

Appendix 1. Charts and Diagrams

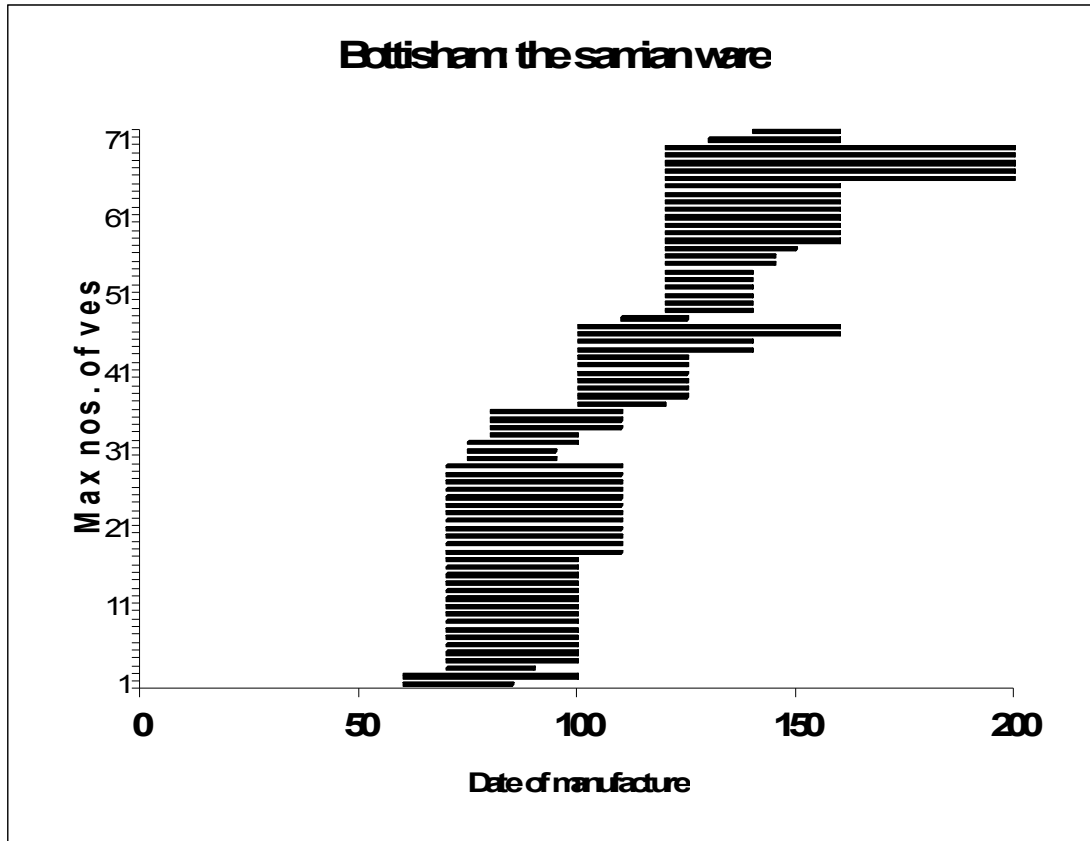

Figure App 1.1. Bottisham, Tunbridge Lane. Dating of the samian

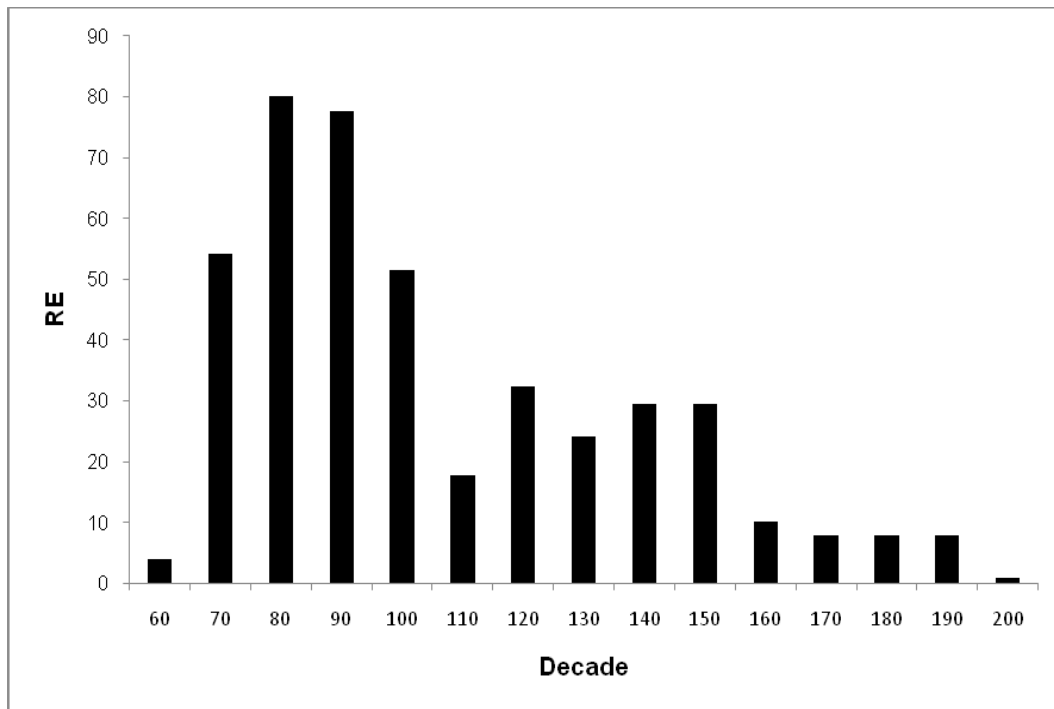

Figure App 1.2. Bottisham, Tunbridge Lane. Samian date distribution (by RE)

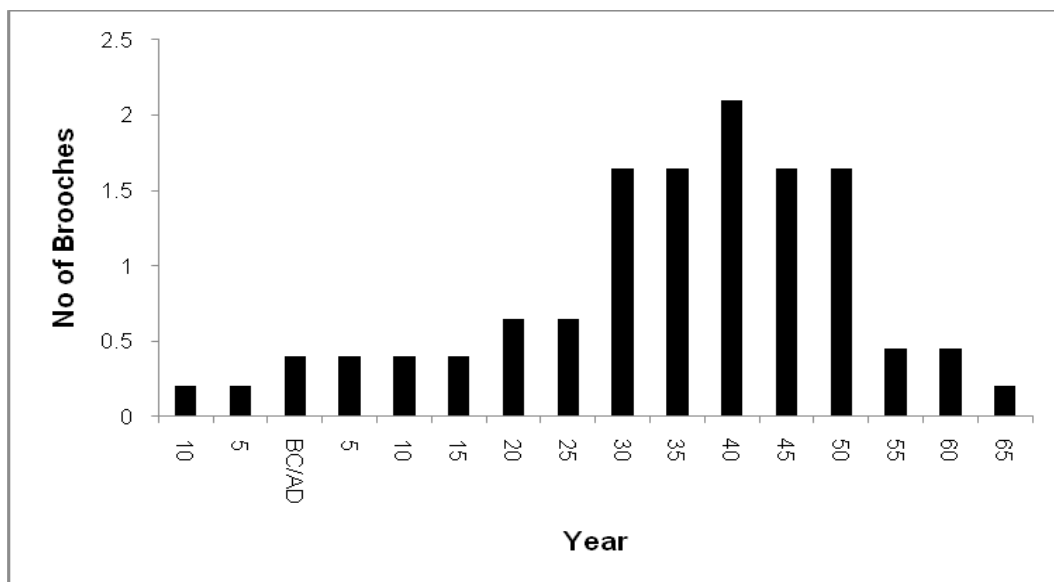

Figure App 1.3. Fengate, Cat's Water. Date distribution of brooches

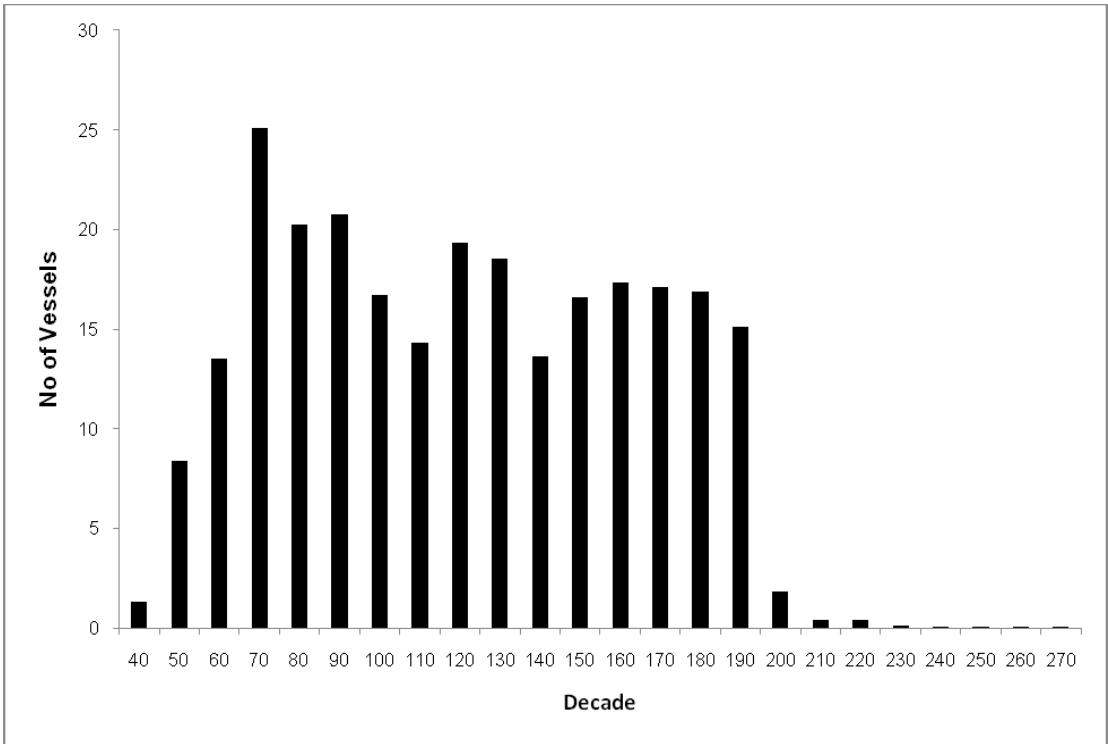

Figure App 1.4. Grandford. Samian date distribution by MNR

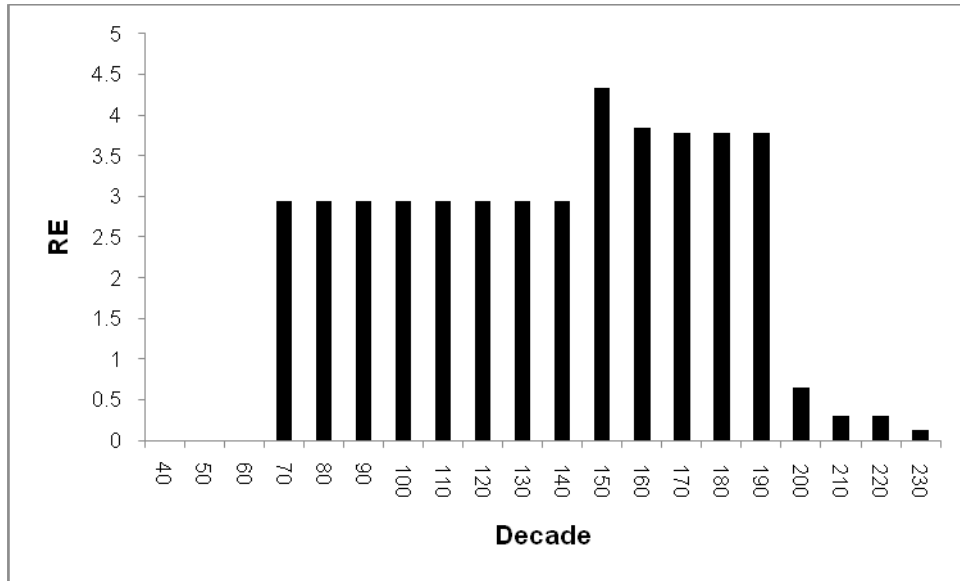

Figure App. 1.5. Horningsea, Eye Hall Farm. Date distribution, forms with range of less than 150 years, by RE

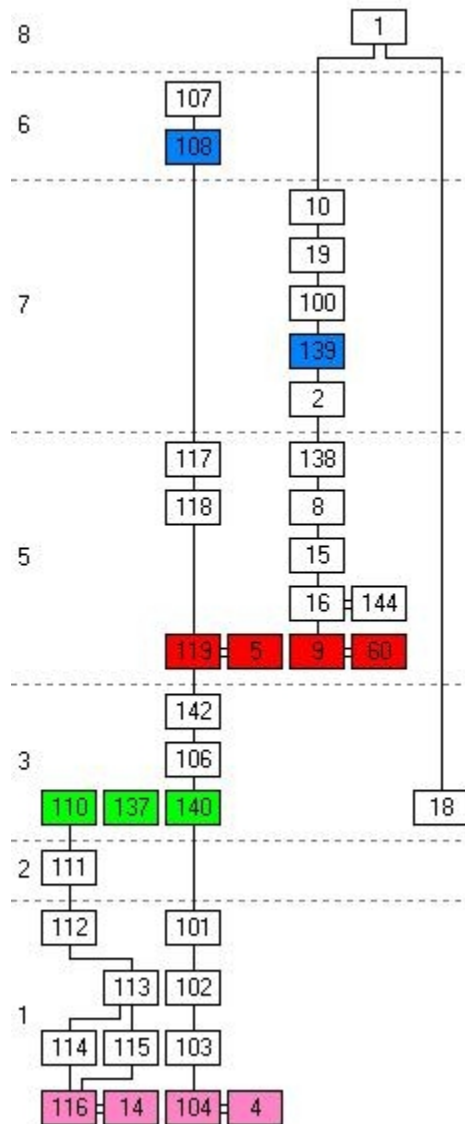

Figure App 1.6. Landbeach, Car Dyke Farm (Akeman Street). Stratigraphic matrix

ERRATA

- (1) Note 101 is in the wrong location and is Same as 18. 101 & 18 are the *Agger* of the Roman Road (Akeman Street).
- (2) 114 contained Roman pottery (however not recorded in excavation pottery report).
- (3) Eastern trackway ditch Cut **14** (= 116), primary basal fill 62 (= 114) contained R-B pottery and final infill 11 (= 112) contained a sherd of reed rimmed mortaria.
- (4) Eastern roadside ditch Cut **5** (=119) fills 7 & 17 both contained R-B pottery generically dated to C2-4.

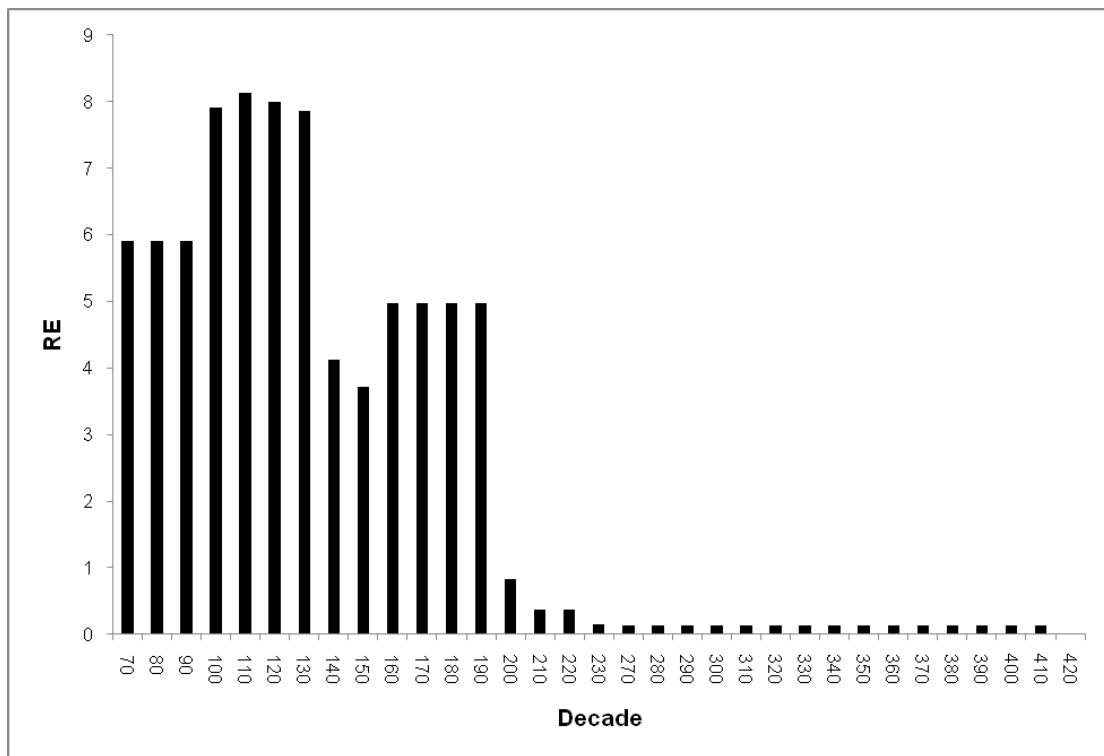

Figure App 1.7. Landbeach, Car Dyke Farm (Akeman Street). Date distribution of vessels with a date range of less than 150 years

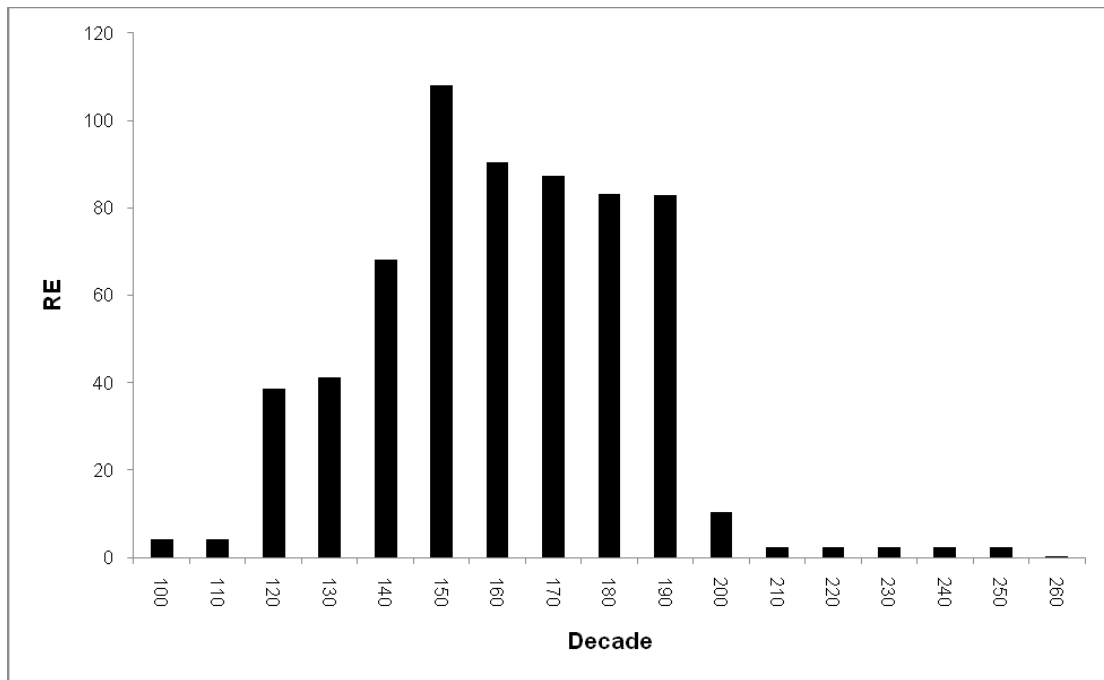

Figure App 1.8. Littleport, Camel Road. Samian date distribution by RE

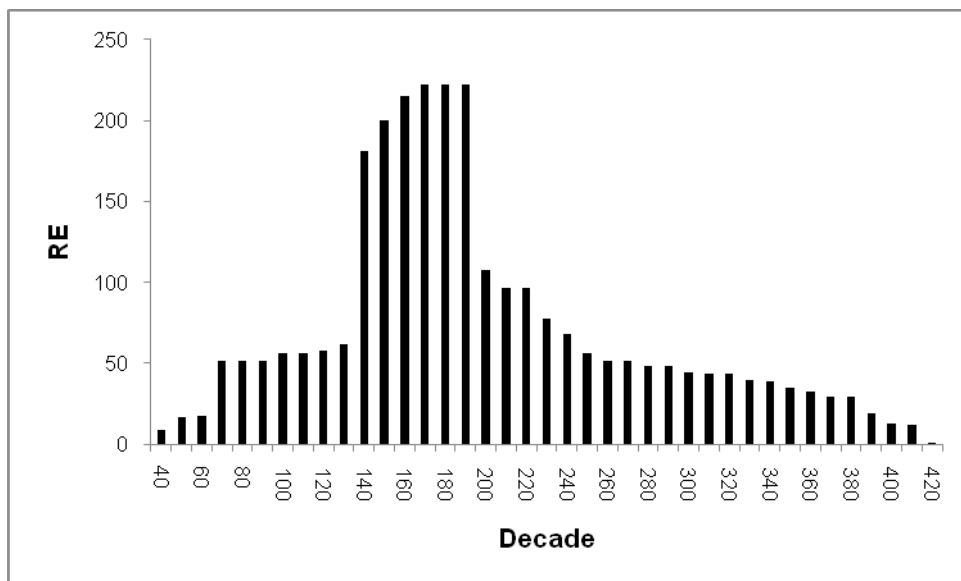

Figure App 1.9. Littleport, Camel Road. Date distribution by RE plot of all pottery forms with range of less than 200 years

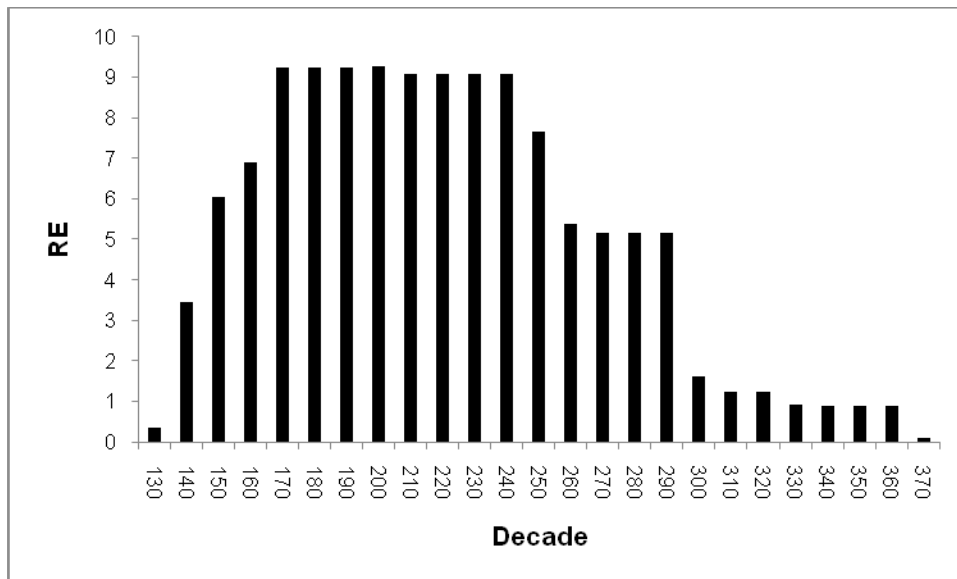

Figure App 1.10. Littleport, Camel Road. Date distribution plot of all forms with range of less than 200 years from phase 1

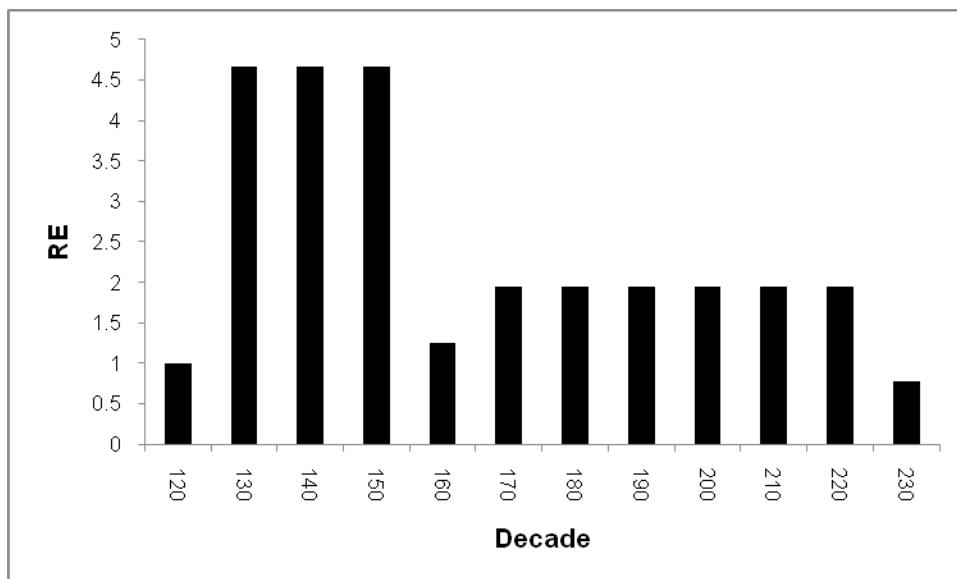

Figure App 1.11 Littleport, Camel Road. Date distribution plot of all forms with range of less than 200 years from Phase 2

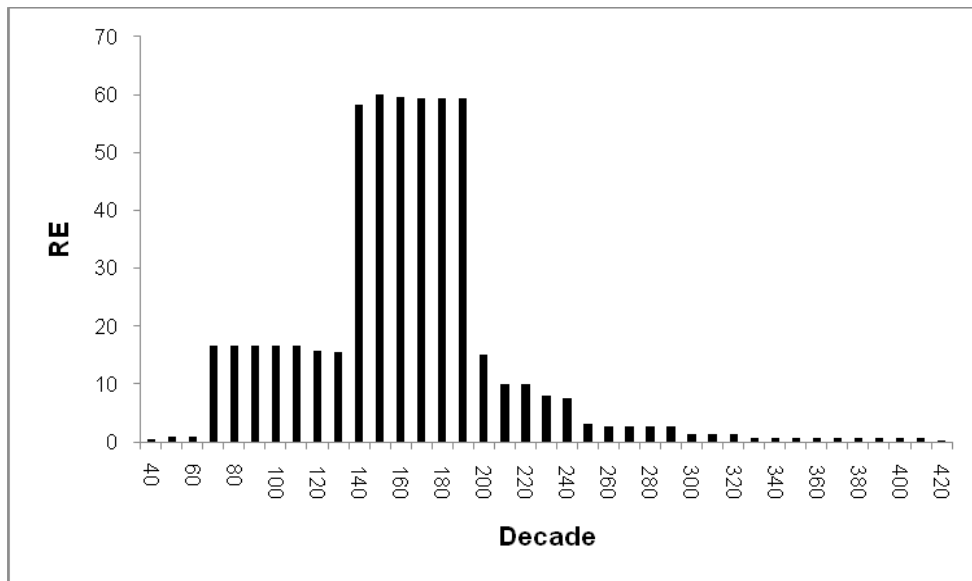

Figure App 1.12. Littleport, Camel Road. Date distribution plot of all forms with range of less than 200 years from Phase 3

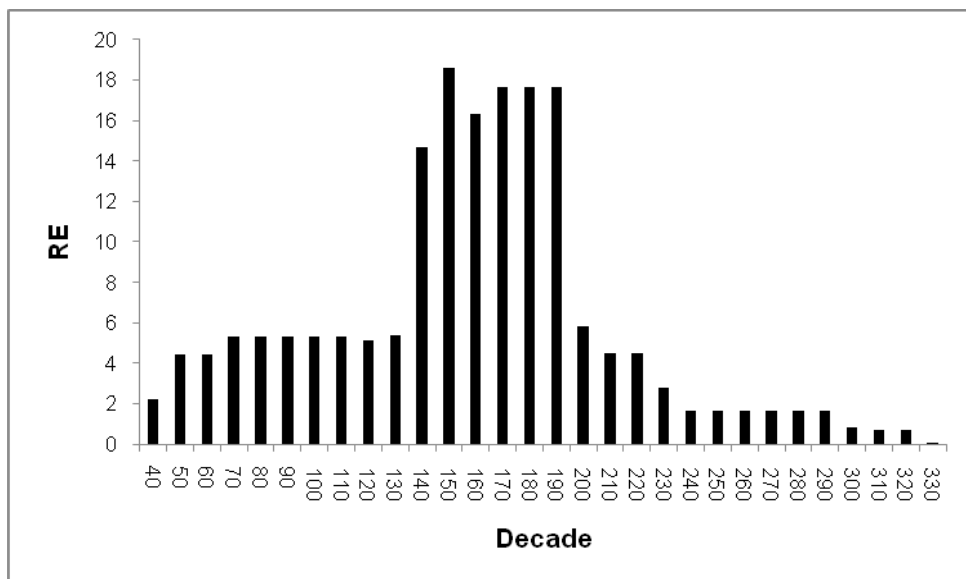

Figure App 1.13. Littleport, Camel Road. Date distribution plot of all forms with range of less than 200 years from Phase 4

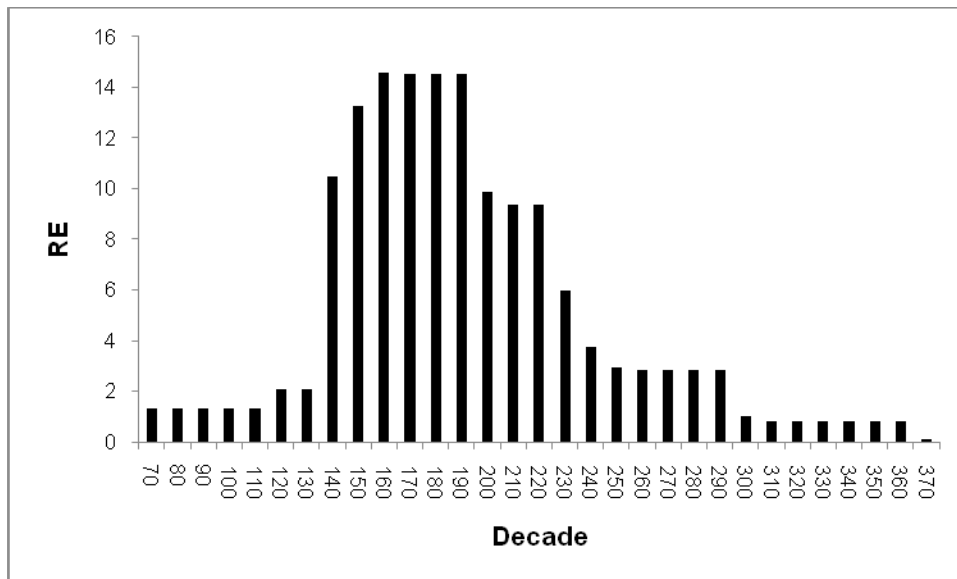

Figure App 1.14. Littleport, Camel Road . Date distribution plot of all forms with range of less than 200 years from Phase 5

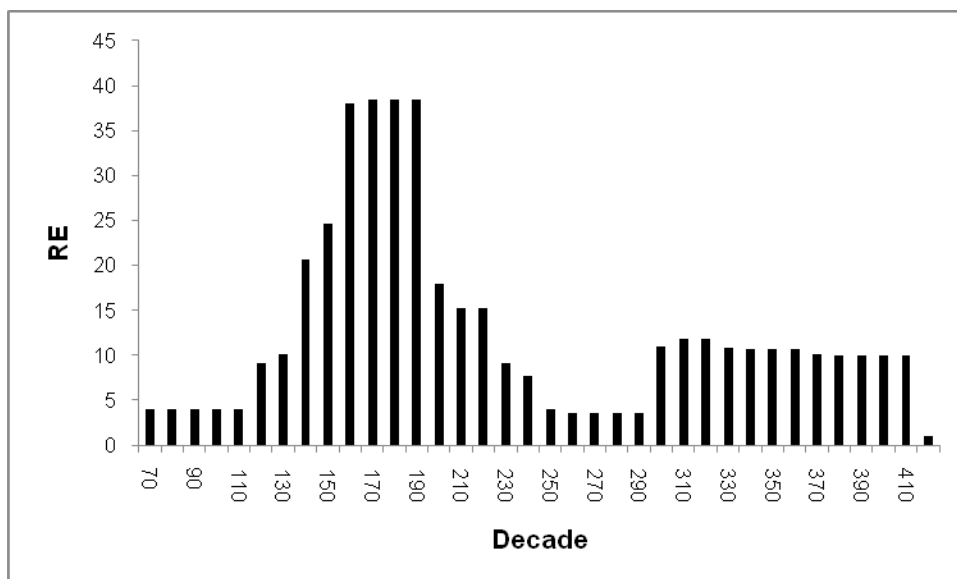

Figure App 1.15. Littleport, Camel Road. Date distribution plot of all forms with range of less than 200 years from Phase 6

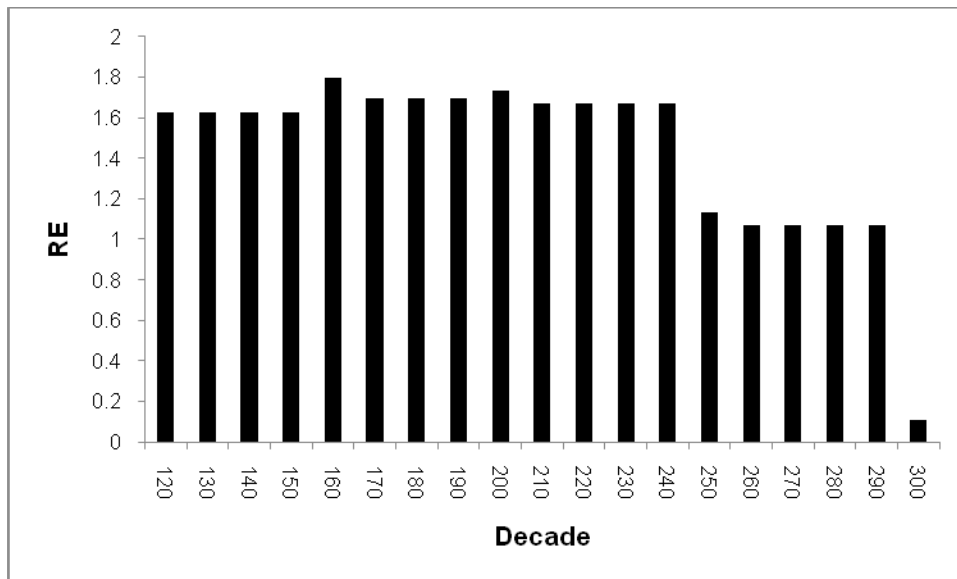

Figure App 1.16. Littleport, Camel Road Date distribution plot of all forms with range of less than 200 years from Phase 7

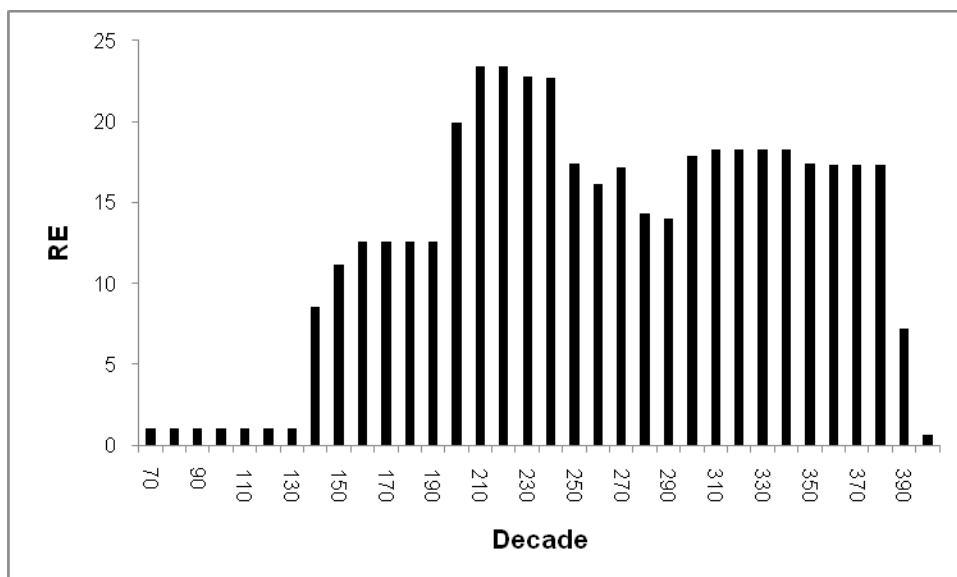

Figure App 1.17. Littleport, Camel Road. Date distribution plot of all forms with range of less than 200 years from Phase 8

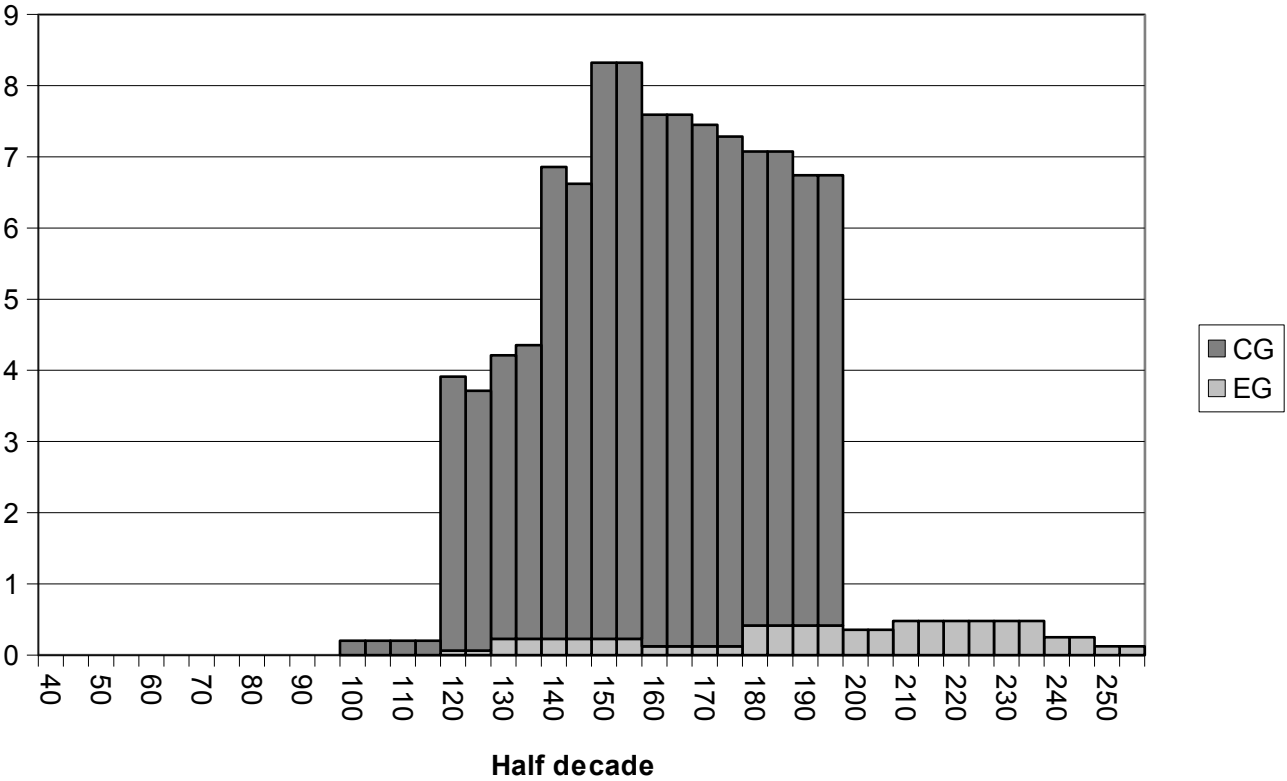

Figure App 1.18. Littleport bar-chart of all samian vessels by half decade **needs axes label**

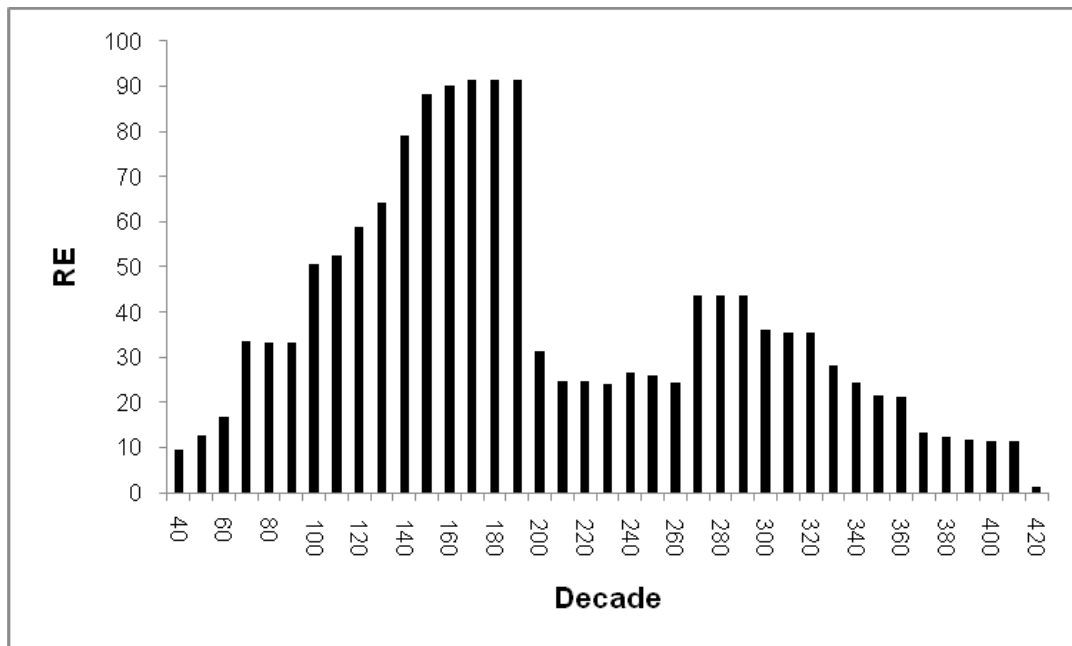

Figure App 1.19. Milton East Waste. Date distribution by RE for Roman vessels with a date range of less than 200 years

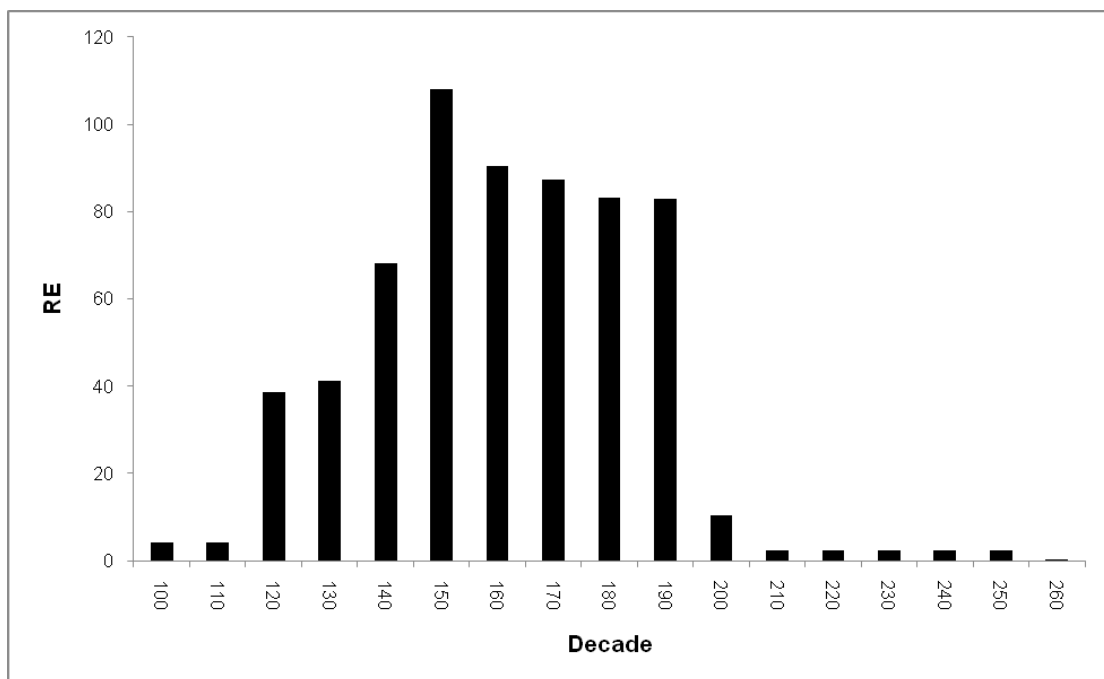

Figure App 1.20. Milton East Waste date distribution of samian vessels by RE

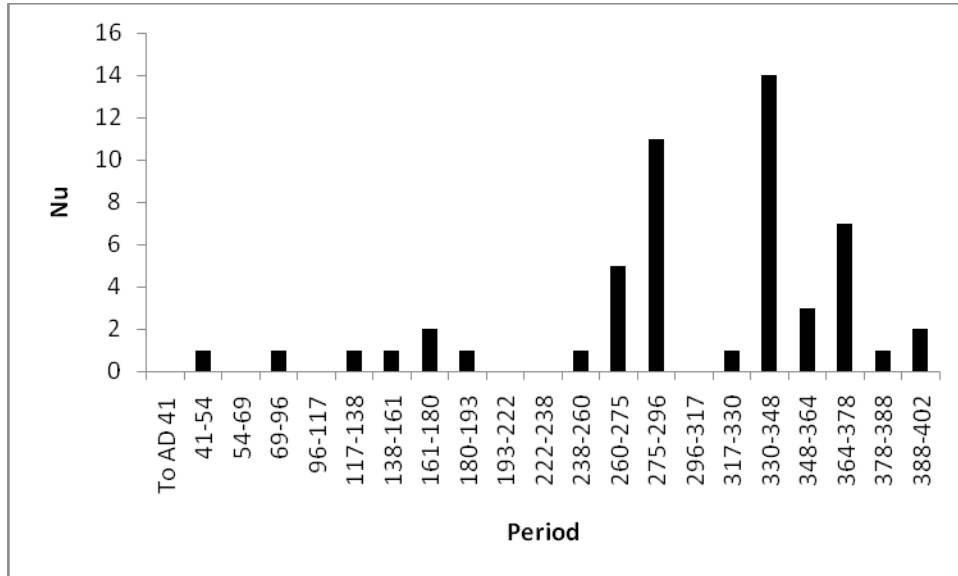

Figure App 1.21. Orton Longueville, Orton Hall Farm. Occurrence of coinage by Reece (1972) periods

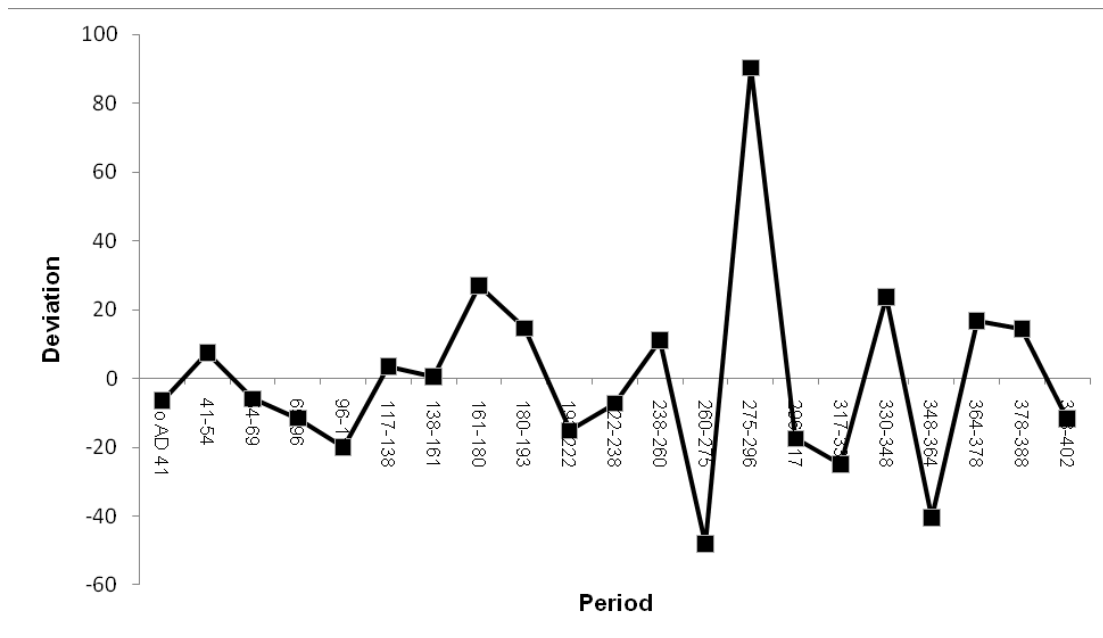

Figure App 1.22. Orton Longueville, Orton Hall Farm. Coin data plotted as deviation from British mean after Reece (1995)

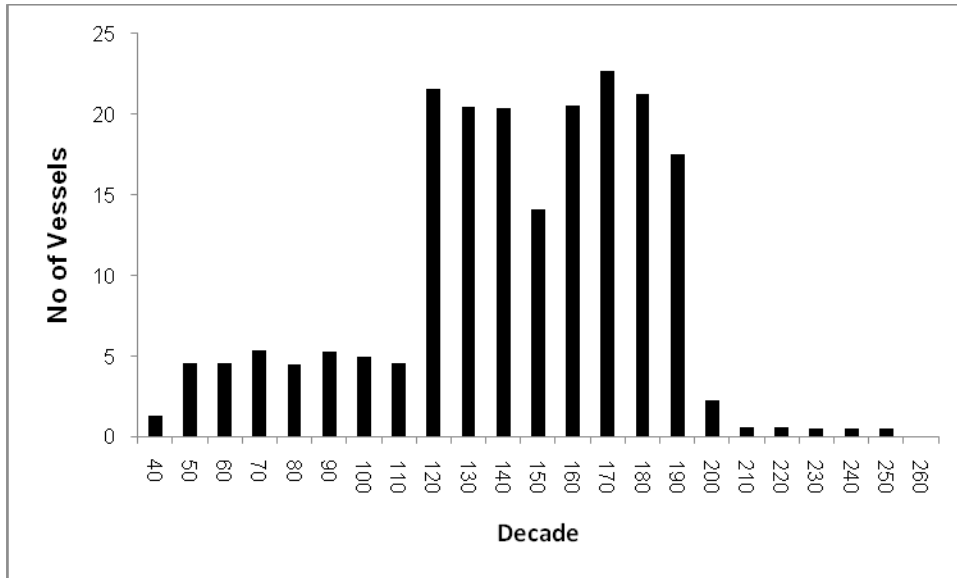

Figure App 1.23. Orton Longueville, Orton Hall Farm. Samian date distribution by MNR

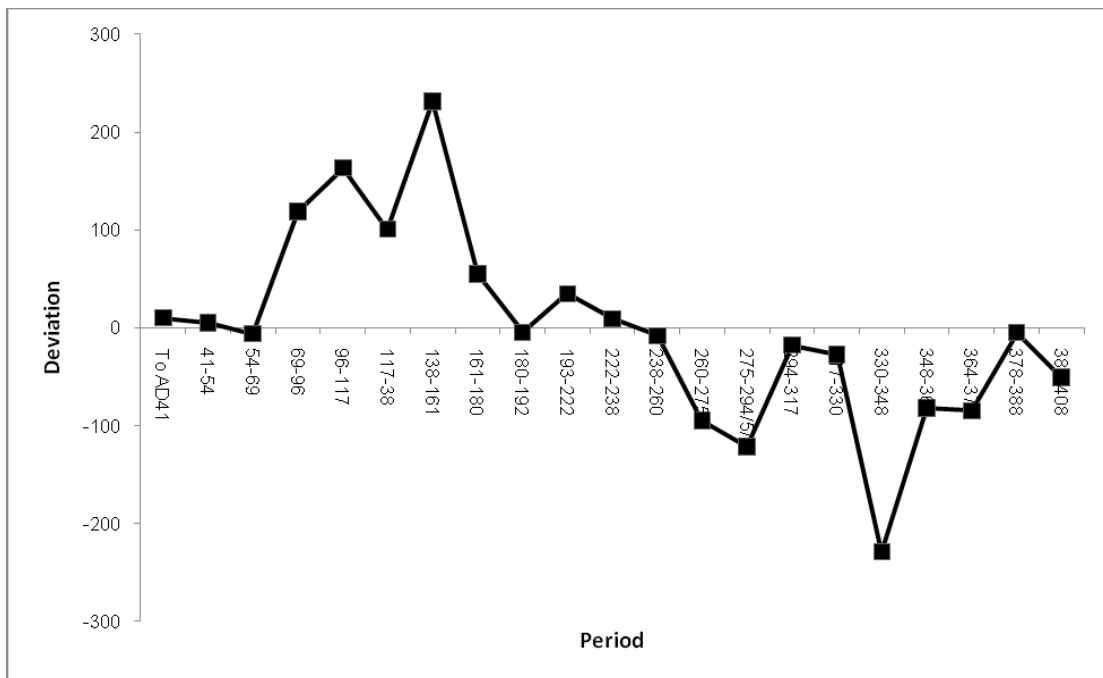

Figure App 1.24. Stonea. Excavation coin list plotted by its deviation against Reece's British mean

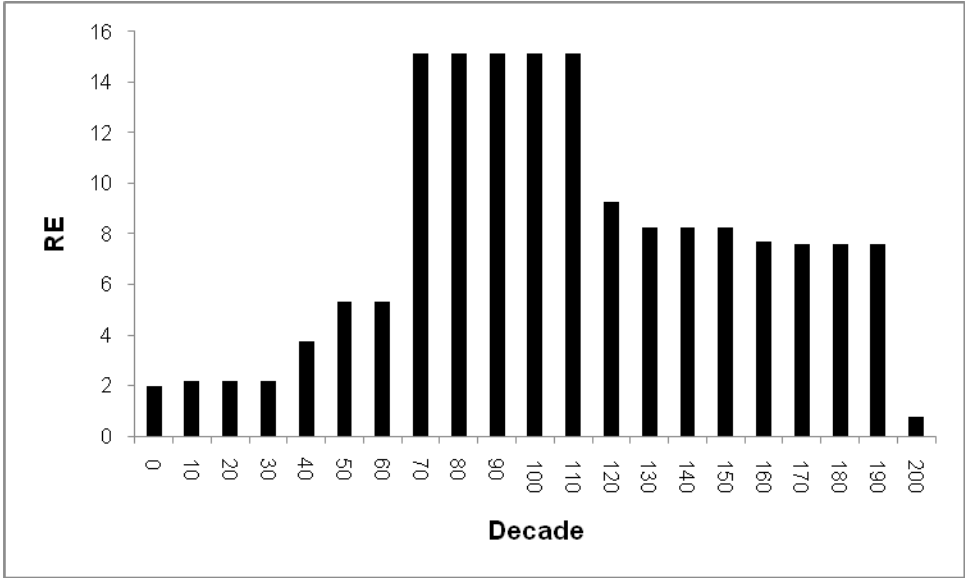

Figure App 1.25. Teversham, Hinton Fields. Date distribution by RE of vessels with date range of less than 200 years from Group 4

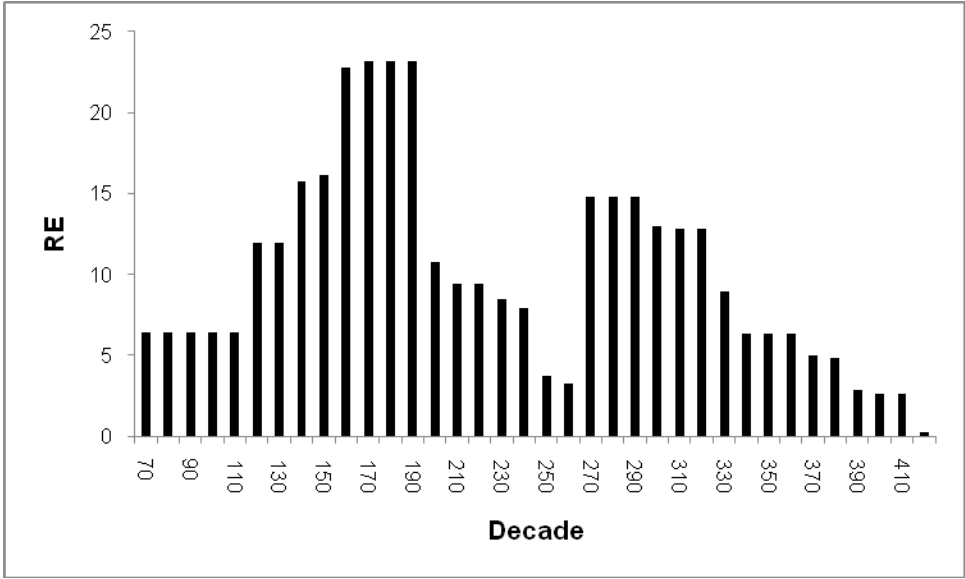

Figure App 1.26. Teversham, Hinton Fields .Date distribution by RE of vessels with date range of less than 200 years from Group 3

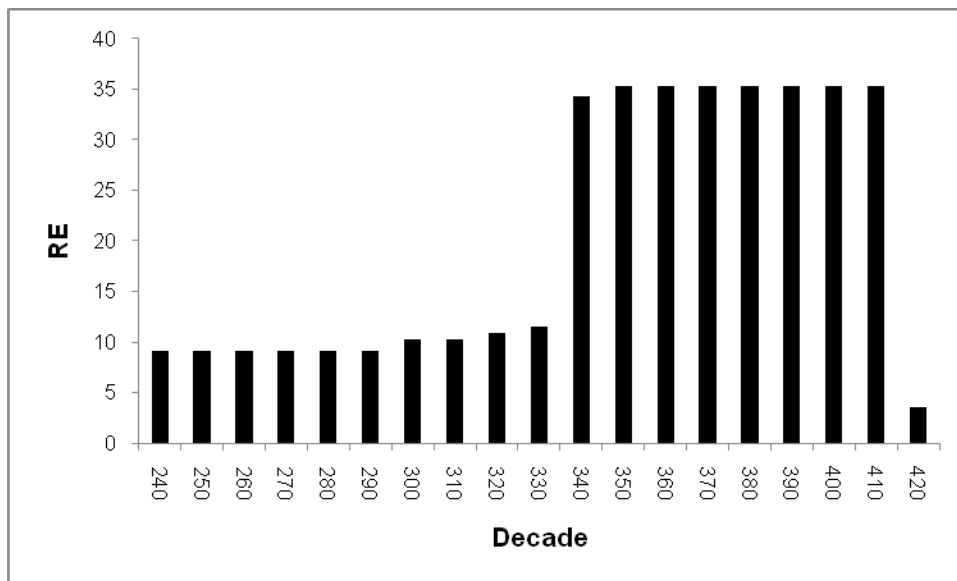

Figure App 1.27. Teversham, Hinton Fields. Date distribution by RE of Oxfordshire CCW rimsherds from Group 2

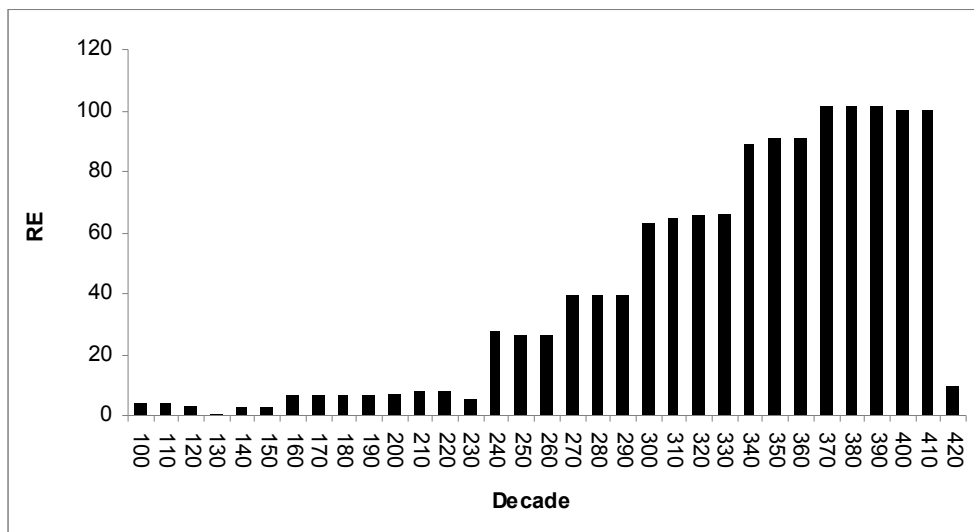

Figure App 1.28. Teversham, Hinton Fields. Date distribution by RE from Group 2 with a date range restricted to less than 200 years

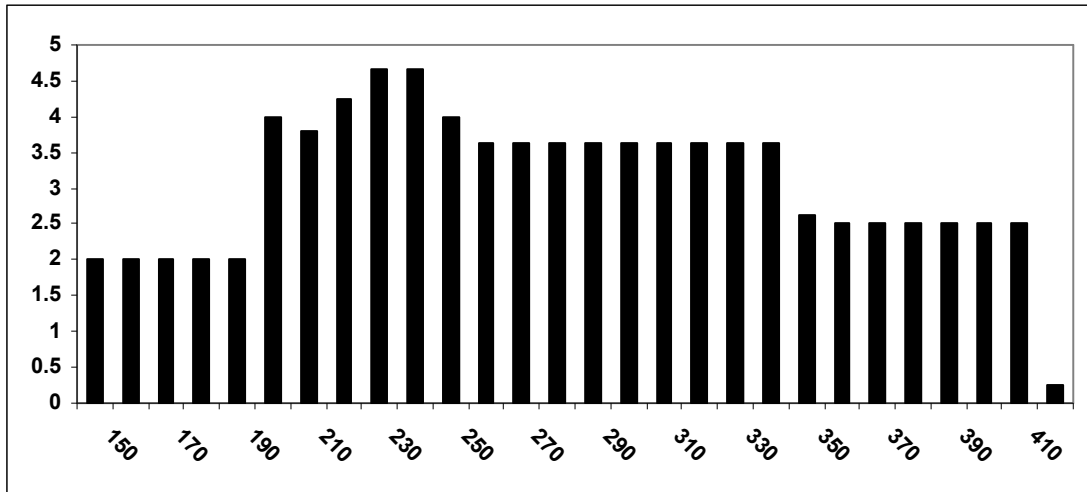

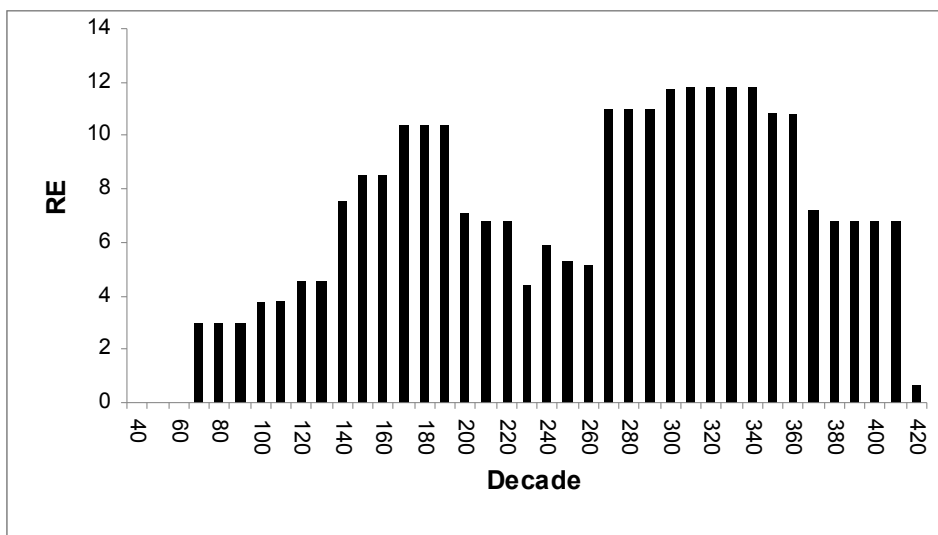

Figure App. 1.29. Cambridge Rowing Lake (WATRL97) date distribution of vessels with a date range of less than 150 years [by RE]

which version is correct?

CD Figure 3.16. Waterbeach, Cambridge Rowing Lake. Date distribution of vessels with a date range of less than 200 years, by RE

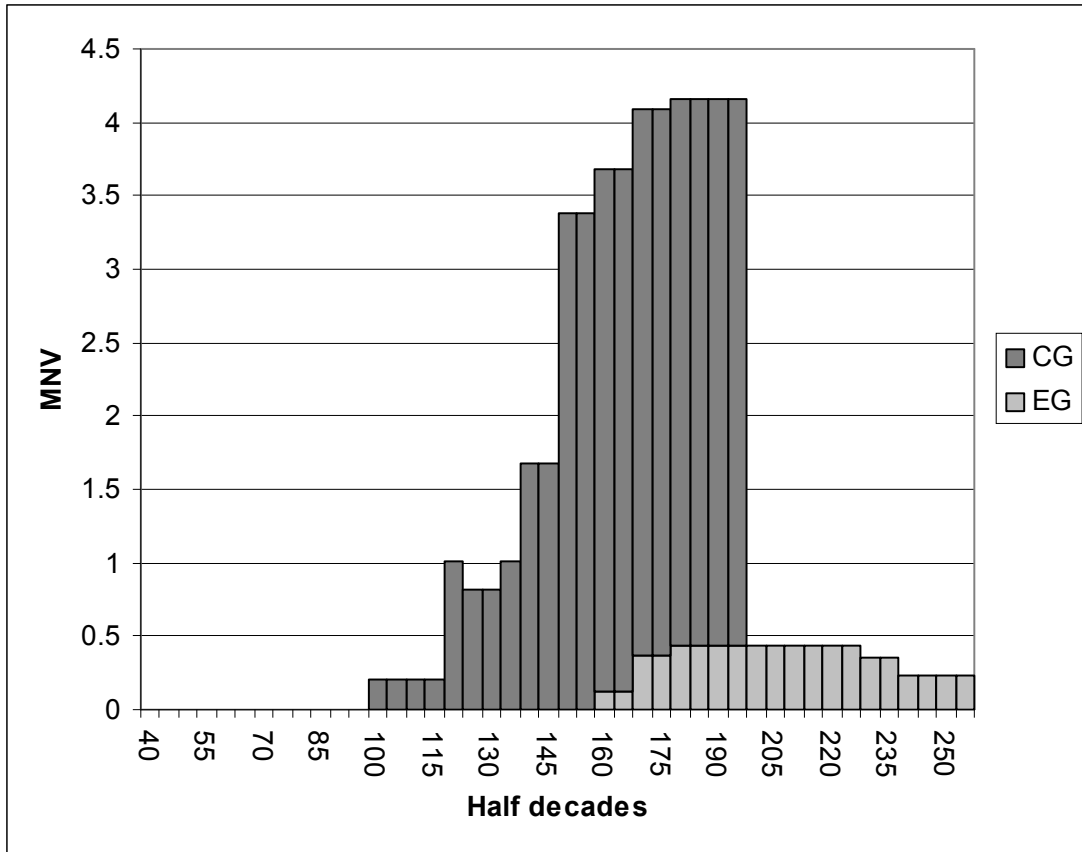

Figure App. 1.30. Waterbeach, Old Tillage. Date distribution plot for Central Gaulish and East Gaulish samian by half decades, by maximum vessel numbers

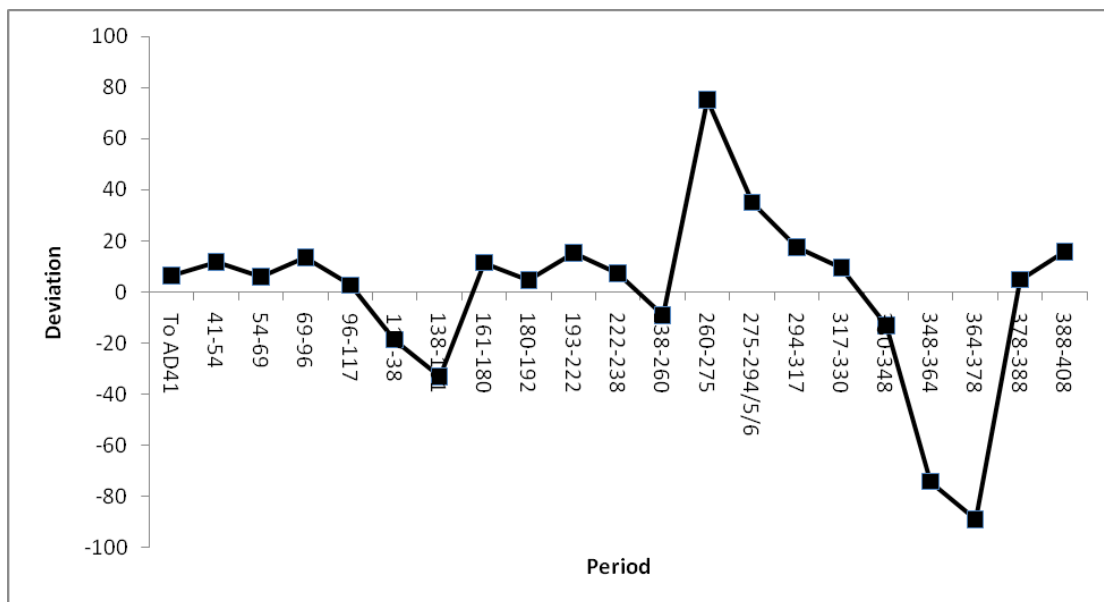

Figure App. 1.31. Wimpole Lodge. Deviation of coins from Reece's British site mean
