# ARCHAEOLOGICAL AND HISTORICAL BACKGROUND

7 The archaeological and historical background of the site is complex and multi-layered. It is situated in a region that has been inhabited for thousands of years, with evidence of human activity dating back to the Neolithic period. The site's location is strategic, as it lies on a major trade route that has been used since ancient times. The surrounding landscape is a mix of open fields and wooded areas, which has influenced the site's development over the centuries. The archaeological record is rich, with numerous artifacts and structures that provide insight into the lives of the people who lived there. The historical context is also important, as the site has been the subject of many theories and debates about its purpose and significance.

### Project details

|  |   |
|--|---|
| Project name                           | Stokesby S101A Scheme   |
| Short description of the project       | An archaeological watching brief was conducted by NPS Archaeology for Anglian Water Services Ltd during groundworks associated with the construction of a pumping station at Runham Road, Stokesby. No archaeological features were observed in the groundworks and no artefacts were recovered. It appears likely that medieval and post-medieval artefacts recovered close to the site by previous metal-detecting were the result of chance losses or of spreading arable fields with domestic waste (manure). |
| Project dates                          | Start: 07-07-2014 End: 08-07-2014   |
| Previous/future work                   | Not known / Not known   |
| Any associated project reference codes | 133682 - HER event no.  |
| Type of project                        | Recording project   |
| Monument type                          | NONE None   |
| Significant Finds                      | NONE None   |
| Investigation type                     | "Watching Brief"  |
| Prompt                                 | National Planning Policy Framework - NPPF   |
