Archaeological Solutions is an independent archaeological contractor providing the services which satisfy all archaeological requirements of planning applications, including:

*Desk-based assessments and environmental impact assessments*  
*Historic building recording and appraisals*  
*Trial trench evaluations*  
*Geophysical surveys*  
*Archaeological monitoring and recording*  
*Archaeological excavations*  
*Post excavation analysis*  
*Promotion and outreach*  
*Specialist analysis*

**LAND SOUTH OF 1 STATION COTTAGES,  
WILBURTON, CAMBRIDGESHIRE**

**AN ARCHAEOLOGICAL EVALUATION**

**SUMMARY**

*In September 2017 Archaeological Solutions (AS) carried out an archaeological evaluation on land south of 1 Station Cottages, Wilburton, Cambridgeshire (NGR TL 4837 7655; Figs. 1 - 2). The evaluation was undertaken in compliance with the initial requirements of a condition attached to planning approval for the construction of two new detached dwellings (East Cambs Council Ref. 16/01680/OUT), based on the advice of Cambridgeshire County Council Historic Environment Team.*

*The site is located within an area of archaeological potential with nearby archaeological remains recorded on the Cambridgeshire Historic Environment Record (CHER). A Bronze Age funerary barrow is recorded c.110m to the north east (CHER 05827) and cropmarks of enclosures are recorded by aerial photography to the north-west (CHER 11149 & MCB23470). Artefact scatters of Roman material are present to the north and south and include pottery and coins (CHER 05726 and 05626). The site is located c.80m to the north of the dismantled railway line between Ely, Sutton and St Ives (CHER MCB19487) with the station previously located along Station Road to the south (CHER MCB23471).*

*The site had a potential for prehistoric, Roman and post-medieval remains. A quarry pit of mid 19<sup>th</sup> – 20<sup>th</sup> century date and a modern drain and post hole were recorded. Ditch F1004 (Trench 3) contained an abraded sherd of prehistoric (Bronze Age to Iron Age) pottery, likely residual.*

**1 INTRODUCTION**

1.1 In September 2017 Archaeological Solutions (AS) carried out an archaeological evaluation on land south of 1 Station Cottages, Wilburton, Cambridgeshire (NGR TL 4837 7655; Figs. 1 - 2). The evaluation was undertaken in compliance with the initial requirements of a condition attached to planning approval for the construction of two new detached dwellings (East Cambs Council Ref. 16/01680/OUT), based on the advice of Cambridgeshire County Council Historic Environment Team.

1.2 The evaluation was undertaken in accordance with a brief issued by Cambridgeshire County Council Historic Environment Team (HET, Gemma Stewart; dated 4<sup>th</sup> July 2017), and a Written Scheme of Investigation prepared by AS (dated 1<sup>st</sup> August 2017) and approved by

CCC HET. It followed the procedures outlined in the Chartered Institute for Archaeologists' *Standard and Guidance for Archaeological Excavation* (2014). It also adhered to the relevant sections of *Standards for Field Archaeology in the East of England* (Gurney 2003).

1.3 The objectives of the evaluation were to determine the location, date, extent, character, condition significance and quality of any archaeological remains liable to be threatened by the proposed development.

#### *Planning Policy Context*

1.4 The National Planning Policy Framework (NPPF 2012) states that those parts of the historic environment that have significance because of their historic, archaeological, architectural or artistic interest are heritage assets. The NPPF aims to deliver sustainable development by ensuring that policies and decisions that concern the historic environment recognise that heritage assets are a non-renewable resource, take account of the wider social, cultural, economic and environmental benefits of heritage conservation, and recognise that intelligently managed change may sometimes be necessary if heritage assets are to be maintained for the long term. The NPPF requires applications to describe the significance of any heritage asset, including its setting that may be affected in proportion to the asset's importance and the potential impact of the proposal.

1.5 The NPPF aims to conserve England's heritage assets in a manner appropriate to their significance, with substantial harm to designated heritage assets (i.e. listed buildings, scheduled monuments) only permitted in exceptional circumstances when the public benefit of a proposal outweighs the conservation of the asset. The effect of proposals on non-designated heritage assets must be balanced against the scale of loss and significance of the asset, but non-designated heritage assets of demonstrably equivalent significance may be considered subject to the same policies as those that are designated. The NPPF states that opportunities to capture evidence from the historic environment, to record and advance the understanding of heritage assets and to make this publicly available is a requirement of development management. This opportunity should be taken in a manner proportionate to the significance of a heritage asset and to impact of the proposal, particularly where a heritage asset is to be lost.

## **2 DESCRIPTION OF THE SITE**

2.1 The site is located on the eastern side of Station Road in the Grunty Fen area to the north of the village of Wilburton. It comprises a vacant plot to the immediate south of 1 Station Cottages and north of The Old Station. It extends to some 2700m<sup>2</sup>.

### **3 TOPOGRAPHY, GEOLOGY AND SOILS**

3.1 The site lies on a solid geology of Kimmeridge Clay, with localised river terrace deposits in the area, on slightly higher ground above the former fen at c.4.6m AOD.

### **4 ARCHAEOLOGICAL AND HISTORICAL BACKGROUND**

4.1 The site is located within an area of archaeological potential with nearby archaeological remains recorded on the Cambridgeshire Historic Environment Record (CHER). A Bronze Age funerary barrow is recorded c.110m to the north east (CHER 05827) and cropmarks of enclosures are recorded by aerial photography to the north-west (CHER 11149 & MCB23470). Artefact scatters of Roman material are present to the north and south and include pottery and coins (CHER 05726 and 05626). The site is located c.80m to the north of the dismantled railway line between Ely, Sutton and St Ives (CHER MCB19487) with the station previously located along Station Road to the south (CHER MCB23471). The site therefore has potential for prehistoric, roman and post-medieval remains.

### **5 METHODOLOGY**

5.1 The evaluation provided for a sample of the area to be subject to development to be trial trenched (overall site area c.2700m). The evaluation focused on the new houses, drives/parking areas and other areas of proposed ground disturbance.

5.2 The brief required a c.5% sample of the site to be investigated by trenching. Three trenches of 25m x 1.8m were excavated.

5.3 The archaeological investigation comprised the inspection of the subsoil and natural deposits for archaeological features, the examination of spoil heaps and the recording of soil profiles. Encountered features and deposits were cleaned by hand and recorded using *pro-forma* recording sheets, drawn to scale and photographed as appropriate. Excavated spoil was checked for finds.

5.4 A one-metre square of topsoil, subsoil and any lower soil horizons below the existing surfaces was bucket sampled and sorted by hand at each end of the trenches to characterise their artefact content. Soil from this sampling procedure was kept separate from the main spoil heaps. Site records were completed to reflect this exercise and an on-site record was made of the finds recovered. The main spoil heaps was also scanned for the retrieval of unstratified artefacts. A metal detector was used to enhance finds recovery. The metal detector survey was conducted when the trenches were opened, and

the detector was not set to discriminate against iron. The spoil tips were also surveyed.

5.5 Modern finds were found during the examination of the topsoil and the metal detecting survey.

## 6 DESCRIPTION OF RESULTS

Individual trench descriptions are presented below:

### Trench 1 (Figs. 3 - 4)

Sample section 1A 0.00 = 5.07m AOD		
0.00 – 0.37m	L1000	Topsoil. Very firm, dark grey brown, clayey silt with occasional sub-rounded and rounded flints and other stones
0.37 – 0.59m	L1007	Fill of Quarry Pit F1006. Firm, mid grey brown silty clay with occasional medium sub-rounded and rounded flints
0.59m+	L1001	Natural. Pale to mid orange brown silty clay with very occasional medium to large sub-rounded and rounded flints

Sample section 1B 0.00 = 5.06m AOD		
0.00 – 0.35m	L1000	Topsoil. As above.
0.35m+	L1001	Natural. As above.

*Description: Trench 1 contained the remains of a large Quarry Pit F1006, which extended into Trench 2. It contained mid 19<sup>th</sup> - 20<sup>th</sup> century finds comprising pottery, CBM, brick, glass, plastic and Fe, fragments.*

Quarry Pit F1006 was sub-circular in plan (11.09+ X 1.80+ x 0.58m). Due to its large size and relatively recent date it was partially excavated by machine in Trench 1, and a hand-dug slot was excavated in Trench 2. Its fill, L1007A was a firm, mid grey brown silty clay with occasional medium sized, sub-rounded and rounded flints. It contained mid 19<sup>th</sup> - 20<sup>th</sup> century pottery (4; 31g); CBM (152g), glass (12g); plastic (2g) and Fe fragments (228g).

### Trench 2 (Figs. 3 - 4)

Sample section 2A 0.00 = 5.25m AOD		
0.00 – 0.33m	L1000	Topsoil. As above in Tr.1
0.33m+	L1001	Natural. As above in Tr.1

Sample section 2B 0.00 = 5.23m AOD		
0.00 – 0.34m	L1000	Topsoil. As above in Tr.1
0.34m+	L1001	Natural. As above in Tr.1

*Description: Trench 2 contained a continuation of Quarry Pit F1006, previously observed in Trench 1.*

Quarry Pit F1006 was sub-circular in plan (8.61+ X 0.95+ x 0.36m). Due to its large size and relatively recent date it was partially excavated by machine in Trench 1, and a hand-dug slot was excavated in Trench 2. It had gradual to moderately sloping sides with a flattish base. Its fill, L1007B, was a firm, mid grey brown silty clay with occasional medium sized, sub-rounded and rounded flints. It contained mid 19<sup>th</sup> - 20<sup>th</sup> century pottery (3; 29g) and CBM (233g).

### **Trench 3** (Figs. 3 - 4)

Sample section 2A 0.00 = 5.20m AOD		
0.00 – 0.34m	L1000	Topsoil. As above in Tr.1
0.34m+	L1001	Natural. As above in Tr.1

Sample section 2B 0.00 = 5.22m AOD		
0.00 – 0.33m	L1000	Topsoil. As above in Tr.1
0.33m+	L1001	Natural. As above in Tr.1

*Description: Trench 3 contained modern Drain F1002, Ditch F1004 and Post Hole F1008. Ditch F1004 contained a sherd of prehistoric pottery and Post Hole F1008 contained modern CBM. The prehistoric (Bronze Age to Iron Age) sherd from Ditch F1004 was heavily abraded and likely residual.*

Drain F1002 was linear in plan (1.80+ x 0.35 x 0.39+), orientated east/west. It had vertical sides and its base was unseen. It contained a ceramic drain pipe and was backfilled with L1003; a firm mid brown grey silty clay with no inclusions.

Ditch F1004 was linear in plan (1.80+ x 0.80 x 0.44m), orientated east/west. It had steep sides and a shallow concave base. Its fill (L1005) was a firm, mid brown grey silty clay. It contained a sherd of heavily abraded prehistoric (Bronze Age to Iron Age) pottery (4g), likely residual.

Post Hole F1008 was circular in plan (0.36 x 0.36 x 0.08m). It had irregular sides and a concave base. Its fill (L1009) was firm, mid brown grey silty clay. It contained small fragments of a modern field drain (11g).

## 7 CONFIDENCE RATING

7.1 It is not felt that any factors inhibited the recognition of archaeological features or finds.

## 8 DEPOSIT MODEL

8.1 Topsoil (L1000) directly overlay the natural deposits (L1001). It comprised a very firm, dark grey brown clayey silt with very occasional small sub-rounded and rounded flints and other stones (0.33 – 0.37m thick).

8.2 The natural deposits was present c.0.33 – 0.35m below the present ground surface and comprised a very firm, pale to mid orange brown silty clay with very occasional medium to large sized sub-rounded and rounded flints

## 9 DISCUSSION

9.1 The recorded features are tabulated:

Trench	Context	Description	Spot Date
1	F1006A = F1006B (Trench 2)	Quarry Pit	Mid 19 <sup>th</sup> -20 <sup>th</sup> century
2	F1006B = F1006A (Trench 1)	Quarry Pit	
3	F1002	Drain	Modern
	F1004	Ditch	Residual prehistoric (Bronze Age to Iron Age)
	F1008	Post Hole	Modern

9.2 The site is located within an area of archaeological potential with nearby archaeological remains recorded on the Cambridgeshire Historic Environment Record (CHER). A Bronze Age funerary barrow is recorded c.110m to the north east (CHER 05827) and cropmarks of enclosures are recorded by aerial photography to the north-west (CHER 11149 & MCB23470). Artefact scatters of Roman material are present to the north and south and include pottery and coins (CHER 05726 and 05626). The site is located c.80m to the north of the dismantled railway line between Ely, Sutton and St Ives (CHER MCB19487) with the station previously located along Station Road to the south (CHER MCB23471).

9.3 The site therefore had potential for prehistoric, Roman and post-medieval remains.

9.4 Trench 1 (F1006A) and 2 (F1006B) contained the remains of a large quarry pit, and the pottery from the feature is of mid 19<sup>th</sup> - 20<sup>th</sup> century date. The pit was possibly associated with the dismantlement of the nearby railway line between Ely, Sutton and St Ives (CHER MCB19487) based on the recovery of two railway track bolts.

9.5 Towards the back of the site Trench 3 contained the remains of a modern Drain (F1002) and Post Hole (F1008); the latter contained fragments derived from a modern field drain.

9.6 Ditch F1004 contained an abraded sherd of prehistoric (Bronze Age to Iron Age) pottery, likely residual. Prehistoric archaeology in the vicinity of the site comprises a Bronze Age funerary barrow is recorded c.110m to the north east (CHER 05827) and cropmarks of enclosures are recorded by aerial photography to the north-west (CHER 11149 & MCB23470).

## **10 CONCLUSION**

10.1 The site had a potential for prehistoric, Roman and post-medieval remains. A quarry pit of mid 19<sup>th</sup> – 20<sup>th</sup> century date and a modern drain and post hole were recorded. Ditch F1004 (Trench 3) contained an abraded sherd of prehistoric (Bronze Age to Iron Age) pottery, likely residual.

## **DEPOSITION OF THE ARCHIVE**

Archive records, with an inventory, will be deposited with any donated finds from the site at Cambridge County Archaeological Store. The archive will be quantified, ordered, indexed, cross-referenced and checked for internal consistency.

## **ACKNOWLEDGEMENTS**

Archaeological Solutions would like to thank Mr Alan Yarrow for funding the work and for his assistance.

AS would like to acknowledge the input and advice of Ms Gemma Stewart, Senior Archaeological Officer, Cambridgeshire County Council.

## APPENDIX 2 SPECIALIST REPORTS

### The Prehistoric Pottery

*Andrew Peachey*

A single small, abraded sherd (4g) of prehistoric pottery was contained in Ditch F1004 (L1005). The hand-made, plain body sherd was manufactured in a bonfire-fired fabric tempered with common calcined flint (0.25-2mm, occasionally to 5mm) with sparse quartz (<0.5mm). This type of fabric is most common in the late Bronze Age to early Iron Age, but based on such limited evidence could conceivably date anywhere in the Bronze Age to Iron Age.

### The Post-medieval Pottery

*Peter Thompson*

The archaeological evaluation recovered 7 modern sherds weighing 60g from Quarry Pit F1006 (Table 1).

#### Key:

ENGs: English stoneware 18<sup>th</sup>+

ENPO: English porcelain mid 18<sup>th</sup>+

RWE: Refined white earthenware late 18<sup>th</sup>+

Feature	Context	Quantity	Date	Comment
Quarry Pit	1007 A	2x18g RWE 2x13g ENGs	Mid 19 <sup>th</sup> - 20 <sup>th</sup>	RWE: jar base ENGs: fragment of preserve jar
	1007 B	1x3g RWE 1x1g ENPO 1x25g ENGs	mid 19 <sup>th</sup> - 20 <sup>th</sup>	ENGs: jar base, prob same vessel as L1007 A

*Table 1: Quantification of sherds by context*

### The Ceramic Building Materials

*Andrew Peachey*

The evaluation recovered five fragments (396g) of early modern CBM in a highly fragmented condition. Ditch F1006 (L1007 Segments A and B) contained small fragments of 19<sup>th</sup> century or later red brick, gault brick and cement; while Post Hole F1008 contained small fragments of field drain.

### Project details

Project name	Land South of 1 Station Cottages, Wilburton, Cambridgeshire
Short description of the project	In September 2017 Archaeological Solutions (AS) carried out an archaeological evaluation on land south of 1 Station Cottages, Wilburton, Cambridgeshire (NGR TL 4837 7655; Figs. 1 - 2). The evaluation was undertaken in compliance with the initial requirements of a condition attached to planning approval for the construction of two new detached dwellings (East Cambs Council Ref. 16/01680/OUT), based on the advice of Cambridgeshire County Council Historic Environment Team. The site had a potential for prehistoric, Roman and post-medieval remains. A quarry pit of mid 19th - 20th century date and a modern drain and post hole were recorded. Ditch F1004 (Trench 3) contained an abraded sherd of prehistoric (Bronze Age to Iron Age) pottery, likely residual.
