Land off Willington Road, Etwall, Derbyshire

Evaluation Report

Summary

Wessex Archaeology was commissioned by CgMs Consulting Ltd. on behalf of Bloor Homes to undertake an archaeological evaluation on land off Willington Road, Etwall, Derbyshire (NGR SK 27200, 31300). A Written Scheme of Investigation (WSI, CgMs 2014) was prepared and was submitted to Steve Baker, the Development Control Archaeologist for Derby and Derbyshire, for approval.

Evidence of ridge and furrow strip cultivation was found across the Site, with the entire Site contained within a single area of strip cultivation. This agricultural activity may be of medieval or post-medieval in date. No other archaeological deposits or artefacts were identified, confirming that the Site lay at some distance from the medieval/post medieval core of Etwall.

The archive of the archaeological evaluation is currently held at the offices of Wessex Archaeology in Sheffield, under the project code **107500**. It is recommended that the project archive be deposited at Derby Museum under an accession number to be determined. An OASIS form, ID number **wessexar1-201843** has been provisionally completed and will be finally submitted at the time of deposition.

Land off Willington Road, Etwall, Derbyshire

Evaluation Report

Acknowledgements

The fieldwork was commissioned by CgMs Consulting Ltd. on behalf of Bloor Homes, and Wessex Archaeology is grateful to them in this regard. The assistance of Steve Baker of Derbyshire County Council who monitored the work is also acknowledged. The project was managed for Wessex Archaeology by Chris Swales. Fieldwork was directed by Ashley Tuck, and undertaken by Ashley Tuck, Jeanette Sires and Eleanor Claxton-Mayer.

This report was written by Ashley Tuck, and illustrated by Alix Sperr.

Land off Willington Road, Etwall, Derbyshire

Evaluation Report

1 INTRODUCTION

1.1 Project background

- 1.1.1 Wessex Archaeology was commissioned by CgMs Consulting Ltd. On behalf of Bloor Homes (hereafter 'the Client') to undertake an archaeological evaluation on land off Willington Road, Etwall, Derbyshire, hereafter 'the Site' (NGR SK 27200 31300; **Figure 1**).
- 1.1.2 Outline planning permission has been granted by South Derbyshire District Council for 'development of up to 100 dwellings, public open space, drainage and associated works'. This evaluation was designed to help fulfil a condition of the planning permission.
- 1.1.3 A Written Scheme of Investigation (CgMs 2014) was prepared in accordance with current industry guidance provided by the Chartered Institute for Archaeologists (CIfA 2014a and 2014b) and in accordance with CIfA Codes of Conduct (2014c). The WSI was submitted to Steve Baker, the Development Control Archaeologist for Derby City and Derbyshire, for approval.

1.2 The Site

- 1.2.1 The Site comprises a pasture, part of a second pasture and part of an arable field to the south of Willington Road, at the south-eastern edge of Etwall near Derby (**Figure 1**). The Site is bounded by Willington Road to the north, by housing to the west and by further fields to the south and east. The majority of the Site is intended for residential development, with ancillary development in the arable field to the south.

1.3 Geology

- 1.3.1 The British Geological Survey records the solid geology of the Site as Mudstone belonging to the Gunthorpe member, with no superficial deposits recorded. (<http://maps.bgs.ac.uk/>)

1.4 Topography

- 1.4.1 The Site slopes gently down from 75m above Ordnance Datum (aOD) in the north to 65m aOD in the south, where the land flattens out.

2 ARCHAEOLOGICAL BACKGROUND

2.1 Introduction

- 2.1.1 The following section summarises the archaeological background of the Site which was detailed in the written scheme of investigation (CgMs 2014).

2.2 Prehistoric/Roman

- 2.2.1 A low or nil potential for prehistoric or Romano-British archaeology was identified. The majority of activity within the wider area dating to the prehistoric and Roman periods is concentrated on the lighter, fertile soils of the sands and gravels of the Trent valley to the south.

2.3 Medieval/post-medieval

- 2.3.1 The Site is located outside the medieval and post-medieval core of Etwall and there is no material evidence of earlier settlement within the immediate area of the Site. Evidence of medieval or post-medieval ridge and furrow strip cultivation is visible as earthworks in the east of the Site, and was identified across the Site by the geophysical survey.

3 METHODOLOGY

3.1 General

- 3.1.1 Detailed methodology for the work can be found in the Written Scheme of Investigation (CgMs 2014). Wessex Archaeology procedures conform to industry best practice, as outlined in the standards and guidance documentation issued by the Chartered Institute for Archaeologists (CIfA 2014c), the United Kingdom Institute of Conservation (UKIC 2001). The methodology conforms to the requirements of the National Planning Policy Framework.
- 3.1.2 The programme of archaeological investigation was conducted within the general research parameters and objectives defined by 'East Midlands Heritage: A research Agenda and Strategy for the Historic Environment' (compiled on behalf of the region's historic environment community by D. Knight, B. Vyner and C. Allen) and the earlier Archaeological Resource Assessment and Research Agenda for the East Midlands 'The Archaeology of the East Midlands' edited by N. Cooper (2006). The investigation also took account of the national research programmes outlined in English Heritage's 'Strategic Framework for historic Environment Activities and Programmes in English Heritage (SHAPE)' published in 2008.
- 3.1.3 Ten trial trenches were excavated, eight of which were 50m long (**Trenches 1-8**), and two were 30m long (**Trenches 9 and 10**). The trench locations were informed by a strategy designed to provide a sufficient sample of the Site to characterise its archaeological potential.

3.2 Machine excavation

- 3.2.1 Topsoil was removed using an 180° mechanical excavator fitted with a toothless ditching bucket, working under the continuous direct supervision of a suitably experienced archaeologist. Topsoil and overburden were removed in a series of level spits down to the level of the upper archaeological horizon, or the level of the natural geology, whichever was reached first.

3.3 Hand excavation

- 3.3.1 No hand excavation was undertaken due to the negative results of the evaluation.

3.4 Recording

- 3.4.1 All deposits were recorded using Wessex Archaeology's *pro forma* recording sheets and a continuous unique numbering system. A stratigraphic matrix was compiled to record the relationships between features and deposits.
- 3.4.2 Excavated areas and deposits were located by means of an RTK GPS system and tied into the OS grid with a tolerance of better than + or - 100mm. All deposits had spot heights recorded in relation to Ordnance Datum, correct to two decimal places.
- 3.4.3 A photographic record was maintained using digital images. 35mm monochrome film equipment was available but was not required due to the negative results of the evaluation.

4 AIMS AND OBJECTIVES

4.1 General

- 3.1.1 The objectives of the programme of archaeological investigation were:
- *to establish the presence/absence of features, deposits and/or finds of archaeological interest;*
 - *to provide sufficient information regarding the character, origin, date, preservation and significance of any archaeological features/deposits and/or finds to determine the need for and scope of any further works;*
 - *to ensure the appropriate investigation and recording of any archaeological remains encountered;*
 - *to disseminate the results of the archaeological investigation, and advance understanding of the Site's archaeology as appropriate; and,*
 - *to produce a Site archive for deposition with an appropriate museum if appropriate.*

5 RESULTS

5.1 Introduction

- 5.1.1 The following section provides a summary of the information held in the Site archive, with a full list of context numbers and context descriptions contained in **Appendix 1**.

5.2 General stratigraphy

- 5.2.1 The natural geological substrate (e.g. **103**) was generally described as silty clay, although in **Trenches 3, 5** and **9** it was described as sandy clay, and varied from yellowish brown in the north through brown to reddish brown in the south. Relic ploughsoil subsoil (e.g. **102**) was present in all trenches, typically mid brown silty clay up to 0.2m in depth. The topsoil (e.g. **101**) was dark brown silty clay, and varied from 0.21m to 0.3m in depth. The majority of deposits contained inclusions of small subrounded stones.
- 5.2.2 In the western pasture (**Trenches 1, 2, 4, 6, 7** and **8**), the interface between subsoil and natural was very uneven and jumbled, requiring moderately deep machining and being indicative of infrequent, imperfect ploughing prior to the formation of the relic subsoil.

5.3 Ridge and furrow

- 5.3.1 In the eastern pasture (the area of **Trenches 3 and 5**) slight earthwork ridges were visible forming long “S” shapes. These “S” shaped ridges appeared to run from the southern boundary of the field to Willington Road in the north. The tenant farmer reported that he had ploughed the western pasture (**Trenches 1, 2, 4, 6, 7 and 8**) more frequently than the eastern pasture, which explains the absence of earthwork ridges there. No earthwork ridges were present in the southern arable field (**Trenches 9 and 10**) due to frequent ploughing.
- 5.3.2 As anticipated from the geophysical survey, furrows were found in all trenches except for **Trenches 8 and 10** which were on the same alignment as the ridge and furrow. The furrows were typically 6m apart in the north and up to 9m apart in the south. A maximum width of 1.8m was recorded for a furrow. The furrows ran north to south up and down the slope of the field. The furrows (e.g. **104**) were filled with mid-brown silty clay, sometimes with stone inclusions (e.g. **105**). The fill of the furrows was similar, but not identical, to the relic ploughsoil subsoil (e.g. **102**).

5.4 Archaeological features

- 5.4.1 Other than the ridge and furrow, no archaeological features were identified.

6 FINDS AND ENVIRONMENTAL

6.1 General

- 6.1.1 No archaeological finds were recovered from the Site. No environmental samples were taken.

7 DISCUSSION

7.1 Conclusion

- 7.1.1 Evidence of ridge and furrow strip cultivation was found across the Site, with the entire Site contained within a single area of strip cultivation. This agricultural activity may be of medieval or post-medieval date.
- 7.1.2 No other archaeological deposits or artefacts were identified, confirming that the Site lay at some distance from the medieval/post-medieval core of Etwall. No phases of earlier settlement were identified.

8 STORAGE AND CURATION

8.1 Museum

- 8.1.1 It is recommended that the project archive resulting from the excavation be deposited with Derby Museum under an accession number to be determined.

8.2 Preparation of archive

- 8.2.1 The complete Site archive, which will include paper records, photographic records, graphics, and digital data, will be prepared following the standard conditions for the acceptance of excavated archaeological material by Derby Museum, and in general following nationally recommended guidelines (SMA 1995; ClfA 2014b; Brown 2011; ADS 2013).
- 8.2.2 All archive elements will be marked with the accession code, and a full index will be prepared.

8.3 Security copy

- 8.3.1 In line with current best practice (e.g. Brown 2011); on completion of the project a security copy of the written records will be prepared, in the form of a digital PDF/A file. PDF/A is an ISO-standardised version of the Portable Document Format (PDF) designed for the digital preservation of electronic documents through omission of features ill-suited to long-term archiving.

10 APPENDICES

10.1 Appendix 1: Context descriptions

Trench 1		
Context	Description	Depth (m BGL)
101	Topsoil: Dark brown loose mixed clay	0-0.3
102	Subsoil: mid brown clay with some stone inclusions	0.3-0.5
103	Natural: light yellowish brown silty clay with many stone inclusions	0.5+
104	Cut: example of furrow. Running N-S, 6m spacing, typically 1.8m wide.	0.5+
105	Fill: example of furrow. Mid brown clay with stone inclusions.	0.5+

Trench 2		
Context	Description	Depth (m BGL)
201	Topsoil: Dark brown loose mixed clay	0-0.35
202	Subsoil: mid brown clay with some stone inclusions	0.35-0.5
203	Natural: light yellowish brown silty clay with many stone inclusions	0.5+
204	Cut: furrow appearing in N end of trench. Running N-S, 0.8m wide.	0.5+
205	Fill: fill of furrow. Mid brown clay with stone inclusions.	0.5+

Trench 3		
Context	Description	Depth (m BGL)
301	Topsoil: Dark grey-brown silty clay Sparse small subrounded pebbles.	0-0.23
302	Subsoil: mid grey-brown silty clay. Sparse small subrounded pebbles.	0.23-0.34
303	Natural: light brown clayey sand. Abundant small-medium subrounded pebbles.	0.34+
304	Cut: example of furrow. Running N-S, 6m spacing, typically 1.6m wide.	0.34+
305	Fill: example of furrow. Dark brown silty clay with no inclusions.	0.34+

Trench 4		
Context	Description	Depth (m BGL)
401	Topsoil: Dark brown loose mixed clay	0-0.3
402	Subsoil: mid brown clay with some stone inclusions	0.3-0.5

403	Natural: light yellowish brown silty clay with many stone inclusions	0.5+
404	Cut: example of furrow. Running N-S, 5.5m spacing, typically 1.8m wide.	0.5+
405	Fill: example of furrow. Dark brown clay with stone inclusions.	0.5+

Trench 5		
Context	Description	Depth (m BGL)
501	Topsoil: Dark grey-brown silty clay Sparse small subrounded pebbles.	0-0.21
502	Subsoil: mid grey-brown silty clay. Sparse small subrounded pebbles.	0.21-0.27
503	Natural: light brown clayey sand. Abundant small-medium subrounded pebbles.	0.27+
504	Cut: example of furrow. Running N-S, 6m spacing, typically 1.6m wide. 7 in trench.	0.27+
505	Fill: example of furrow. Dark brown silty clay with no inclusions.	0.27+

Trench 6		
Context	Description	Depth (m BGL)
601	Topsoil: Dark brown loose mixed clay	0-0.3
602	Subsoil: mid brown clay with some stone inclusions	0.3-0.5
603	Natural: light yellowish brown silty clay with many stone inclusions	0.5+
604	Cut: example of furrow. Running N-S, typically 1.6m wide. 2 in trench running obliquely.	0.5+
605	Fill: example of furrow. Dark brown silty clay with no inclusions.	0.5+

Trench 7		
Context	Description	Depth (m BGL)
701	Topsoil: Dark grey-brown silty clay Sparse small subrounded pebbles.	0-0.3
702	Subsoil: mid grey-brown silty clay. Sparse small subrounded pebbles.	0.3-0.48
703	Natural: light reddish brown silty clay. Abundant small-medium subrounded pebbles.	0.48-0.55+
704	Cut: example of furrow. Running N-S, 8-9m spacing, typically 1.5m wide. 7 in trench.	0.48+
705	Fill: example of furrow. Dark brown silty clay. Sparse small subrounded pebbles.	0.48+

Trench 8		
Context	Description	Depth (m BGL)
801	Topsoil: Dark grey-brown silty clay Sparse small subrounded pebbles.	0-0.3
802	Subsoil: mid grey-brown silty clay. Sparse small subrounded pebbles.	0.3-0.5
803	Natural: light reddish brown silty clay. Abundant small-medium subrounded pebbles.	0.5+

Trench 9		
Context	Description	Depth (m BGL)
901	Topsoil: Dark grey-brown silty clay Sparse small subrounded pebbles.	0-0.31
902	Subsoil: mid grey-brown sandy clay. Sparse small subrounded pebbles.	0.31-0.48
903	Natural: light reddish brown silty clay. Abundant small-medium subrounded pebbles.	0.48-0.59+
904	Cut: example of furrow. Running N-S, 8-9m spacing, 0.6-0.9m wide. 7 in trench.	0.48+
905	Fill: example of furrow. Dark brown silty clay. Sparse small subrounded pebbles.	0.48+

Trench 10		
Context	Description	Depth (m BGL)
1001	Topsoil: Dark grey-brown silty clay Sparse small subrounded pebbles.	0-0.29
1002	Subsoil: mid grey-brown silty clay. Sparse small subrounded pebbles.	0.29-0.4
1003	Natural: light reddish brown silty clay. Abundant small-medium subrounded pebbles.	0.4+

Project details

Project name	Land off Willington Road, Etwall, Derbyshire
Short description of the project	Wessex Archaeology was commissioned by CgMs Consulting on behalf of Bloor Homes to undertake an archaeological evaluation on land off Willington Road, Etwall, Derbyshire, NGR 427200 331300. A Written Scheme of Investigation (WSI, CgMs 2014) was prepared and was submitted to Steve Baker, the Development Control Archaeologist for Derby and Derbyshire, for approval. Evidence of ridge and furrow strip cultivation was found across the Site, with the entire Site contained within a single area of strip cultivation. This agricultural activity may be of medieval or post-medieval date. No other archaeological deposits or artefacts were identified, suggesting that the Site lay at some distance from any settlement.
Project dates	Start: 19-01-2015 End: 22-01-2015
Previous/future work	Yes / Not known
Any associated project reference codes	107500 - Contracting Unit No.
