Interpretation and discussion					
A surface deposit of charcoal rich burnt material. It was oval in plan on the surface. Very thin. No cut detected therefore a deposit. The natural immediately beneath the deposit was stained red - indicating an intense burning event.

Interpretation and discussion NATURAL VARIATION NOT P. HOLE. Cut of small shallow post hole three others close by [30028] and [30042] very similar but [30030] is different as its more than twice the depth as the others so probably not related no finds associated but contained charcoal so sample taken
