

Trial trench log

1C20WRBTT / 43 / 66 / No archaeology / 19 Jan 2021

Complete

Score	0%	Failed items	0	Actions	0
Site				1C20WRBTT, HS2-C, Northamptonshire	
Field number				43	
Trench number				66	
Archaeology present?				No archaeology	
Conducted on				19 Jan 2021 10:55 GMT	
Trench metal detected?				Yes	
Location				Banbury Road, Lower Boddington Daventry England NN11 United Kingdom (52.17433692426623, - 1.3208569306892537)	
Trench width				1.8m	
Prepared by (leave)				mpad 1	
Approximate trench orientation				NE-SW	
Trench measurements. Typically measurement starts at the western end of a trench, except when trenches are directly NS in alignment. In this case start measuring from the northern end.					
Measurements started from				Northern most end

Trench records

Trench records

Trench details

Specify the trench length and this will both present the number of measurement you should take on such a trench, and an appropriately sized trench sketch proforma to fill out. At each measurement point (MP) you will now be prompted for the depth to natural, and then the thickness of any horizons present. All depths are recorded in meters. When recording the main horizon thicknesses, at each measurement point, context numbers are assigned to these horizon in case finds are encountered. The numbers are based on the trench number, so the 1st and 2nd context in trench 77 would be 7701 and 7702 respectively.

Trench length and sketch

30m

Speed up your sketch using colour

Use colour to differentiate features

- Furrows
- Drainage complete/broken
- Archaeology
- Other modern

Trench sketch

1st MP depth to natural

0.30

1st MP Horizon thicknesses

1st MP Horizon thicknesses 1

Horizon type	Top soil
Thickness of this horizon in meters.	0.30
Context number	6601
2nd MP depth to natural	0.30

2nd MP Horizon thicknesses

2nd MP Horizon thicknesses 1

Horizon type	Top soil
Thickness of this horizon in meters.	0.30
Context number	6601
3rd MP depth to natural	0.40

3rd MP Horizon thicknesses

3rd MP Horizon thicknesses 1

Horizon type	Top soil
Thickness of this horizon in meters.	0.40
Context number	6601

Trench bucket sampling

All trenches are bucket sampled at the start and end. For those more than 50m, a third sample is taken at a mid point too. This section records any bulk artefacts, ecofacts or small find recovered from these sample points and the horizon from which those finds came.

First sample point

First sample point 1

Was this sample taken?	Yes but nothing recovered
------------------------	---------------------------

Second sample point

Second sample point 1

Was this sample taken?	Yes but nothing recovered
------------------------	---------------------------

Third sample point

Third sample point 1

Was this sample taken?

Yes but nothing recovered

Nature of geology in trench. Brief description of the predominant geology of the trench, noting anything unusual, e.g.
"Predominantly sandy gravels, with a 2m wide band of silt at c. 14m"

Geological description

Silty Clay

Land drains

Not encountered

Date of trench completion

19 Jan 2021 11:31 GMT
