

Trial trench log

1C20WRBTT / 43 / 55 / Archaeology present / 14 Jan 2021

Complete

Score	8.33%	Failed items	1	Actions	0
Site	1C20WRBTT, HS2-C, Northamptonshire				
Field number	43				
Trench number	55				
Archaeology present?	Archaeology present				
Conducted on	14 Jan 2021 13:36 GMT				
Trench metal detected?	No				
Location	Daventry England NN11 United Kingdom (52.17453884431363, - 1.3225588761282363)				
Trench width	1.8m				
Prepared by (leave)	mpad 3				
Approximate trench orientation	EW				
Trench measurements. Typically measurement starts at the western end of a trench, except when trenches are directly NS in alignment. In this case start measuring from the northern end.					
Measurements started from	Western most end

Trench record 8.33%

Trench details

8.33%

Specify the trench length and this will both present the number of measurement you should take on such a trench, and an appropriately sized trench sketch proforma to fill out. At each measurement point (MP) you will now be prompted for the depth to natural, and then the thickness of any horizons present. All depths are recorded in meters. When recording the main horizon thicknesses, at each measurement point, context numbers are assigned to these horizons in case finds are encountered. The numbers are based on the trench number, so the 1st and 2nd context in trench 77 would be 7701 and 7702 respectively.

Trench length and sketch

25m

Speed up your sketch using colour

Use colour to differentiate features

-  Furrows
-  Drainage complete/broken
-  Archaeology
-  Other modern

Trench sketch

1st MP depth to natural	0.20
1st MP Horizon thicknesses	
1st MP Horizon thicknesses 1	
Horizon type	Top soil
Thickness of this horizon in meters.	0.20
Context number	5501
2nd MP depth to natural	0.50
2nd MP Horizon thicknesses	
2nd MP Horizon thicknesses 1	
Horizon type	Top soil
Thickness of this horizon in meters.	0.20
Context number	5501
2nd MP Horizon thicknesses 2	
Horizon type	Subsoil
Thickness of this horizon in meters.	0.20
Context number	5502
2nd MP Horizon thicknesses 3	
Horizon type	Other
Natural overcut	
Thickness of this horizon in meters.	0.10
Context number	5503
3rd MP depth to natural	0.30
3rd MP Horizon thicknesses	
3rd MP Horizon thicknesses 1	
Horizon type	Top soil
Thickness of this horizon in meters.	0.20
Context number	5501
3rd MP Horizon thicknesses 2	
Horizon type	Subsoil

Thickness of this horizon in meters.	0.10
Context number	5502
Trench bucket sampling	8.33%
All trenches are bucket sampled at the start and end. For those more than 50m, a third sample is taken at a mid point too. This section records any bulk artefacts, ecofacts or small find recovered from these sample points and the horizon from which those finds came.	
First sample point	5.56%
First sample point 1	5.56%
Was this sample taken?	Yes and material recovered.
Context number of horizon containing material	5502
Bulk artefacts recovered	CBM
Bulk ecofacts recovered	
Second sample point	
Second sample point 1	
Was this sample taken?	Yes but nothing recovered
Third sample point	11.11%
Third sample point 1	11.11%
Was this sample taken?	Yes and material recovered.
Context number of horizon containing material	5502
Bulk artefacts recovered	Clay pipe CBM
Bulk ecofacts recovered	
Nature of geology in trench. Brief description of the predominant geology of the trench, noting anything unusual, e.g. "Predominantly sandy gravels, with a 2m wide band of silt at c. 14m"	
Geological description	
Clay	
Land drains	Not encountered
Date of trench completion	17 Jan 2021 10:47 GMT
