24th October, 1974.

Dear Mrs. Filson,

Many thanks for your letter of 9th October enclosing details of the subject of Mr. Chittick's lecture. I am very grateful for this but I notice that it has little metallurgical content. As I have been helping Professor Shinnie to excavate Meroe for the last few years I was hopeful that Mr. Chittick's Aksumite excavations might unearth something that could be related to Meroe and might throw some light on the reasons for the supposed overwhelming of the Meroites by the Aksumites.

With many thanks,
Yours sincerely,

R.F. Tylecote
R.F. Tylecote.

Mrs. Judith Filson,
London Secretary,
