**Context Description**

TRUNCATION PHYSICAL, NOT STRATIGRAPHICAL

Fine - medium textured mid white sandy clay w/  
no other inclusions - Same as (1629) + (1638).  
Cut by [1636]

In context.

Drawing Nos. - + -	Levels Digital	Finds	Other	SMF Nos	Samples
Photographs	Highest: / Lowest:	Lithics <input type="checkbox"/> Metal <input type="checkbox"/> Bone <input type="checkbox"/> Glass <input type="checkbox"/> Coarse Stone <input type="checkbox"/>	Pot <input type="checkbox"/> CBM <input type="checkbox"/> Hazelnut <input type="checkbox"/> Leather <input type="checkbox"/> Wood <input type="checkbox"/>		

**Interpretation**

Initials: BW  
Date: 11/3/20

Checked Interpretation Pass. interface deposit formed along the base of buried wetland (1633/1641) with upper surface of underlying periglacial? clay deposits.

Checked By: TP  
Date: 12/3/20
