Abstract

This report presents the results of an archaeological evaluation undertaken by AOC Archaeology Group at Stenton House near East Linton, East Lothian in advance of the construction of a new house, associated access and gardens.

Four trenches totalling 64 m² and accounting for the required 5% evaluation were opened across the house plot. No structures, features, deposits or artefactual material of any archaeological significance were found by the evaluation. No further works are considered necessary.

1 INTRODUCTION

1.1 Development Background

1.1.1 A programme of archaeological works comprising an Archaeological Evaluation was required by PR Design, on behalf of their client, prior to the construction of a single house plot within the grounds of Stenton House, Stenton, nr East Linton in East Lothian (Planning Ref: 10/00127-P). The need for, and scope of, the archaeological works was determined by the East Lothian Council who are advised on archaeological matters by the East Lothian Council Archaeology Service (ELCAS).

1.1.2 The area lies within the administrative jurisdiction of the East Lothian Council (ELC), who are advised on archaeological matters by the East Lothian Council Archaeology Service (ELCAS). ELCAS required an intrusive archaeological evaluation of the development area. The works were conducted under the terms of a *Written Scheme of Investigation* (AOC 2012), approved by ELCAS on behalf of the Council and carried out in accordance with *Scottish Planning Policy* (2010) and *PAN 2/2011 Planning And Archaeology* (2011), in order to determine the nature, extent, condition, date and significance of any archaeological remains within the proposed development area.

1.2 Location

1.2.1 The proposed development lies wholly within the grounds of Stenton House, Stenton, East Linton, East Lothian (see figure 1).

1.3 Archaeological Background

1.3.1 There are no known sites of archaeological interest within the proposed development area. However, the site lies adjacent to the medieval village of Stenton and within the designed landscape of Stenton House, a Category B Listed Building built around 1820, and originally serving as the church manse. The possibility of identifying the remains of the original designed landscape therefore exists.

2 OBJECTIVES

2.1 The objectives of the evaluation, as set out within the *Written Scheme of Investigation* (AOC 2010) and approved by ELCAS, were:

- i) to determine the character, extent, condition, quality, date and significance of any buried archaeological remains within the proposed development area
- ii) to advise and implement an appropriate form of archaeological mitigation, such as excavation, post-excavation analyses and publication, given the infeasibility of preserving the archaeological material *in situ*, should significant archaeological remains be encountered.

3 METHOD

3.1 ELCAS requested a 5% sample evaluation of the development area. The site amounts to approximately 1,270 m² therefore a 5% sample equates to a minimum of 64 m². The evaluation area excluded the south-west part of the site to maintain access and focused the trenches over the areas to be subjected to the greatest disturbance by the development, namely the house

footprint.

- 3.2 The trial trenching will establish the extent, condition, character, quality and date of any archaeological features present. Excavation was undertaken in shallow units/spits until the first significant archaeological horizon or natural drift geology was reached. All machine excavation was supervised by an experienced field archaeologist. All potentially significant archaeological features were cleaned and defined prior to sample excavation to determine their significance.

Plate 1 – Area Pre Excavation

4 RESULTS

4.1 Introduction

- 4.1.1 The evaluation was conducted on 23rd August 2013. The weather conditions during the evaluation were dry and clear allowing for good archaeological visibility.

- 4.1.2 The various data gathered from the evaluation are presented as a series of appendices:

Appendix 1: Trench Descriptions;
Appendix 2: Photographic Register;
Appendix 3: reproduces the '*Discovery & Excavation in Scotland*' entry.

- 4.1.3 Four ten metre trenches were opened across the site and all showed similar profiles comprising of a topsoil of soft dark brown sandy silt varying in depth between 0.4 m and 0.5 m. This overlay an orange brown silty sand with frequent sub rounded stones. No archaeological features or deposits were found within any of the trenches nor were any significant small finds noted (Plates 1 and 2).

Plate 2 – Trench 3 Post Excavation

5 CONCLUSION

- 5.1 No significant archaeological structures/features or deposits were identified by the evaluation. Scanning of the spoil arisings from the evaluation trenches failed in identifying any residual artefactual material. The significant balance of probability is that the development area is archaeologically sterile.

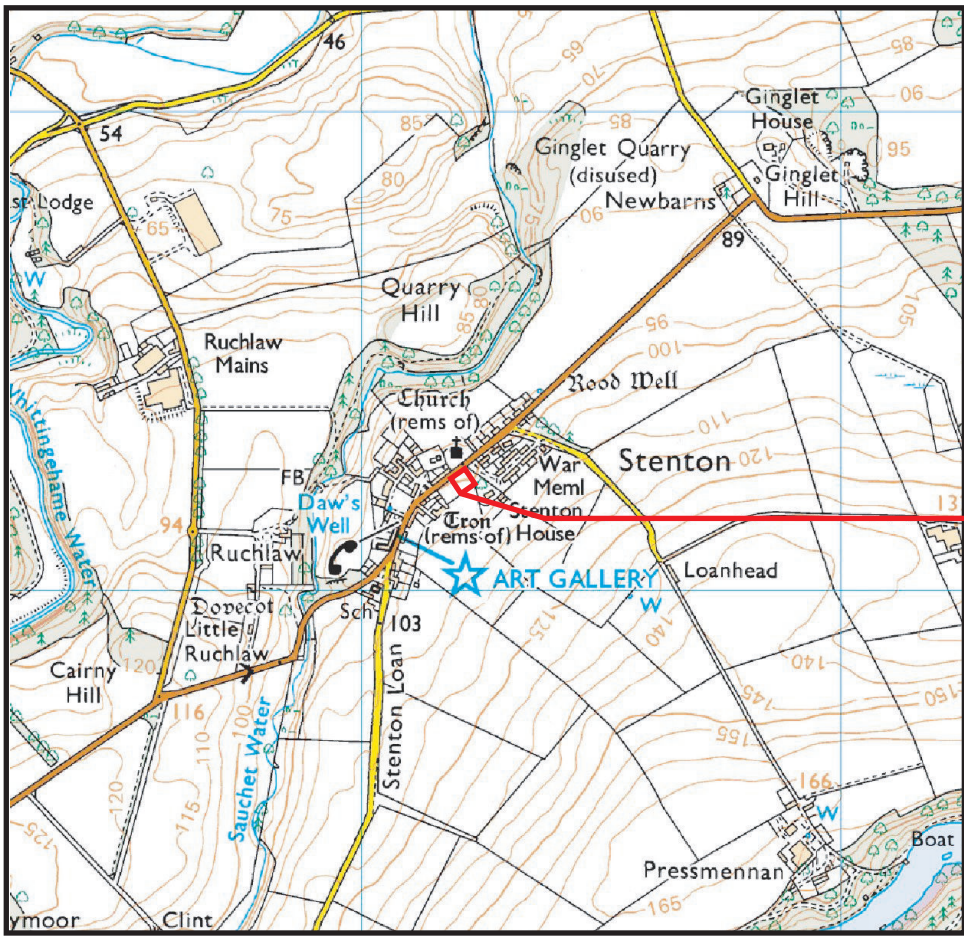

6 RECOMMENDATIONS

- 6.1 As no significant archaeological features or artefacts were identified it is recommended that no further archaeological works are required. This recommendation will require confirmation by ELCAS on behalf of East Lothian Council

APPENDIX 1: Trench Descriptions

Trench 1

<i>Dimensions</i>	10 m x 1.6 m
<i>Orientation</i>	E – W
<i>Depth of trench</i>	0.5 m
<i>Depth of topsoil</i>	0.4m
<i>Features</i>	None
<i>Significant Features</i>	None
<i>Subsoil</i>	Orange Silty Sand
<i>Finds</i>	None

Trench 2

<i>Dimensions</i>	10 m x 1.6 m
<i>Orientation</i>	E – W
<i>Depth of trench</i>	0.5 m
<i>Depth of topsoil</i>	0.4 m
<i>Features</i>	None
<i>Significant Features</i>	None
<i>Subsoil</i>	Orange Silty Sand
<i>Finds</i>	None

Trench 3

<i>Dimensions</i>	10 m x 1.6 m
<i>Orientation</i>	E – W
<i>Depth of trench</i>	1.17 m
<i>Depth of topsoil</i>	0.3 m
<i>Features</i>	None
<i>Significant Features</i>	None
<i>Subsoil</i>	Orange Silty Sand
<i>Finds</i>	None

Trench 4

<i>Dimensions</i>	10 m x 1.6 m
<i>Orientation</i>	E – W
<i>Depth of trench</i>	0.7 m
<i>Depth of topsoil</i>	0.7 m
<i>Features</i>	None
<i>Significant Features</i>	None
<i>Subsoil</i>	Orange Silty Sand
<i>Finds</i>	None
