Site	1C20WRBTT, HS2-C, Northamptonshire				
Field number	43				
Trench number	53				
Archaeology present?	Archaeology present				
Conducted on	5 Feb 2021 08:34 GMT				
Trench metal detected?	Yes				
Location	Banbury Road, Lower Boddington Daventry England NN11 United Kingdom (52.17499352065117, - 1.3216282334190994)				
Trench width	1.8m				
Prepared by (leave)	Mpad 6				
Approximate trench orientation	NS				
Trench measurements. Typically measurement starts at the western end of a trench, except when trenches are directly NS in alignment. In this case start measuring from the northern end.					
Measurements started from	Northern most end

Specify the trench length and this will both present the number of measurement you should take on such a trench, and an appropriately sized trench sketch proforma to fill out. At each measurement point (MP) you will now be prompted for the depth to natural, and then the thickness of any horizons present. All depths are recorded in meters. When recording the main horizon thicknesses, at each measurement point, context numbers are assigned to these horizon in case finds are encountered. The numbers are based on the trench number, so the 1st and 2nd context in trench 77 would be 7701 and 7702 respectively.

Thickness of this horizon in meters.	00.7
Context number	5302
Trench bucket sampling	5.56%
All trenches are bucket sampled at the start and end. For those more than 50m, a third sample is taken at a mid point too. This section records any bulk artefacts, ecofacts or small find recovered from these sample points and the horizon from which those finds came.	

First sample point	
First sample point 1	
Was this sample taken?	Yes but nothing recovered
Second sample point 5.56%	
Second sample point 1 5.56%	
Was this sample taken?	Yes and material recovered.
Context number of horizon containing material 5301	
Bulk artefacts recovered	Pottery
Bulk ecofacts recovered	
Third sample point	
Third sample point 1	
Was this sample taken?	Yes but nothing recovered
Nature of geology in trench. Brief description of the predominant geology of the trench, noting anything unusual, e.g. "Predominantly sandy gravels, with a 2m wide band of silt at c. 14m"	
Geological description	
Silty Clay	
Land drains	Not encountered
Date of trench completion	5 Feb 2021 08:56 GMT
