Glass

Ian R Scott

There 16 pieces of glass many of them tiny or small and the vessel glass is largely undiagnostic. The window glass sherds are also small and all appear to broadly post medieval in date. Most of the glass is from context 209 (n sherds = 13)

Vessel and window glass

Borehole	Context	Sample	Count	Identification	Comments	Colour
	209		1	window	small sherd of window glass. Th: 1.2mm.	pale olive green
	209	220	1	window	tiny sherd with iridescent weathering	pale green
	209	220	1	window	tiny sherd of thin olive green glass	olive green
	209	220	1	window	small sherd of window glass. TH: 1.3mm. Post medieval	olive green
	209	220	1	window	small sherd of window glass. Th: 1mm	green
	209	220	1	window	tiny sherd, opaque dk green.	v dk green
	209	220	1	window	2 x small sherds with iridescent weathering	pale green
	209	220	1	vessel	tiny body sherd in blue green glass	blue green
	209	220	1	vessel	tiny body sherd in colourless glass, balck weathering	colourless
	209	220	1	vessel	tiny body sherd in colourless glass	colourless
	209	220	1	vessel	tiny body sherd in green glass	green
	209	220	1	vessel	strongly curved body sherd, quite thin walled, heavy opaque weathering. Possibly from round bodied or globular vessel	pale green
	209	220	1	vessel	strongly curved sherd, thick-walled heavy opaque weathering. Probably from an early 18th-century squat wine bottle	pale green?
	209	220	1	window	small sherd of window glass some de-vitrification.	colourless?
