIME OF STOPPING WORK
THIS FILL IS LATER THAN FILLS (142449) AND (142450)

ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

THE EXCAVATION OF THIS RUBBISH PIT WAS STOPPED AS IT BECAME TOO DEEP AND DANGEROUS TO CONTINUE DIGGING. THUS, IT IS UNKNOWN HOW DEEP THE PIT AND CUT IS. THE SHAPE OF THE BASE OF THE CUT IS ALSO UNKNOWN AS WE DID NOT REACH NATURAL.

THE CUT HAS CLEAR AND DEEP EDGES, AND APPEARS TO FORM A LARGE, CIRCULAR RUBBISH PIT.

THE DEPTH AND LENGTH OF THE CUT ARE NOT KNOWN AS EXCAVATIONS WERE STOPPED.

[142459] CUT OF LINEAR, RUNNING E-W DIRECTION

PART Southern Component of DRIVEWAY Possibly? THAT RUNS ACROSS SITE and lines up with each other truncation by FURROWS at intermitted PLACES shown IN Sketch.

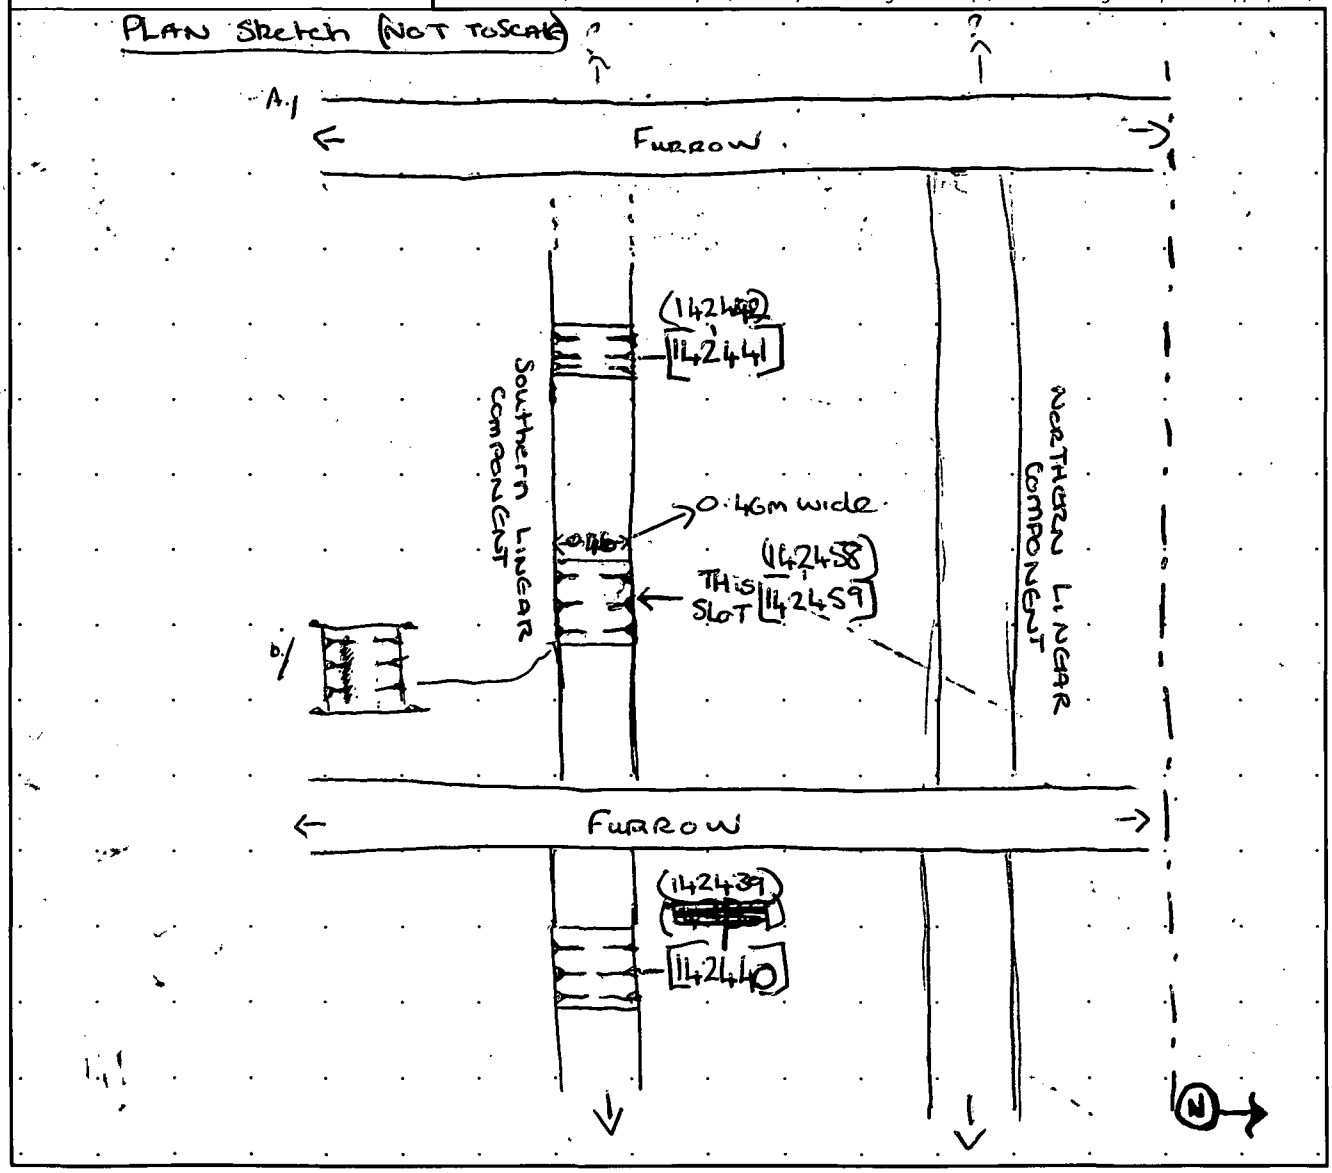

Fill Primary is (142458).

NOTE Sketch b.f badly illustrates a darker component IN THIS natural edge Clean PURE GREY blue likely from bioturbation as evidence of disturbance was found whilst digging. IT IS not Fill ~~NOT Right~~ but Natural NOTE Surrounding area affected by bioturbation.

- 1m SLOTS AT 10m INTERVALS
- ONE FILL SO NO 1:10 SECTION DRAWN.

267
268

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

*THIS FILL WAS PART OF THE ORIGINAL TOP SECTION OF THE PIT, WHICH CAN BE SEEN IN PHOTOGRAPHS 140262/263/264/265/266/267/268. THE TOP SECTION WAS TAKEN DOWN 50CM BY ORDER OF SUPERVISORS ~~WHO~~ WANTED TO CREATE A SAFETY STEP ON EACH SIDE OF THE FEATURE. THE SUPERVISORS ALSO DID NOT WANT TO SECTION DRAW THE ORIGINAL SECTION. THUS, NO SECTION DRAWING EXISTS FOR THE FILL. IT WAS NO LONGER VISIBLE AFTER THE STEP WAS CREATED. THEREFORE, ITS RELATIONSHIP TO OTHER FILLS IS UNCERTAIN, ALTHOUGH IT IS LIKELY LATER THAN FILLS (142447), (142448), (142449) AND (142450).
THE FILL HAD MODERATE FAUNAL REMAIN AND POTTERY INCLUSIONS, AS DID THE REST OF THE FILLS IN THIS RUBBISH PIT. THE FILL IS A RESULT OF DELIBERATE BACKFILL, OCCASIONAL SMALL STONE INCLUSIONS WERE ALSO PRESENT.

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

SECONDARY USE OF PIT (MAYBE)
EVEN DISTRIBUTION OF LARGE + SMALLER STONES THROUGHOUT. SOME OF THEM SHOW SIGNS OF BURNING/SCORCHING + SOME ARE HEAT CRACKED.

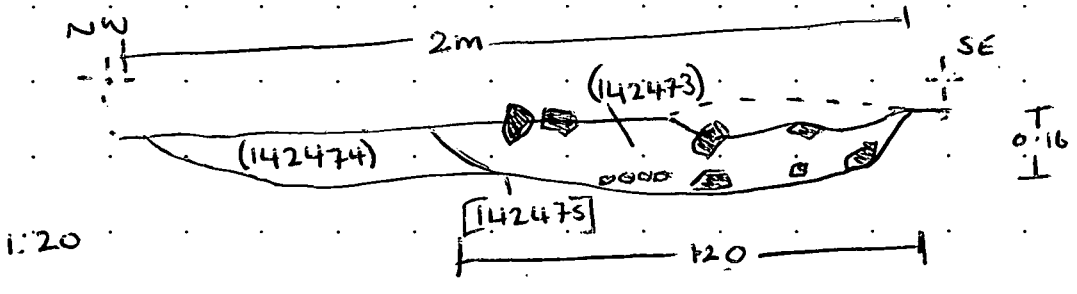

NO ORDER TO THE DEPOSIT SO IS DUMPED IN + IT WENT IN COLD AS THERE IS NO SIGN OF HEAT OR LAMINATION IN THE CUT.

ONE LARGE (APPROX 80mm) PIECE OF RED WORKED, BUT BROKEN FLINT COME OUT OF IT ~~FROM~~ ~~THE~~ ~~DEPOSIT IS~~ ~~SECONDARY USE AS OF PIT AS THERE SEEMS NO RE~~

ORIGINALLY EXCAVATED ACROSS THE AXIS BUT REALISE MORE INFO COULD BE GAINED BY DIGGING ALONG THE AXIS

## ADDITIONAL INFORMATION

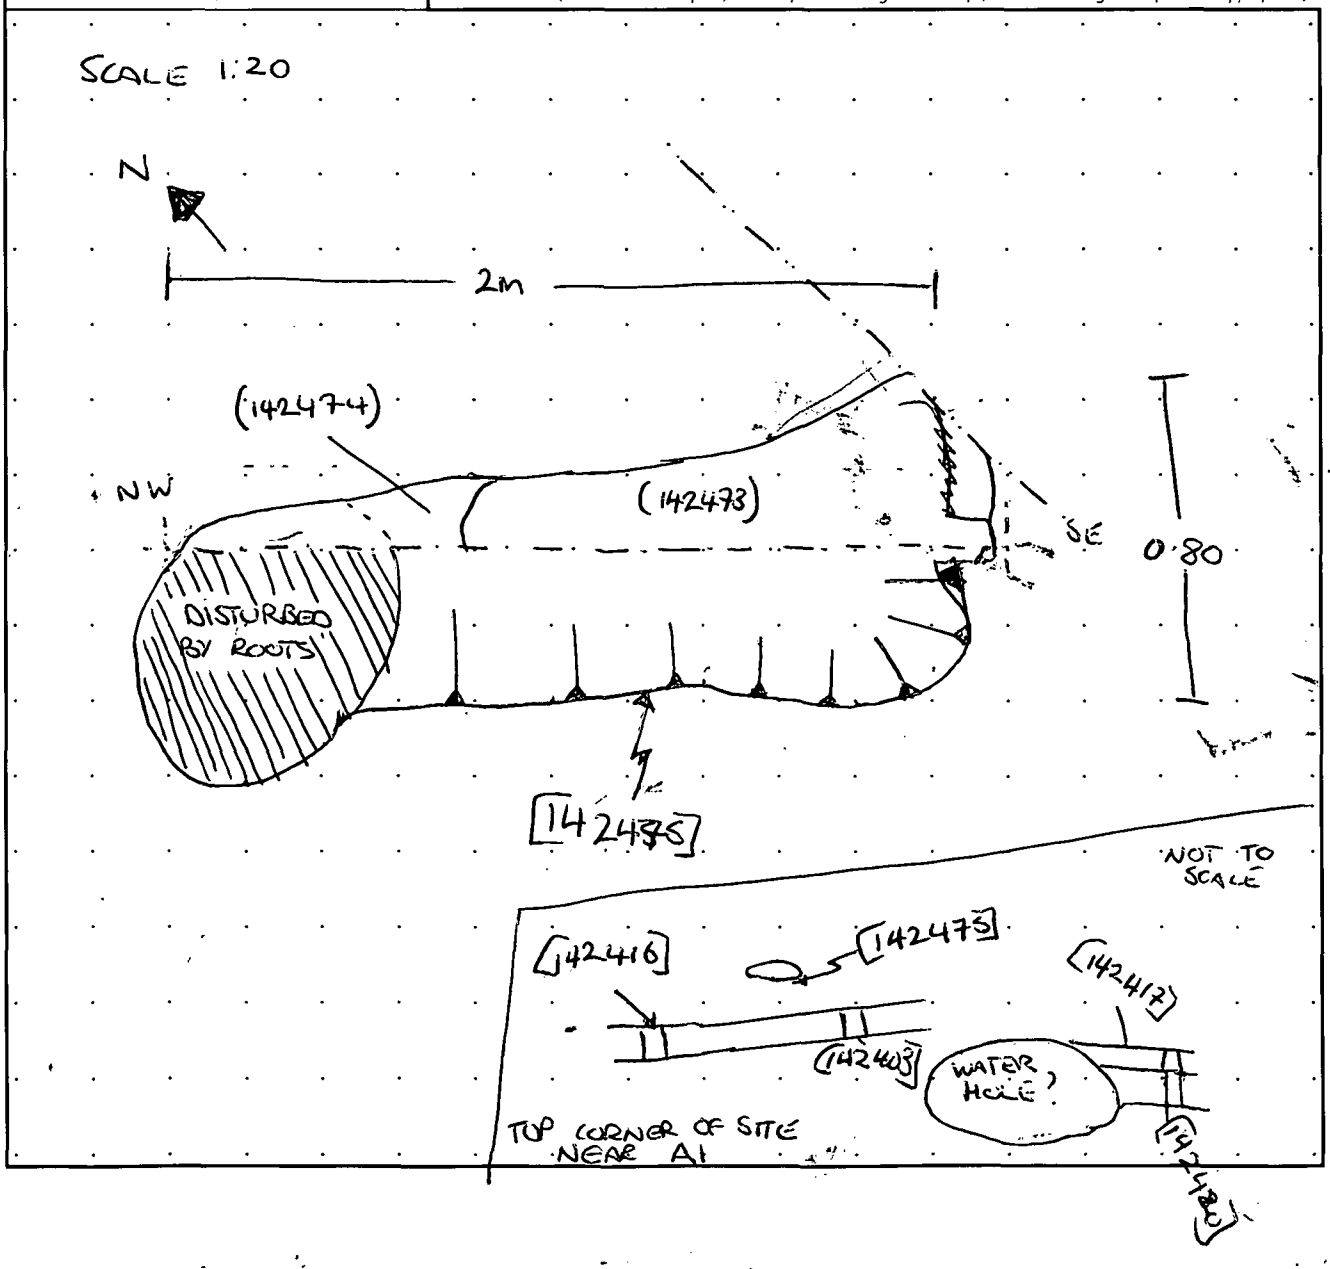

*(any further details that may be important for understanding the context, including items marked * overleaf)*

THE NW AREA OF THE CUT HAS BEEN DISTURBED BY PLANT ROOTS.
NO CLEAR REASON FOR THIS CUT - A RANDOM SHAPE COUPLED WITH A SECONDARY FILL OF BURNT STONES + SOILS MEANS IT'S TRICKY TO INTERPRET

Refer to context

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

THIS FILL IS THE RESULT OF THE DISUSE OF THE DITCH - THIS HAS RESULTED IN NATURAL INFILLING
ROOTING SEEMS TO HAVE OCCURRED DURING TIME OF DISUSE AND THERE WERE ALSO A FEW WORMHOLES MEANING THAT THERE MAY BE MIXING OF NATURAL SOIL AND FILL.
MAY ALSO HAVE SOME MIXING ~~OF~~ WITH FILL (142478) SINCE [142477] WAS CUT INTO THE CONTEXT MEANING THAT MIXING COULD HAVE OCCURRED DURING THE CONSTRUCTION OF [142477].
IT WAS ORIGINALLY DIFFICULT TO DETERMINE THE FILL FROM THE NATURAL SO A SONDAGE WAS CUT INTO THE SURROUNDING AREA AND SOME OVERCUTTING HAS OCCURRED IN THE PROCESS

Refer to context 142477 + 142479

SKETCHES
(consider: location plan, detailed plan showing relationships, section showing fills/deposits as appropriate)

THE DITCH IS AN EXTENSION OF CUT ~~OF~~ [142475] BUT DOES DIFFER FROM THAT CUT IN DEPTH AND NIDTH. THIS SECTION OF THE DITCH IS SHALLOWER AND NARROWER WHICH CORRESPONDS TO THE SHAPE OF THE DITCH AS SEEN ON THE SURFACE, THAT IS, THE DITCH APPEARS TO NARROWER AND WIDEN AS IT TRAVELS ACROSS THE SITE. HOWEVER THE SHAPE OF THIS SECTION OF THE DITCH WAS UNEXPECTED SINCE IT DID NOT CORRESPOND TO THE SHAPE SUGGESTED ON SURFACE LEVEL.
THE CUT OF THIS DITCH ALSO CURVED SLIGTLY, RESULTING IN THE SW END OF THE DITCH BEING FURTHER NW THAN THE NE END. THIS HAS YET TO BE EXPLAINED.

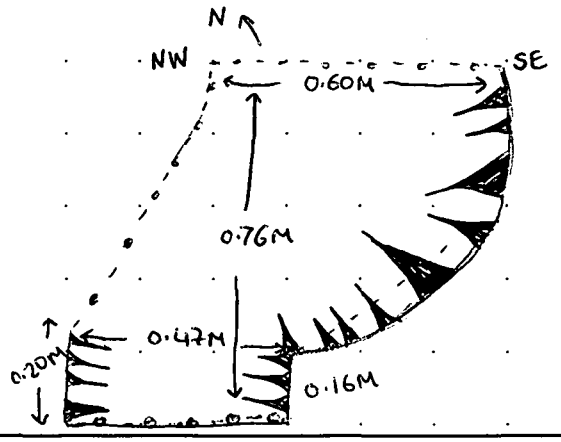

Refer to context 142479

SKETCHES
*(consider: location plan, detailed plan showing relationships, section showing fills/deposits as appropriate)*

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

THIS FILL IS VERY SIMILAR TO FILL (142476) THOUGH THERE WAS NO EVIDENCE OF ROOTING AND NO WORMHOLES IN THE FILL. THE SIMILARITY BETWEEN THE FILLS MAY BE DUE TO DIGGING OUT SIMILAR SOIL OR THE MIXING OF SOIL WHEN THE DITCH WAS DUG OVER THE PIT.
SINCE THE PIT WAS PROBABLY ABANDONED BEFORE THE DITCH WAS DUG THERE WAS PROBABLY SOME NATURAL INFILLING WHICH HAS RESULTED IN THE FILL. SOME OF THIS FILLING WAS PROBABLY REMOVED DURING THE PROCESS AND HAS MOST LIKELY AFFECTED THE FILL (142476).

Refer to context 142477 + 142479

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

THE CUT OF THE PIT IS INCOMPLETE DUE THE CONSTRUCTION OF THE DITCH AT A LATER DATE. FROM THE REMAINING CUT EGDE IT APPEARS THAT THE PIT WAS A CIRCULAR SHAPE AND WAS PROBABLY FAIRLY LARGE JUDGING BY THE DEEPER CUT CORRESPONDING TO ~~THE~~ WHAT WAS ORIGINALLY THOUGHT TO BE THE NW EDGE OF THE DITCH.

Refer to context 142477

## ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

CUT OF DITCH FOR DRAINAGE, IRRIGATION, OR/AND FIELD BOUNDARY PURPOSES. THIS DITCH CONNECTS TO TWO FURROWS PERPENDICULAR TO IT. THESE RUN ALONG A N TO S AXIS TO THE WEST AND THE EAST OF THE DICH ITSELF. THE TWO FURROWS ARE APPROXIMATELY 7m APART FROM EACH OTHER. THEREFORE, THE DITCH THAT CONNECTED THEM WAS MOST PROBALY 7m LONG.

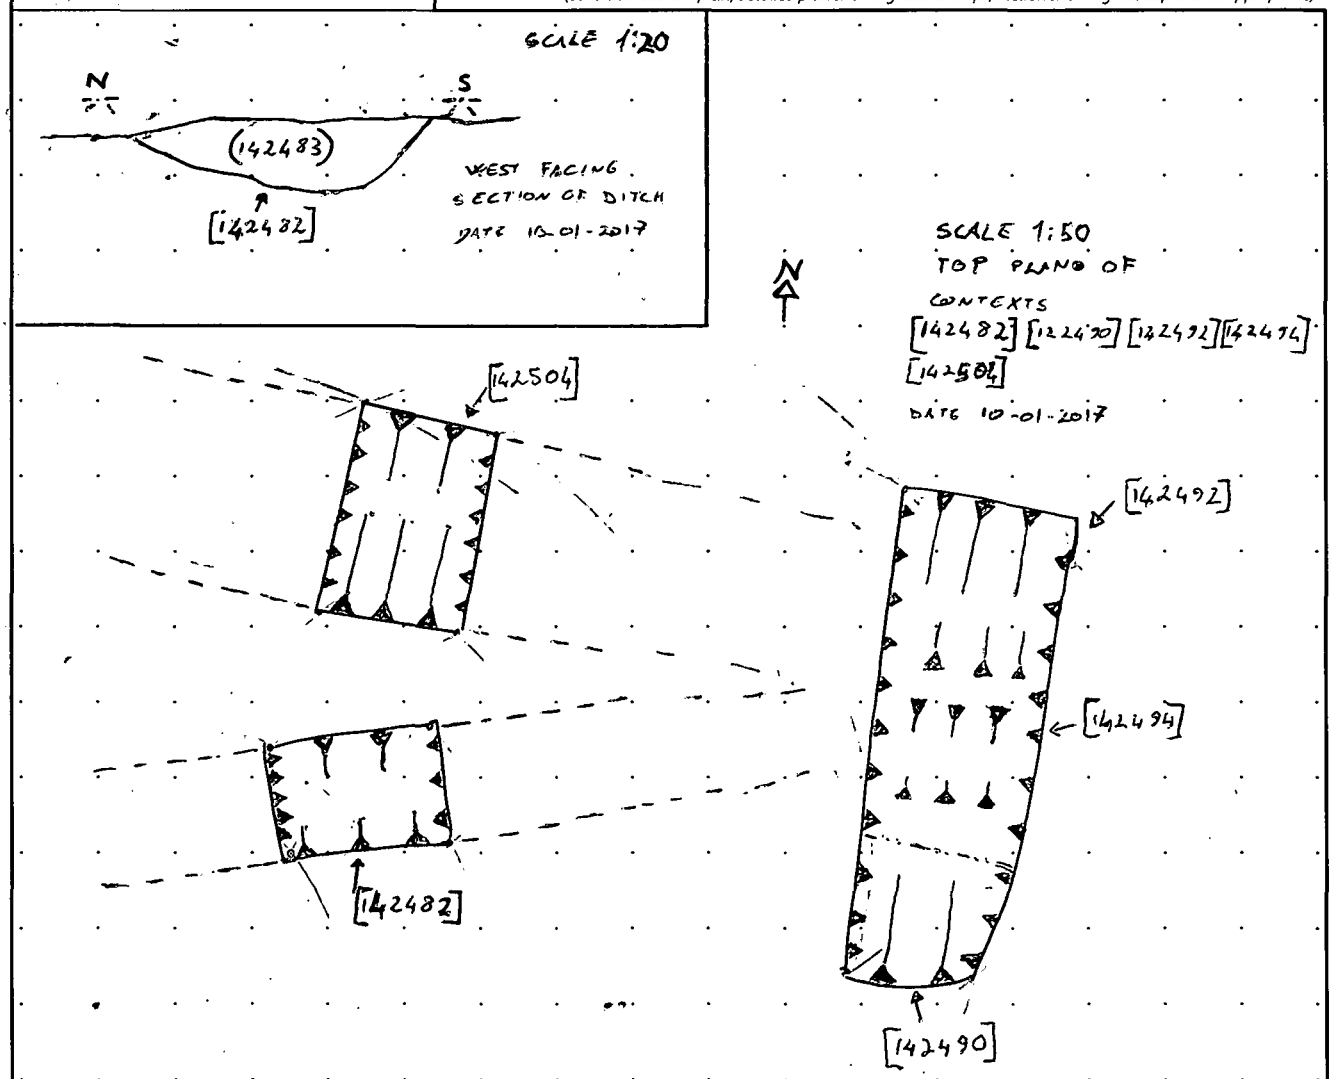

A FURTHER DITCH WAS EXCAVATED PARALLEL TO DITCH [142482] AT A DISTANCE OF ONLY 0.90 m. THESE TWO DITCHES CONVERGE AND POSSIBLY FLEDGE INTO THE N-S FURROW TO TE EAST.

DITCH [142482] IS RATHER SHALLOW, WHICH INDICATES A PROBABLE TRUNCATION DUE TO FARMING ACTIVITIES OCCURRED AFTER IT WAS ABANDONED AND FILLED UP.

Refer to context

## ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

FILL OF DITCH, PROBABLY FORMED THROUGH SEDIMENTATION OF CLAY AND SILT IN THE WATER FLOW. THIS FILL PROBABLY STARTED TO FORM WHEN THE DITCH WAS STILL FUNCTIONING. HOWEVER, THIS PROTRACTED SEDIMENTATION CAUSED THE BLOCKAGE OF THE DITCH.

Refer to context [42482]

ADDITIONAL INFORMATION
*(any further details that may be important for understanding the context, including items marked * overleaf)*

THE SOIL WAS RICH IN CHARCOAL - SAMPLE WAS COLLECTED.
HOWEVER IT IS CONSIDERED CONTAMINATED.
AFTER ~~DIGGING~~ ~~IT~~ REMOVING THE IN BETWEEN SOIL - WE REALISED THAT ~~IT WAS~~ WE MIGHT HAVE TWO DIFFERENT PITS MIXED ONE IN THE OTHER, BECAUSE THE SOIL BETWEEN THOSE WAS NOT NATURAL, AND STILL HAD CHARCOAL INCLUSIONS.
A FLAKE/FLINT OF STONE HAS BEEN FOUND IN THAT FILL.
THE FILLS - (POSSIBLY TWO PITS) ARE SEPARATED AND REGISTERED AS TWO DIFFERENT FILLS. HOWEVER THE SAMPLE IS FROM BOTH OF THEM.

## ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

Fill of pit No 8Mds. Inclusions of [redacted] medium-sized stones, and some manganese. Probably deliberate infilling (due to the number of sizeable stones left), but since there were no finds in the fill, its purpose is unclear.

Refer to context

CUT OF PIT WIT UNEVEN BASE. THIS COULD BE DUE TO THE METHOD OF EXCAVATION AS THE FEATURE WAS DEEP AND NARROW THE PIT CUTS AN EARLIER DITCH/GULLEY [142496] WHICH EXTENDS EW BUT POSSIBLY TERMINATES AS IT DOES IT CANNOT BE SEEN WEST ON THE SURFACE.
IRREGULAR EDGES STARTING GRADUALLY THEN GETS STEEPER.

Refer to context

SKETCHES
(consider: location plan, detailed plan showing relationships, section showing fills/deposits as appropriate)

[142424] [142428]
DR 14235.

Possible continuation this feature which cuts two associated ditches of DRIVEWAY. NORTHERN SIDE.

ADDITIONAL INFORMATION

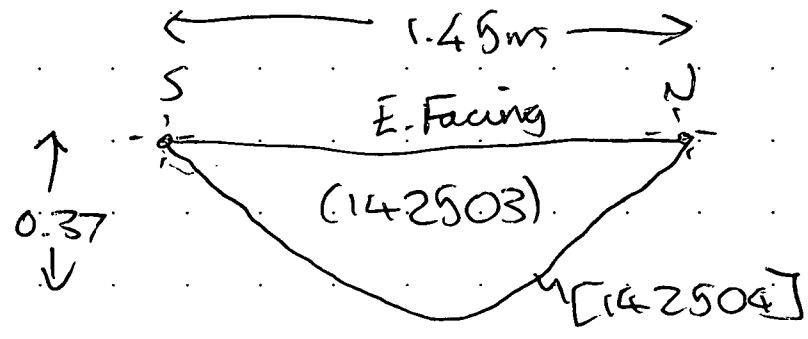

*(any further details that may be important for understanding the context, including items marked * overleaf)*

A DUMPED DEPOSIT OF MAINLY DAUB OR POORLY FIRED CLAY. THERE WAS A CONCENTRATION OF IT IN THE CENTRAL AREA BUT DAUB WAS PRESENT THROUGHOUT THE DEPOSIT. THE DEPOSIT HAD BEEN COMPACTED AGAINST THE SIDES (BUT NOT LINED) OF THE PIT.

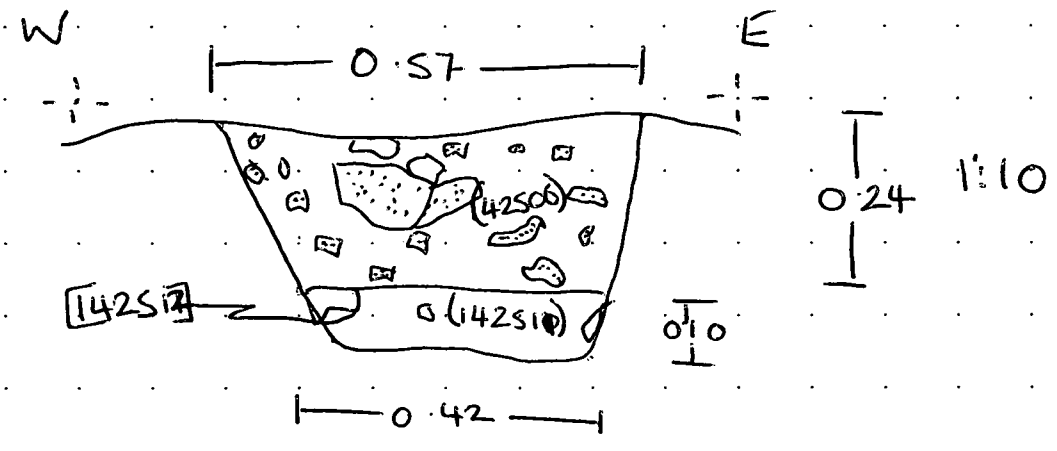

2 PIECES OF POTTERY WAS RECOVERED WHICH APPEARS TO BE ROMAN AND SEVERAL FIRECRACKED STONES (APPROX 0.10) WERE ALSO FOUND.

NOT CLEAR IF THE PIT WAS DUG TO TAKE THIS FILL OR IF IT IS SECONDARY USE

ADDITIONAL INFORMATION

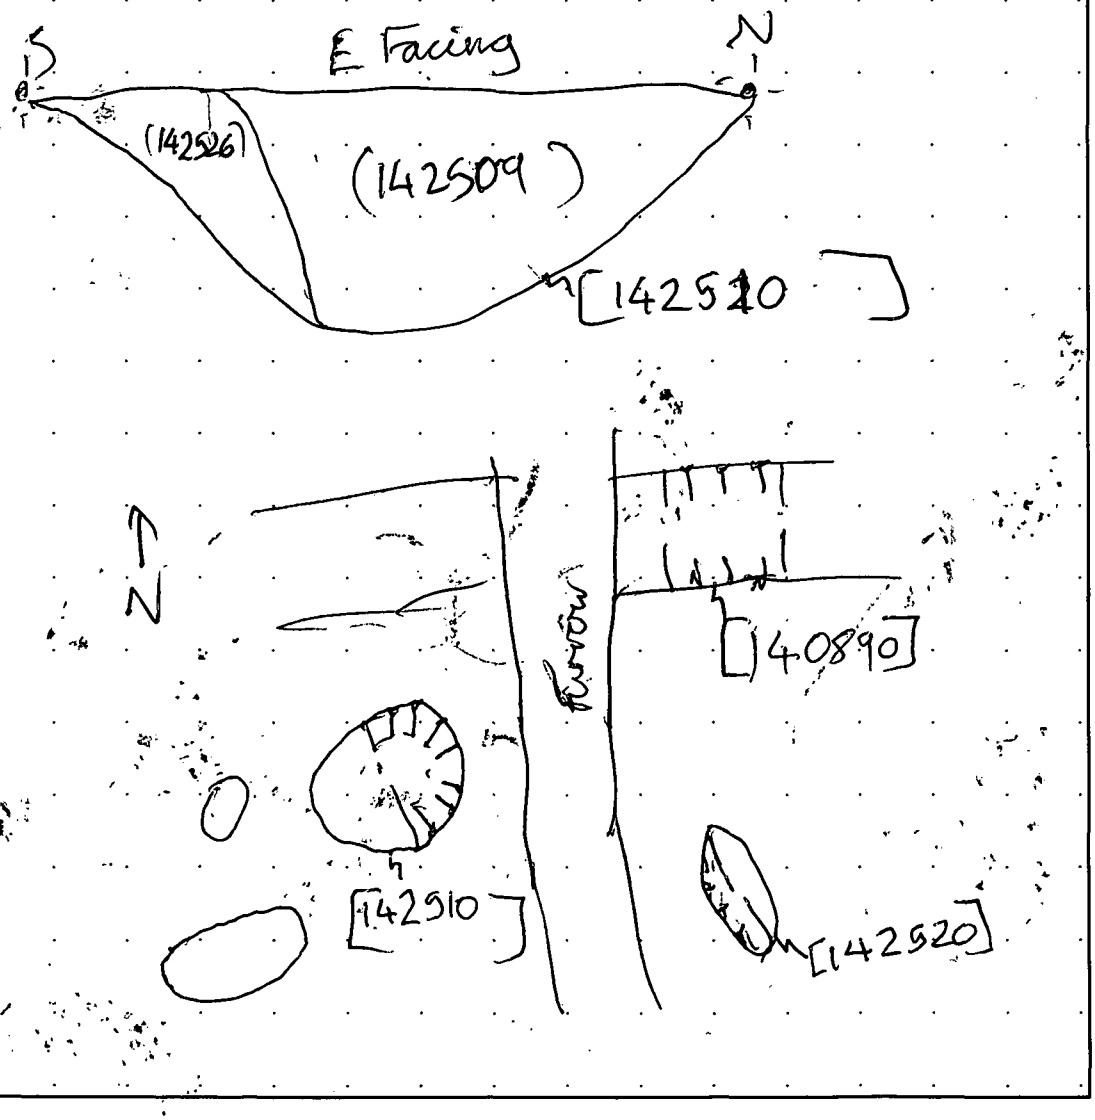

*(any further details that may be important for understanding the context, including items marked * overleaf)*

Pit cut ~~[illegible]~~ located as part of a cluster near the south western limit of excavation. The pit is the easternmost in the group. Given the depth and profile of the pit it may have acted as a large post-hole although the lack of packing material in the fill may discount this interpretation.

Refer to context (142904)

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

FILL OF PIT WITH OCCASIONAL SMALL STONE INCLUSIONS AND MANGANESE. FILL IS PROBABLY THE RESULT OF A COMBINATION OF DELIBERATE BACKFILL, AS TWO POTSHERDS WERE FOUND IN THE FILL, AND PARTLY NATURAL INFILLING. THE PIT AND THE ASSOCIATED FILL ARE SHALLOW AND THEIR PURPOSE IS NOT CLEAR, POSSIBLY A POST HOLE

* NO SECTION DRAWN AS FEATURE CONSISTS OF SINGLE CUT AND FILL

Refer to context 142520

## ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

THIS FEATURE CAN BE INTERPRETED AS A COOKING PIT, AND THE CONTENTS OF THIS PIT STRONGLY POINT TOWARDS THIS INTERPRETATION — IN THIS REGARD, PLEASE SEE COMMENTS TO CONTEXT (142522).

THIS PIT, WHICH COULD BE DATED TO THE IRON AGE, IS LOCATED NW OF A ROUNDHOUSE, AT 24 M. APPROXIMATELY FROM IT. ALTHOUGH WE DO NOT KNOW THE ACTUAL RELATIONSHIP BETWEEN THESE TWO FEATURES, THIS COOKING PIT ADDS TO OUR KNOWLEDGE OF THE EXPLOITATION OF THIS AREA IN THE IRON AGE. VERY CLOSE TO THE COOKING PIT, OTHER THREE PITS WERE IDENTIFIED AND EXCAVATED, THE FUNCTION OF WHICH AND THEIR RELATIONSHIP WITH THE COOKING PIT ARE UNKNOWN.

## ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

THIS FILL REPRESENTS THE REMAINS OF A COOKING PIT INNER STRUCTURE. WE FOUND 64 PIECES OF SANDSTONE, THE LARGEST PIECE MEASURING APPROXIMATELY 0.26 x 0.08 m. MOST OF THESE STONES ~~PRESENT~~ ARE BURNT AND SOME ARE CLEARLY CRACKED BY FIRE ACTION. DURING THE EXCAVATION PROCESS, WE FOUND THESE STONES MIXED WITH A RELATIVELY SMALL AMOUNT OF SOIL, FEW POTSHERDS, AND A FAIR AMOUNT OF CHARCOAL FLECKS. THESE STONES WERE MOST PROBABLY SET ALONG THE WALLS AND ON THE BOTTOM OF THE PIT. SOME PIECES, WHICH ARE FLAT-ISH, MIGHT HAVE BEEN ROUGHLY ~~HEWN~~ TO FIT THE WALLS OF THE PIT OR TO SERVE AS COOKING SURFACE. THE CONSTRUCTION OF THIS COOKING PIT AND THE CERAMIC MATERIAL INDICATE THAT IT WAS PROBABLY BUILT AND USED IN THE IRON AGE.

ADDITIONAL INFORMATION
*(any further details that may be important for understanding the context, including items marked * overleaf)*

CUT OF DITCH. THIS FEATURE IS A DITCH TERMINUS. IT LIES IN ALINGMENT WITH CUTS [142536] AND [142559]. THEY LIKELY FORM PART OF THE SAME DITCH. THE SHAPE AND SIZE OF THIS CUT AND THAT OF [142536] ARE ALSO VERY SIMILAR.
AS CAN BE SEEN IN THE PLAN, THERE IS A SMALL GAP BETWEEN THIS TERMINUS AND CUTS [142536] AND [142559]. A GAP WAS LIKELY BUILT TO ALLOW ENTRANCE TO THE FIELD.
NO SECTION WAS DRAWN AS THERE WAS ONLY A SINGLE CUT AND FIT

Refer to context 142536 + 142559

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

THE CHARCOAL + DAUB IN THE FILL SUGGEST THAT THIS FILL IS THE REMNANTS OF A DAUB PRODUCTION PLACE. THE DARKNESS OF THE SOIL SUGGESTS THAT BURNING HAS TAKEN PLACE HERE AND AS A RESULT HAS MADE THE SOIL DARK AND FERTILE.
NO EVIDENCE OF ROOTING, OR NATURAL DISTURBANCE OF FILL
PLEASE SEE [142538] FOR A MORE DETAILED EXPLANATION

Refer to context 142538

SKETCHES

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

THE FEATURE IS A SMALL PIT IN CLOSE PROXIMITY TO 4 OTHER PITS OF A SIMILAR NATURE
DAUB AND CHARCOAL WERE FOUND IN THE FILL (AS IN THE OTHER 4 PITS SUGGESTING THAT SOME FORM OF BURNING ACTIVITY WAS TAKING PLACE HERE.
THIS BURNING ACTIVITY MAY HAVE BEEN WHERE THE DAUB WAS MADE.
IT IS UNLIKELY TO HAVE BEEN A POST-HOLE AS THE SURROUNDING ARE NOT IN A REGULAR ORDER THAT IS SUGGESTIVE OF A BUILDING AND THE PRESENCE OF CHARCOAL MAKES IT UNLIKELY TO HAVE BEEN A DUMPING PLACE FOR. THE DAUB AS THAT INTERPRETATION DOES NOT EXPLAIN THE POSSIBILITY OF A BURNING ACTIVITY TAKING PLACE
THIS AREA HAVE BEEN A DAUB PRODUCTION AREA

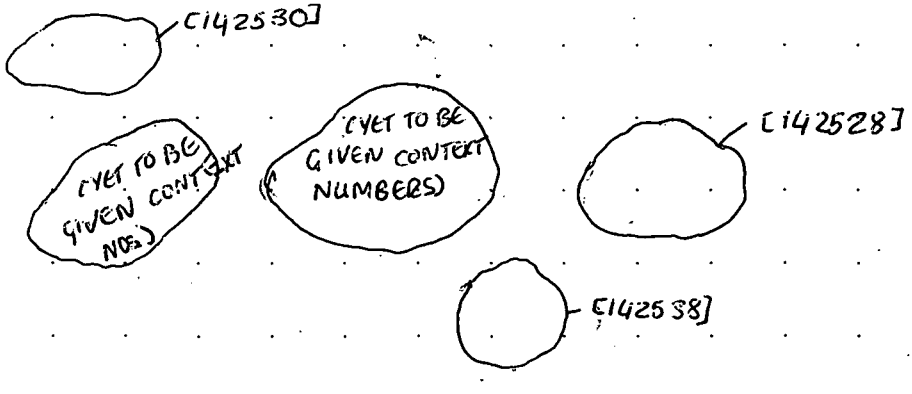

Refer to context

A CUT OF A DITCH. NO SECTION WAS DRAWN AS THERE WAS ONLY A SINGLE CUT AND FILL

THIS CUT BELONGS TO THE SAME DITCH AS CUTS [142534] AND [142536], WITH WHICH IT LIES IN ALINGMENT. THIS FEATURE IS ~~AT~~ MORE SHALLOW THAN CUTS [142534] AND [142536] BUT IT SHARES THE SAME SHAPE AND DESIGN. THERE WAS LIKELY AN ENTRANCE GAP TO THE FIELDS BETWEEN THIS CUT AND CUT [142534].

Refer to context [142534] [142536]

SKETCHES
(consider: location plan, detailed plan showing relationships, section showing fills/deposits as appropriate)

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

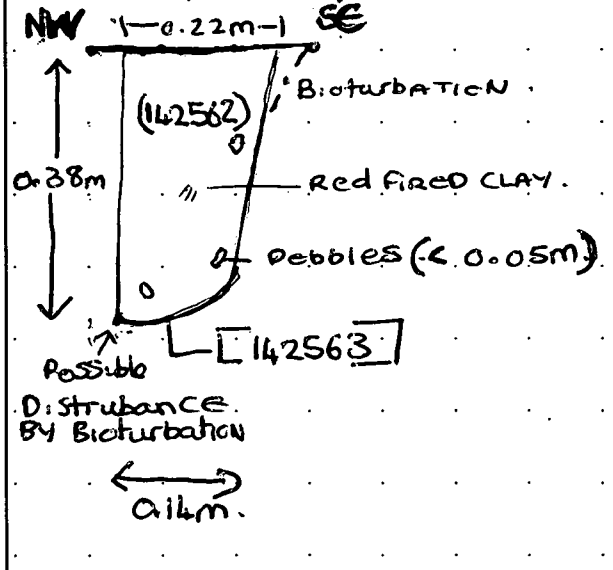

(142562) Primary fill of Posthole [142563] see its Sheet for Basic Area Sketch.

→ Mostly uniform Solid fill but there is evident distruption by bioturbation/Rooting through it creating slightly more Sandy silt Pockets in composition.
occasional small Pebble/gravelly Stones.
very Rare occurance of ~~Red~~ Red Clay fragments that has been fired. Possible daub or Poor Condition Pottery or even boring CBM not bagged due Size and Condition.)
→ No evident post Ape in section.
→ Due solid composition must be delibrate backfill. Phase uncertain but possible IRON AGE Pit near by could be associated with this activity?

Refer to context

ADDITIONAL INFORMATION
*(any further details that may be important for understanding the context, including items marked * overleaf)*

[142563] is cut of posthole Primary fill is (142562). NW - SE orrentated

IT is located NW corner of site See below Sketch for associated features. [142565] [142567] two intercutting pits and [142573] another posthole due East it is similar fill but different Profiles.

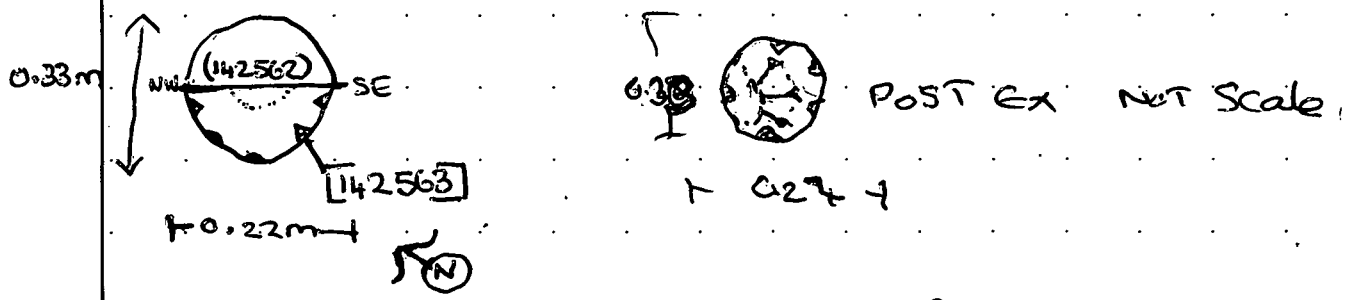

Note Furrow activity in area but doesnt affect Above features.

→ Phase uncertain could be associated with IRON AGE activity in area backfill did have tiny amount fired clay could suggest depri from IRONAGE cooking activity and actually be later phase? Romans levelling off ground, end of a phase if Post hole is structural and not just a fence post.

[142567] cut of a Sub Circular feature true extent and shape disguised by cutting feature [142565].

Located in NW area site See Sheet [142563] for area sketch.

Base seems to mirror [142565] before it is truncated by it but maybe slightly more rounded than flat? So could also be Posthole.

Refer to context

FILL OF DITCH, PROBABLY FORMED BY SEDIMENTATION OF CLAY AND SAND PARTICLES IN THE WATER FLOW. THIS FILL PROBABLY STARTED TO FORM SOON AFTER THE CONSTRUCTION OF THE DITCH. IN FACT, SOME OF THE NATURAL ORANGE-ISH FILL AND SOME OF THE SMALL GRAVELS IN IT ENDED UP MIXED WITH THE DARKER FILL (42368) OF THE DITCH

Refer to context [42369]

SKETCHES

## ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

DITCH CONSTRUCTED FOR IRRIGATION AND/OR FIELD BOUNDARY PURPOSES. THIS DITCH SHOULD JOIN TWO LARGER DITCHES (OR FURROWS) WHICH ARE PERPENDICULAR TO THIS DITCH. THE LARGER DITCHES ARE APPROXIMATELY SPACED 13m FROM EACH OTHER. THEREFORE, THE DITCH CONNECTING THEM SHOULD HAVE A MAXIMUM EXTENT OF 13m THE DITCH IS ONLY 020m DEEP AND WE MAY HYPOTHESIZE THAT IS WAS TRUNCATED BY FARMING ACTIVITIES, SUCH AS PLOUGHING, OCCURRED AFTER IT ABANDONMENT.

Refer to context

(142572) Primary Fill of Posthole [142573] fairly solid so could be deliberate backfill but disruption by footing and on plan after cleaned it did look natural bioturbation after testing it became clear it is manmade feature but fill has bone possible burnt bone very degraded Pot not bagged but put in sample tub as very poor condition these were within top spit (0.05m) so fill could be rainwash?

[142573] CUT OF POST hole PRIMARY FILL (142572); LOCATED NW AREA OF SITE
SEE SHEET [142563] FOR AREA SKETCH.

SIMILAR TO [142563] BUT DIFFERENT PROFILES

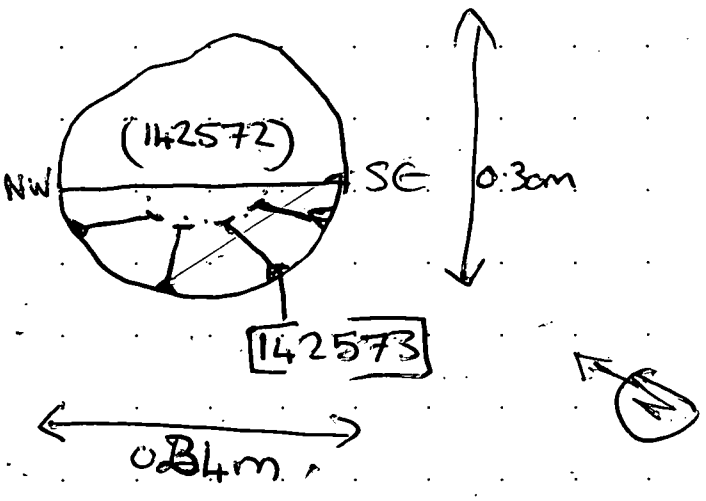

BASE SLIGHTLY 'V' SHAPED, BUT VERY SOFT ~~by~~ ROUNDED HP.

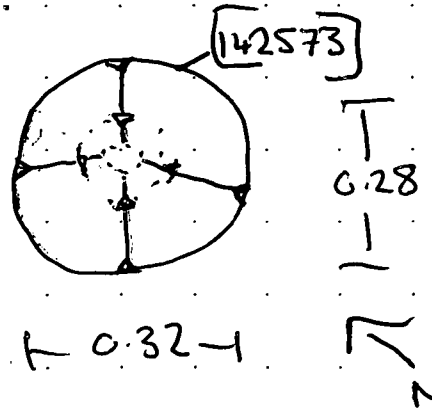

↳ POSSIBLE MORE MODERN FROM FIELD FENCE BOUNDARY RATHER THAN RELATED TO IRON AGE ACTIVITY BUT FILL IS SIMILAR TO [142563]

Refer to context

*This form is incomplete if fields marked with ◤ are empty. PTO for additional information (and describing all items marked with *) and sketches.*

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

- Cut of ditch terminus [142579]
- This ditch cuts into [142583], can easily see this in the section
* - At the time digging was stopped the base was uneven, but the bottom of the feature was not reached as we were told to stop digging ~~because a machine will be brought in to finish the ditch~~, so the base may look different at the time of completion

→ machine will take back edge of feature to stop erosion
→ box will determine total depth of feature

ADDITIONAL INFORMATION
*(any further details that may be important for understanding the context, including items marked * overleaf)*

THIS FILL WAS PARTICULARLY STIFF CLAY. CHARCOAL WAS MOSTLY NEAR THE TOP OF THE FILL IN THE CENTRE OF THE CUT. THERE WERE ONLY SMALL PIECES OF CHARCOAL SCATTERED THROUGHOUT THE REST OF THE FILL. ONE SMALL PIECE OF DAUB IN THE BOTTOM OF THE FILL.

THIN LAYER OF STONES WAS FOUND ON THE EDGE OF THE NORTHERN FACE OF THE FEATURE NEXT TO THE TOP OF THE CUT.

THE FILL OF THIS PIT IS NEAR THE OTHER PITS WHICH CONTAINED LOTS OF CHARCOAL AND DAUB SO THIS PIT MAY BE RELATED TO THEM THOUGH THERE IS MUCH LESS CHARCOAL + DAUB

Refer to context 142587

## ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

THE SECTION OF THIS PIT IS A TRIANGULAR SHAPE AND THE FULL SHAPE OF THE PIT APPEARS TO BE A THIN OVAL FROM THE SURFACE

A LINE OF STONES SURROUNDED THE NORTHERN FACE OF THE PIT WHICH MAY BE THE EDGE OF THE PIT, THOUGH THERE DOES NOT APPEAR TO BE ANY FURTHER ALONG

THE NEARNESS OF THIS PIT TO THE OTHERS WHICH CONTAINED A LOT OF DAUB + CHARCOAL MAY INDICATE A RELATIONSHIP BETWEEN THE TWO

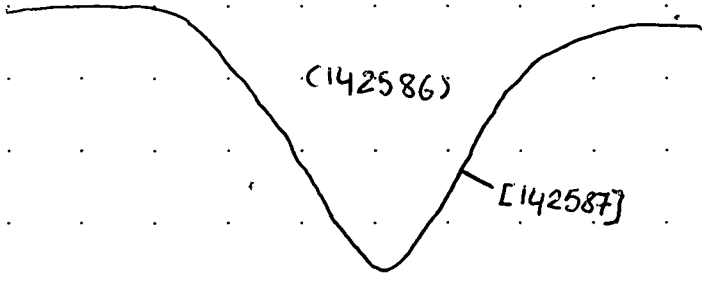

Refer to context

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Ditch cut running NW-SE, which continues NE and SW across a considerable portion of the area of excavation. The profile of the ditch is highly variable. For example, this section was much steeper sided and deeper than [142609], which represents a continuation of the ditch to the SE.
Ditch is paralleled to the SW by ditch (142642)

Refer to context (142618)

SKETCHES
(consider: location plan, detailed plan showing relationships, section showing fills/deposits as appropriate)

*(any further details that may be important for understanding the context, including items marked * overleaf)*

Cut [142634] a small pit with vertical sides. Excavated in 'quadrants' (50%) as part of pit digstes.
Truncates pit [142634].

Refer to context [142632]

SKETCHES

*This form is incomplete if fields marked with ◤ are empty. PTO for additional information (and describing all items marked with *) and sketches.*

A natural irregularity of pit [142367].
Probably just a lense of mid. grey-brown silty material with a moderate amount of charcoal inclusions.

See [142632] for sketch.

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Fill of posthole [142667] likely formed by gradual infilling. Lack of frequent gravel within fill suggests lack of a packing deposit.

Refer to context

Fill of pit [14267]. Pot recovered located within the base of the fill suggesting an initial dumping episode preceded the silting and gradual natural infilling of the pit cut.

Animal bone located within fill heavily degraded. Teeth recovered (probably cow?) intermingled with pot sherds supporting dumping activity involved in the infilling of the pit.

Refer to context

ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

Post hole located near pits [142614] & [142649]. Composition of fill with frequent inclusions of large stones suggests hole dug as support for a structural post.

Refer to context 142677

SKETCHES

*(consider: location plan, detailed plan showing relationships, section showing fills/deposits as appropriate)*

*(any further details that may be important for understanding the context, including items marked * overleaf)*

Lower fill of pit [142694] ~~which~~ Given the frequency of charcoal within the fill ~~suggests~~ in situ burning occured resulting in the formation of the fill. This may be a primary fill associated with the use of the pit.

ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

Fill of pit re-cut [142707]. Occasional charcoal and mid-dark colour of fill may indicate dumping associated with the formation of the fill. The charcoal is not sufficiently abundant to suggest in situ burning. No finds recovered.

Refer to context

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Fill of pit [42709] cut in its upper portion by pit re-cut [42707]. The composition of the fill is ubiquitous silty clay with an extensive gravelly interface with the natural suggesting formation via gradual natural infilling.

Refer to context (42706)

## ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

Packing fill of post hole [42716]. Orange colour and frequent gravel (0-30mm) suggests fill used to pack around post was likely derived from the natural ~~excavated~~.

Refer to context (42712)

Poss. deliberate backfill of refuse material in pit [142718]. A mid.-dark grey-brown silty-sandy material with frequent manganese and moderate charcoal flecks.
Pottery and (burnt) bone recovered.
No sample taken due to likelihood of contamination from modern intrusion to SW.

Refer to context (142719)

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Cut for NW → SE running ditch.
Truncated by [142734]
Classic Roman ankle breaker ditch.
Although no finds recovered.
Same alligament as other Roman
boundary ditches.

Refer to context | 142734

SKETCHES
(consider: location plan, detailed plan showing relationships, section showing fills/deposits as appropriate)

*(any further details that may be important for understanding the context, including items marked * overleaf)*

Middle fill of ditch [142769]. Blue colour and fine clay composition of the fill suggests formation via an extended period of waterlogging facilitating the accumulation of fine grained sediments. Very occasional gravel.

Refer to context (142753)

SKETCHES

ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

lower fill of shallow gully with gravelly inclusions and chalky bits

moderately compact silty clay, brown-orange-grey

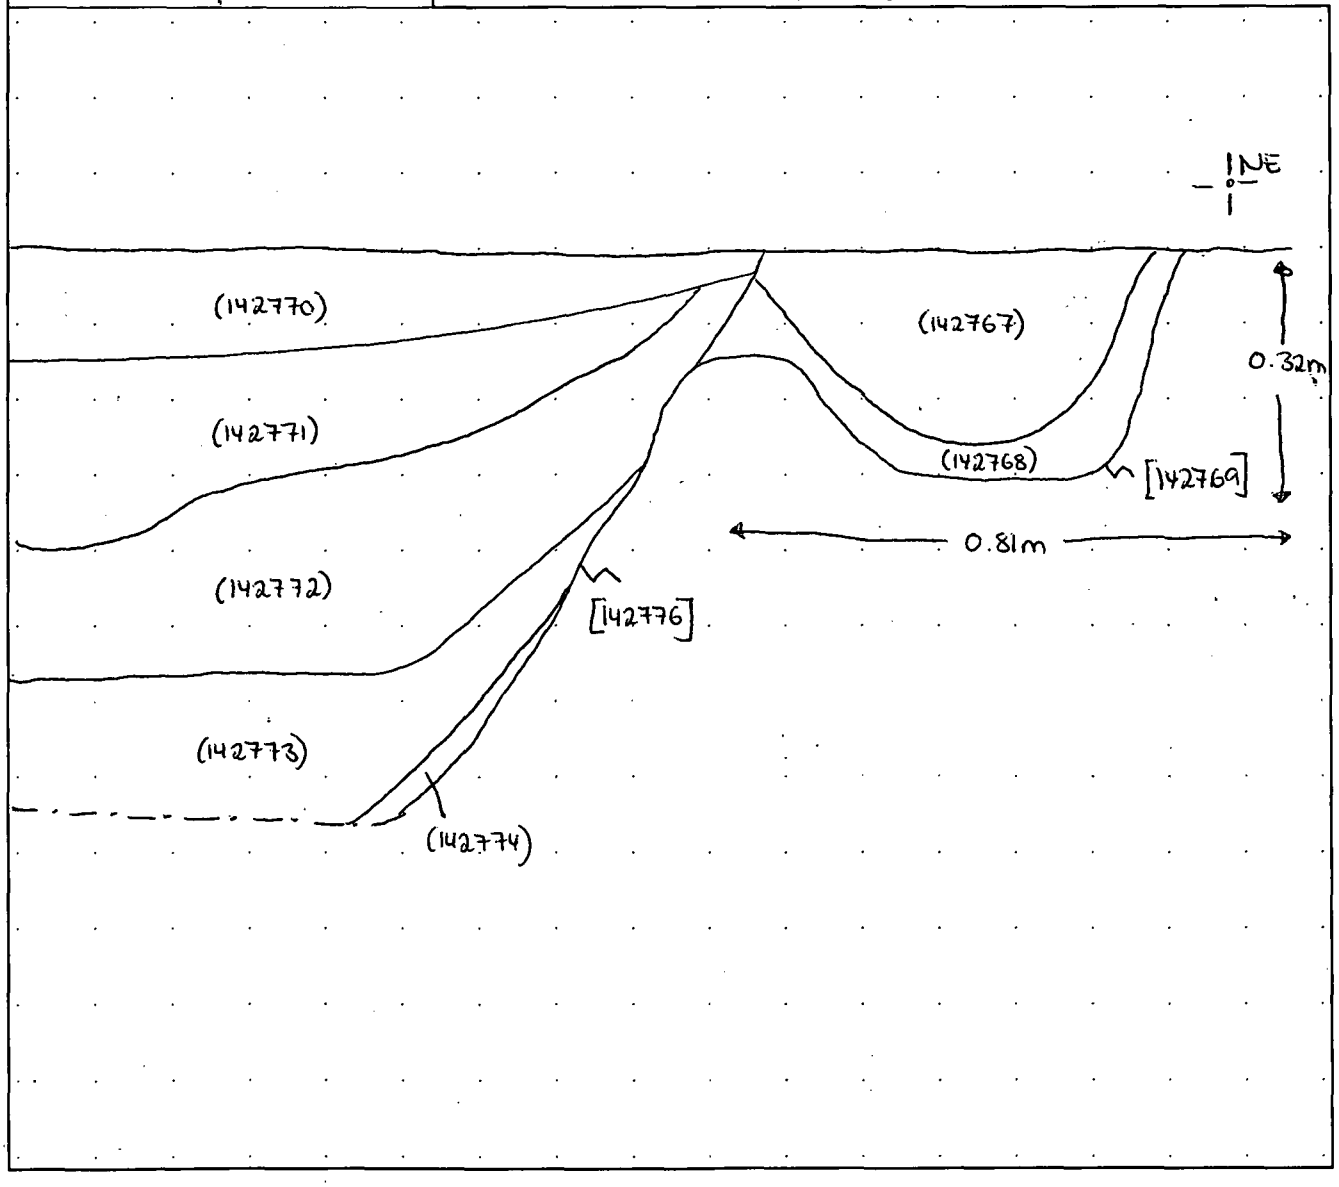

quite similar to natural, but with less chalk

seems like silting into the gully before the actual backfill

Refer to context: [142769]

SKETCHES

deep U-shaped ditch with multiple fills → not fully excavated due to water coming from below and 1m deep already with spoil on the side

edges look slightly different on each side → ditch is cutting a gully in the NE and a possible pit? in the SE

most probably roman due to finds of samian ware in one of the fills

Refer to context [142776]

SKETCHES

Cut of possibly pit (?) [142779].
Cut by ditch [142776].
Not fully excavated. Sub-circular shaped with steep edges and uneven base. Located next to [142776]. Near (opposite [142762]. Possibly related to nearby features.

Refer to context [142779]

ADDITIONAL INFORMATION

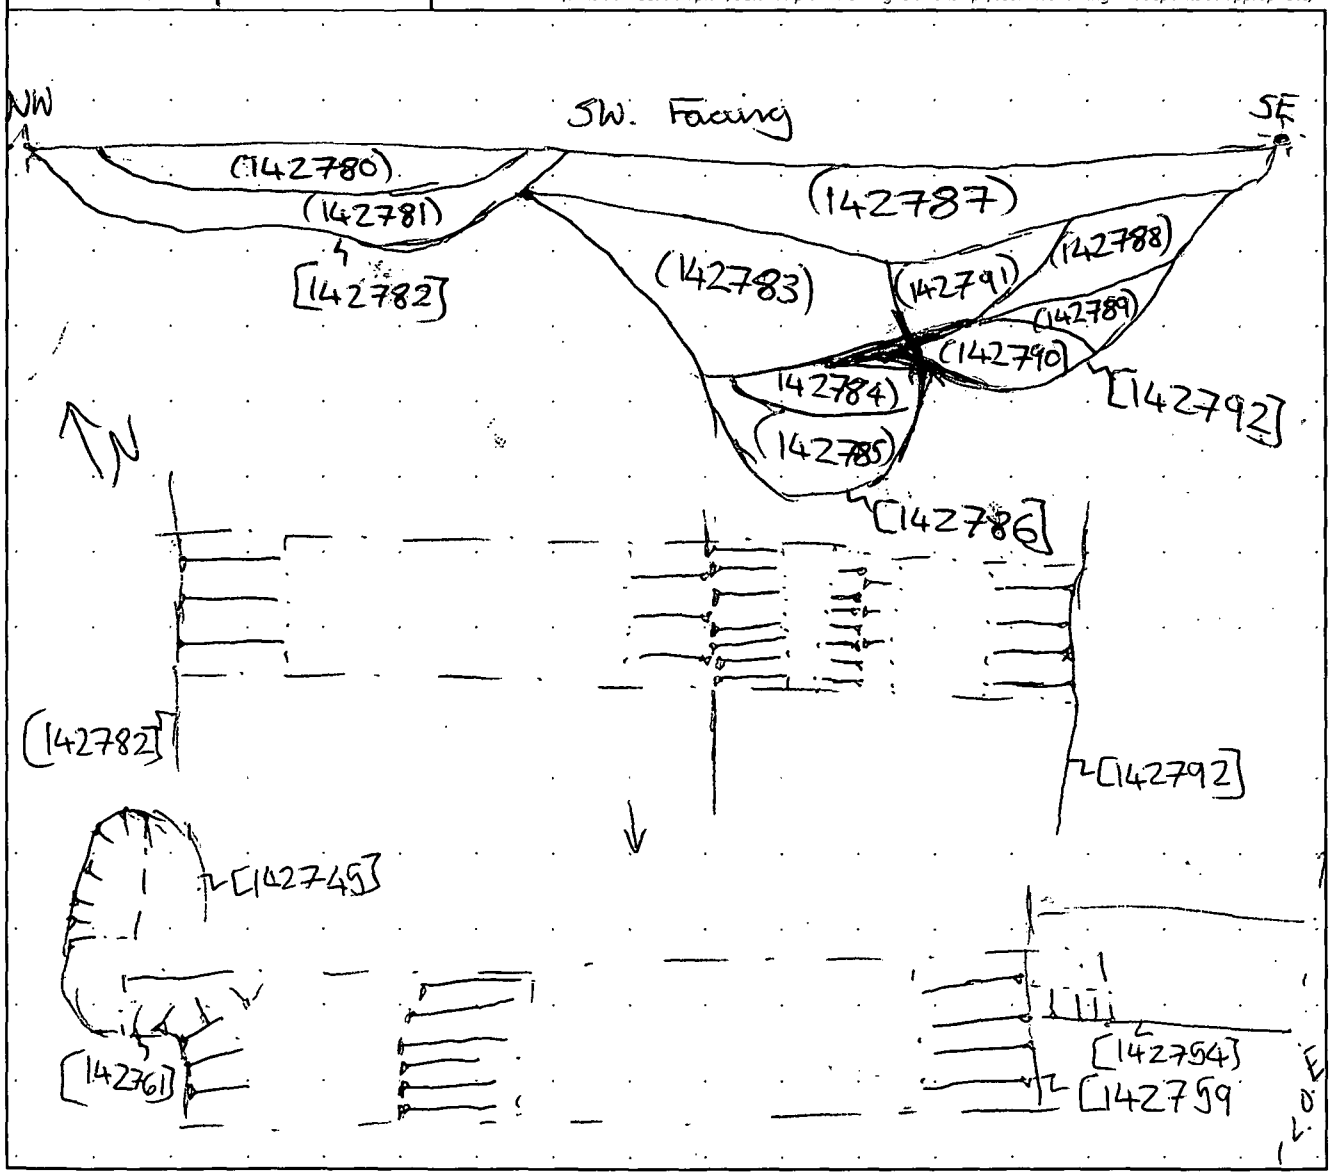

*(any further details that may be important for understanding the context, including items marked * overleaf)*

Lower fill of ditch [14278Z] which given its composition likely resulted from initial backfilling and slumping of material into the cut following its creation. Very few pottery sherds recovered.

Refer to context (14278O)

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Fill of cut [142786]
A very compact mid grey clay with light brown patches, due to the high manganese content of the fill.
Most of the finds came out of this fill, because its composition and how compact it is, is a deliberate backfill of the ditch.
Truncated on the W side by [142782] and on the E side by [142792]

Refer to context 142780

Cut of NE-SW oriented linear ditch.
Cut of initial ditch. The W side of it is really steep, but the E side ~~completely~~ was destroyed on the top by a later recut.
Probably the E side collapsed during one point, as the fill (142784) tell us, and then later it was backfilled with (142783), and then recut on the E by [142792]
On the W side the cut [142782] truncates the top of the cut.

Refer to context: 142780

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Upper most fill of ditch [142792]. The fill extends over the uppermost fill of the earlier ditch [142786] and likely represents the final natural gradual infilling of the cut. The fill is cut in its NW portion by later ditch [142782]. Several pot sherds recovered.

Refer to context (142780)

soft, light grey-brown silty clay with hardly any inclusions apart from a few pebbles; clearly distinguishable from natural and other fill

there might be a furrow cutting the pit in its north-eastern corner, but fills look the same → not obvious → might just be the fill of the pit

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

SECONDARY FILL OF DITCH CUT [142819], FILL IS THE MAIN COMPONENT OF THE DITCH BACKFILL, LIKELY TAKING UP 85% OF THE CUT. SEALING SLUMPING PRIMARY FILL (142818)

ANIMAL BONE WITH POSSIBLE MEDIEVAL POTTERY SHERDS CONTAINED WITHIN THE BACKFILL.

QUITE MIXED AND MOTTLED LIKE ON EXCAVATION. RISING WATER AT BASE OF THE CUT HINDERED THE REMOVAL OF THIS FILL.

Refer to context 142817

lower fill of ditch [142840] poss same as [141929] coming from the E. therefore this fill might be the same as (141928)

this fill seems to contain a large amount of sandy silt natural on it which could suggest is a consequence of some natural mixing up with the upper fill. (142838).

Refer to context

## ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

Upper fill of [142844]. The fill could correspond to the disuse of the pit and could be a deliberate backfill ~~the~~ close / level the pit. A gravely ~~layer~~ lense is seen towards the bottom of the fill right on top of (142842)

A few amount of pot came out from this fill. Poss. deeply used roman pot.

During excavation this layer was hard to distinguish from (142842) therefore some finds could be related to this lower layer. But as hard to determine all of them were located to this top layer.

Refer to context

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Mid fill of P.T [142844]. The fill is only a small (lense of larger accumulation of charcoal flecks (no chunks) that gives the fill a much darker black colour than the upper fill (142841). Therefore there were separated although finds could be from any of the fills as they were not distinguishable during digging only very clear distinguishable on section.

The fill ~~is~~ poss. relates to discarging something charcoal rich, although not direct evidences of burning were present. This ~~layer~~ fill was only present towards the poss. centre of the PIT (SW facing section) not visible on the NE facing section.

Refer to context

Lower fill of pit [142844]. This fill is ~~the~~ poss. related to the disuse of the pit and its characteristic relate to the accumulation of water. the water table is quite high on this area of the site therefore the lower of the pit might have been affected by water.

On the NW end of the pit there is clear sloping of the fill with mix of natural (silty sand) creating a patch of mottled fill. No sloping was visible on the NE facing section. No cut is visible but rather just a larger accumulation of natural mix with the fill.

Refer to context

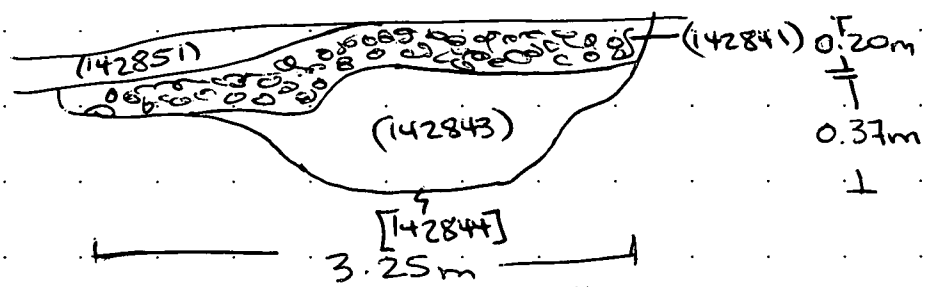

SKETCHES
(consider: location plan, detailed plan showing relationships, section showing fills/deposits as appropriate)

SW facing section

oooo gravel
### charcoal flecks
sloping mix mottled fill with natural (not another fill)

*(any further details that may be important for understanding the context, including items marked * overleaf)*

Circular pit with two diff. type of sides that might indicate sloping ~~end~~ use of the pit.

The top sides are more ~~steep~~ moderate sloping whilst the bottom is a very steep (vertical) side, this characteristic alongside with the description of lower fill (142843) might indicate the ~~Pit~~ contained water and the upper part allowed collection of it (poss?).

Refer to context

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Fill of pass. ditch [142850]

The fill suggests high mix with natural sand but the presence of pot suggests deliberate backfill

Less frequency of gravel than in adjacent fills - more sandy.

Refer to context

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

this cut was only visible on the N part a small fragment before excation towards the W before been truncated by cut of gully [142848] towards the S of the slot the cut is not visible and it is only easier to identified by looking at it on section SE facing

therefore due to the truncations is easier to establish it is running E-W but harder to determine if it is a ditch or a gully.

Refer to context 142849.

SKETCHES
(consider: location plan, detailed plan showing relationships, section showing fills/deposits as appropriate)

## ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

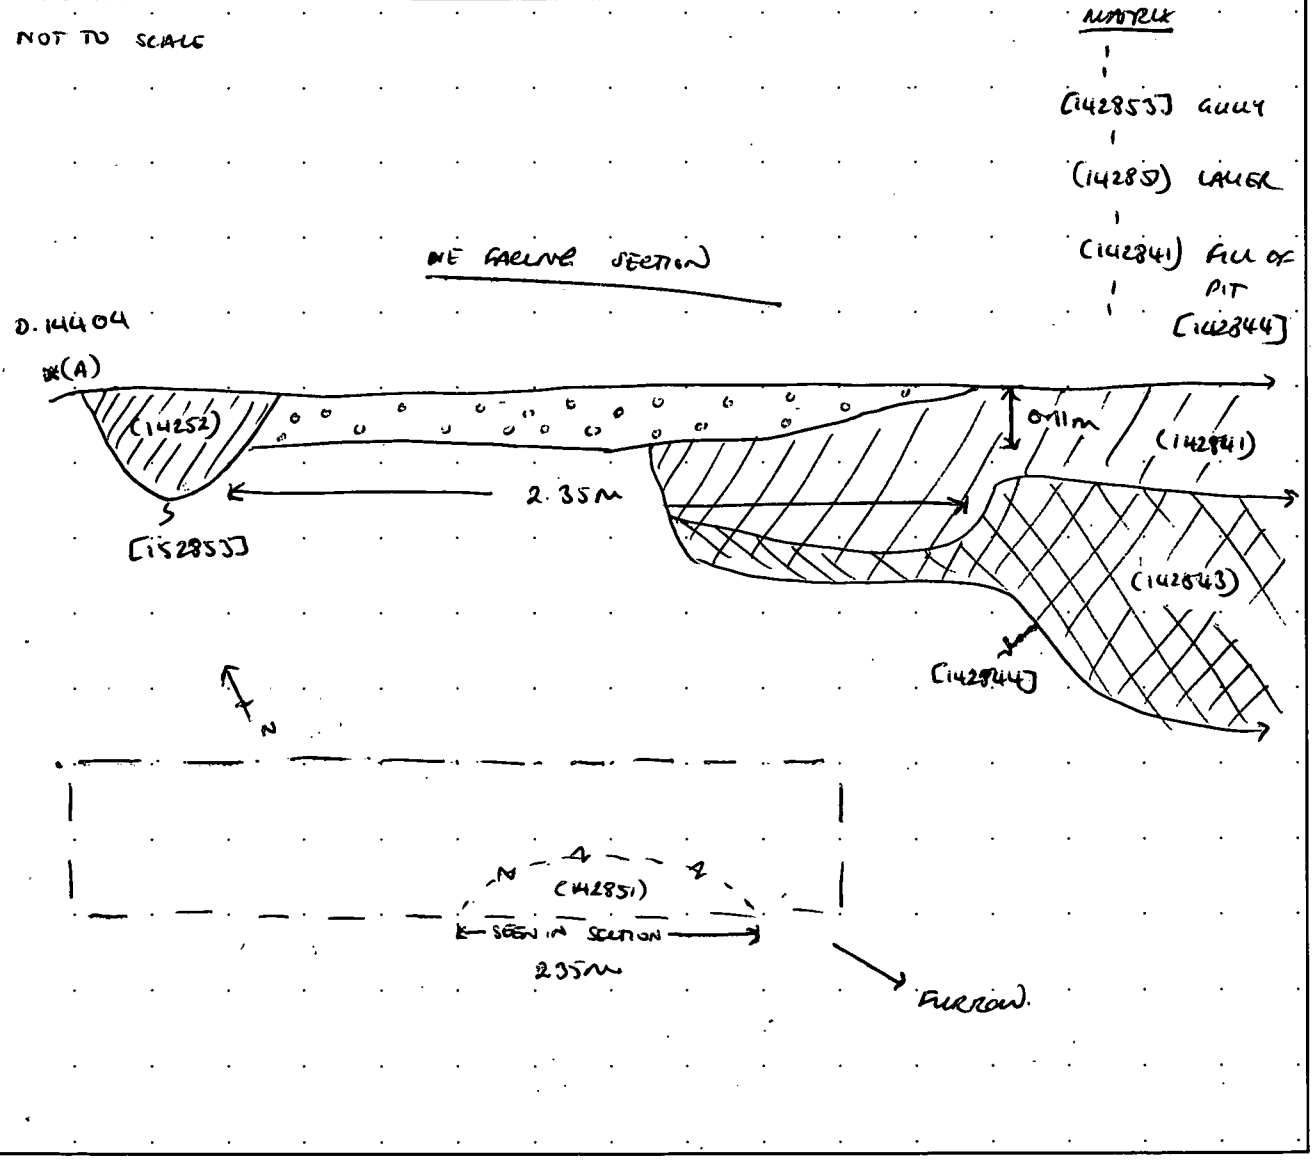

A SMALL LAYER OVERLYING PIT [142844] AND TRUNCATED BY A SHALLOW GULLY [142853]. COULD BE REMNANT PEGGLED SOIL, WITH A FURROW CLOSE BY TO THE SOUTH. THERE WERE NO FINDS, BUT THE SURROUNDING ACTIVITY IS GENERALLY FROM THE ROMAN PERIOD, SO LAYER COULD BE CONTEMPORARY TO THAT. LAYER HAS BANDED IN THE SUN AND IS MODERATELY GRAVELLY. TRUE/FULL EXTENT IS UNKNOWN, BUT IN SLOT IT IS SEEN EXTENDING (NW-SE) 2.35m AND 0.11m THICK.

## ADDITIONAL INFORMATION

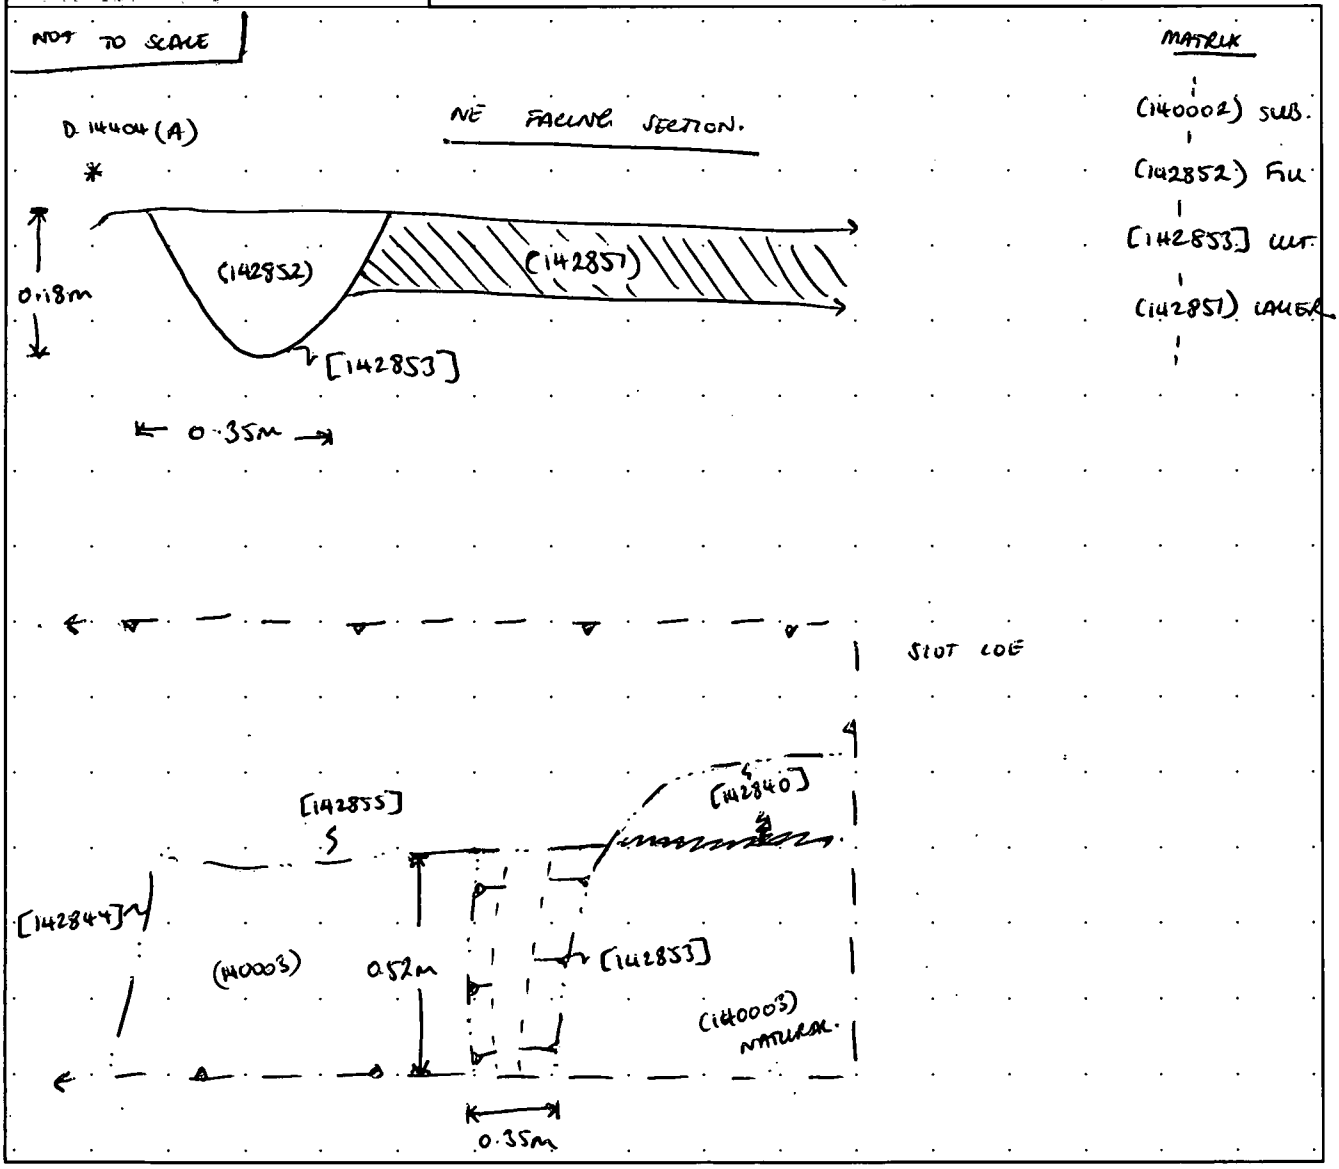

*(any further details that may be important for understanding the context, including items marked * overleaf)*

CUT OF SHALLOW GULLY, WITH A SINGLE FILL (142852), AND TRUNCATING A THIN LAYER (142851). THE GULLY IS RELATIVELY THIN AND SHALLOW, WITH ONLY 0.52m EXPOSED AND EXCAVATED (UNCERTAIN HOW LONG OR WIDE IT CONTINUES AS THE SURROUNDING AREA HAS BEEN BALED SOLID BY THE SUN). THE GULLY PARTIALLY TRUNCATES THE NATURAL (140003) AND SO HAS POSSIBLY RETAINED ITS SHAPE PARTICULARLY ITS USE? NO SIGN OF SLUMPING OR NOTICEABLE WEATHERING WITHIN FILL OR SECTION. NATURAL IS PARTICULARLY GRAVELLY IN THIS PART OF THE SLOT. THEREFORE FUNCTION OF THIS GULLY IS UNCERTAIN DUE TO ITS SIZE/DEPTH, TRUNCATION OF A THIN LAYER, AND POSSIBLY NOT OPEN FOR A PARTICULARLY LONG TIME? POSSIBLY A DEMARCATION OF AN AREA, OR TO PROVIDE A BIT OF DRAINAGE

Refer to context: –

Also see [142844] for location of slot

## ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

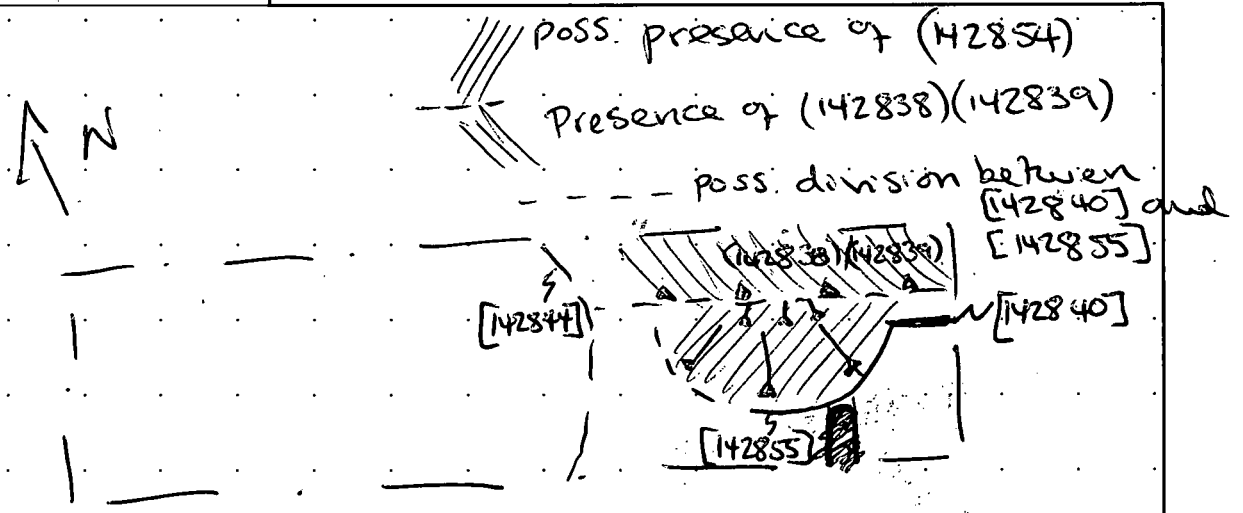

Unfortunaly, the poss. presence of this fill was only infered as the digging finished and the ~~natural~~ ~~should be~~ features cut into the natural were assessed.

It was infered that a round pit [142855] must have been present at some point. But ~~not~~ it was not poss. to differentiate clearly the presence of two fills as (142838) was being dug. therefore is poss. that the characteristics of the fill that filled pit [142855] were similar to (142838) but hard to say for certain.

N–S LINEAR TRUNCATED BY GULLEY [142880].
POSSIBLE BOUNDARY DITCH. ROMAN?
LINEAR APPEARS TO CUT PIT [142884]. THIS ONLY BECAME APPARENT WHEN THE SLOT WAS DUG ACROSS [142882] AND [142884]. [illegible]
PIT FILL (142901) WAS SEEN TO UNDERLIE CUT [142882].
NOT CERTAIN IF (142883) + (142885) WERE TRUNCATED BY [142882] AS THE RELATIONSHIP WAS LOST.

## ADDITIONAL INFORMATION

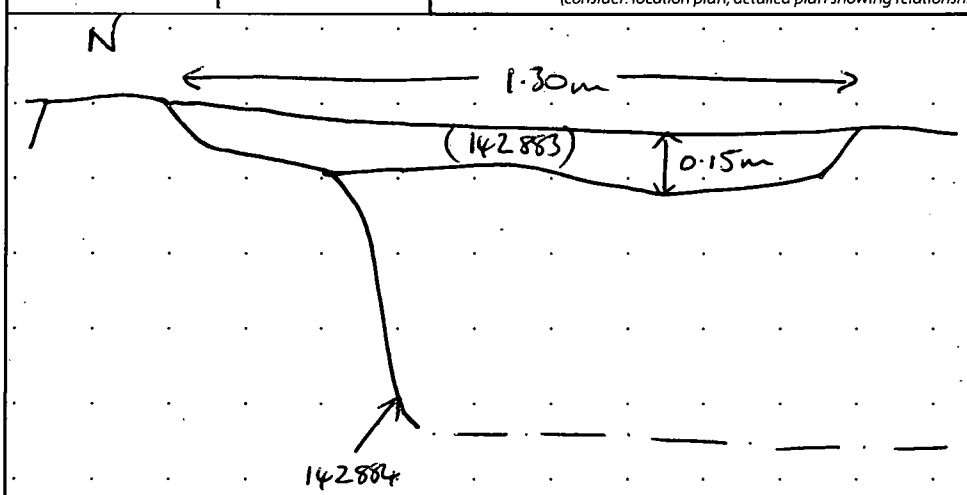

*(any further details that may be important for understanding the context, including items marked * overleaf)*

LOWEST FILL OF DITCH [142908], COMPRISED OF LENSES OF NATURAL: MID BROWN ORANGE NATURAL SAND WITH SOME MANGANESE, OVERLYING A MID-DARK GREY/ORANGE BROWN/SILTY CLAYEY SAND WITH MOD-OCC SM S-A/S-R PEBBLES, WHICH IS OVER A MID YELLOW-ORANGE SAND WITH FREQ PEA GRAVEL. MOST LIKELY WIND OR WASH ACCUMULATION INTO BASE OF DITCH, SIGNIFYING END OF MAINTENANCE/USE OF DITCH. POSSIBLY OCCURRED DURING ROMAN ERA, DUE TO PROMINANCE OF ROMAN FEATURES IN CLOSE PROXIMITY TO DITCH.

Refer to context (142905) SECTION [142908] PLAN

## ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

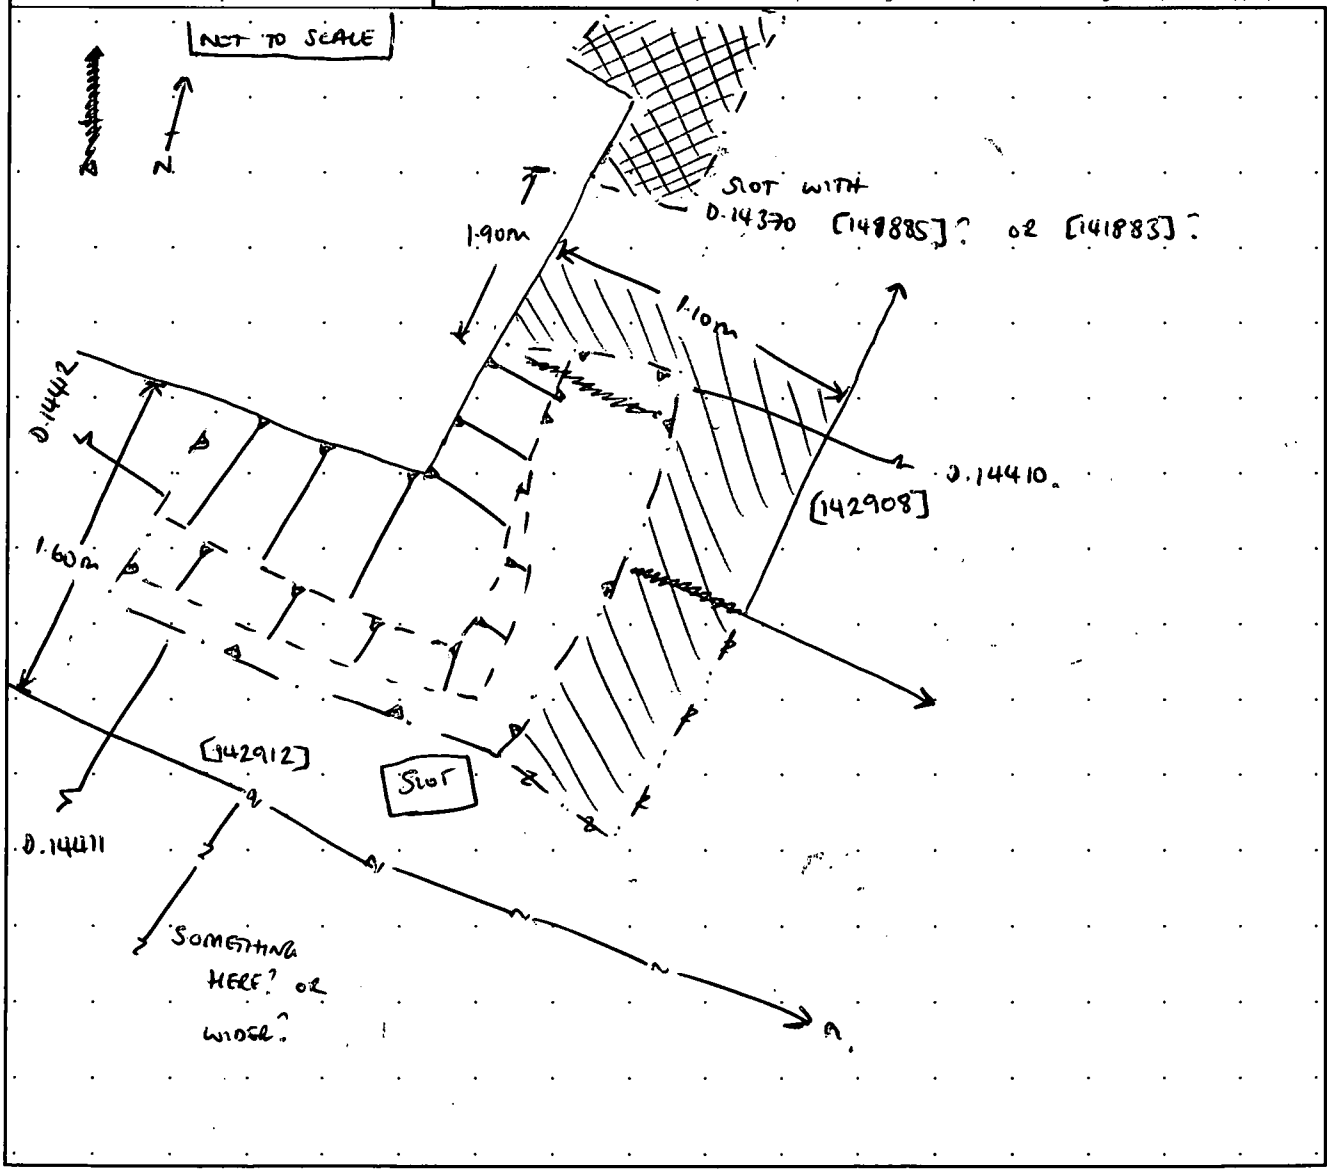

CUT OF DITCH [142908], WITH THREE FILLS (142905), (142906) & (142907). TRUNCATES EARLIER E-W DITCH [142912]. UNCERTAIN OF LENGTH, POSSIBLY 2.30m TO NORTH OF SLOT WITH POSSIBLE TERMINUS? DUE TO LENGTH OF EXPOSURE TO SUN, AND SIMILARITY OF TOP FILLS OF BOTH DITCHES, CANNOT SEE WHERE [142908] ENDS, TO THE SOUTH.

NO FINDS WITHIN FILL, BUT IN CLOSE PROXIMITY TO ROMAN FEATURES, INCLUDING THE DRIVE WAY TO NORTH. UNSURE OF FUNCTION - COULD BE BOUNDARY MARKER?

Refer to context | 142905 SECTION

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

This is the cut of a furrow, running NS & extending beyond the limit of excavation. The furrow cuts previous postholes [142927?, 142929] & is found in the vicinity of other linears, [142832] is found running almost parallel to [142925], & linears [142828], [142872], & [142876] run perpendicular to [142925]. [142828] terminates near the E edge of [142925] & any relationship with [142872] is located outside of the current limit of excavation.

## ADDITIONAL INFORMATION

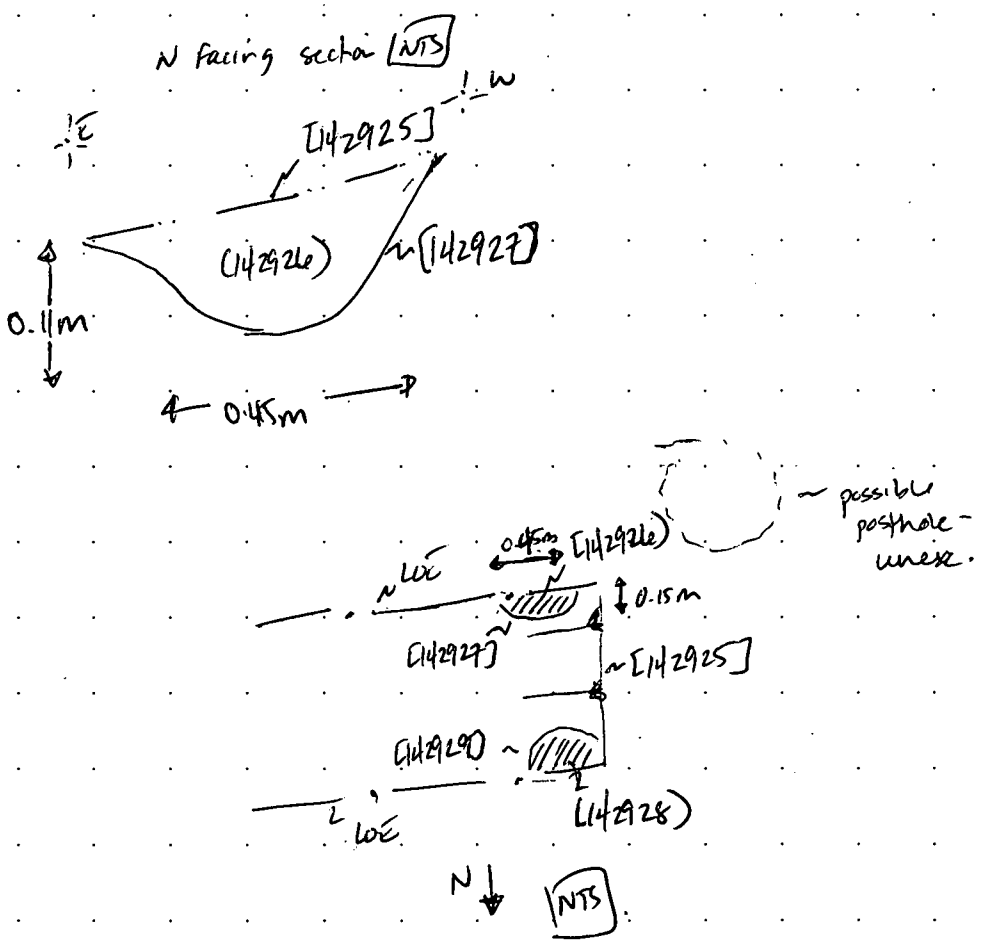

*(any further details that may be important for understanding the context, including items marked * overleaf)*

This is the disuse backfill of a probable posthole, discovered during the excavation of furrow cut [142925]. No cultural artifacts were recovered & only a portion of the posthole is present in the excavated area. The fill contains occassional small subangular stones & occasional chalk flecks. It may be one of a series of postholes, including [142929], [142926] & its cut [142927], which were later truncated by furrow [142925]

Refer to context:

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

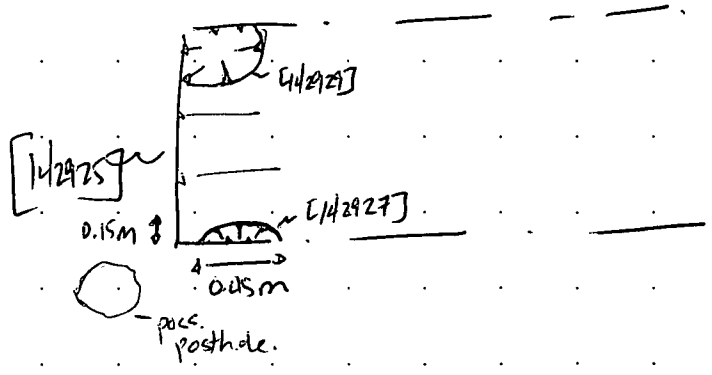

This is the cut of a posthole, located in the SW corner of the slot for furrow [14925]. It is truncated by the cut for the furrow, similar to [14929]. A possible posthole - unexcavated - is found just to the SW of this. No cultural artifacts were identified in the fill (14926), so dating is uncertain. It may be part of an earlier fenceline or other boundary.

Refer to context

ADDITIONAL INFORMATION

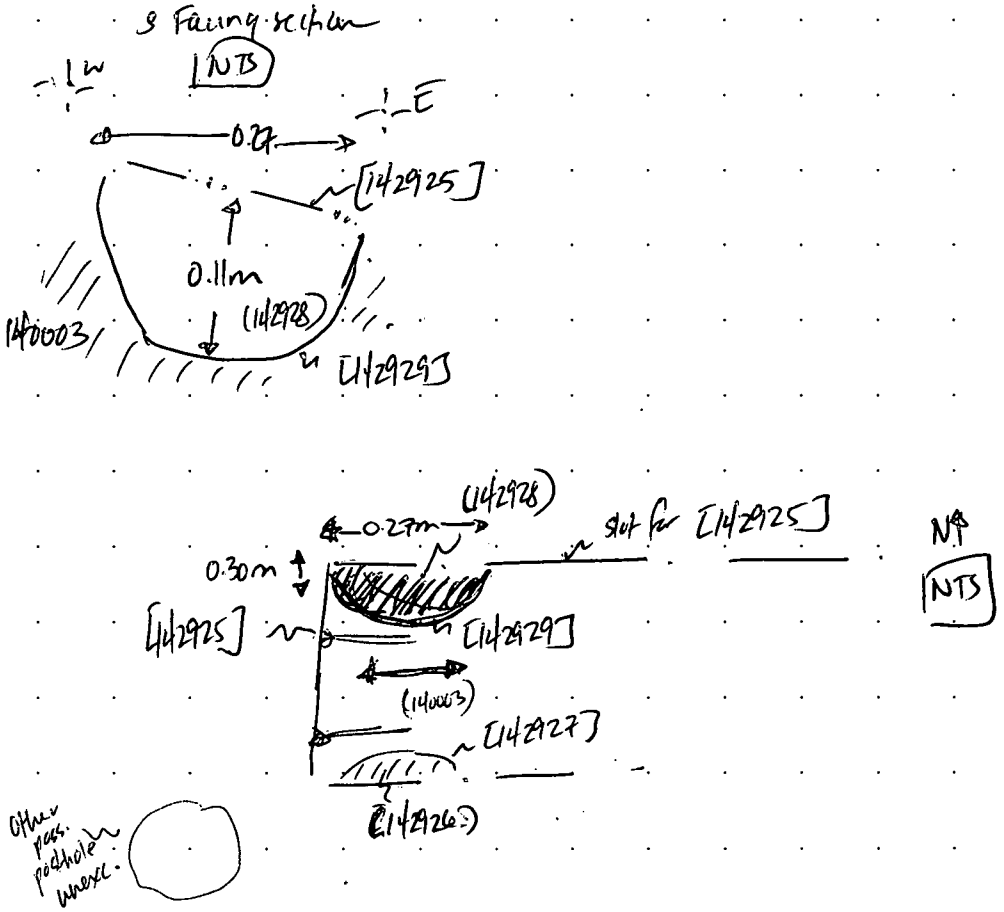

*(any further details that may be important for understanding the context, including items marked * overleaf)*

This is the backfill of posthole [142929]. ~~Like~~ like [142926], there were no cultural artefacts identified in the fill, with only occ. small rounded stones & freq. chalk flecks identified. The fill is truncated by furrow cut [142925] & was identified in the NW corner of the slot. Similarly, ~~a~~ posthole [142927] is found in the SW corner of the slot, & these may constitute a fenceline of some sort. Another possible posthole is found just to the SW of [142927] but currently remains unexcavated.

## ADDITIONAL INFORMATION

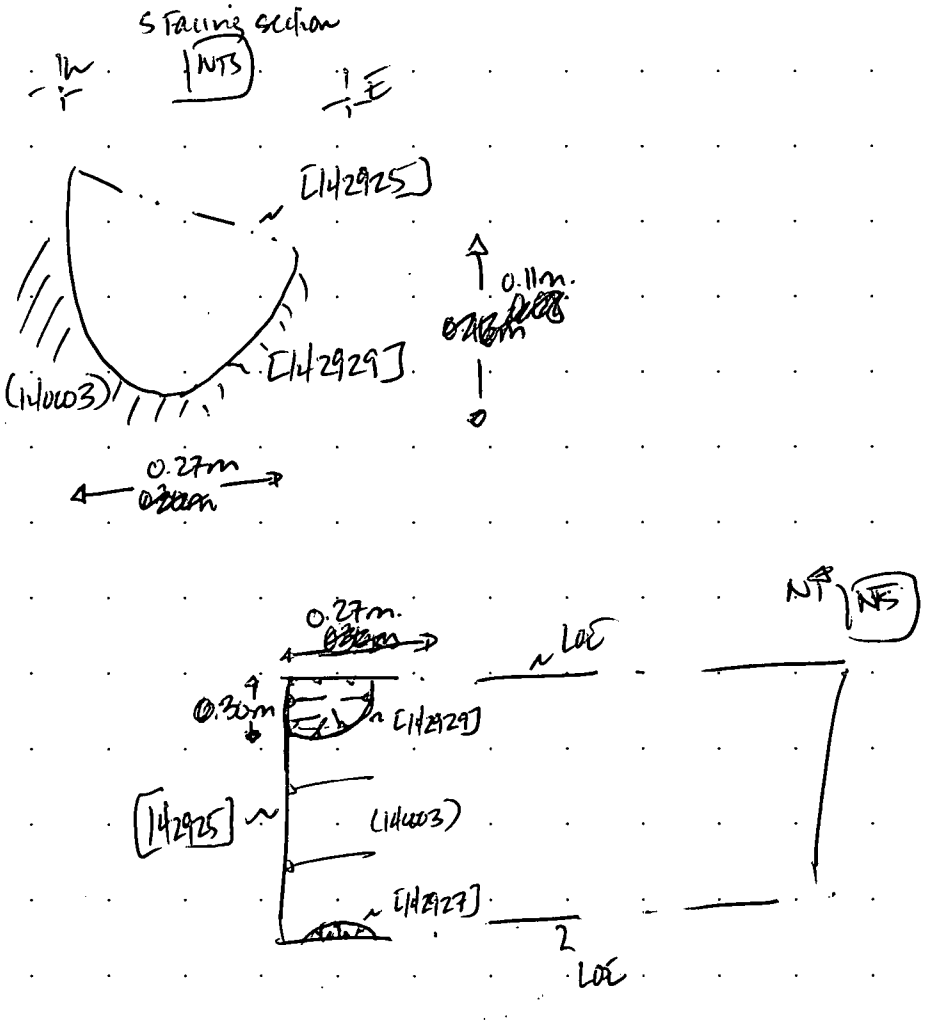

*(any further details that may be important for understanding the context, including items marked * overleaf)*

This is one of several possible postholes in the area, including [14/2927]. [14/2929] & [14/2927] are both truncated by the ~~east~~ furrow cut [14/2925]. The presence of several possible postholes indicates there may have been a fenceline or boundary in the area, predating the later furrows. No artifacts were recovered from the posthole fills, making dating of the structure unclear.

Refer to context | ~~14/2927~~

TOPFILL LEVELLING LAYER FOR DITCH [142933]. AFTER DUMP OF ORGANIC MATERIAL, THIS FILL WAS ADDED TO CONSOLIDATE THE GROUND SURFACE. ~~NO FINDS FROM~~ THIS FILL ~~BUT EARLIER FILES~~ HAVE ROMAN REMAINS OF POTSHERDS. THIS FILL WAS EXCAVATED WHILE THE GROUND SURFACE WAS BAKED THROUGH EXPOSURE TO THE SUN, SO THE FILL WAS PROBABLY MORE COMPACT THAN IF IT HAD JUST BEEN EXPOSED.

ADDITIONAL INFORMATION

*(any further details that may be important for understanding the context, including items marked * overleaf)*

DURING USAGE OF DITCH [142933] THIS FILL IS THE NATURAL SILTATION/INFILLING OF THE DITCH DURING ITS USE FOR WATER MANAGEMENT/IRRIGATION OF THE LOCAL AREA. THIS USAGE HAS CAUSED GRAVELS TO WASH INTO THE BASE OF THE DITCH, WHICH HAS FORMED THE SANDY GRAVELLY LAYER EXCAVATED. GIVEN THE PRESENCE OF THIS FILL THE DITCH WAS NOT RAKED CLEAN UPON DISUSE, BUT BACKFILLED WITH ORGANIC MATERIAL (142931)

ADDITIONAL INFORMATION

(any further details that may be important for understanding the context, including items marked * overleaf)

This is the fill of a small pit, comprised of clayey silt & occasional small to med subround stones. & charcoal flecks One piece of ? prehistoric? pot was recovered at the very top of the fill (visible prior to excavation). It may be incidentally associated with the feature. Overall, it appears that the cut was filled in naturally, & the color (greyish blue) may be the result of its proximity to a possible nearby well/ watering hole, although this is currently unexcavated.

Refer to context | 142941

## ADDITIONAL INFORMATION

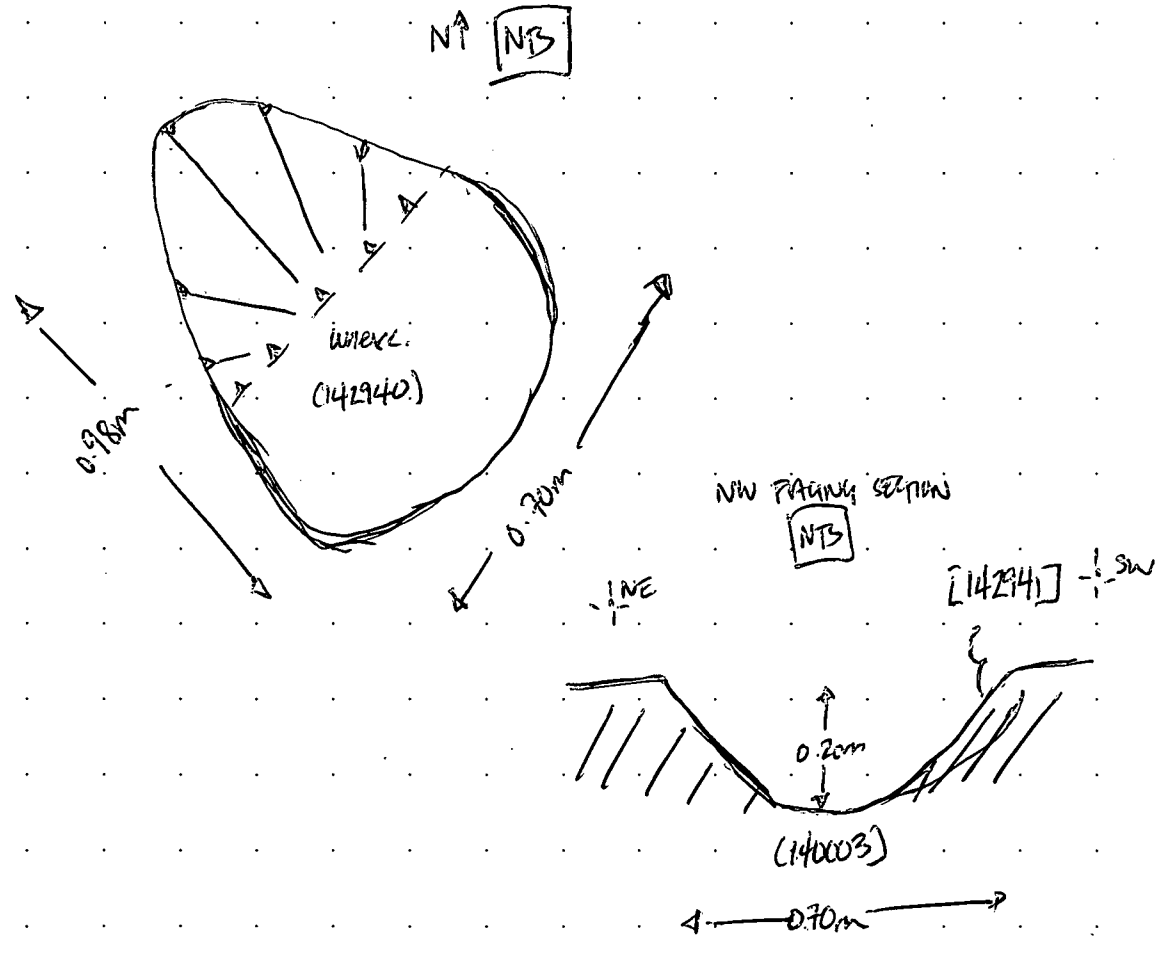

*(any further details that may be important for understanding the context, including items marked * overleaf)*

This is the cut of a pit that is filled primarily by clayey silts & occasionally small to med subround stones & charcoal flecks. One fragment of ?prehistoric pot was found in fill (142940), but the lack of cultural artifacts indicates this may have been naturally filled in. Features in the surrounding area are currently unexcavated, but ~~is~~ to the NW is ~~an~~ ~~large~~ what appears to be a large feature (kiln? watering hole?). * The pit is cut into a sandy natural (140003).

CUT FOR LARGE V-SHPED DITCH RUNNING APPROX. NW-SE. SIMILAR TO THE TYPE OF CUT ASSOCIATED WITH ANKLE BREAKER SLOTS, WITH STEEP SIDES, SUDDENLY DROPPING OFF TO CREATE A DEEP AND SHARPLY VERTICAL BASAL PORTION.

APPEARS CUT INTO AN ORANGE/S GRAVEL TYPE NATURAL

RUNNING PARALLEL TO DITCH /LINEARS [142944], [142947]

Refer to context | 142957

SKETCHES

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

This is the fill of ditch cut [142954], + it is the same as [142955]. There were no cultural artifacts ~~recovered~~ identified in the excavated slots. The fill ~~is~~ a clayey silt, becoming slightly sandier toward the base due to mixing with the natural. Evidence of bioturbation - roots - are found in the W ~~facing~~ facing wall of the slot. There is another parallel ditch [~~142994~~] [142816] 1.30m N of [142954]. Based on the fill, this appears to be a poss. drainage ditch, which may be consistent with a possible well / watering hole located to the S~~W~~.

## ADDITIONAL INFORMATION

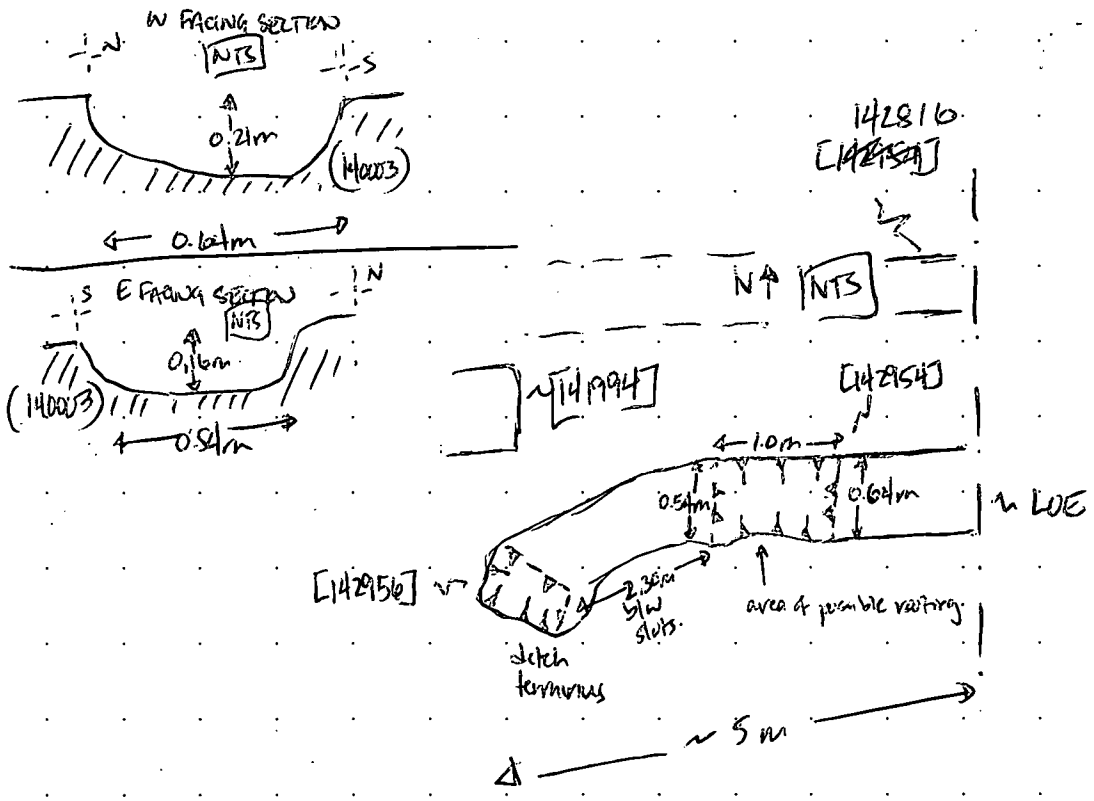

*(any further details that may be important for understanding the context, including items marked * overleaf)*

This is the cut of a ditch that runs E-W, extending into the LOE to the E, is terminating @ [142956], ~230 m to the SW. The associated fill (142953) was void of cultural artifacts & likely represents ~~natural~~ disuse infilling. [142954] runs parallel, in part, to ditch [142956]. It's possible that [142954] represents a drainage ditch. Also, ~~a~~ a small "pocket" of mare silty sand, found in the S wall, may be the result of a tree root.

## ADDITIONAL INFORMATION

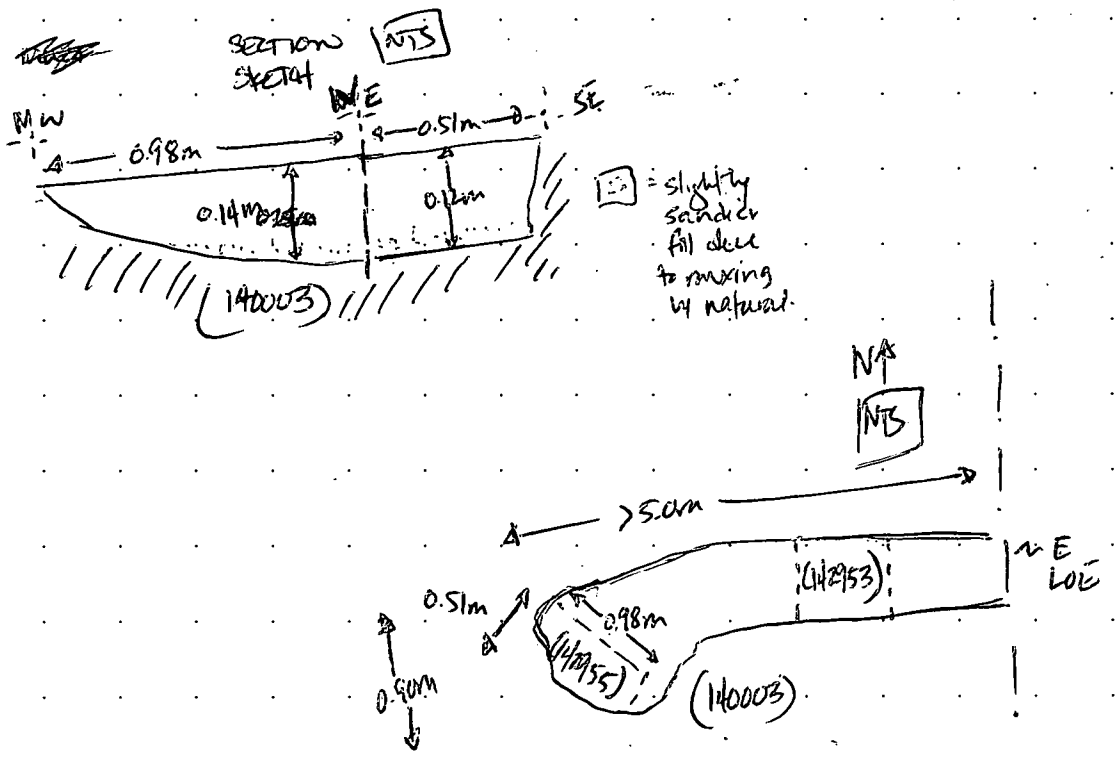

*(any further details that may be important for understanding the context, including items marked * overleaf)*

This is a clayey silt fill of ditch [142956], & it is the same as (142953) in [142954]. However, in contrast to (142953), the fill is slightly darker & contains occassional charcoal fragments which were not observed in the former. No cultural artifacts were identified/recovered, making dating of the ditch/fill uncertain. This fill is located ~ 2.3 m to the SW of (142953), & it represents the terminus of the ditch.

## ADDITIONAL INFORMATION

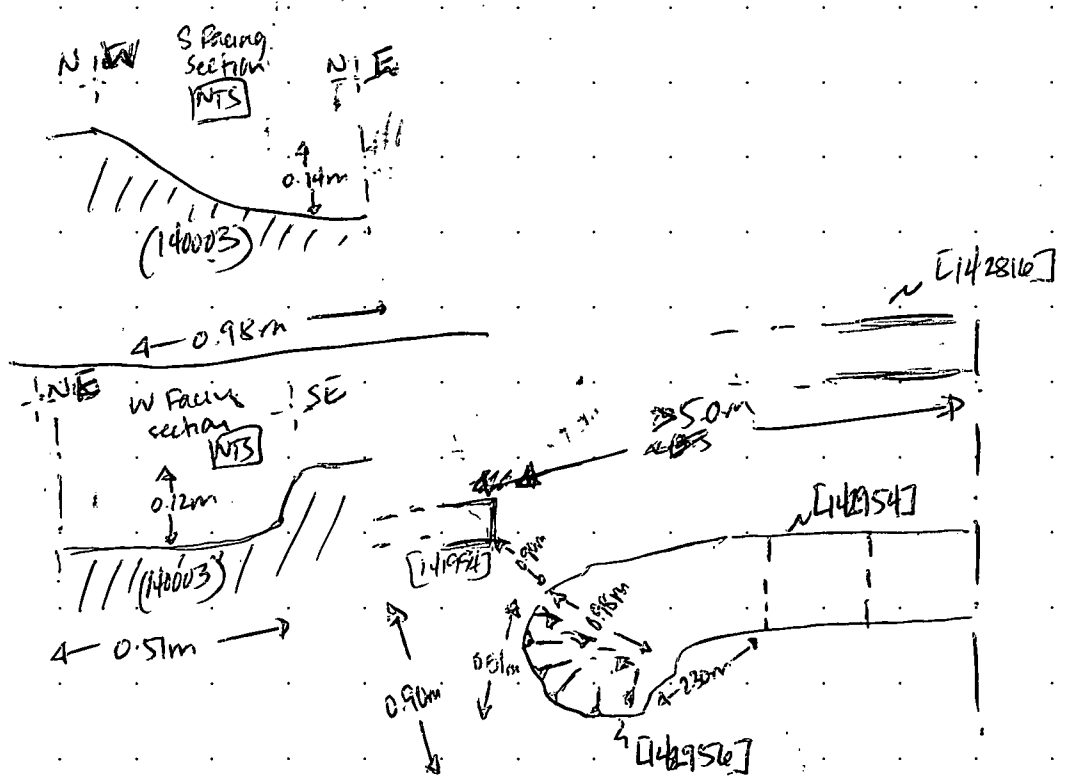

*(any further details that may be important for understanding the context, including items marked * overleaf)*

This is the terminus of ~~a~~ a ditch, which includes [142954]. ~~The~~ At the E end, [142954/142956] runs parallel (E-W) to [142816], but [142954/56] then curves towards the SW, where it terminates. Based on the fills, this was likely a ~~drainage~~ drainage ditch that was naturally infilled. Dating is uncertain, due to an absence of artifact ~~dating~~ in the fills.

ADDITIONAL INFORMATION
(any further details that may be important for understanding the context, including items marked * overleaf)

Lower fill/layer in feature [142991] was overlained by top fill (142989) and on „S" side was overlained by layer (142997).
On the „S" side this fill/layer was also cutted by cliff [142995]
In the middle part ~~the~~ this fill also was overlined fill (142992) of older pit [142993]

Fill was probably a result of natural infilling
