

ARCHAEOLOGICAL MONITORING REPORT

SCCAS REPORT No: 2012/068	Parish: Haughley
<p style="text-align: center;">New Bells Farm</p> <p style="text-align: center;">HGH 050</p>	Planning Application No: 0811/11
	HER Event No: HGH 050
Address: New Bells Farm, New Bells Lane, Haughley, Stowmarket, IP14 3RW	Grid Reference: TM 0353 6407
	Number of Site visits: 3
	Dates of visits: 03 May/09 May/11 May 2012
Nature of the archaeological work: Monitoring of foundation trenches for an extension and a linked cart lodge/garage.	
Trench dimensions: The trenches were generally 0.50m wide x 1.0m deep and had a total length of approximately 110m, of which 100m were observed.	
Location Map: 	Trench plan (sketch):  <p style="text-align: center;">Red lines = observed trenches</p>

Results:

Chalky till (boulder clay) was overlaid by up to 0.30m of garden soil and turf. Several intrusive features of relatively recent date were seen, mainly service trenches and a land drain.

No archaeological deposits or features were seen.

Photograph:

Foundation trench for north wall of garage block, looking west

Finds:

A small amount of post-medieval and modern pottery and building material was found in the garden soil and in underlying intrusive features. This was not retained.

Recorded by: Kieron Heard, Project Officer

Date: 14 May 2012
