All w/ or unless
otherwise stated

Pretery, Hapa 1976.

Trench ii - surface collection, made before excavation
(6 x 2 m) (one of more plentiful shales, but not most plentiful)

11 chert flakes

c. 150⁻²⁰⁰ shards, almost all of fine-sized wheel-made

Jars, remainder of (a) brick-red ware, often with one side blackish; (b) purple ware, sandy, (c) greenish buff, roughly in proportion 2:2:1. All greatly sand-blasted,

(c) being softest of all; some of this may have been glazed.

(note reasoning glaze = all coll.)

Also base v. heavy dark grey coarse, hard jar

frag near rim red-ware jar, this

Fr. modern glass.

All thrown.

Trench iii 2 x 2 m.

Surface coll. 25 shards, much as above.

All thrown.

Trench iv 3 x 2 m.

Surface coll. As above, c. 30 shards, but nice flat-top pot
brown (worn); h-u pr grey, fm pr yellow (now) base, flat.

top large new pot

; v. thin red of jar

Jr v surface coll - c. 20 heavy jar body frags, as tr. ii.

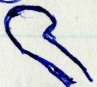

All thrown.

Jr vi spe 6 body shards only

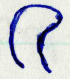

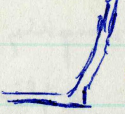

As shards of h-u buff and reddish buff + greenish - buff seems to depend on firing, at least in case of common jars

2 Ms 60-70 shells, mostly hard greenish buff jaw, some red; some have asphalt ^{inclusion}

Tr ii (1) Knobs amphora base  , pink, some red
Near vert-sided jaw  , greenish buff, hard

NB (in this Tr (only) frs of similar vessel occur down to 60) 
Rim wide-bellied jaw  buff, asphalt in and out

✓ 2 body sherds, (1 purplish, 1 brick red), w/a, w. fragm -
