

Trial trench log

1C20WRBTT / 44 / 107 / No archaeology / 18 Jan 2021

Complete

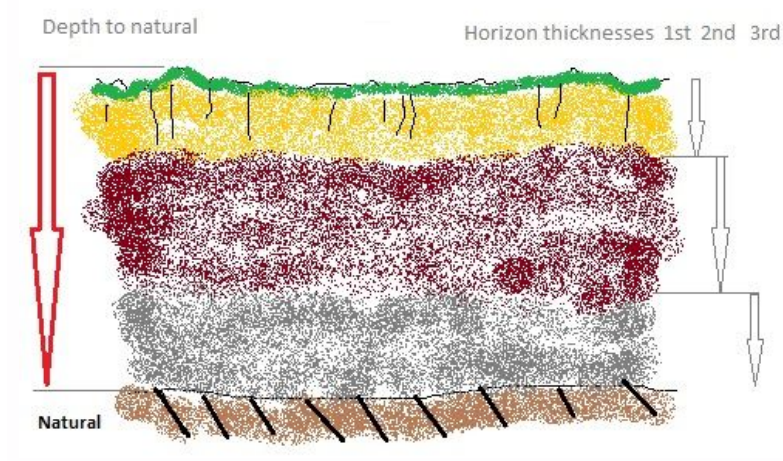

Score	0%	Failed items	0	Actions	0
Site	1C20WRBTT, HS2-C, Northamptonshire				
Field number	44				
Trench number	107				
Archaeology present?	No archaeology				
Conducted on	18 Jan 2021 09:50 GMT				
Trench metal detected?	Yes				
Location	Banbury Road, Lower Boddington Daventry England NN11 United Kingdom (52.1736838482806, - 1.318152090535795)				
Trench width	1.8m				
Prepared by (leave)	Mpad 3				
Approximate trench orientation	EW				
Trench measurements. Typically measurement starts at the western end of a trench, except when trenches are directly NS in alignment. In this case start measuring from the northern end.					
Measurements started from	Western most end

Trench records

Trench records

Trench details

Specify the trench length and this will both present the number of measurement you should take on such a trench, and an appropriately sized trench sketch proforma to fill out. At each measurement point (MP) you will now be prompted for the depth to natural, and then the thickness of any horizons present. All depths are recorded in meters. When recording the main horizon thicknesses, at each measurement point, context numbers are assigned to these horizons in case finds are encountered. The numbers are based on the trench number, so the 1st and 2nd context in trench 77 would be 7701 and 7702 respectively.

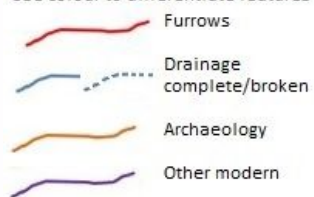

Trench length and sketch

50m

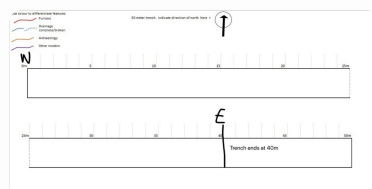

Trench finishes at 40m. 10m added as trench 111 couldn't be completed due to badger set

Speed up your sketch using colour using the format below, mark on your measurement points (ideally at either end and 25m intervals between) and indicate the direction of North!

Use colour to differentiate features

Trench sketch

1st MP depth to natural

0.3

1st MP Horizon thicknesses

1st MP Horizon thicknesses 1

Horizon type	Top soil
Thickness of this horizon in meters.	0.3
Context number	10701
2nd MP depth to natural	0.35

2nd MP Horizon thicknesses

2nd MP Horizon thicknesses 1

Horizon type	Top soil
Thickness of this horizon in meters.	0.35
Context number	10701
3rd MP depth to natural	0.35

3rd MP Horizon thicknesses

3rd MP Horizon thicknesses 1

Horizon type	Top soil
Thickness of this horizon in meters.	0.35
Context number	10701

Trench bucket sampling

All trenches are bucket sampled at the start and end. For those more than 50m, a third sample is taken at a mid point too. This section records any bulk artefacts, ecofacts or small find recovered from these sample points and the horizon from which those finds came.

First sample point

First sample point 1

Was this sample taken?	Yes but nothing recovered
------------------------	---------------------------

Second sample point

Second sample point 1

Was this sample taken?	Yes but nothing recovered
------------------------	---------------------------

Nature of geology in trench. Brief description of the predominant geology of the trench, noting anything unusual, e.g. "Predominantly sandy gravels, with a 2m wide band of silt at c. 14m"

Geological description

Pale Orangey yellow grey Silty clay with manganese staining

Land drains

Not encountered

Date of trench completion

18 Jan 2021 10:12 GMT
