

radiocarbon dates

- 190 BC to AD 120
- 1600–1400 BC
- 2910–2490 BC

— base of trench

█ extent of sampled profile

interpretations

- facies 9 – modern made ground
- facies 8 – buried pre-industrial land surface
- facies 7 – wet meadowland subject to seasonal overbank flooding
- facies 6 – permanent/prolonged flooding (marshy fen)
- facies 5 – slackwater with sedges fringing the active river and forming backwater area
- facies 4 – peaty land surface
- facies 3 – fluvial sands
- facies 2 – tufa-rich sands
- facies 1 – Pleistocene gravel (reworked by Holocene river in upper part)
- inferred surface of Pleistocene gravel (Pleistocene/Holocene interface)
